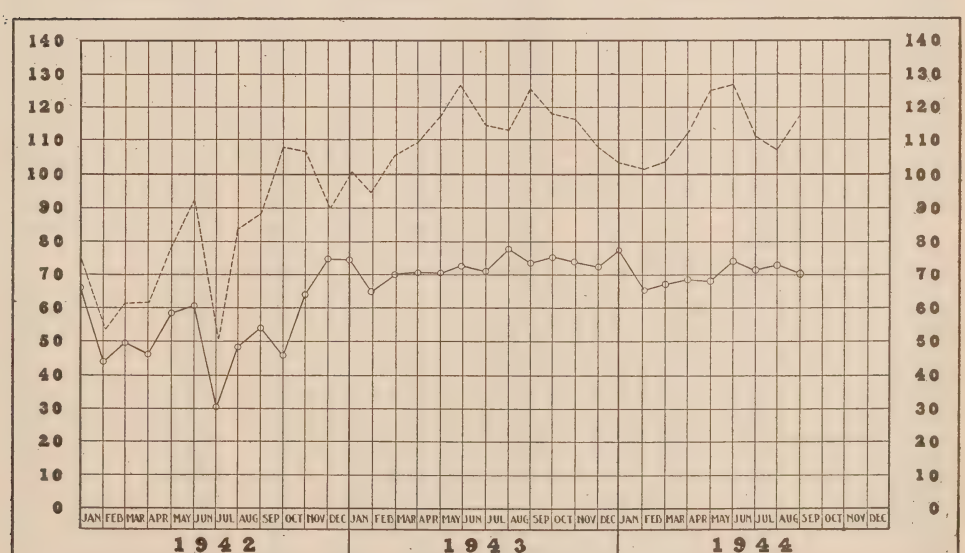
the five weeks ending August 31, 1944, was 5,304 of which 5,174 were in regular employment and 130 in work of one week's duration or less, in comparison with a daily average of 6,109 during the previous four weeks. Placements during the five-week period ending September 2, 1943, averaged 6,307 daily, consisting of 6,174 in regular employment and 133 in casual work.

During the five weeks July 28, to August 31, 1944, the offices referred 217,137 persons to vacancies and effected a total of 159,117 placements. Of these, the placements in regular employment were 155,212 of which 96,240 were of males and 58,972 of females, while placements in casual work totalled 3,905. The number of vacancies reported by employers was 168,115 for males and 97,031 for females, a total of 265,146, while applications for work numbered 226,032, of which 138,257 were from males and 87,775 from females. Reports for the four weeks June 30, to July 27, 1944, showed 206,635 positions available, 192,847 applications made and 140,507 placements effected, while in the five weeks July 30, to September 2, 1943, there were recorded 325,233 vacancies, 257,661 applicatons for work and 189,214 placements in regular and casual employment.



The following table gives placements effected by the offices, each year, from January, 1934 to date:—

Year	Placements Regular	Casual	Totals
1934	223,564	182,527	406,091
1935	226,345	127,457	353,802
1936	217,931	113,519	331,450
1937	275,300	114,236	389,536
1938	256,134	126,161	382,295
1939	242,962	141,920	384,882
1940	320,090	155,016	475,106
1941	316,168	191,595	507,763
1942	809,983	85,638	895,621
1943	1,890,408	53,618	1,944,026
1944 (35 weeks).	1,123,149	31,913	1,155,062

Nova Scotia and Prince Edward Island

Employment opportunities, as indicated by orders received at Employment and Selective Service Offices in Nova Scotia and Prince Edward Island during the five weeks ending August 31, 1944, showed a daily average of 280, in comparison with 319 in the preceding period, and 424 during the five weeks ending September 2, last year. The average number of placements registered daily was 196 during the period under review, in contrast with 254 in the previous four weeks and 253 during the period ending September 2, 1943. A fairly large decrease in manufacturing and moderate losses in construction and mining accounted for the reduction in placements when compared with the five weeks ending September 2, last year. Of the changes in all other groups, a moderate gain in agriculture was the most important. Industrial divisions in which

the majority of placements were effected were: manufacturing 1,625; services 1,390; trade 989; construction 813; public utilities operation 617 and agriculture 211. There were 3,615 men and 2,188 women placed in regular employment.

New Brunswick

The demand for workers on a daily average as indicated by orders listed at Employment Offices in New Brunswick during the period under review, was 237 as compared with 214 in the previous four weeks and 270 during the period ending September 2, 1943. There was a daily average of 150 placements in comparison with 188 in the preceding period and 158 during the five weeks ending September 2, last year. When comparing placements by industrial groups with the period ending September 2, 1943, none of the changes was large, the most significant being moderate declines in public utilities operation and manufacturing and increases of small proportions in construction, services and trade. Placements by industrial divisions numbered: manufacturing 1,340; services 918; trade 649; construction 575; public utilities operation 503; forestry and logging 200, and mining 194. Regular placements numbered 2,841 of men and 1,617 of women.

Quebec

There was a decrease in the average number of positions available daily at Employment Offices in the Province of Quebec during the five weeks ending August 31, 1944, there being 2,453, in contrast with 2,577 in the preceding period and 3,208 during the five weeks ending September 2, last year. Placements, likewise, showed declines under both comparisons, the daily average being 1,378 during the period under review, 1,676 in the previous four weeks and 1,837 during the period ending September 2, 1943. The pronounced loss in placements from the five weeks ending September 2, 1943, was due to a marked decrease in manufacturing, with losses of more moderate proportions reported in construction, public utilities operation, services and mining. There was a moderate gain in forestry and logging. Industrial groups in which most of the placements were effected included: manufacturing 19,661; services 6,201; construction 4,875; public utilities operation 3,594; trade 3,188; forestry and logging 2,419, and mining 726. Placements in regular employment numbered 27,765 of men and 13,437 of women.

Ontario

Opportunities for employment at Employment Offices in Ontario during the period ending August 31, 1944, showed an increase when compared with the four weeks ending July 27, but a decrease in comparison with the period ending September 2, last year. The daily average being 3,830 during the five weeks under review, 3,603 in the preceding period and 4,324 during the five weeks ending September 2, 1943. Placements showed a daily average of 2,253 in contrast with 2,423 in the previous four weeks and 2,373 during the five weeks ending September 2, last year. When comparing placements by industrial divisions with the period ending September 2, 1943, a substantial increase in agriculture and a moderate gain in forestry and logging were largely offset by a loss in manufacturing. A fairly large decline in construction and moderate losses in public utilities operation, trade, mining, finance and insurance, and services were reported. Industries in which employment was found for more than 1,000 workers included: manufacturing 28,965; services 11,108; agriculture 8,582; trade 6,788; public utilities operation 5,043; construction 3,558, and forestry and logging 1,802. There were 40,233 men and 26,293 women placed in regular employment.

Manitoba

Orders received at Employment Offices in Manitoba during the five weeks under review, called for an average of 396 workers daily in comparison with 440 in the previous period and 479 during the five weeks ending September 2, last year. There was a daily average of 243 placements compared with 277 in the preceding four weeks and 345 during the period ending September 2, 1943. With the exception of a moderate gain in agriculture, all industrial divisions recorded decreases in placements from the five weeks ending September 2, last year, the greatest reduction being in manufacturing followed by smaller losses in public utilities operation, services, construction and trade. Placements by industrial groups included: manufacturing 1,942; services 1,918; trade 1,453; public utilities operation 747; agriculture 672 and construction 316. Regular placements numbered 2,979 of men and 3,215 of women.

Saskatchewan

Positions offered through Employment Offices in Saskatchewan during the period ending August 31, averaged 244 daily compared with 242 in the preceding four weeks and 336 during the period ending September 2, 1943. The average number of placements effected daily was 160 during the five weeks under review, in contrast with 170 in the previous period and 201 during the five weeks ending September 2, last year. All industrial groups showed declines in placements when compared with the period

ending September 2, 1943, the largest reductions being in agriculture, services, manufacturing, construction and public utilities operation. Placements by industries numbered: services 1,303; agriculture 1,086; trade 1,061; manufacturing 599; public utilities operation 410 and construction 222. There were 2,551 men and 1,871 women placed in regular employment.

Alberta

Orders listed at Employment Offices in Alberta during the five weeks ending August 31, called for a daily average of 386 workers, in comparison with 519 in the preceding period and 502 during the five weeks ending September 2, last year. Placements showed a daily average of 262 compared with 353 in the previous four weeks and 362 during the period ending September 2, 1943. Placements in construction were considerably fewer than during the five weeks ending September 2, last year, while more moderate losses were reported in manufacturing, public utilities operation, services, trade and mining. Placements by industrial divisions included: services 2,298; trade 1,312; manufacturing 1,308; construction 868; public utilities operation 826; mining 553 and agriculture 536. Regular placements numbered 4,324 of men and 3,098 of women.

British Columbia

During the period ending August 31, 1944, the daily average of positions offered through Employment Offices in British Columbia was 1,013, compared with 1,069 in the previous four weeks and 1,298 during the period ending September 2, 1943. Placements decreased under both comparisons, the daily average being 662 during the five weeks under review, in contrast with 768 in the preceding period and 778 during the five weeks ending September 2, last year. A large reduction in placements in manufacturing augmented by a smaller decrease in construction accounted for the decline from the period ending September 2, 1943. In addition, a moderate loss in mining and gains in services, forestry and logging, and trade were reported. Industrial groups in which the largest number of placements were effected included: manufacturing 5,848; services 4,443; trade 2,965; forestry and logging 2,368; public utilities operation 1,844; construction 1,596 and mining 364. Placements in regular employment numbered 11,932 of men and 7,253 of women.

Employment in Lode Gold Mines in Canada

There was a steady overall decline in employment in the lode gold mines of Canada throughout the greater portion of 1943, according to a report issued recently by the Mining, Metallurgical and Chemical Branch of the Dominion Bureau of Statistics. The highest total was reached in January when the recorded employment reached 21,310, and from then until November there was a progressive decline to a minimum of 16,042. A slight upturn occurred in December, which was continued until March, 1944, when the total reached was 17,266, the high point for the current year up to the end of August.

The comparative figures of the first eight months of 1943 and 1944, as given by the Dominion Bureau of Statistics, follow:

	1943	1944*
January	21,310	16,444
February	20,838	17,116
March	20,587	17,266
April	19,908	16,969
May	19,401	16,708
June	18,979	16,494
July	18,272	16,164
August	17,573	15,916

Of the three provinces of Quebec, Ontario and British Columbia, in which the major portion of Canadian lode gold mining is carried on, the decline was most marked in Ontario. Thus the figures for Ontario showed employment of 13,766 in January, 1943, which had fallen to 11,086 in January, 1944, or a drop of 2,680. For the month of August the corresponding figures were 11,828 and 10,720, a decrease of 1,108.

The companion figures for Quebec are: January, 1943, 5,268; and January, 1944, 4,071, or a difference of 1,197; August, 1943, 4,162 and August, 1944, 4,054, a decline of only 108.

In British Columbia the parallel figures were: January, 1943, 1,448 and January, 1944, 1,062, a drop of 386; August, 1943, 1,019 and August, 1944, 919, a difference of 100.

For the remaining gold producing districts and provinces the figures given are: January, 1943, 828; January, 1944, 225; August, 1943, 564 and August, 1944, 223. Employment in these mines has remained practically constant throughout the first eight months of 1944.

Employment in active but non-producing lode gold mines in Canada showed considerable fluctuation during the first six months of 1943. Thus, in January of that year recorded employment was 191, which increased to 417 in February and then declined progressively to 147 in May, a low for the year. From May, 1943, to January, 1944,* employment in these mines rose steadily to 880 in the latter month. The figures for February, 1944, were down to 513* and for August, they stood at 517.*

* Subject to revision.

Labour Law

Labour Legislation in Manitoba in 1944

THE Manitoba Legislature, which was in session from February 8 to April 6, 1944, enacted new statutes to establish a system of apprenticeship and to make the Dominion Wartime Labour Relations Regulations (P.C. 1003, February 17, 1944) applicable to employer-employee relations which are ordinarily within the exclusive jurisdiction of the Province. Laws relating to mothers' allowances and old age pensions were amended.

Collective Bargaining

The Manitoba Wartime Labour Relations Regulations Act applies the Dominion Wartime Labour Relations Regulations (P.C. 1003) to employers and employees whose relations with each other in matters covered by the regulations are ordinarily within the exclusive legislative jurisdiction of the Province, and to organizations of such employers and employees. The regulations require employers to bargain with organizations of employees and provide for compulsory arbitration of disputes arising out of a collective agreement and for conciliation machinery to settle disputes where there is no agreement (L.G., 1944, p. 135). The Act authorizes the Lieutenant-Governor in Council to declare any amendments to the Dominion Regulations to have the force of law in the Province. Thus these changes will apply also to those employers and employees and their respective organizations whose relations in such matters are within provincial jurisdiction. Any person given any power or charged with any duty under the Dominion Regulations may exercise such power and perform such duty with reference to the employers and employees and their organizations mentioned above.

The Minister of Labour for Manitoba, or any other member of the Executive Council designated by the Lieutenant-Governor in Council, may enter into an agreement with the Dominion Minister of Labour for the administration of the regulations in Manitoba. This agreement may provide for the appointment of officers or the constitution of administrative agencies and the delegation to them of such of the Dominion Minister's powers as may be necessary to carry out the regulations in Manitoba. In addition, the agreement may provide for the transfer to the Provincial Government, or to some person specified by it, of all or part of the powers conferred on the Wartime Labour Relations Board by the regulations with respect to matters within the Province; for procedure for taking an appeal to the Dominion Board from a decision of the provincial authority so established; and for reimbursement of the Province for expenses incurred in carrying out the agreement.

The Act suspends the Strikes and Lockouts Prevention Act until such suspension is terminated by Order in Council and repeals the Industrial Disputes Investigation Act (Manitoba), which made effective within the Province the provisions of the Dominion statute of that title.

The Lieutenant-Governor in Council is authorized to suspend the Manitoba Wartime Labour Relations Regulations Act at any time by Proclamation issued pursuant to an Order in Council.

Apprenticeship

The Apprenticeship Act, which came into force on Proclamation on June 26, 1944, authorizes the Minister of Labour for Manitoba with the approval of the Lieutenant-Governor in Council to enter into an agreement with the Dominion Minister of Labour with respect to the extension and operation of apprentice training in the Province. The Act is generally similar to laws which have been in force for some years in Ontario, British Columbia and Nova Scotia and to those enacted this year in New Brunswick, Prince Edward Island, Alberta and Saskatchewan.

The Act prohibits any person entering into a contract of apprenticeship in a designated trade except in accordance with the provisions of the Act and regulations made under it. The Lieutenant-Governor in Council may, by Proclamation, name as a designated trade any of the seventy-one trades listed in the Schedule to the Act, or any subdivision of any such trade. The trades listed in the Schedule include the building trades, metal worker, electrician, printing, engraving and bookbinding,

ship and boat building, lithographing, moulder, aero engine fitter, automobile repair mechanic, air conditioning engineer, refrigeration engineer, glass moulder and blower, goldsmith and silversmith, machinist, radio repairman, telephone and telegraph installation repairman, type founder, welder and woodworker (factory).

Every apprenticeship contract must be in prescribed form, approved by the Provincial Apprenticeship Board and registered with the Director of Apprenticeship. A contract must provide for an agreed scale of wages, with increases in accordance with the regulations; for a period of apprenticeship of at least 4,000 hours, with time credits, approved by the Board on recommendation of the appropriate trade advisory committee, for previous experience in the trade or trade training in vocational schools or in the armed services; for a probationary period of at least three months; for transfer of the apprentice to another employer or cancellation of the agreement for cause.

The contract must be signed by the apprentice, who must be at least 16 years of age, by the employer and by the parent or guardian or the Director of Public Welfare. It may be terminated by consent of all parties or may be cancelled by the Director for good cause. In addition to apprenticeship under individual contracts, the Act applies to apprenticeship entered into under a collective agreement between an employer and a trade union or under an approved private plan carried on by an industry. An apprentice who is a party to such an agreement is deemed to be employed in a designated trade and where rates of wages for apprentices have been determined by such an agreement these rates are to apply, if they are not less than the rates established under this or any other Act in force in the Province.

The Lieutenant-Governor in Council is authorized to appoint a Director of Apprenticeship to administer the Act. No contract and no termination, transfer or cancellation of a contract is of any effect until it is registered by the Director but such registration is not proof of the contract's validity. The Director may refuse to register any contract, termination or transfer which he considers is not for the benefit of the apprentice, but an appeal to the Board from such decision may be taken by any of the parties. The Director's duties include collaborating with the appropriate authorities with regard to training, assisting in establishing a permanent system of training apprentices in any designated trade, ensuring that the provisions of the Act are observed and promoting interest in apprenticeship.

Provision is also made for appointment of an Apprenticeship Board consisting of a Government official as Chairman, an officer of the Department of Labour, and an officer of the Department of Education, together with two representatives each of employers and employees. The Board, with the approval of the Lieutenant-Governor in Council, may appoint an advisory committee of not less than five members for each designated trade or group of trades. The Chairman of the Committee is to be the Director or a person nominated by him and the other members must include an equal number of representatives of employers and employees, an officer of the Department of Labour and one from the Department of Education. Each committee may make rules for its trade relating to matters on which the Board may make regulations, but not inconsistent with such regulations. The rules may deal *inter alia* with age and qualifications of apprentices, the apprenticeship period, and the ratio of apprentices to other employees. Such ratio is to be fixed after consultation with employers and employees and in accordance with estimated future requirements of the trade.

Except under permit from the Board, issued on the recommendation of the appropriate advisory committee, no person who is eligible to be an apprentice in a designated trade and has not completed his apprenticeship may be employed in that trade for more than three months unless he enters into a contract under the Act. Contracts of apprenticeship in a designated trade existing before the date of designation must be registered with the Director within three months but are to remain unaffected by the Act in other respects. Where there is no formal contract the Act is to apply after three months from the date of designation of the trade.

Subject to the approval of the Lieutenant-Governor in Council, the Board may make regulations prescribing qualifications, courses of training, hours of labour, rates of and times of paying wages, fees, forms to be used, and the constitution powers and duties of trade advisory committees. The regulations may also provide for registration and transfer of agreements; inspection of training; examinations and certificates; registration of employees in a designated trade; procedure at meetings of trade advisory committees; periodic trade tests and a trade examination before granting of final certificate; and generally for carrying out the Act.

A penalty of not less than $10 or more than $100 may be imposed upon any person who enters into a contract of apprenticeship in a designated trade except in accordance

with the provisions of the Act or who contravenes the Act or the regulations or rules.

In case of conflict between this Act or the regulations or rules and any provision with respect to apprentices in any other Act or in any order or schedule made under such other Act, this Act and the regulations and rules made under it are to govern.

Employment of Children

A section added to the Winnipeg Charter enables the Council of that city, by by-law, to make such regulations preventing or controlling the employment of children under 18 years of age as it may consider necessary in the interests of the health or education of the children; to empower public school principals, physicians, the inspector of licences, or other persons designated in the by-law, to issue permits authorizing the employment of children, the decision as to granting or withholding such permit to be made in each case according to the health or school record of the applicant; to provide that no person shall employ a child in any work unless the child holds a permit; and to define the terms "employment" and "work" as used in the new section.

Mothers' Allowances

Part III of the Child Welfare Act, which relates to mothers' allowances, was amended to provide that where the mother of a child shows reasonable ground for presuming the death of the child's father she may obtain an Order of the Court presuming the death of the father for purposes of Part III. Proof that the father has deserted his family for seven years and that there is no reason to believe that he has been living during that time is to be evidence of death until the contrary is proved. Where such Order of the Court is obtained, the mother would be treated as a widow and the children would be entitled to an allowance, if otherwise eligible.

Liability of Employer's Medical Aid Fund For Employee's Hospital Expenses

An amendment was made in the sections of the Hospital Aid Act which deal with liability for hospital care and maintenance. A municipality is liable under these sections to pay hospital and burial expenses of public ward patients who are residents of the municipality and the Province is liable where the patient is not a resident of any municipality. Where the patient was employed by any person who deducts a fee for medical care or burial expenses from the wages of his employees, the amount owing the employee or his estate may be claimed by the hospital or municipality paying for medical care, to the extent of the cost of such care. These provisions do not apply to any employee who comes under the Workmen's Compensation Act or to wards of the Dominion Government. The amendment now enacted provides that neither shall they apply to any person who has made a contract with a physician for medical and hospital care or a contract of health insurance or any other arrangement involving a plan for prepaying hospital expenses.

Old Age Pensions

The Old Age and Blind Persons' Pensions Agreement Ratification Act, 1944, which is retroactive to September 1, 1943, validates a supplementary agreement made with the Dominion Government pursuant to the Dominion Order in Council P.C. 6367, August 10, 1943. The Order enables payments to be made to the provinces, out of the War Appropriation, of additional amounts based on a maximum pension of $300 a year.

Housing

A section added to the Winnipeg Charter enables the City to appoint a Commission to deal with housing matters.

Bills Not Passed

Two Bills of labour interest were introduced but failed to pass. A Bill to amend the Minimum Wage Act would have repealed the provision authorizing the Board to fix varying rates of wages or hours or conditions of labour for employees of different sexes or different ages and also the provision allowing exceptions to the general minimum rate of 25c per hour.

A Bill to amend the Trade Schools Act would have altered the definition of "trade," to include skill and knowledge that might be useful in an industrial or commercial occupation even if it were also intended for use in a household or in other non-industrial or non-commercial occupation.

Resolutions

A Resolution adopted on March 23 recommended that the Government reconstitute the Workmen's Compensation Act Committee to consider several phases of the Act, including the advisability of an amendment providing that if disability lasts more than three days compensation is to be payable from the first day.

A further Resolution of the same date urged the Government to continue its efforts to secure support of the other provincial governments and of the Dominion Government for an increase in the maximum income allowed to pensioners under the Old Age and Blind Persons Pensions Act by $60 a year. It was also recommended that, upon such increase becoming effective, the Government should consider the possibility of a further increase of $5 per month in the amount of the pension and in the maximum income allowed to pensioners, by joint action with the Dominion and the other provinces, as part of the present national scheme of old age and blind persons' pensions.

On April 6, a Resolution was adopted recommending that all members of the Legislative Assembly be constituted a Special Select Committee for the purpose of reviewing, criticising and formulating plans for post-war reconstruction and advising the Government as to its post-war program.

Recent Regulations under Dominion and Provincial Legislation

RECENT Dominion Orders in Council deal with the exemption of certain subsidiary employments from unemployment insurance contributions. Other recent changes under the Act include: the exemption of employees in certain cemeteries from contributions; the extension of coverage of the Act to include certain employees in Newfoundland and Labrador, and a reciprocal agreement between Canada and the United States regarding the exchange of claims.

Among provincial Orders: British Columbia has issued a proclamation under the Factories Act stating that October 9 is to be a public Thanksgiving holiday. Order 4 governing Quebec minimum wage rates has been amended to increase the rate for certain employees. Order 30 concerning the manufacture of wooden boxes in Quebec has been renewed. Saskatchewan has extended the provisions of the Minimum Wage Act to include certain other towns and certain classes of employees.

Dominion

Unemployment Insurance

Special Orders exempting certain employees from unemployment insurance contributions were made July 1, 1944 and August 22. These employments are added to the list of exemptions published in the LABOUR GAZETTE in January, 1944, which included all special exemption Orders up to November, 1943. The Unemployment Insurance Commission has power to issue special Orders for exemption under section (*p*) of Part II of the First Schedule to the Act on the grounds that such an occupation is ordinarily adopted as subsidiary employment only, and is not a principal means of livelihood.

The two new Orders exempt the following employments: (1) A full-time enrolled student of a day school, college or university during any week, from Sunday to Saturday, in which his earnings from any one employer do not exceed $5.40. (2) Any person employed in an occupation which he could ordinarily follow in addition to his usual employment and outside the working hours of that employment, if the remuneration or profit received does not exceed one dollar in respect of any day, or where the occupation is followed for a period longer than a day, the remuneration does not exceed a daily average of one dollar in any one week.

An Order in Council (P.C. 2457) made on April 4, 1944, and gazetted April 22, amends the Unemployment Insurance Contribution Regulations (P.C. 6952) of Sept. 3, 1943. The new Order exempts from Unemployment Insurance contributions employees in certain cemeteries which are required by their Letters Patent, Charter or other evidence of incorporation to furnish graves to the poor without charge.

By Resolution dated April 4, 1944, a further change deals with an extension of the coverage of the Act to include employees sent by an employer resident in Canada to perform some particular work in Newfoundland or Labrador as a result of wartime conditions. If such employees were insured immediately before leaving Canada they are to be insured as though they were still employed in the country, regardless of the duration of their employment in Newfoundland or Labrador. Under the general provisions of the Act and Contribution Regulations an employee who goes outside Canada for such a purpose is insurable for only eight months. However, under Section 6 (*b*) of the Contribution Regulations, the Commission is empowered to extend this period in special cases.

On April 12, 1942, a reciprocal agreement was made between Canada and the United

States regarding the exchange of claims. The terms of the agreement made it optional for any State to participate and empowered Canada to suspend the operation of the agreement with any of the States if they fail to subscribe to the terms laid out.

To date the Commission has been notified that thirty-two of the fifty-one United States Agencies (comprising the forty-eight States, the District of Columbia and the Territories of Alaska and Hawaii) have indicated their willingness to subscribe to the terms of the Agreement.

Provincial

British Columbia Factories Act

A Proclamation of September 14, 1944, gazetted September 21, stipulates that Monday, October 9, 1944, is to be a public holiday for the purpose of general thanksgiving. Section 62 of the British Columbia Factories Act, 1936, provides for the appointment of a public holiday by Proclamation, in addition to the following: Christmas Day, New Year's Day, Victoria Day, Dominion Day, Labour Day and Remembrance Day.

British Columbia Wartime Labour Relations Regulations Act

An Order in Council dated September 4, 1944, under the British Columbia Wartime Labour Relations Regulations Act, makes effective within the Province the provisions of the amendment in the Dominion Regulations made by Dominion Order in Council, P.C. 6893, September 1, 1944. The provisions of P.C. 6893 were given in the LABOUR GAZETTE, September, 1944, p. 1105.

Quebec Minimum Wage Act

Order No. 4 (L.G. 1938, p.512) concerning minimum wages for industries to which special orders do not apply, was amended by Order-in-Council 3282 on August 29, 1944 and gazetted September 2.

Wage rates have been increased to $250 a year for employees working at home for municipal corporations of from 1,500 to 3,000 persons. In local municipalities of less than 1,500, the minimum wage per year is one tenth of one per cent (1/10 of 1%) of the total value of the taxable property of the municipality, but the wage must not be less than $125 a year and is imperative only up to $250. The wages of these employees who work at home are to be payable monthly. Employees engaged in homework who become employed in other works are entitled to the wage established for these works.

A new section has replaced that on "School Boards and other Public Corporations." Employees of any public corporation who work at an office must come under the category entitled "Office Employees." Employees on school boards and other public Corporations usually working at home are to be governed by the following:

Corporations whose population is	*Per Year*
over 10,000 souls	$450
from 6,000 to 10,000	375
from 3,000 to 6,000	300
from 1,500 to 3,000	200
from 500 to 1,500	100
less than 500	75

These wages are to be paid monthly. Employees of any public corporation usually working at home who work at other occupations are entitled to the wage established for this work.

RENEWAL: Order No. 30 (L.G. 1939, p. 1112) governing the manufacture of wooden boxes and other wooden objects has been renewed until October 1, 1945 by an Order gazetted September 2.

Saskatchewan Labour Relations Act

A Proclamation of the Saskatchewan Gazette declares the amendments in the Dominion Wartime Labour Relations Regulations (P.C. 1003) made by Dominion Order in Council P.C. 6893, September 1, 1944, to be in force in Saskatchewan. The provisions of P.C. 6893 were given in the LABOUR GAZETTE, September, 1944, p. 1105.

Saskatchewan Minimum Wage Act

By Order in Council (1073/44) made September 19, 1944 and gazetted September 30, the provisions of the Act are to be extended to include the following towns: Assiniboia, Biggar, Gravelbourg, Indian Head, Maple Creek, Melfort, Moosomin, Nipawin, Rosetown, Rosthern, Tisdale, Watrous and Wilkie. Provision for extending the power of the Act to other districts was made under the Act (Revised Statutes of Saskatchewan, 1940, Chapter 310). The Order comes into effect October 16, 1944.

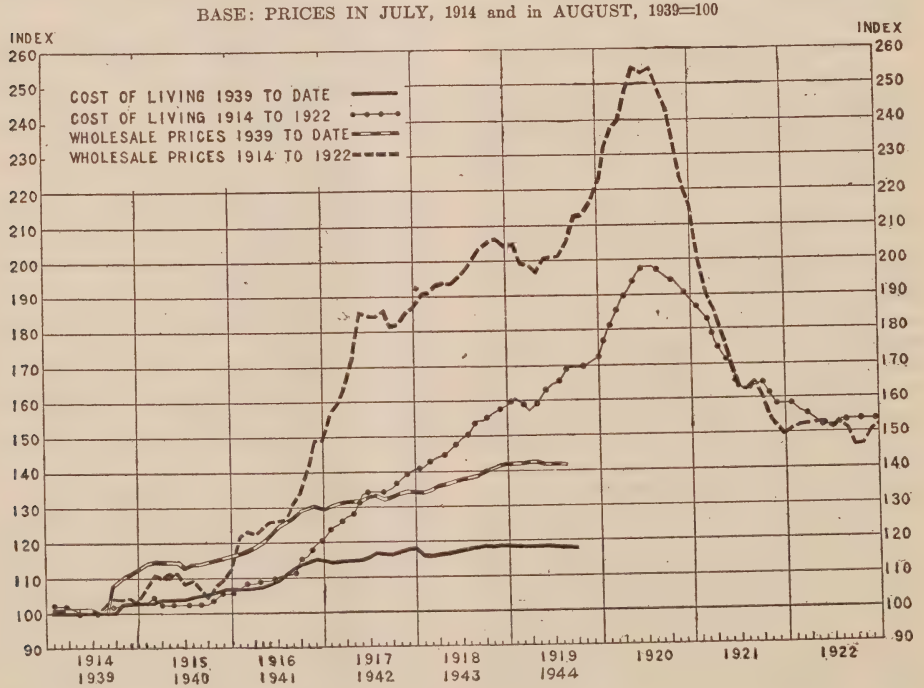
By Order in Council (1074/44) made and gazetted on the same dates, the provisions of the Act are extended to apply to all classes of employees except those employed by the Government of Saskatchewan or by one of its departments, or by a Board or Commission created by an Act of the legislature, or by a municipal corporation, or those engaged in the agricultural industry. The Order comes into effect October 16.

Prices

Prices, Retail and Wholesale, in Canada, September, 1944

Cost of Living, Prices of Staple Articles, and Index Numbers, as Reported by the Dominion Bureau of Statistics

THE Dominion Bureau of Statistics official cost-of-living index declined a further 0·1 to 118·8 between August 1 and September 1, 1944. This marked the lowest point reached by the index since July 2, 1943. Foods declined 0·3 to 131·2, reflecting seasonal decreases in potatoes, carrots, onions, cabbage and turnips. These overbalanced higher prices for eggs and butter. Home furnishings and services, the only other group to record a change, moved 0·1 lower to 118·4 following price recessions in the hardware and furniture sections. September 1 index levels for other groups were 111·9 for rentals; 108·7 for fuel and light; 121·5 for clothing and 109 for miscellaneous items.



Retail Prices

The accompanying table on retail prices of staple foods, coal and rentals (Table IV) is prepared each month by the Dominion Bureau of Statistics. It shows the prices of these commodities in 64 cities across Canada at the date under review.

The prices of the staple food items included in the table are all used in the calculation of the index of the food group in the official cost-of-living index, and give a reasonably complete picture of prices throughout Canada as used in the calculation of the index of this particular group. They are the averages of prices of goods reported to the Bureau by in-

COST OF LIVING AND WHOLESALE PRICES IN CANADA 1914-1922 AND 1939-1944

BASE: PRICES IN JULY, 1914 and in AUGUST, 1939=100

dependent stores. They do not include prices from chain stores. As the movement of chain store prices agrees closely with the movement of independent store prices it was considered that the extra work and cost involved in compiling and printing a separate table for chain store prices were not warranted although chain store prices are used in the calculation of the index.

The coal and rental figures given are also used in the official cost-of-living index. Quotations are shown for anthracite coal in the provinces of Ontario and Quebec, and for bituminous coal in the rest of Canada, where this type of coal is more generally used.

Rental figures given in the table are typical of rents being paid by tenant households in each city. In some cities, flats and apartments are more numerous than single houses; in such cases rents for flats and apartments are shown while figures for other cities represent single-house rentals. In all cases figures represent rents being paid, not the rent asked for vacant dwellings. The basis of these figures is the record of rents for every tenth tenant-occupied dwelling collected in the 1941 census of housing. The movement of rents since that time has been determined from reports submitted by real estate agents. The 1941 census averages have been adjusted in accordance with the change indicated by these reports, and the printed figures show a $4 spread centred around each city average.

Table III is designed to show the variation in the retail prices of commodities since the beginning of the war. Taking the Dominion average retail price of each of the commodities at August, 1939, as 100, the table shows the percentage changes in prices since that date; also the actual price on the first of the current month.

The Dominion Bureau of Statistics issues an index number of retail prices of commodities included in the cost-of-living index excluding rents and services. This index is now being included in Table I.

The accompanying chart shows the trend of the cost of living and wholesale prices since the beginning of the present war compared with the trend in the period of 1914-1922.

Explanatory Note as to Cost-of-Living Index

The index number of the cost of living was constructed on the basis of a survey of expenditure by 1,439 families of wage-earners and salaried workers with earnings between $600 and $2,800 in 1938. The average expenditure was $1,413.90, divided as follows: food (31·3 per cent), $443; shelter (19·1 per cent), $269.50; fuel and light (6·4 per cent), $90.50; clothing (11·7 per cent), $165.80; home furnishings (8·9 per cent), $125.70; miscellaneous (22·6 per cent), $319.40.

The last-named group includes health (4·3 per cent), $60.80; personal care (1·7 per cent), $23.90; transportation (5·6 per cent), $79.30; recreation (5·8 per cent), $82.10; life insurance (5·2 per cent), $73.30. Other expenditure not directly represented in the index brought the total family living expenditure to $1,453.80.

A description of the cost-of-living index, how it is calculated, and the complete list of items included in each of the principal groups, food, fuel, rent, clothing, home furnishings, etc., with their weights, was published in the LABOUR GAZETTE for July, 1943, page 1057.

The control of prices under an Order in Council of November 1, 1941, P.C. 8527, became effective on December 1, 1941 (L.G., 1941, page 1371). The order provided that no person should sell any goods or supply services at prices higher than during the period September 15 to October 11, 1941, except under the regulations of the Wartime Prices and Trade Board. The activities of the Board in the operation of the price control policy are summarized from time to time in the LABOUR GAZETTE under the title *Activities of the Wartime Prices and Trade Board.*

Wholesale Prices, September, 1944

The general index of wholesale prices remained unchanged in September at 102·3. Group changes were small. Vegetable products declined 0·2 to 94·4 between August and September, with lower prices for potatoes, rye, lemons and onions outweighing increases for hay and oats. A reduction for arsenious oxide was responsible for a decrease of 0·2 to 100·1 in the chemical product group, while the wood, wood product and paper series rose 0·1 to 118·1 following an increase in oak lumber prices. Other groups were unchanged, animal products at 106·0; textile products at 91·7; iron and its products at 117·0; non-ferrous metals at 79·7 and non-metallic minerals at 102·3.

A further small decline was recorded for Canadian farm product prices in September, the composite index being 0·2 lower at 101·0. Field products fell the same amount to 91·0 as reductions in grains, potatoes and onions outweighed upturns in hay. In the animal products group lower livestock prices counteracted upturns in eggs and fowl to reduce the index 0·1 to 117·8.

† Nominal price.

Price Movements in Canada and Other Countries

Wholesale price index numbers available for the third quarter of 1944 indicated little net change from levels obtaining in the first half of the year. The Canadian wholesale price series recorded a fractional decline of 0·2 points to 102·3 (1926=100) between June and September, while the net change for the year to date also amounted to 0·2 points. The Bureau of Labour Statistics index of wholesale prices for the United States stood at 103·9 in August, 0·4 points below June but 0·7 points above December, 1943. Led by higher prices for cotton and coal, the United Kingdom series continued to move progressively higher, reaching 167·1 in July for a gain of 3·7 points since December, 1943, and 1·0 points since June, 1944. Among indexes for other countries, the Argentine series at 213·2 (1926=100) in July was 9·4 points over December, 1943, and 0·5 points above June. The South African index dropped back from a peak of 1773 (1910=1000) in April, to 1757 in July, which was also the December, 1943 level.

As for wholesale prices, fluctuations in cost-of-living indexes in the third quarter of 1944 were relatively small. Due mainly to lower food quotations, the Canadian index recorded a decline of 0·2 points to 118·8 (1935-39=100) between June and September, while a comparison with the December, 1943 figure revealed a drop of 0·5 points. On the other hand, the United States cost-of-living index (also on the 1935-39 base) continued upward in the third-quarter to reach 126·3 in August against 125·4 in June and 124·4 in December, 1943. Movement of the United Kingdom index was intermittently upward, the September level of 202 (1914=100) being 2 points over the June figure, and 3 points over December, 1943. An index of South African living costs stood at 1285 (1938=1000) in July which was 11 points under the June figure, but 23 points above the final month of 1943.

TABLE IV.—RETAIL PRICES OF STAPLE FOODS,

	Beef							Pork													
	Sirloin steak, per lb.	Round steak, per lb.	Rib roast, prime, rolled, per lb.	Blade roast, per lb.	Stewing, per lb.	Veal, boneless fronts, per lb.	Lamb, leg roast, per lb.	Fresh loins, per lb. (b) The basis of these figures is the record of rents collected in the 1941 census of housing. The movement since then has been determined from reports from real estate agents, the census averages being adjusted in accordance with the changes indicated by these reports.

(c) Rents marked (c) are for apartments or flats. Other rent figures are for single houses. Apartment and flat rents have been shown where this type of dwelling is more common than single houses.

TABLE V—INDEX NUMBERS OF WHOLESALE PRICES IN CANADA CALCULATED BY THE DOMINION BUREAU OF STATISTICS

(Average Prices in 1926=100)

Achievements of Tripartite Labour Organization in India

THE establishment of a permanent tripartite organization to deal with labour matters was decided on at a Conference in New Delhi in 1942. The conference was attended by representatives of Governments, employers and workers. "The constitution by statute of an organization by which representatives of employers, of labour and of Governments would meet regularly in conference" had been recommended by the Royal Commission on Labour in India in 1931. Two features were to distinguish the new organization from previous Conferences: the permanency achieved by means of a standing committee, and representation of employers and workers as well as of Governments.

Three main objects of the organization were outlined to the Conference by the Government: the promotion of uniformity in labour legislation, an important matter in India with its many administrative and provincial jurisdictions; determination of procedure for settling industrial disputes, since the existing adjudication of disputes under the Defence of India Rules is only a wartime measure; and thirdly, the "discussion of matters of all-India importance as between employers and workers." This latter aim was framed in comprehensive terms to include questions of labour welfare and other problems of insufficient importance to lead to industrial disputes.

In the general discussion which followed, the workers' representatives stressed that uniform labour legislation should not be regarded as an end in itself but merely as a means for improving labour conditions, and also that the avoidance of disputes rather than their settlement should be emphasized. The employers hoped that the organization would cover the whole field of co-operation in industry and not restrict itself to legislative proposals. They understood that the purpose was not to hasten legislation necessarily but to provide a means for its careful consideration.

The constitution of the organization, it was proposed, should be similar to that of the International Labour Organization. There should be a Plenary Conference meeting at least once a year, to advise the Government of India on any matters referred to it, taking into account suggestions made by the representatives, and a Standing Advisory Committee of the Conference, meeting whenever called by the Central Government to advise or report on questions referred to it by the Central Government or the Plenary Conference.

The Constitution, as adopted, makes provision for 23 Government representatives to the Plenary Conference: the Member for Labour of the Viceroy's Executive Council as Chairman, three representatives of the Government of India, 11 from the British Indian Provinces, six from the industrially important Indian States, and two from the Chamber of Princes to represent other Indian States. Eleven Conference delegates are to represent the workers, four nominated by Government in agreement with the All-Indian Trades Union Congress, four in agreement with the Indian Federation of Labour, and three by Government as representatives of other workers, including municipal workers. Four employers' representatives will be nominated by Government in agreement with the Employers' Federation of India, four in agreement with the All-India Organization of Industrial Employers, and three nominated by Government to represent other classes of employers. The term of appointment of the delegates is limited to the Conference for which they are selected.

The Standing Advisory Committee has eleven Government representatives: the Member for Labour of the Viceroy's Executive Council as Chairman, one Central Government representative, six provincial Government delegates, three of whom will represent single Provinces and be selected by the Governments of these Provinces, with the other three each representing several provinces and selected by agreement betweeen them, two Indian States' representatives chosen by their Governments and one representative of the Chamber of Princes, selected in the usual manner. Four of the five employer representatives on the Standing Advisory Committee will be nominated by the Labour Member of the Government in agreement with the two principal associations of employers and the fifth will be chosen solely by the Labour Member. The five workers' delegates are to be chosen in the same manner. It was agreed that as far as possible members of the Standing Committee should also be members of the Conference in order to provide a link between the two.

It was suggested by the workers' representatives that the Conference should have power to frame its own agenda, that the procedure

of the I.L.O. should be applied more fully to the proposed organization, and that the system of voting should be the same as that of the International Labour Conference. The President replied that, in framing the agenda, all suggestions made by the Government and other organizations represented would be taken into account, but that it was too early to establish a permanent secretariat. The system of voting was left to the decision of the Conference.

Between November 1942 and May 1943 three meetings of the Standing Advisory Committee were held. The items on the agenda included a review of wartime labour legislation, production problems, workers' earnings, labour welfare, industrial statistics, the supply of essential articles of food to workers, an amendment of the Defence of India Rule 81 (A) relating to the adjudication of trade disputes, deferment of payment of bonuses to workers until after the war, the inclusion of a fair-wage clause in Government contracts, the establishment of joint production committees, the appointment of labour welfare officers in industrial undertakings, and the institution of employment offices for skilled and semi-skilled workers. Following these meetings the Government took action to give effect to certain resolutions which had been unanimously approved. The War Injuries (Compensation Insurance) Act, which requires industrial employers to pay compensation for war injuries, and the National Service (Technical Personnel) Amendment Ordinance were enacted. Measures were taken to compile certain labour information under the Industrial Statistics Act and employment service was established.

The first session of the Plenary Conference was held in Delhi in September 1943. The President noted that the greatest achievement of the new organization was the fundamental change brought about in the attitude of the three parties to labour problems. The Conference agreed that provision should be made for the relief of wartime temporary unemployment due to such factors as a shortage of raw materials, and that there should not be, in the case of lower paid workers at any rate, any waiting period preparatory to drawing benefits. It was resolved that wages, employment, housing and other social conditions should be investigated and the findings made available to a representative committee to be appointed by the Central Government to formulate social security plans. The Conference authorized the President to appoint a small committee to recommend principles for the determination of the cost-of-living bonus. Agreement was reached that working conditions should be uniform as between different mills and should be contained in standing orders approved by the Commissioner of Labour and put in effect by all mill-owners. The employers' delegates agreed to equal representation of the workers whenever "industry", as distinct from "commerce", was specially represented in legislatures or on statutory committees and local bodies.

British Study on Variations in Output

THE Industrial Health Research Board of Great Britain has recently published the results of a study on variations in output (Emergency Report No. 5). Undertaken primarily to determine whether a reduction of weekly hours would lead to an equal or increased rate of output, the study demonstrated that "variations of output are rarely, if ever, due to a single outstanding cause". Other factors, besides hours, which must be considered include changes in the type or design of the product, mechanical difficulties and breakdowns, variations in the quantity and quality of materials, improvements in the methods or conditions of work, changes in the type or lay-out of machines and a variety of personal factors. Further investigation was recommended to rank these factors in order of importance.

The study covered 21 groups of workers in seven factories engaged in war work. Their weekly hours ranged from 45 to 65 and were reduced by amounts varying from one to eight hours. A record of their output was kept for a four-week period before the reduction in hours and for a 12-week period after.

The results showed an average increase of 4·1 per cent in output for all groups, with the greatest improvement in the last four weeks. However, in only three of the 15 groups registering increases was it possible to attribute the increase to the change in hours. In the other cases factors such as improvements in the conditions and methods of work and reorganization were considered more significant. It was concluded tentatively that in the type of work studied a shortened workweek will usually be followed "by a tendency to increasing output", but "at present, sweeping statements connecting reduction of working hours with either marked increase or decrease of output are not warranted".

The reduction in hours caused a slight decrease in absences from work. It was observed

that the absence rate for women on the three-shift system was higher than that for those on the two-shift system. A recommendation was made that hours of work should be adjusted to the needs of married women so that absences for domestic reasons would be controlled rather than haphazard.

It was found that workers who alternated fortnightly between the day and the night shift worked with almost equal effectiveness on both shifts. Where the three-shift system was in effect, hourly output was greatest on the afternoon shift and lowest on the morning shift, even when the morning shift was shorter. The difference was not very great, however. A study of daily variations in one plant showed that output was highest on the first working day of the week and on pay day.

Attention was drawn to the fact that dissatisfaction with methods and rates of pay, friction between foremen and workers and the relations of management and labour are reflected in output rates. It was noted that

> . . . conditions had greatly improved since the formation of Joint Production Committees, but the degree of improvement varied considerably in different factories. The most successful results have been obtained in factories where both the management and the shop stewards have been able and willing to understand and respect each other's rights and difficulties."

Labour and Industry in British Columbia, 1943

Apprenticeship—Factory Inspection—Women and Children in Industry—Labour Disputes and Conciliation—Board of Industrial Relations

INDUSTRIAL payrolls in British Columbia have shown impressive annual increases since the outbreak of the war, according to the twenty-sixth annual report of the provincial Department of Labour. They amounted to $165,683,460 in 1939 and had risen progressively until, in 1943, they had reached a total of $381,196,427, an increase in the five years of slightly more than 130 per cent. The most noteworthy increase was in the shipbuilding industry which was $18,000,000 over the figures shown for that industry in 1942. The construction industry registered an increase of $13,000,000; followed by miscellaneous trades and industries, up over $10,000,000; metal trades with an increase of almost $7,500,000; and lumber industries advanced over $3,000,000. Only three of the twenty-five industrial classifications registered relatively small declines, namely, metal mining, $490,503; smelting, $414,817; and pulp and paper mills, $97,415.

It is emphasized that the greatest employment increases were evident in those industries most essential to the war effort. An overall increase in the number of female employees added to the payrolls released many male workers for the armed services or for more essential occupations. The month of August, 1943, showed a total of 152,694 as against a high of 143,760 in November, 1942.

Increases in the average weekly wage for adult male workers were general in twenty-one of the twenty-five classes, the decreases in the remainder being mostly of a fractional nature. The averages given were based on the week of employment of the greatest number. It is pointed out that considerable difficulty was experienced in arriving at the averages in certain industries because of broken time, but efforts were made to base the calculations on a full working-week. The average weekly wage for adult male wage earners rose to $37.19 in 1943 representing an increase of $1.95 over the previous year and "the highest recorded since the formation of the Department."

Working hours decreased slightly in 1943, the average for all employees being 47·19 hours as compared with 48·12 hours in 1942.

Industrial Statistics, Payrolls, etc.—Statistics were compiled by the Department from reports received from 4,727 firms, a decrease of 118 from 1942. These returns covered some 151,420 male and female employees for 1943. A segregation showed that 89·10 per cent worked 48 hours or less per week; 4·57 per cent worked from 48 to 54 hours per week; and 6·3 per cent worked in excess of 54 hours per week. To find the total payroll of the province the sum reported by these industrial firms was augmented by the returns received too late in to be included in the industrial summary, $70,134; estimated payroll of employers in occupations included in the Department's inquiry not sending in returns $1,350,000; transcontinental railways $19,424,973; and payrolls of additional services not included in the industrial survey, such as governmental workers, wholesale and retail firms, etc., $48,945,000. Payrolls in the shipbuilding industry increased from $47,203,906 in 1942 to $65,494,519 in 1943. The corresponding figures for the other classifications are given as follows: Construction, from $30,101,754 to $43,356,556; miscellaneous trades and industries, $16,012,831 to

$26,160,573; metal trades, $17,223,536 to $24,637,007; lumber, $43,935,333 to $47,078,896; breweries (including mineral waters), $1,584,038 to $1,758,828; builders' materials, $2,000,579 to $2,306,658; cigar and tobacco manufacturing, $4,441 to $6,971; coal mining, $4,491,833 to $4,890,314; coast shipping, $8,660,344 to $10,019,897; explosives and chemicals, $3,501,356 to $4,014,989; food products, $16,276,059 to $18,192,018; garment making, $1,264,303 to $1,403,599; house furnishings, $1,778,909 to $1,822,614; jewellery manufacturing, $343,552 to $347,097; laundries, etc., $2,018,329 to $2,433,302; leather and furs manufacturing, $866,701 to $926,231; oil refining, $3,039,683 to $3,229,243; paint manufacturing, $429,195 to $457,182; printing and publishing, $4,143,521 to $4,337,734; street railways, etc., $12,734,102 to $13,613,489; wood manufacturing, $5,917,196 to $7,406,450. Industries reporting decreased payrolls in 1943 from 1942 were as follows: Pulp and paper mills, $8,824,524 to $8,727,109; smelting, $7,881,503 to $7,466,686; metal mining, $11,808,861 to $11,318,358.

Apprenticeship.—The Director of Apprenticeship in his report stated that there were 1,603 apprenticeship contracts in force at the close of 1943. This was an increase of 181 over 1942. It is indicated that the Federal government has made certain proposals to the provinces with a view to setting up a uniform system of apprenticeship throughout the Dominion along lines similar to those in force in British Columbia.* This would make apprenticeship facilities available for the rehabilitation of ex-service men and women.

Factory Inspection.—During 1943, 2,240 inspections and re-inspections were made. The Inspector of factories expressed concern with respect to the number and the seriousness of industrial accidents. In some measure these may be attributed to the higher percentage of inexperienced workers now employed in industry and it was urged that new employees be carefully instructed and supervised so that accidents may be reduced. He also suggested that an industrial hygienist be employed for research work in connection with poisonous fumes and dust, especially in plants making use of new industrial processes or manufacturing new chemicals and poisonous substances.

Women and Children in Industry.—While the employment of women in industry as a whole increased during the year, it was found that a number of industries had discontinued their employment entirely and others were operating with decreased staffs. However, this was attributed largely to a slow-down in these particular plants and the discontinuance of extra shifts. Some uneasiness was expressed as to the number of head accidents suffered by women owing to carelessness in the wearing of protective head-dress while at work.

It was ascertained during the year that many children were falsifying their ages to obtain employment, chiefly in the shipyards. This was revealed following a fatal accident to a 14-year old shipyard employee, following which all boys who could not produce satisfactory proof that they had reached their fifteenth birthday were removed from the shipyards. With but very few exceptions the issuance of permits was confined to children for the duration of the summer holidays only.

Labour Disputes and Conciliation.—Of the 43 strikes recorded during the year, six were in the jurisdiction of the province. A total of 21,704 employees were affected by these disputes and of that number 463 were within the authority of British Columbia. Of the total of 78,129 man-days lost, 1,299 were attributable to the six strikes under provincial jurisdiction. It is stated that although there had been a larger number of disputes in past years, the number of employees affected and the time loss in man-days in 1943 were amongst the highest recorded by the Department.

Complaints brought to the attention of the Industrial Conciliation and Arbitration Branch numbered 70 in 1943, while nineteen disputes were referred to the Conciliation Commissioners. Boards of Arbitration begun in 1943 numbered eleven. Of the nine awards made, six were unanimous.

New Legislation.—An Act entitled "Control of Employment of Children Act" was passed at the 1944 session of the legislature. It prohibits the employment of children under 15 years of age, unless permission has been granted by the Minister of Labour, or any person appointed by him for the purpose. Eight industries or trades are specified in the Schedule of the Act in which employment is prohibited unless under permit. (L.G., June, 1944, p. 784).

Other legislation passed provided amendments to the minimum wage laws respecting both men and women and the "Wartime Labour Relations Regulations Act".

Report of Board of Industrial Relations

The tenth annual report of the Board of Industrial Relations provides summaries of the orders made by the Board during 1943 with respect to a wide range of industries and trades.

* L.G., Feb., 1944, p. 206.

Women and Girl Employees.—Returns were received from some 6,894 employers of women and girls. These showed a total of 54,905 female workers for 1943, an increase of 10,444 over 1942. The average weekly wages for female employees over 18 years of age (or experienced), was $18.51 in 1943 and for females under 18 years of age (or inexperienced), $11.09 as compared with $17.54 and $10.52 respectively in 1942. The percentage of female workers receiving actual minimum wages set for experienced workers was 7·47 in 1943 and 9·09 in 1942. The percentage receiving more than the minimum wage was 72·63 in 1943 and 68·78 in 1942. Total salaries and wages for one week amounted to $989,392.74, an increase of $233,706.35 over the figure for 1942. The average weekly working hours for the 54,905 female employees decreased from 41·96 to 41·03 for 1943.

Inspections and Collections.—During the year the inspection staff made 8,642 personal inspections throughout the province, as compared with 10,727 in 1942. The reduction was due to a decrease in the number of inspectors, brought about mainly by the loan of staff members to the Federal government and to branches of the armed services. Under the Female Minimum Wage Act 128 employers made adjustments for 213 women and girls in the amount of $3,901.06. In addition to the above settlements, which were made without recourse to the Courts, Court proceedings were instituted in 17 cases, resulting in 14 convictions, two dismissals and one withdrawal.

THE LABOUR GAZETTE

PREPARED AND EDITED BY

THE DEPARTMENT OF LABOUR, OTTAWA, CANADA

Minister—Hon. HUMPHREY MITCHELL

Deputy Minister—ARTHUR MACNAMARA

Editor—HARRY J. WALKER

VOLUME XLIV] NOVEMBER, 1944 [NUMBER 11

Notes of Current Interest

Wage increases authorized by War Labour Boards

Speaking recently before the annual convention of the Canadian Congress of Labour in Quebec City, the Honourable Humphrey Mitchell, Minister of Labour, made reference to the operation of the wage stabilization policy.

Decisions of National and Regional War Labour Boards since the stabilization policy was instituted in November, 1941, have resulted in increasing the remuneration of workers by more than $175,000,000 a year, the Minister announced, declaring: "This has been accomplished without adverse effect on the cost of living."

He stated that the Boards had dealt with 57,000 cases affecting over four million workers. Vacations with pay had been awarded in cases affecting 849,000 workers, not including those affected by the Report of the O'Connor Commission on Western Coal Mines.

Further reference to the Minister's speech will be found in the article dealing with the Congress convention, elsewhere in this issue.

Royal Commission to inquire into coal industry

A Royal Commission has been appointed to inquire into the Canadian coal industry, it was announced recently by the Prime Minister, Rt. Hon. W. L. Mackenzie King.

Mr. Justice W. F. Carroll, Halifax, is Chairman of the Commission, the other members of which are Mr. Angus J. Morrison, United Mine Workers of America, Calgary, and Mr. Justice C. C. McLaurin, Calgary.

The Commission will report to the newly-established Department of Reconstruction.

Slight decline in index of cost of living

The Dominion Bureau of Statistics cost-of-living index declined further from 118·8 for September 1 to 118·6 for October 2, 1944. Continued autumn decreases in fresh vegetables were mainly responsible for this change. The food index dropped from 131·2 for September to 130·8 for October, with price reductions in fresh vegetables, citrus fruits and lamb partially offset by small increases for butter and eggs. Other group changes were fractional. Rents advanced from 111·9 to 112, and clothing from 121·5 to 121·6. Lower gasoline prices in some areas reduced the miscellaneous index from 109 to 108·9. Two group indexes remained unchanged, fuel and light at 108·7 and homefurnishings and services at 118·4. After adjustment to the base August, 1930 as 100 the index was 117·7 at October 2, 1944.

Payment of grants under Post-Discharge Re-establishment Order

The Department of Veterans' Affairs announced recently that, during the month of September, 1,810 ex-service personnel of this war received benefits and grants under the Post-Discharge Re-establishment Order. The grants are on the basis of $60 monthly for a single person and $80 monthly for a man and his

20696—1½

wife, with allowances for dependents if the veteran is receiving training or continuing education; or $50 and $70 respectively if out of work, temporarily incapacitated or awaiting returns from a business venture or farm.

During the same period 9,741 veterans of this war were placed in employment through National Selective Service in co-operation with the Department of Veterans' Affairs. In addition, jobs were found for 3,143 veterans of the first Great War. A total to date of 257,004 veterans of both wars have been placed in this manner, according to the announcement.

Indicative of employment conditions among veterans of this war is the fact that in the total of 1,731 in receipt of grants under the Post-Discharge Re-establishment Order at the end of September, only 158 were receiving maintenance benefits, while fit and available for work but for whom no work was available. During the whole month 274 received benefits under this clause. The big majority of the grants, a total of 1,146, were paid to ex-service personnel taking courses of vocational training. An additional 94 were attending universities, and with the opening of more universities this figure has increased to more than 350. Payments were made to 84 veterans temporarily incapacitated and to 328 while they were awaiting returns from farms or businesses. A total of $88,246.51 was expended in grants during the month of September.

Service personnel not included in union representation vote

A group of mining employers in Northern Ontario recently appealed an order of the Ontario Labour Relations Board that votes be taken of their employees to elect collective bargaining representatives. The appeal was on the grounds that the order did not provide an opportunity of voting to those members of His Majesty's forces who were employees and who are either on leave of absence or entitled to be reinstated as employees on the completion of their military service.

The National Board, in issuing its judgment, declared: "The real issue in this appeal is whether a unit of employees is appropriate for collective bargaining as provided by Section 7 of the Regulations if it includes employees who are now on military service". The Board was of the opinion that the employees properly included in a collective bargaining unit are those who require a collective agreement. Employees now on military service, the Board asserted, "do not presently require a collective agreement containing provisions with reference to rates of pay, hours of work, or other working conditions. If, when they are discharged from military service, they return to their employment they may desire such an agreement but it is impossible to say how many of these will return to their former employment."

The National Board agreed with the Ontario Board's ruling that the rights of members of the forces could not be detrimentally affected by any collective agreement that might be negotiated between the parties. The Ontario Board had pointed out that even a closed shop provision in such a collective agreement could not bar the re-employment of persons who come within the Reinstatement in Civil Employment Act, 1942, Canada, and the Rights of Labour Act, 1944, Ontario; also that under the Wartime Labour Relations Regulations employees may avail themselves of the right to change their bargaining representatives at fairly frequent intervals so that any alteration in the views of the working force of an enterprise will soon be reflected in application for the certification of new bargaining representatives.

The appeal was dismissed.

Report on Japanese administration

An illustrated Report has recently been issued by the Department of Labour on "The Administration of Japanese Affairs in Canada 1942-44." This is supplementary to the Report issued in November, 1942, on "The Removal of Japanese from Protected Areas."

In December, 1941, there were 22,837 persons of Japanese racial origin in Canada, of whom approximately 75 per cent were Canadian citizens, mostly born in Canada. Almost 21,000 resided along the British Columbia coastal area which was declared a Protected Area after Pearl Harbour, and the evacuation of this large group by the British Columbia Security Commission during 1942 is summarized from the earlier Report.

In the two years since evacuation, up to August 4, 1944, relocation has been proceeding gradually and voluntarily to the point where 80 per cent of the Japanese are again self-supporting and 35 per cent of them are relocated east of the Rocky Mountains.

The policy of the Department in this work has been threefold—to get all employable Japanese into self-supporting employment helpful to the Canadian war effort across Canada, to maintain the unemployable minority when they were financially unable to keep themselves, and to see that the children received a thoroughly Canadian education. The Report

proceeds to describe in some detail how these aims were put into practice over the period.

By a series of placement offices working with National Selective Service between British Columbia and Quebec, Japanese have been recruited and placed in industries which have felt most acutely the wartime scarcity of labour —farms and market gardens, lumbering operations, manufacturers of fertilizers and leather, canneries, hospitals and restaurants, and many other diversified types of employment, at prevailing rates of pay. This relocation program, which has been materially assisted by local citizens' committees, is also part of a long-range policy of resettlement for loyal Japanese-Canadians.

Just as the Japanese in Canada before evacuation were seldom on relief lists, so now they are in large measure self-supporting, except for some invalids, elderly persons, and families of internees, being maintained by the Department in the Interior Housing Projects in British Columbia. The number requiring assistance has steadily declined, until in the summer of 1944 less than 2,000 require full maintenance and the same number require partial temporary maintenance. A Royal Commission in January, 1944, found that welfare provisions for these people were reasonably adequate as a wartime measure.

The Department of Labour has established a complete Public School system for 3,000 children of elementary school age in the Project towns, based on the provincial school curriculum. These schools have been found by leading educationalists to be efficiently operated on a consistently high level. Various church mission schools look after the high school students, and those outside the Projects either go to local schools or take correspondence courses. Two thousand five hundred children who have relocated with their families east of the Rockies have since 1942 attended the regular provincial schools and colleges without discrimination.

There are also sections in the Report on Work Projects, Japanese Property, Internment and Repatriation, International Red Cross and Protecting Power, Security, Control, and Travel, and other special phases of the Administration of the "Japanese Problem."

The Report concludes with the Prime Minister's Statement of Policy on Japanese, in the House of Commons on August 4, 1944. In this speech, the Prime Minister announced that a Commission was to be established to decide the loyalty or disloyalty of individual Japanese, the loyal to be relocated and dispersed across Canada, the disloyal to be repatriated to Japan as soon as possible, and a barrier erected against any further Japanese immigration.

Enrolment of veterans in Canadian universities

The Hon. Ian Mackenzie, Minister of Veterans' Affairs announced recently that more than 350 ex-service men and women entered the various universities across Canada this autumn. In addition, seven are attending classes at universities in the United States.

"By far the greater percentage of these men and women are from the ranks with only about ninety of the three hundred and fifty being former officers," the Minister stated. "Twelve are ex-service women, four of them former nursing sisters." Of the officers one was a Lieut.-Colonel and two were Majors.

Approximately one hundred ex-service men are studying engineering in its various branches; about fifty are enrolled in arts courses to qualify for such professions as teaching, the ministry, journalism and law, and an equal number are science students. More than forty are studying commerce and finance and over forty others are potential doctors, dentists and public health nurses. Twenty are studying agriculture and there are eighteen prospective lawyers. A former army lieutenant is becoming an organist, and a former W.D. is continuing her studies towards an L.T.C.M. degree on the violin.

There are twenty-two service men and women taking post-graduate courses of almost as many varieties. Some of these courses are of the refresher type calculated to bring back proficiency partially lost during service in the Armed Forces.

"The Department is anxious," concluded the Minister, "to assist suitable men and women to obtain higher education. Aside from solving their individual rehabilitation problems we are training now a large number of the future leaders of Canada."

Additional day nurseries approved

Approval of two additional wartime day nurseries in the city of Toronto, to be completed as soon as possible, will bring to 30 the total number of such units now in operation in Ontario, it was announced recently by the Dominion Department of Labour. These nurseries are operated under agreement between the Government of Ontario and the Dominion Department of Labour (L.G., Oct., 1944, p. 1200).

Mrs. Rex Eaton, Associate Director of National Selective Service, stated that the nursery units were approved by the Minister of Labour because of the upswing in employment of women workers for heavy ammunition plants in the area.

Employment and industrial statistics

The table below shows the latest statistics available reflecting industrial conditions in Canada.

For the fourth successive month the index of the Dominion Bureau of Statistics showed an increase in industrial employment to 185·5 at September 1. The average of the indexes for these four months is below the average for the same period in 1943, but higher than for the similar periods in the other years of the war. In comparison, the index was 184·3 at August 1, 1944, 186·2 at September 1, 1943, and 119·6 at September 1, 1939. The 14,837 establishments reporting to the Bureau showed a total working force of 1,882,790 at September 1 which was 0·6 per cent greater than at August 1. The total

* Many of the figures in this table with an analysis are included in the Monthly Review of Business Statistics issued by the Dominion Bureau of Statistics, price $1.00 per year.

† Week ended October 26, 1944.

(1) Base, 1926=100. (2) Figures are for the end of the preceding month. (3) Base, June, 1941=100. (4) Base, 1935-1939=100. (5) Adjusted, where necessary, for seasonal variation. (6) Notes in the hands of the public at the end of the preceding month. (7) Figure for four weeks ended October 28, 1944, and corresponding previous periods. (8) Maclean's Building Review.

weekly wages and salaries paid to these employees increased from the previous month by 0·9 per cent to $59,671,139 for the pay-week ending September 1. Per capita weekly earnings advanced from $31.63 at August 1 to $31.69 at September 1. The figure for September 1, 1941, was $26.04.

Manufacturing establishments reported moderately increased activity at September 1, but the increase is the smallest at the beginning of September in any year since 1936. There was a further reduction in the production of durable manufactured goods, notably of iron and steel products, while non-durable goods showed expansion of a seasonal character. In the non-manufacturing industries, communications, construction and maintenance, and trade showed upward trends, while logging, mining and transportation moved downward. The declines in logging and mining were contra-seasonal.

The index of the physical volume of business receded from 233·1 in August to 231 in September, the lowest point reached in more than a year. This compares with 236·7 for September, 1943. Mineral production, manufacturing, and electric power production averaged lower in September. The indexes for construction and for the distribution of goods experienced increases.

The index of the physical volume of business for the first nine months of 1944 averaged 2·5 per cent higher than for the similar period in 1943. In the same comparison, the index of industrial production and also the index of employment averaged 0·1 per cent higher; mineral production was 2·8 per cent lower while employment in mining was 2·2 per cent lower; manufacturing production was 1·8 per cent higher while manufacturing employment was 0·8 per cent higher; the value of construction contracts awarded and building permits issued were 45·8 and 58·3 per cent higher, respectively, while construction employment was 20·7 per cent lower. Again in the same comparison, export trade increased 20·6 per cent and import trade 4·2 per cent, carloadings 7·2 per cent, wholesale prices 3·4 per cent, and cost of living 0·8 per cent. Bank debits expanded 14·7 per cent and the circulating media 21·1 per cent.

Prosecutions under N.S.S. Civilian Regulations

Failure to comply with National Selective Service Civilian Regulations resulted in the prosecution of 141 persons during the month of October, according to a statement issued on November 6 by A. MacNamara, Director of National Selective Service.

A total of 122 of the accused were convicted, as compared with 94 convictions in September. Twenty more charges were laid in October than in the previous month.

Employers were convicted in 7 cases, most of them being charged with engaging workers without permits. Of 78 employees convicted, a majority were charged with quitting "designated" employment without Selective Service permission or failing to accept high priority work when referred by a Selective Service officer.

Thirty-seven conscientious objectors—all of them convicted—were charged with failure to follow a direction to report to an alternative service work camp.

At November 1, a total of 342 cases were still pending—23 being charges against employers, 186 against employees, and 133 against conscientious objectors.

Topics before convention of British Trades Union Congress

The 76th British Trades Union Congress was convened at Blackpool, England on October 16. Advance notices of the meeting stated that "seventy-six resolutions and also nominations for the General Council, the General Purposes Committee, had been received for inclusion in the agenda. Among the subjects dealt with in the resolutions were: amendments to the Workmen's Compensation law; the organization of a National Health Service and the nationalization of hospitals; post-war problems; the establishment of a residential college for trade unionists; the sending of trade union delegations to other countries after the war; urging the recognition of the I.L.O. as an essential part of the machinery for safeguarding world peace; wartime regulations affecting labour; the nationalization of the transport and mining industries; the principle of the 40-hour week and holidays with pay and others.

A summary of the proceedings will appear in an early issue of the LABOUR GAZETTE.

Dr. James appointed to University Advisory Board

Dr. F. Cyril James, Principal and Vice-Chancellor of McGill university, has been appointed to the University Advisory Board to replace Dr. H. J. Cody, President of the University of Toronto, who resigned from the Board recently, it has been announced by Hon. Humphrey Mitchell, Minister of Labour.

The University Advisory Board was created in December, 1943, to advise the Minister of Labour on matters affecting the students and staffs of Canadian universities during wartime,

including mobilization matters (L.G., Jan., 1944, p. 6).

Chairman of the Board is Mr. Arthur MacNamara, Deputy Minister of Labour. Dr. Sidney E. Smith, President of University College, University of Toronto, is vice-chairman, and H. W. Lea, Director of the Wartime Bureau of Technical Personnel, is secretary.

Other Board members include: Dr. F. C. James; Dr. R. C. Wallace, Principal of Queen's University; Mgr. Cyrille Gagnon, Rector of Laval University; Dr. J. S. Thomson, President, University of Saskatchewan, and Dr. N. A. M. MacKenzie, President, University of British Columbia.

S. H. MacLaren and Paul Goulet, Associate Directors of National Selective Service; Paul Béique, consulting engineer, Montreal; and A. E. McMaster, Assistant Coordinator of Controls, Department of Munitions and Supply, complete the Board membership.

U.S. Court rules "wildcat" strikers not protected by N.L.R.A.

In what is described in the *Labour Relations Reporter* of October 23, as "probably the most important strike decision by a federal appellate court since the sit-down strike cases five years ago," the right of an employer to discharge a minority group of strikers in a specific circumstance, was sustained.

In the instance under review, the strikers, a minority of the employees in an important South Carolina industry, had been discharged for engaging in an unauthorized sit-down strike and the National Labour Relations Board had ordered their reinstatement with back pay, contending that the company had been guilty of unfair labour practices. The Court, in refusing to agree to enforcement of the order, held that the employees had forfeited their rights under the Wagner Act by themselves, violating the Act. The law, the Court held, requires a minority employee group "to acquiesce in the action of the majority and the bargaining agent they have chosen . . ." and reasoned that "a wildcat strike is necessarily destructive of that collective bargaining which it is the purpose of the Act to promote." Further, "even though individuals and groups are assured of the right to present grievances to the employer, they do not have the right to call strikes for the purpose of influencing the bargaining being carried on by the chosen representatives of all the employees."

The Court explained, however, that the ruling was not intended to imply that a strike could be called only by a bargaining union, or that less than a majority of employees will not be protected when they go on strike in protection of their rights. But minorities who engage in "wildcat" strikes in violation of rights established by the collective bargaining statute, can find nothing in that statute that protects them from discharge.

The article suggests that, if the ruling should be upheld by the Supreme Court, union leaders might welcome the co-operation of employers in discharging recalcitrant minorities which provoke local strikes. Inter-union disputes and minority protests against an elected collective bargaining agent could, it was asserted, be dealt with effectively in the same way.

"Wildcat" strikers penalized by C.I.O.

It was reported in the *New York Times* of October 30, that two affiliates of the Congress of Industrial Organizations have levied fines ranging from $5 to $25 on certain of their members in addition to threats of expulsion and loss of jobs for participating in unauthorized strikes.

The national president of the United Rubber Workers has, according to the press report, imposed fines of $12.50 each on union workers who, as a result of an unauthorized strike in an important industrial plant, held up production for three days. In another large industry the same union official expelled workers for a like offence. This in turn resulted in the offending workers losing their jobs, as a maintenance-of-membership clause was included in the collective agreement covering the plant in question.

Fifty-one workers were fined from $5 to $25 by the Executive Board of the Papermakers Organizing Committee for their activities in a recent unauthorized walkout in the plant of an important paper-making company.

University scholarships for employees' children

It is reported in *Business Week*, for October 14, that "a unique plan for the improvement of worker morale" has been adopted by a leading transportation corporation in Chicago. The company has incorporated in its program a university scholarship project for deserving children of its employees.

An employee must have been on the company's payroll for at least three years before applying for a scholarship. While the company may ask for an interview with the applicant, the final selection of candidates rests with the University and is made on the basis of previous training, personal qualifications and actual need of financial assistance. The scholarships, on the basis of one year at the

University of Chicago, provide $500 to non-resident students and $1,200 to resident students. The company makes no commitment about renewing scholarships, but, it is stated, apparently plans to furnish some help through the entire course if necessary, and the student shows a satisfactory record. The plan will not apply to children of officers and directors of the company.

U.S. Department of Labour issues brochure on labour relations

In response to what it declares to be "a widespread management demand for training materials," the Division of Labour Standards at Washington has issued a brochure entitled "The Foreman's Guide to Labour Relations."

It covers three major fields: (1) management, supervision and labour relations; (2) the foreman and collective bargaining; (3) the foreman and the individual worker.

The brochure stresses that unless foremen and shop stewards understand the collective agreement and how to apply it in daily practice, the best efforts of union leaders and managements may prove fruitless. It urges the importance of the human element in getting out production, the advantages of foremen working with shop stewards in solving departmental problems and the foreman's responsibility as a direct representative of management.

While admitting that "there are no final answers in human relations," it takes it for granted that there is value in a discussion of the development of labour policies and personnel procedures to meet the better "basic needs of workers for security, reasonably good wages, a chance to advance the desire for fair treatment and for self-expression."

United States consumers co-operatives increase volume of business

It is stated in the October issue of the U.S. *Monthly Labour Review,* that the co-operative associations providing consumer goods and services in the United States, made "a general advance in both membership and volume of business" in 1943. In that year retail distributive business done by these associations reached an estimated total of $468,000,000. In addition, the service business, which included meals, housing, medical care, printing, recreation, etc., accounted for about $12,500,000. The wholesale associations, which supplied these local organizations, had a combined wholesale distributive business of over $148,250,000 and a service business in excess of $3,250,000. Net savings on the wholesales' operations for the year were over $8,500,000 of which over $6,000,000 was returned to member associations in patronage funds. Service federations had a combined business of nearly $2,000,000.

The nine thousand active credit unions in the United States made more than one and one-half million loans to their three million members in 1943, amounting to considerably over $211,000,000. The total assets of these co-operative credit associations amounted to nearly $362,000,000. It is pointed out however, that the increased earnings of workers and the consequent lessened need for credit, coupled with control of instalment buying and the dearth of consumer goods, has led to a reduction in the volume of business transacted by the credit unions during the war years.

However, it is claimed that increased production and acquisition of productive plant by the federations as well as diversification of activities by the local associations "have been the outstanding developments in the consumers' co-operative movement in the United States in 1943."

Holiday pay in United States

In its sixteenth report the National War Labour Board at Washington presented an interpretation of Executive Order No. 9240 with respect to the holiday pay of workers in the United States.

The Order provides that time and one-half shall be paid for work performed on New Year's Day, Fourth of July, Labour Day, Thanksgiving Day, Christmas Day and either Memorial Day, or some other holiday of greater local significance. No premium wage or extra compensation is to be paid for work performed on any other holiday. However, there is no provision for payment when no work is performed on holidays.

It is pointed out that when operations are continued on holidays companies have claimed that if the worker is given a choice between working at the rate of time and one-half, and not working and receiving straight-time pay, he will frequently choose the latter and thus absenteeism will be increased. Unions, on the other hand, have contended that absenteeism on holidays has been very low, and also that one result of a provision for paid unworked holidays will be increased production, since an employer will be unwilling to shut down his plant if he has to pay straight time rates to employees. It is stated that in ordering payment for unworked holidays the Board has at times stipulated "that employees absent without justification are not to be paid."

Ratification of International Labour Conventions by Venezuela

The Venezuelan National Congress recently authorized the ratification of fourteen International Labour Conventions. Dealing with unemployment, hours of work, women in industry and various matters affecting working conditions, the Conventions set forth standards agreed upon as desirable for international adoption by representatives of labour, management and government from the Member States of the International Labour Organization during the Conferences held between 1919 and 1939.

As a Member State of the International Labour Organization, Venezuela undertakes in ratifying the Conventions to take measures to implement their provisions and to report annually to the I.L.O. on these measures.

The fourteen Conventions follow: Hours of Work (Industry), 1919; Unemployment, 1919; Childbirth, 1919; Night Work (Women), 1919; Minimum Age (Industry), 1919; Minimum Age (Sea), 1920; Right of Association (Agriculture), 1921; Weekly Rest (Industry), 1921; Equality of Treatment (Accident Compensation), 1925; Inspection of Immigrants, 1926; Seamen's Articles of Agreement, 1926; Minimum Wage Fixing Machinery, 1928; Forced Labour, 1930; Underground Work (Women), 1935.

When the Venezuelan ratifications become effective, it will bring to 901 the total number of ratifications of the 67 Conventions adopted by the International Labour Conference since 1919. Fifty-one countries have ratified one or more Conventions.

Unity among Dutch Labour Unions

The Netherlands Government Information Bureau, Montreal, reports that the three leading Dutch trade union federations have resolved to maintain the "closest possible co-operation" during the days of reconstruction which will follow the war. These organizations are the Netherlands Federation of Trade Unions, the Roman Catholic Worker's Federation and the Christian Trade Union Federation.

A publication called *Resurrection* has made its appearance, edited by a board representing the three organizations.

In the first issue the report states, "labour leaders forecast the formation of joint unions acting for special trade branches, as well as councils of consultation among the local organizations." Dutch workers were called upon to work hard and long to help restore devastated country. The three federations praised the Netherlands government for restoring to the liberated areas of the country the social insurance regulations that had been abolished by the Germans, the report adds.

Company Plans for Reinstatement of Returned Men

THE LABOUR GAZETTE has received word of plans at present being carried out by a number of Canadian firms for reinstatement of former employees now in the Armed Forces after their discharge. These companies have adopted the policy of writing to their former employees, assuring them of the intention to place them, and asking for information that would aid the firm in making the necessary arrangements.

Such letters are reported to be beneficial to the morale of the men in the Forces. Moreover they provide assistance to employers in meeting the problems of reinstatement, which are said to be heightened in same cases where the proportion of enlisted men to plant payrolls runs over 50 per cent.

One large firm (as reported in *Canadian Business*, November, 1944) which has 2,200 former employees on active service, sent out a questionnaire to which over 1,400 replies were received. Inquiries were made as to whether the man intended to return to his old employment, and if so whether he wanted his old job back or would prefer to work in another department, and whether he had received any technical training that he would like to use in peacetime.

Replies indicated that over 97 per cent of those answering planned to return to the company. Of these, 63 per cent would be satisfied to return to their old jobs. On the other hand 29 per cent wanted a change; for instance 56 men were hoping to drive trucks on their return, although only two of these had driven for the company before the war. Although less than 15 per cent of those replying had received technical training, it was indicated that there would be two prospective machinists for every machinist who enlisted, and three electricians for each man who had formerly been in the electric shops. Information of this sort is considered valuable by the company in planning the adjustments necessary to carry on its reinstatement program.

Under the Reinstatement in Civil Employment Act (1942) employers are required to reinstate a war veteran in his original job, or to re-employ him under conditions "not less favourable than those which would have been applicable to him had he remained in the employment of the employer." (L.G., July, 1944, p. 815; 1942, p. 920.)

Manpower

Canada's Manpower Distribution at June 1, 1944

THE accompanying table shows the distribution of Canadian manpower 14 years of age and over as at the beginning of June, 1939, 1941, 1943 and 1944. A comparison of the numbers of men and women employed in the various categories enumerated in the table indicates the changes that have taken place in the overall employment pattern since the outbreak of war in 1939.

During the five-year interval from June 1, 1939 to June 1, 1944, there was a natural increase of 606,000 in the population aged 14 years and over. At June 1, 1944, out of the total of 8,865,000 persons in this age group, 5,016,000 or 56·5 per cent were "gainfully occupied" or in the armed forces. As compared with employment at the pre-war date, June 1, 1939, this represented an increase of 1,323,000 in the total number of men and women thus employed; increases during this period were 30 per cent in male workers, 64 per cent in female workers, with an overall increase of 36 per cent.

Armed Forces

The strength of the armed forces has been augmented by 774,000 since the outbreak of war, with an increase of 56,000 during the year ended June 1, 1944. Of the total service personnel at that date, 36,000 were women volunteers. The number of women in the three services showed a 33 per cent increase during the year ended June 1, 1944. The number of men in the armed forces rose from 701,000 to 748,000 during the year—a 7 per cent increase.

Male Workers

It is estimated that there were 3,930,000 men in the armed forces or "gainfully occupied" at June 1, 1944, including 780,000 engaged in war industry, 1,082,000 in civilian industry and another million men in agriculture. The estimates of male employment in agriculture and civilian industry were lower than those at the pre-war date June 1, 1939, by 17 and 25 per cent, respectively. The number of male students 14 years and over also declined by 33 per cent during the five-year period.

Women Workers

There has been a remarkably rapid rise in the number of women working for wages or salary during the five years of war. Out of 5,016,000 persons in the armed services or "gainfully occupied" as it June 1, 1944, more than one million or 22 per cent were women. This does not take into account an estimated 775,000 farm women between the ages of 14 and 64, mostly farmers' wives and daughters whose work extends beyond the ordinary household tasks and has supplemented the male labour required to maintain record farm production during the past three years. There are, in addition, many part-time women workers and some 230,000 women students aged 14 years and over, many of whom have taken temporary jobs during the holidays.

Much of the expansion in the employment of women has been in war industry. At June 2, 1941, there were only 40,000 women thus employed. Two years later the number had increased to 230,000 and although reduced to 195,000 during the next twelve months, female employment still accounted for 20 per cent of the total employment in war industry at June 1, 1944. The influx of women workers into civilian industry has been even more pronounced. At June 1, 1939, there were 543,000 women workers, which was 27 per cent of the total employment in civilian industry at that date. Five years later the number of women workers had increased to 745,000 which was 41 per cent of a total of 1,827,000 persons employed in civilian industry at June 1, 1944. At the same time there has been a decline of 27 per cent since June 1, 1939, in the number of women students aged 14 and over.

V. All Others—includes homemakers not on farms					353	2,181	2,534	29·8	340	2,194	2,534	28·9	360	2,210	2,570	29·0

NOTE.—The above estimates were prepared by the Research and Statistics Branch, Department of Labour, and are based on the most recent information obtainable from the Dominion Bureau of Statistics and other official sources. In some cases, (such as domestic servants, agricultural males, farm women, and employers, own accounts and no pays), they are subject to a possibility of considerable error, as little statistical information is available except at the census date of the decennial Census, June 2, 1941.

(i) Includes prisoners of war and persons missing but still on strength. Excludes persons enlisted but on leave and engaged in civilian occupations.

(ii) Does not include women gainfully occupied on farms or in farm homes, who are included in Item II. Does not include wage and salary workers who are temporarily unemployed owing to "No job" or "Lay-off."

(iii) Includes employment on direct and indirect war production and construction, and the war content of employment in ancillary industries.

(iv) "Own accounts" are persons who carry on their business without assistance of employees. "No pays" are mainly family workers receiving no fixed money payment.

(v) Since it is impossible to measure statistically the amount of farm work done by women, all women residing on farms are here included except students, women 65 years of age and over and those gainfully occupied outside the farm.

(vi) In 1943 and 1944 the number of unemployed was accounted for almost entirely by persons temporarily out of work while moving from one job to another.

Employment of Members of Canadian Army

AN Order in Council was passed on October 3 authorizing the employment of members of the Canadian Army, including persons called up under the National Resources Mobilization Act, on projects deemed to be in the national interest.

The text of the Order is as follows:—

P.C. 7429

Whereas the Minister of National Defence reports that, —

(*a*) It is desirable to have authority to make available members of the Canadian Army on active service as might be spared from their military duties for the carrying out of projects which are in the national interest or have for their object the benefit or welfare of members or ex-members of the Armed Forces of Canada or which are in the opinion of the Minister of National Defence and the Minister of Labour essential to the efficient prosecution of the war.

(*b*) It is deemed necessary to provide that

(i) military personnel when employed in work of this character should be deemed to be performing a military duty;

(ii) in respect of such work the provisions of the Pensions Act, Chapter 157, Revised Statutes of Canada, 1927, as amended, should apply in respect of such personnel and their dependents in like manner and to the same extent as if death or injury arose out of or was directly connected with military service as defined in the said Act;

(iii) each member of the military forces of Canada while performing such service shall continue to receive his military pay and allowances, including dependents allowance.

Therefore, His Excellency the Governor General in Council, on the recommendation of the Minister of National Defence, concurred in by the Minister of Labour, and pursuant to the provisions of the War Measures Act, and the National Resources Mobilization Act, 1940, is pleased to make and doth hereby make the following Order:

ORDER

1. All members of active units and formations of the Canadian Army, including persons called up for training, service or duty pursuant to the provisions of the National Resources Mobilization Act, may on the authority of the Minister of National Defence be required to perform any service or duty upon or in connection with any project or undertaking in Canada which the Minister of National Defence and the Minister of Labour deem to be in the national interest.

2. All orders given or issued by the appropriate military authorities pursuant to the provisions of this Order shall be deemed to be lawful orders given by a superior officer, disobedience of which shall constitute an offence under Section 9 of the Army Act, and the said section shall, as a part of the law of Canada, be construed accordingly.

3. The Minister of National Defence and the Minister of Labour are hereby authorized to make all necessary financial and other arrangements with any person relating to such employment and to make such provisions as are necessary for the collection and disposal of remuneration payable to the Crown by employers in respect of service or duty performed by members of the Canadian Army as aforesaid.

4. All members of the Canadian Army performing services or duties specified in paragraph 1 hereof, pursuant to the lawful orders of their superior officers, shall, for the purpose of the Pensions Act, the National Resources Mobilization Act, the Militia Act, the War Measures Act, the War Service Grants Act and all regulations and orders made thereunder, be deemed to be performing military training, service and duty as prescribed therein.

5. The Minister of National Defence is hereby authorized to do all such acts and things and to issue such orders and make such regulations as he may deem necessary or advisable in connection with the employment of members of the Canadian Army as aforesaid.

6. The Minister of Labour is authorized to reimburse the Department of National Defence for such expenditures incurred by that Department pursuant to this Order as may be mutually agreed by the Minister of National Defence and the Minister of Labour.

7. Expenditures made by the Department of Labour and amounts collected by the said Department pursuant to this Order shall be paid out of or into, as the case may be, the revolving fund known as the Army Labour Account established under the provisions of Order in Council P.C. 6434 of August 13, 1943.

Report on Conference of Women Officers

A CONFERENCE was held in Ottawa, October 12 to 17 inclusive, of Women Employment Advisers and Supervisors from the Unemployment Insurance Commission and National Selective Service Offices across Canada.

The main purpose of the conference, which was under the chairmanship of Mrs. Rex Eaton, Associate Director, National Selective Service, was to discuss matters affecting the transfer and placement of women during the transition period between war and peace, and the new angles of approach to problems which will emerge with the return to peacetime.

The Women Employment Officers who were in attendance listened to speeches from government officials, and adopted recommendations relating to the Employment Service.

In an opening speech of welcome, the Honourable Humphrey Mitchell, Minister of Labour, voiced his appreciation of women's work during the war and expressed the opinion

that the Women's Division of the U.I.C. had done an excellent job in recruiting women for essential work during one of the most critical periods in Canadian history.

Mr. Arthur MacNamara, Deputy Minister of Labour and Director of National Selective Service, said there was need of intensive preparation for the important work of placement and employment research during the transition period. To this end he urged the fullest discussion on all topics affecting the work of N.S.S. and said that the findings of this conference could prove of great assistance in the formulation of policies during the coming months.

Mr. MacNamara presided during a session devoted to the future program of the Employment Service.

Mr. Allan Mitchell, Director, Employment Service and U.I.C., urged continued improvement of the quality of service given through the Employment Service and the expansion of its function to meet the greater needs and problems attendant on the change-over from war to peacetime employment.

Mr. W. K. Rutherford, Assistant Director, Employment, U.I.C., outlined the original plans made by the Commission to carry out the provisions of the Unemployment Insurance Act and the subsequent rapid expansion due to war demands. Dealing with plans now being developed he considered that many responsibilities might be assigned to the Employment Service in connection with employment problems in the transition and post-war periods.

As an important factor affecting employment prospects, the future pattern of production during the transition period was dealt with by Mr. A. E. McMaster, Assistant Co-Ordinator of Controls, Department of Munitions and Supply and Mr. G. E. Raley, Assistant Chief, Industrial Division, Wartime Prices and Trade Board.

General statements were given by several supervisors, which, supported by figures from the Research and Statistics Branch, showed that the Pacific Region already had a small surplus of women, particularly in the clerical occupation. The Prairie Region, except possibly Edmonton, had overtaken the demand. The Maritime Region had no shortage of women workers. The Province of Quebec could meet the requirements except in Montreal, where the local situation would be relieved shortly by impending lay-offs. In Ontario, Toronto and Hamilton continued to be short of women. (It was pointed out that in every area there are certain occupations and industries in short supply of workers, particularly where conditions of work are unfavourable.)

The conclusion drawn from these addresses and statements was that the problems which will mark the transition period will not be spread evenly over the whole of Canada but will crop up from time to time in certain localities or areas.

On the basis that employment opportunities for women during the transition period will not be less than those in 1941 (when approximately 630,000 were employed as wage earners), the conference studied the possibilities for increases in employment of women in various occupations and industries. Working toward this objective the conference recommended that research in employment opportunities for women be instituted.

Further recommendations dealt with the training projects, staff requirements as related to numbers and quality of personnel, staff training and the establishment of special sections for vocational guidance and placement of youth and the general improvement of the Service.

The relationship of the Employment Service to community and social agencies was also considered.

Mrs. G. D. Finlayson, representing, the National Council of Women, gave the view of organized women regarding certain phases of employment for women after the war and urged a study of wages, hours and conditions in domestic service.

The discussions were assisted also by the following speakers and consultants:—

Mr. Louis J. Trottier, Chief Commissioner, U.I.C., who spoke on the place of the Unemployment Insurance Act in a National Social Security Program.

Mr. R. J. Tallon, Commissioner, U.I.C.: The work of the Advisory Committees.

Mr. R. G. Barclay, Assistant Director (Insurance) U.I.C.: The working requirements of the U.I.C. in peacetime as compared to conditions during the war.

Mr. Harry Hereford, M.B.E., Director of Planning, National Selective Service, Special Assistant to Deputy Minister of Labour, gave a resume of the objectives and anticipated results of the Government post-war employment survey, undertaken all over Canada to check on possibilities for employment in the transition period.

Mr. H. C. Hudson, Supervisor of Special Placements, Employment Service: Placing handicapped persons; training and vocational guidance and placement for youth.

Mr. V. C. Phelan, Director of Information and Publicity, Department of Labour: Publicity.

Mr. Gordon Anderson, Information Officer (Radio): Radio Publicity.

Brigadier-General G. E. Lyon, Veterans' Placement Officer, Employment Service: The Rehabilitation of Women from the Armed Forces.

During the last two days of the conference a training institute was held under the direction of Mr. Ted Parkinson, Supervisor, Staff Training, U.I.C., Mr. E. P. Laberge, Ph.D., Chief, Operations Division, U.I.C., Mr. Rene de Cotret, Supervisor of Planning, U.I.C., and Mr. S. E. MacLean, representing the Chief Enforcement Officer, U.I.C.

Re-Allocation of Manpower in Great Britain

Arrangements for Interim Period Between Defeat of Germany and Defeat of Japan

A WHITE Paper issued by the Ministry of Labour and National Service in September describes the plan to be followed by the Government of Great Britain in the re-allocation of manpower between the Armed Forces and civilian employment during any interim period between the defeat of Germany and the defeat of Japan.

The Paper points out that "general demobilization, either of the Armed Forces or of war industry, cannot take place until the end of the war against the Axis Powers and their total defeat throughout the world." There is to be no break in the war effort before the final overthrow of both the Axis partners. However, during the interim period before the defeat of Japan it is considered that re-allocation of manpower between the Armed Forces and industry will be possible on a substantial scale.

It is considered essential in the first place to continue the compulsory recruitment of men for the Forces in order to bring relief to the men who had served for long periods and to enable them to return to their homes.

The Government adheres to the view that a fair and reasonable scheme can best be secured on the basis of release according to age and length of service, the Paper states. However, it is considered necessary to make a limited provision for certain urgent work of reconstruction on which a beginning must be made in the interim period. Accordingly, the plan provides for two separate methods of selecting men for return from the Forces. Those selected according to age and length of service will form one class (Class A) and those selected on account of their qualifications for urgent reconstruction work will form a second class (Class B). In any case, no man will be released or transferred from the Forces if his retention should be considered necessary on military grounds and men released or transferred will be given an opportunity to volunteer for a further period of service. Men of 50 years of age and over will be treated as a priority class to be released, if they so desire, before other men.

Releases in Class A will begin as soon as possible after the defeat of Germany. The combination of age and length of war service will be "on the basis that two months of service is equivalent to one additional year of age."

The men in Class B will be "those identified as belonging to particular occupational classes, specified by the Minister of Labour and National Service as required for urgent reconstruction employments". They will be selected mainly "to suplement the labour force available for building houses against the time when sailors, soldiers and airmen will be returning in large numbers to civil life". In addition, Class B "will include a number of individual specialists for whose transfer application may be made through government departments in accordance with existing arrangements". With a view to increasing the transfers in Class A, and also to compensate for the transfers in Class B, younger men at present deferred will be called to the Armed Services.

Men in Class A will, on release, be given eight weeks' leave with full pay, ration allowance and, where applicable, family allowance, dependent's allowance and war-service grant, to assist in re-settlement. Additional leave and allowances will be granted for foreign service of six months or more. At the expiration of leave, Class A men will be placed in a special reserve from which they will be recalled only in case of extreme emergency. They will be permitted to return to their pre-war employment, or the Employment Exchanges will give them every assistance in finding employment, without any restrictions other than those generally operative.

Men in Class B will be given three weeks' leave on transfer, with full pay, ration allowance, and, where applicable, family allowance, dependent's allowance and war service grant and will then be placed in the Reserve. Payments due on account of foreign service to men in Class B will be held in suspense until after the end of the war. They will be directed to reconstruction employments and will be liable to be recalled individually to the Forces if they discontinue their reconstruction employment. Men selected for transfer to Class B will, in the first instance, be given the option of awaiting their normal return for release in Class A.

Compassionate release may be given in accordance with arrangements already in force. Men to be discharged on medical grounds will receive the same benefits as men released to Class A. In addition to the service leave payments, it is the Government's intention to introduce a system of war gratuities by way of reward for service. Men released or transferred may, if they so desire, claim pension for disablement due to war service by applying to the Ministry of Pensions. They will also be given civilian clothes if they have at least six months' service to their credit.

The arrangements for the release and transfer of men from the Forces will also apply to women, with the addition that married women will have priority over all others, if they so desire. A cash grant and clothing coupons will be given to women in lieu of civilian clothing as provided for men.

Employment of Workers for Christmas Rush

The hiring of extra workers by retail stores and the Post Office Department for the Christmas rush season has been simplified by a special Order signed by Hon. Humphrey Mitchell, Minister of Labour, under National Selective Service Civilian Regulations, it was announced recently by Mr. Arthur MacNamara, Director of National Selective Service.

From December 4 to January 5, 1945, retail businesses may engage—without first securing National Selective Service permission—students and teachers on Christmas vacation, any woman, and any man who has passed his fifty-ninth birthday.

The Post Office Department may employ persons in the same categories without permit from December 1, 1944, to January 10, 1945.

If the employer—either a retail business or the Post Office Department—wishes to retain a temporary employee beyond the permit exemption period, it will be necessary to secure a Selective Service permit.

Mr. MacNamara pointed out that in relaxing the regulations to ease the Christmas rush, it is still necessary to maintain employment controls in general for the protection of essential industries.

Canada's Wartime Industrial Achievements

The latest issue of *The Industrial Front*, a 400-page volume, has been recently released for distribution by the Department of Munitions and Supply. It "tells the story of the industrial war effort of Canada up to the end of 1943, the year in which the production of arms reached its peak". In a foreword to the volume Hon. C. D. Howe, Minister of Munitions and Supply, states that "those who read this record will learn little of the toil and problems involved, but they will learn the industrial achievements of Canada in 1,500 days of war, and . . . they may glimpse something of what Canada can and will become when the war clouds pass away."

The subject matter is treated under the following chapter headings: (1) Aircraft; (2) Ammunition; (3) Automotive Vehicles; (4) Chemicals and Explosives; (5) Construction (6) General Purchases; (7) Guns and Small Arms; (8) Ships; (9) Signals and Communications; (10) Solid Fuels and Gas; (11) Machine Tools; (12) Metals (non-ferrous); (13) Oil; (14) Power; (15) Rubber; (16) Steel; (17) Supplies; (18) Timber; (19) Transit Services; (20) Transport Services; (21) Crown Properties and Crown Companies; (22) Administration and Operation; (23) Genesis and Growth.

A statistical analysis covering some of the operations of the Department and of its two predecessor Boards is given in an appendix. The value of the book for reference purposes is enhanced by the inclusion of an index. Copies of the volume may be procured from the King's Printer, Ottawa, at a price of 50 cents per copy.

Social Security

Social Insurance in Great Britain

Proposals Announced by Government for Implementation After War

PROPOSALS for a new scheme of social insurance are contained in a White Paper recently published by the Government of Great Britain. The plan is based upon and is largely similar to that which was recommended in the Beveridge Report[1] two years ago. It seeks to provide protection for the entire population against the extremes of poverty, whether caused by unemployment, ill health, old age, bereavement, or inability to provide for children.

The official announcement of the British Government's intention to proceed with such a plan follows by a few months a statement of policy on a closely related matter, the maintenance of employment. In an earlier White Paper, *Employment Policy*,[2] the Government undertook to accept responsibility for the maintenance of a "high and stable level of employment" after the war.

The plan set forward in the present paper, *Social Insurance*, constitutes a supplement to the employment program in that it is intended to take care of the "hazards of personal fortune over which individuals have little or no control", and which may arise even under conditions of high employment and national prosperity.

The Paper is in two parts, the first of which is on social insurance in general, and the second of which outlines the Government's proposals for a new scheme of workmen's compensation. The second part is summarized separately at the conclusion of this article.

The basis of the social insurance scheme is that persons will pay weekly a single contribution into a social insurance fund, and will thus entitle themselves to receive a variety of benefits if needed. The entire population is to be covered, and the scheme will be compulsory for everybody.

The types of benefits to be provided include the following, some of which are already provided in Great Britain in a modified form: family allowances, orphans' allowance, sickness and unemployment benefit, training allowances, retirement pensions, invalidity benefit, maternity grants, provision for widows, and death grants. In addition there will be a comprehensive health service, including medical care, hospitalization and public health measures for the prevention of disease; this program has already been outlined in a White Paper.[3] Finally there will be a national assistance program to provide for specially necessitous cases upon proof of need.

The social insurance scheme will be financed partially by weekly contributions from the insured population, but the greater part of the fund will be raised by direct taxation. For the first year the total expenditure is estimated at £650,000,000, of which £352,000,000 will be met out of the national revenue. The costs of family allowances and national assistance are to be met directly from taxation; the insurance sections of the scheme will be financed jointly by employers, employees, other insured persons, and the Government.

Benefit Provisions

The insurance benefits under the scheme are conditional on a prescribed minimum number of insurance contributions having been paid.

A summary of the major benefit provisions of the plan follows:—

Family Allowances

A weekly cash allowance of five shillings, derived from taxation, will be introduced, and will be supplemented by services in kind, including meals and milk at schools. As it is considered "reasonable to assume that one child at any rate can be maintained from family earnings", the cash allowance will not be paid in respect of the first child in the family, except during such time as the head of the family may himself be in receipt of unemployment or other benefit. Children will be eligible to receive allowances as long as they are below the upper age-limit for compulsory school attendance; those above that age-limit who remain at school or are apprentices will be eligible up to the July 31 following their sixteenth birthday.

[1] *Social Insurance and Allied Services:* Report by Sir William Beveridge—(L.G., Jan., 1943, p. 46.)

[2] L.G., Aug., 1944, p. 942.

[3] L.G., April, 1944, p. 443.

The order for payment of the allowance will normally be made out in favour of the father, but will be drawn in such a way as to enable the mother to cash it also, the Paper states.

Orphan's Allowance

For every child both of whose parents are dead there will be a weekly allowance of 12 shillings, of which 5 shillings will come from taxation and 7 from insurance funds.

Sickness and Unemployment Benefit

Cash benefits will be payable to those unable to work either through unemployment or sickness. The rate will be the same in both cases, 40 shillings a week for a married couple and 24 shillings for a single person.

There will be a waiting period of three days before benefit becomes payable; however if sickness or unemployment lasts for at least four weeks, benefit for the first three days will then become payable.

The Beveridge Report had recommended that unemployment and sickness benefit be of unlimited duration. The Government, however, has considered it "reasonable and prudent" that limitations be imposed. Accordingly sickness benefit will be paid only for the first three years of any continuous illness; and if at the end of this period the contributor is still incapable of work he will become eligible instead for invalidity benefit at the standard retirement pension rate. Unemployment benefit is limited to thirty weeks in any continuous period "together with additional days where the contributor has a good record of employment in recent years". If still unemployed at the end of this period

TABLE I—CLASSIFICATION OF POPULATION

Class	Numbers in thousands		
	Men	Women	Total
I Employed persons	13,350	4,750	18,100
II Others gainfully occupied	2,150	450	2,600
III Housewives, including those gainfully occupied	.....	9,650	9,650
IV Other persons of working age	1,000	1,250	2,250
V Children under 15, or 15-16 at school	5,150	4,950	10,100
VI Persons above working age who have retired	1,200	3,600	4,800
	22,850	24,650	47,500

TABLE II—RATES OF CONTRIBUTION REQUIRED FOR SOCIAL INSURANCE BENEFITS (INCLUDING HEALTH SERVICES AND WORKMEN'S COMPENSATION)
(per week)

—	Class I			Class II	Class IV

Aged 18 and over	3 10	3 1	6 11	4 2	3 4
Aged 16-18	2 5	2 1	4 6	2 9	2 2
Women—					
Aged 18 and over	3 0	2 5	5 5	3 6	2 8
Aged 16-18	2 0	1 7	3 7	2 5	1 10

TABLE III—SUMMARY OF MAIN BENEFIT RATES

—	Sickness Benefit	Invalidity Benefit	Unemployment Benefit	Retirement Pension
	s. d.	s. d.	s. d.	s. d.
Single man or woman	24 0	20 0	24 0	20 0
Married man with gainfully occupied wife	40 0	35 0	40 0	35 0
Married man with wife not gainfully occupied	16 0	16 0	20 0	20 0
Married woman gainfully occupied	16 0	15 0	16 0	—
Dependant's allowance where payable				

the contributor becomes eligible for national assistance, which will, however, be subject to proof of need and examination of means.

The cost of unemployment benefit and assistance has been estimated by the Government on the assumption that an average of 8½ per cent of insured persons will be out of work at any time.

Training Allowances

The Government considers that training schemes are "of the utmost importance in preventing unemployment and in securing fluidity of labour, and that claimants unreasonably refusing to undergo a course of training should be disqualified from receiving unemployment benefit". When an unemployed person takes a course of approved training or industrial rehabilitation, he will receive a training allowance at a higher rate than unemployment benefit, the cost of which will be met by taxation instead of insurance. This training allowance will not reduce the total number of days of unemployment benefit due him. People who, after training, are transferred to jobs away from home will receive a settling-in allowance for the first few weeks.

Retirement Pensions

The minimum age of retirement will be 65 for men and 60 for women. The standard rate will be 35 shillings for a married couple and 20 shillings for a single person. The joint pension will become payable when the husband qualifies, whatever the age of the wife, provided that if she is under 60 she is not gainfully occupied.

Pensions will be paid only to those who have retired, and will be reduced if more than 20 shillings weekly is earned during retirement. Those who postpone retirement beyond the age of 65 (or 60 for women) will, when they do retire, get pensions increased by 2 shillings a week (joint) and 1 shilling (single) for each year of work after pensionable age.

Although pensions will eventually be dependent on contributions, those who are already of pensionable age or approaching it

TABLE IV—ESTIMATED EXPENDITURE AND INCOME, 1945-1975 (EXCLUDING WORKMEN'S COMPENSATION)
(in £ millions)

—	1945	1955	1965	1975

Interest on existing funds	15	15	15	15
Balance of expenditure, to be met from Exchequer (or local rates)	352	436	506	557
Total Income	650	731	796	831

when the scheme is instituted will receive the full rate even though they cannot make full contributions.

The Government estimates that owing to the decline in the birthrate there will be a rise in the proportion of elderly people in the community. It is expected that the number of pensioners will increase from 3,400,000 to 6,100,000 between 1945 and 1975, while the contributing population will fall from 21,000,000 to less than 20,000,000. The result of these changes is that, whereas in 1945 it is estimated that there will be 16 pensioners to every 100 contributors, there will, by 1975, be about 31 pensioners to every 100 contributors. This will increase the cost of the plan.

Maternity Grant

For childbirth, a maternity grant of £4 will be available. In the case of gainfully occupied women there will also be maternity benefit at the rate of 36 shillings a week for 13 weeks, provided that the woman is absent from her employment for that length of time. Women not eligible for maternity benefit will receive an attendant's allowance of £1 a week for 4 weeks. These benefits are dependent on contributions. They are available to unmarried mothers as well as to wives.

Widow's Benefit

Widows will receive 36 shillings a week for the first 13 weeks of bereavement. A guardian's benefit of 24 shillings will be paid as long as the widow has in her family a child within the qualifying age for family allowances. Those who are over 50 when widowed will receive a pension of 20 shillings a week following the expiration of the higher benefit rate of the first 13 weeks. Benefits will terminate on remarriage.

Death Grant

A death grant will be paid varying in rate between £6 and £20 according as the age of the deceased varies between 3 and 18.

National Assistance

The administration of the National Assistance program will be separate from that of the insurance scheme. Its purpose is to protect those who are ineligible for benefits and who are in need. (For instance the Government estimates that of those who are unemployed at any time, 20 per cent will have exhausted their right to benefit and will require assistance.) Claimants for National Assistance will be subject to a means test.

Other Benefit Provisions

Apart from maternity and widow's benefit the insurance needs of married women are to be met substantially through the husband's position in insurance. Special arrangements have been devised, however, for married women who are employed. A grant payable to women on marriage, which was recommended in the Beveridge Report, was considered by the Government; but it was felt that the increase to contributions that would be necessary would not be justified.

Special arrangements are to be made for sickness benefits to the self-employed; increase in benefits in the case of those who have an adult dependent; the treatment of the blind; the reduction of benefits during maintenance in hospital; and provision to avoid possible duplication of benefits.

Contributions

Although the scheme is universal, its benefit and contribution regulations will not apply uniformly to all sections of the community, but will take into account differences in ways of life and requirements. Thus the population will be divided into six classifications, as follows:—

Class I: Employees.

Class II: Other gainfully occupied (includes employers and the self-employed).

Class III: Housewives.

Class IV: Other persons of working age not gainfully occupied (the smallest class; includes students above compulsory school-leaving age, unmarried women engaged in domestic duties not for pay, persons of private means, and persons who were disabled before the scheme came into operation and thus not eligible for insurance benefits).

Class V: Children below working age.

Class VI: Persons retired and above working age.

The contributing Classes will be Classes I, II and IV. Housewives, children and retired persons will not be required to make insurance contributions.

Members of the contributing Classes will pay rates related to the benefits provided for their particular Class and for Classes III and VI. Unemployment benefit will be restricted to persons in Class I (employees), and sickness benefit and invalidity benefit to persons in Classes I and II (others gainfully occupied). For persons in Class II sickness benefit will be payable only after the first four weeks of incapacity for work. Provision will be made for Class V (children below working age) by

family allowances, and for Class VI (persons retired and above working age) by retirement pensions.

Men in Class I will pay 3 shillings and 10 pence a week as their contribution, with employers adding a slightly smaller amount on their behalf to bring the total to 6s. 11d. Women and youths in this Class make a smaller contribution, with the employer's share in proportion. In Class II the contribution rate for men is 4 shillings and 2 pence weekly, and in Class IV, 3 shillings 4 pence. These rates include the contributions to workmen's compensation and the health service program. Persons in Classes II and IV with an income below £75 a year may elect not to become contributors, in which case they would be eligible for National Assistance upon proof of need.

The Level of Benefit

The Government had under consideration the possibility of basing the rates of benefit on a subsistence level, and varying them with changes in the cost of living. It was decided to reject this plan, because of the difficulties involved. The Government adopted the principle that "the right objective is a rate of benefit which provides a reasonable insurance against want and at the same time takes account of the maximum contribution which the great body of contributors can properly be asked to bear." The Paper points out that "there still remains the individual's opportunity to achieve for himself in sickness, old age and other conditions of difficulty a standard of comfort and amenity which it is no part of a compulsory scheme of social insurance to provide".

Administration

The social insurance scheme will be brought into operation under a Minister of Social Insurance, who will be responsible for the legislative and other preliminary work. On October 8 the appointment was announced of Sir William Jowitt as Minister of Social Insurance. Introduction of a bill dealing with family allowances and another to implement the scheme of social insurance is forecast in the paper at an early date.

The accompanying tables are taken from the White Paper.

Workmen's Compensation in Great Britain

Proposals for a Scheme of Industrial Injury Insurance

THE British Government's proposals for replacing the existing system of workmen's compensation by a scheme of industrial injury insurance are contained in a White Paper which constitutes Part II of the Paper on *Social Insurance* summarized above. The Paper on *Workmen's Compensation* outlines the present system, summarizes the plan put forward by Sir William Beveridge and presents the Government's scheme.

Present System

The White Paper states that the present system was first established in 1897 and is based on the liability of the individual employer under legislation which, where necessary, is interpreted and enforced by the Courts. Compensation is related to average earnings and does not take account of family responsibilities.

The Act has been amended from time to time and at the outbreak of war provided for benefit in cases of total disablement of 50 per cent of earnings, except for workmen earning less than 50s. a week who received from 50 to 75 per cent of earnings. Maximum compensation was 30s. a week. For partial incapacity compensation was a proportion of the difference between pre-accident average earnings and what the workmen was able to earn after the accident. During the war, weekly compensation has been increased by flat rate allowances based on family responsibilities. In fatal cases a lump sum is paid to dependents, the aggregate maximum being £700.

The Beveridge Plan

The White Paper also summarizes the proposals relating to workmen's compensation contained in Sir William Beveridge's Report, *Social Insurance and Allied Services*. The Report recommends that the existing system should be superseded and that provision for industrial disability should be made as part of a unified scheme of social insurance administered by the Ministry of Social Security. Benefit would be paid at a flat rate from a central fund made up of contributions from employers and workers, also paid at a flat rate, and a grant from the Exchequer. Further recommendations include pooling of risks; imposition of a levy, by merit rating or otherwise, on industries scheduled as specially hazardous; payment of benefit for industrial acci-

dents as for all other disability for the first thirteen weeks, to be replaced, if disability continues, by an industrial pension related to the earnings of the individual; compensation for partial disability to be proportionate to loss of earning power; and a single payment to dependants in fatal cases.

The Government's Plan

The White Paper states that the Government agrees that the present system should be replaced by a scheme based on the accepted principles of social insurance and comprehensive in scope; that its cost should be borne by a central fund maintained by contributions from employers, workmen and the Exchequer; that claims should be dealt with by administrative rather than legal procedure; that the scheme be administered and supervised by the authority responsible for the general scheme of social insurance; and that benefit should not be conditional on payment of a minimum number of contributions.

It is declared, however, that the Government is unable to accept some of the main proposals of the Report. These are, the limitation of special rates of benefit for industrial disability to cases of more than thirteen weeks' duration; the proposal to relate industrial pensions to earnings in cases of long term disability; the provision for dependants in fatal cases by a single industrial grant; and the imposition of a special levy on employers in certain industries scheduled as hazardous.

Dealing with these rejected proposals, the White Paper declares that the Government, while agreeing that there should be an initial period during which a temporary allowance should be payable, considers that this allowance should be at a higher rate than that proposed for non-industrial disability. Moreover, the Government does not favour determining the date of transfer from temporary allowance to pension without reference to the condition of the workman. It considers that a more flexible system is required under which the pension can be awarded at a date appropriate to the circumstances of the individual case.

As to the proposal to relate pensions to earnings, the White Paper points out that this contravenes a principle to which the Government attaches importance and which is otherwise adopted generally in the Report, namely, that benefits should vary only with family responsibilities and that, subject to provision for these, there should be uniform flat rates of benefit in return for uniform flat rates of contribution. A further objection noted is that average weekly earnings calculated over a period before the accident do not necessarily represent the normal earning capacity of the workman. "It is urged that it is hard on a workman who meets with an accident when his earnings are relatively low that he should be penalized by receiving correspondingly low compensation, and that the sense of hardship is accentuated if he sees that another workman in the same employment, who has suffered an injury similar to his own, but at a time of good trade, is receiving compensation at a higher rate."

Assessment of compensation in cases of partial disability on the basis of a proportion of the difference between pre-accident and post-accident earnings was also found by the Government to be unsatisfactory. In some cases the workman felt that the work offered to him was unsuitable and would retard his recovery; in others he was reluctant to take employment for fear that his compensation would be reduced and that he would find it difficult to have it restored to the previous level if he failed to make good. For similar reasons it was found that a workman is often reluctant to submit to rehabilitation treatment. On this point the White Paper refers to the Reports of the Interdepartmental Committees on Rehabilitation, issued in 1939 and in 1943 (L.G. 1943, p. 425). The latter report is quoted as strongly deprecating "a system under which the provision of light employment is treated not as part of the rehabilitation process but merely as a factor in determining the quantum of compensation."

As to the proposal for a lump sum payment in fatal cases the Government does not regard lump sum payments as a satisfactory means of assuring an income and considers that the proposed sum (averaging £300 to a total dependant) might often fall short of what is necessary and appropriate.

With regard to the proposal for a special levy on employers in hazardous industries, the White Paper points out that this involves a departure from the principle of all "standing-in" with complete pooling of risks. Furthermore, hazardous industries are hazardous because of the nature of the employment and not because the employers in them are less active in accident prevention or the workmen less careful than in other industries. The Government is not satisfied that merit rating of

employers, based on the risks in particular industries or in individual undertakings, would give employers an incentive to take measures to prevent accidents. It points out that merit rating on this basis is the practice on which insurance against workmen's compensation risks is conducted and from reports of Departmental Committees which inquired into the operation of the Acts and from other information in possession of the Government the practice has not made any marked contribution to safety. If a special levy were made on employers in hazardous industries it is difficult to see why it ought not to be extended to workmen, as the prevention of accidents depended so much on the care exercised by them.

Summary of Government Proposals

The following is a summary of the Government proposals:—

Workmen's compensation will be treated as a social service but, in view of the special benefits to be provided, the scheme cannot be a part of the general system but will be a separate scheme.

The scheme will cover, broadly, all persons working under a contract of service or apprenticeship and non-manual workers without income limit and will apply to accidents arising out of and in the course of employment and to specified industrial diseases.

Benefit and administrative costs will be paid from an Industrial Injury Fund maintained by contributions from employers and workmen, with a contribution from the Exchequer. The weekly contribution will be 6d. from adult men and 4d. from women, shared equally between the employer and the workman, with half the amount for juveniles under 18. Employers and workmen are each to contribute five-twelfths of the cost and the Exchequer one-sixth. Benefits will not depend on a contribution qualification.

The scheme will be administered by the Minister of Social Insurance assisted by an Advisory Committee or Council. Claims will be dealt with by a Pensions Officer subject to right of appeal to local tribunals and to an Industrial Injury Insurance Commissioner whose decision is to be final. Employers and workmen are to be equally represented on the advisory committee and on the local tribunals.

Benefit will not be payable for the first three days of disability if disability lasts less than four weeks. Benefit will be paid at a uniform flat rate and will consist of an industrial injury allowance of 35s. a week, with 8s. 9d. for an adult dependant and 5s. for the first child under 15, the plan being based on the assumption that children's allowances under the general scheme will be paid to the other children. This injury allowance will be payable for an initial period, while the workman is incapacitated for work, and will be replaced, where the disablement is likely to be permanent or prolonged, by an industrial pension, which will not be based on loss of earnings but on the degree of disablement assessed by a medical board, subject to certain rights of appeal to a special tribunal. This allowance will be 40s. a week for 100 per cent disability with proportionate amounts for other degrees. A special allowance of 10s. a week will be payable if the pensioner is unemployable. Allowances will be given for family responsibilities, amounting to 10s. for an adult dependant and 7s. 6d. for a child under 15, in cases of total disability of the workman. Allowances for treatment and for constant attendance will be provided where necessary. The pension will not be affected by subsequent earnings and no provision will be made for cummutation by a lump sum.

For minor disabilities provision will be made for final settlement by an award of a gratuity or a temporary allowance at a special rate, with or without a final gratuity.

In fatal cases a weekly pension of 20s. will be payable to the widow, or 30s. if she is over 50 years of age or is incapable of self-support or has the care of a child. An allowance of 7s. 6d. will be paid for the first child, or 12s. a week if the child is an orphan.

Pensions to parents and other dependants are also provided for in certain cases. A pension of 20s. a week will be payable, whether or not a widow's pension is payable, to a parent incapable of self-support, or 30s. if both parents qualify. Where no pension is payable to a widow or parent, one other adult member of the workman's family residing with him at the time of the injury will be eligible for a pension of not more than 20s. a week if incapable of self-support. A foster-mother will be eligible for a pension not exceeding 20s. a week as long as one child is within the age for allowance under the scheme. An adult member of the workman's family who is not eligible for pension may be paid a temporary allowance of 36s. a week for 13 weeks.

Trends in Medical Care Under Health Insurance

THE Institute of Public Affairs, Dalhousie, has made a study of medical care in two Nova Scotia communities, one of which, Glace Bay, has had a health insurance scheme for 80 years, and the other of which, Yarmouth, obtains medical attention on the usual fee-for-service basis.

The purpose of the survey was to determine what increase and changes in demand for medical attention might be expected under a compulsory system of health insurance. The two areas were studied for twelve consecutive months. All illnesses and ailments which received medical attention were tabulated, as well as the types of care given. The results are described in an article by L. Richter in the *Canadian Journal of Economics and Political Science* for May, 1944, entitled "The Effect of Health Insurance on the Demand for Health Services."

At Glace Bay workers and their dependents are entitled to medical care irrespective of age, sex, occupation, and income; no medical examination is required. The system provides for treatment by general practitioners as long as illness lasts and for hospital care, operations, drugs, and dressings. Cash benefits are paid wage earners in case of disabling illness. Workers, single or married, pay 40 cents a week for the doctor, 40 cents for the hospital, and 30 cents for the relief society; they finance the entire cost of medical and hospital care and a large part of the cash benefit fund. In Yarmouth, medical care services are rendered under the usual present-day system, with fees of $2 for an office call and $3 for a home call. Families of small means pay less, and medical charity is common, since hospitalization is the only provision for health care of the indigent sick.

In the year, out of every 100 persons, 34 in Yarmouth received medical care, and 48 in Glace Bay. The article points out that this does not necessarily mean that illness was less frequent in Yarmouth, but rather that it was less frequently treated.

The article indicates that for all causes except two—diseases of the eye and of the circulatory system (heart)—rates of treatment are higher in Glace Bay than in Yarmouth. Accidents, skin diseases, and colds head the list and bring the insured person to the doctor twice as often as the uninsured. Evidently, under insurance, common colds and minor surgery cases are no longer treated with home remedies, the article comments. Tonsilitis and laryngitis are attended in Glace Bay three times as often as in Yarmouth, and digestive upsets twice as often. Light illnesses and minor accidents seem to be fairly frequent in Glace Bay, more so than in Yarmouth. Professor Richter states that the same observation has been made in the European systems, and it has been found that such cases, when promptly treated, not only do not become serious but also facilitate preventive medicine. The low rate of eye cases (11 per 1,000 persons) in Glace Bay is probably due to the absence of specialist service, according to the article.

The two systems vary widely in the amount of medical services rendered, the article states. A person in Glace Bay had on the average 2.4 medical calls per year; a person in Yarmouth, 1.4 calls. The Glace Bay doctor sees his patient on the average 3.0 times during an illness; the Yarmouth doctor, 2.8 times. Home visits per 1,000 persons are twice as frequent in Glace Bay as in Yarmouth—1,437 as compared to 686. The difference is less pronounced in the rate of office calls—972 to 687. Glace Bay doctors, however, have also dispensed or prescribed medicines and dressings or have given advice in 16,185 cases on the basis of "complaints" reported to them by a member of the patient's family. Glace Bay children under 5 have 2½ times—children 5-14 years, 3 times—the number of calls that Yarmouth children do.

Some of the main findings of the survey as reported in the article, are briefly summarized as follows:

(1) Health insurance is likely to bring about a considerable rise in the demand for health services, with the rate of increase depending to some extent on the previous level of demand. "An increase of 55 per cent" (as found in the survey) "may be considered indicative of the general trend in Eastern Canada if the two communities are deemed to be representative."

(2) A demand level as indicated by the survey seems to be a permanent feature of health insurance, as the Glace Bay System had been operating for about 80 years.

(3) Health insurance appears to be most beneficial for large families and for children.

(4) Health insurance should provide not only care by the general practitioner but also specialists' services. Only illnesses which required specialist treatment were found in the survey to have received more medical attention under the present-day system than under insurance.

(5) Health insurance seems to bring about an excessive demand for drugs if they are obtainable without cost to the patient. An annual rate of more than 3 drugs per person in the survey group was found to exist under insurance.

Reconstruction

Appointment of Ministers of New Departments

APPOINTMENT of Ministers to head the three new government departments for which legislation was enacted at the recent session of Parliament was announced on October 13 by the Prime Minister of Canada, Rt. Hon. W. L. Mackenzie King.

The Hon. C. D. Howe was named Minister of Reconstruction, in addition to his present position as Minister of Munitions and Supply; the Hon. Ian Mackenzie, formerly Minister of Pensions and National Health, assumed the new portfolio of Minister of Veterans' Affairs; and Brooke Claxton, M.P., Parliamentary Assistant to the Prime Minister as President of the Privy Council, was named Minister of National Health and Welfare.

The Minister of Reconstruction will be responsible for preparing and co-ordinating plans and projects for post war reconstruction. He will concern himself with the needs for new employment of the men and women in the armed forces and in industry, and with the job opportunities that will be available; with industrial reconversion and development; and with public works, housing and development of natural resources (L.G., Sept., 1944, p. 1172).

Measures relating to the care, hospitalization, rehabilitation, re-establishment in civil life, and pensions of members of the forces, formerly administered by the Department of Pensions and National Health, will now come under the Department of Veterans' Affairs, which will also administer the recently authorized veterans' insurance, war service gratuities, and re-establishment credits.

The functions of the Department of National Health and Welfare will extend to all matters relating to health, social security and social welfare over which the Parliament of Canada has jurisdiction, including the program for family allowances.

Cabinet Committee on Reconstruction

A Cabinet Committee on Reconstruction has been established, composed of the Minister of Reconstruction, Hon. C. D. Howe, as chairman; Hon. J. L. Ilsley, Minister of Finance; Hon. L. S. St. Laurent, Minister of Justice; and Hon. J. A. MacKinnon, Minister of Trade and Commerce.

The Committee is to formulate and review plans and projects regarding reconstruction, particularly proposals by various departments and agencies requiring financial assistance by the Minister of Reconstruction. The Minister of a department concerned with any reconstruction project will confer with the Committee when the project is under consideration.

British Printing Industry in the Post-War Period

A BULLETIN entitled *Report on Post-War Reconstruction,* issued in May by authority of the Annual Conference of the Administrative Council of the Printing and Kindred Trades Federation in Great Britain deals with post-war planning in the industry under the following headings: Employment after the War, Rehabilitation of the Disabled, Joint Industrial Council Powers and Control of Industry, Functions of the Federation, Wages and Working Conditions, Relations between Unions, and Health and Welfare.

Post-war employment will largely depend upon the supply of materials and plant and the amount of manpower available, the Report states, and recommends that firms whose premises and plant have been destroyed should have priority in rebuilding and acquisition of machinery. Confidence is expressed that the industry will do everything possible to reinstate those who have been engaged in war service and it is recommended that local joint committees be set up to deal with difficult cases. The Report approves the proposal for Government grants for apprentices whose training has been interrupted and recommends that these should be sufficient to make up the difference between the pay received and the adult rate. It was also recommended that journeymen and women be given an opportunity to take "refresher" courses.

The Report considers that disabled veterans should have first claim on the industry, and that a special register should be established

for them. Persons able to return to the industry but unable to continue in their former capacity ought to be provided with suitable training and the industry should supplement the State allowance for that purpose. Transfers from one union to another, the Report continues, should be made easy, and the member's rights preserved as far as possible. Proposals for uniform procedure in accepting transferred members are also being considered.

The section entitled "Joint Industrial Council Powers and Control of Industry" was dealt with in the August issue of the LABOUR GAZETTE (p. 937).

As to the functions of the Federation, the Report suggests the establishment of a Reference and Research Department which would be a centre of specialist knowledge on all matters of print, particularly as affecting the members of unions, and would be available to the unions as a service of the Federation. The Report further proposes that a Reference Department of legal opinions and advice should be instituted which would bring the benefits of such opinions within the reach of all. This department would make contact with the unions only and not with the members themselves. As to education facilities the Report finds that there are already excellent facilities for trade unionists to undertake correspondence and other courses in order to fit themselves for executive positions in the trade union and labour movement and it is recommended that the Federation should help to extend them, providing if possible for a "specialist" line for trade union printing trade workers. Organization of local Federations under a National Federation is also urged.

The Report suggests a system of profit-sharing for the industry under which a central fund would be established under control of the employers' national organization and the Federation or, if desired, through the Joint Industrial Council. Each employer would undertake to reserve a proportion of his profit, which would be calculated according to an agreed formula and forwarded to the fund. At the end of the year the Joint Committee would determine the amount payable to each worker and this amount would be sent to the union for distribution.

In a memorandum on wages submitted by the Secretary, a "minimum wages pact" amongst all the unions in the industry is suggested, since it is "unhealthy for all concerned that wide disparities of rates for the same job should prevail." The Report recommends "that the request for a 40-hour week (with the universal adoption of the 8-hour day and the 5-day week) should be renewed, and that—together with a request for a minimum of two weeks' annual holiday—should be one of the first post-war aims." The reabsorption of men and increase in supply of materials will be gradual, it further states, and should therefore produce no problem for the unions. The introduction of shifts is favoured in preference to regular overtime.

A further section of the Report suggests that a general amalgamation of unions in the Federation would offer few advantages at present, since the Federation itself now performs many of the functions which a centralized executive would be required to fulfil. However, it continues, "the conviction was firmly held that the principle of amalgamation ought to be explored in our (i.e., printing) industry, in the first instance on a sectional basis." Methods must be provided, regardless of the success of sectional amalgamation, for closer working amongst unions. Machinery whereby difficulties between unions could be settled within the industry itself has also been suggested, to be organized as some form of "internal conciliation committee" to which inter-union matters could be referred.

The Report deals briefly with the prevention of industrial disease and accidents and suggests wide distribution of a Federation Handbook, containing information on health and accident precautions, remedies and Government legislation. Health and Safety Committees are recommended to enforce healthful conditions. The Report also lays down practical suggestions to: offset dermatitis by the use of "barrier creams," ensure adequate heating and ventilation, guard against tuberculosis, and provide canteens. Increased attention is being paid to provision of first-aid facilities. An adequate State sickness benefit scheme is considered preferable to a sick benefit in the industry itself.

United Nations Agreement on International Monetary and Financial Problems

MEETING at Bretton Woods, New Hampshire, U.S.A., between July 1 and July 22, 1944, the United Nations Monetary and Financial Conference came to agreement on matters of international money and finance. The importance of the agreements in their effect upon the future peace and prosperity of the peoples of the world, the stimulation of employment, and the improvement of standards of living everywhere, is stressed in the Final Act of the Conference, which has recently been published by the King's Printer, Ottawa.

Representative of forty-four nations, the Conference formulated proposals for an *International Monetary Fund* and for an *International Bank for Reconstruction and Development.*

The *International Monetary Fund,* according to the agreement, will function as a permanent institution, whose members will include the forty-four nations represented at the Conference and such others as may later be entitled to join.

Its primary purpose will be to "facilitate the expansion and balanced growth of international trade", and by this means to contribute to "the promotion and maintenance of high levels of employment" in each of the member nations.

The Conference agreed that broad international action is necessary to maintain an international monetary system which will promote foreign trade. "The nations should consult and agree on international monetary changes which affect each other. They should outlaw practices which are agreed to be harmful to world prosperity, and they should assist each other to overcome short-term exchange difficulties."

Each nation will contribute a quota to the Fund, partly in gold, and partly in its own currency (Canada's quota being fixed at 300 million dollars, out of a total of approximately nine billion). The Fund's resources will be available to the member nations, "thus providing them with opportunity to correct maladjustments in their balance of payments without resorting to measures destructive of national or international prosperity".

In formulating its proposals for an *International Bank for Reconstruction and Development,* the Conference agreed that: "It is in the interest of all nations that post-war reconstruction should be rapid. Likewise, the development of the resources of particular regions is in the general economic interest. Programs of reconstruction and development will speed economic progress everywhere, will aid political stability and foster peace".

The Bank will "assist in providing capital through normal channels at reasonable rates of interest and for long periods for projects which will raise the productivity of the borrowing country". It is agreed also that the Bank should guarantee loans made by others. The Conference decided on the powers and resources which the Bank must have and on the obligations which the member countries must assume.

In carrying out the policies proposed, special consideration is to be given to the needs of countries which have suffered from enemy occupation and hostilities.

Decisions of National War Labour Board

DURING the month of October, the National War Labour Board issued decisions in the following cases:—

Calgary General Contractors Association and United Brotherhood of Carpenters and Joiners of America, Local 1779.

Defence Industries Limited (Verdun Works and Westmount Tool Works), Dominion Wire Rope and Cable Company Limited, and Anglo-Canadian Wire Rope Company Limited, and International Association of Machinists, District Lodge No. 82.

Alberta Nitrogen Products Limited (Calgary) and International Union of Mine, Mill and Smelter Workers, Local 690.

M. Kohen Boxes (Oshawa, Ont.), and United Automobile Workers of America, Local 222.

Oshawa Box and Lumber Co. Limited (Oshawa, Ont.), and United Automobile Workers of America, Local 222.

Le Syndicat d'Oeuvres Sociales Limitée (Le Droit, Ottawa), and Le Syndicat des Imprimeurs-Relieurs Inc.

Metal Stampings Limited (Toronto) and Aluminum Workers of America, Local 35.

Burns and Company, Limited (Calgary, Alta.).

Canada Bread Company, Limited, Weston's Bread and Cake (Canada) Limited, Bryce Bakeries, Limited, and Picardy, Limited, all of Winnipeg, Man., and Canadian Bakery Workers' Union, Local No. 1.

Canadian Car and Foundry Company, Limited (Fort William, Ont.), and Office Employees' Union, No. 23302.

Sun Oil Company, Limited (Toronto, Ont.).

Toronto Asphalt Roofing Manufacturing Company, Limited.

Messrs. E. and A. Gunther Company, Limited (Brantford, Ont.).

Terminal Warehouses Limited (Toronto, Ont.), and Brotherhood of Railway and Steamship Clerks, Freight Handlers, Express and Station Employees.

Chrysler Corporation of Canada, Limited, and United Automobile Workers of America, Local 127.

Kent Grill, Limited (Chatham, Ont.).

Canadian International Paper Company.

Toronto Hydro-Electric System and Canadian Electrical Trades Union, Branch No. 1.

Canadian International Paper Company.

Reliance Industries, Limited (Belleville, Ont.), and United Automobile Workers of America, Local 426.

Old Sydney Collieries, Limited (Sydney Mines, N.S.), and Acadia Coal Company, Limited (Stellarton, N.S.), and United Mine Workers of America, District 26.

Dominion Coal Company, Limited (Sydney, N.S.), and United Mine Workers of America, District 26.

B.C. Shipbuilders' Federation and Dock and Shipyard Workers' Union of Vancouver and District, Local No. 2.

Western Canada Flour Mills Company, Limited (Goderich, Ont.), and International Union of Operating Engineers.

The Ontario-Minnesota Pulp and Paper Company, Limited (Fort Frances Division), and International Association of Machinists, Lodge 760.

Calgary Hotel Licensees and Hotel and Restaurant Employees Local 262, Calgary.

Canadian Manufacturers' Association and Brotherhood of Carpenters and Joiners of America.

Re: Calgary General Contractors Association *and* United Brotherhood of Carpenters and Joiners of America, Local 1779

Reasons for Decision

This is an appeal by the Union from a decision of the Alberta Regional Board dated June 26, 1944 under P.C. 9384 refusing an application for an increase in rates from $1.01 to $1.10 per hour.

The Regional Board found that the increase requested was not "necessary to rectify a gross inequality or gross injustice" (Section 20 (1) (*a*)). We find no basis upon which to say that the Regional Board's decision was wrong and consequently the appeal is dismissed. October 2, 1944.

Re: Defence Industries Limited (Verdun Works and Westmount Tool Works), Dominion Wire Rope & Cable Company Limited and Anglo-Canadian Wire Rope Company Limited *and* International Association of Machinists, District Lodge No. 82

Reasons for Decision

This is an appeal by the Union from a decision dated June 4, 1944 of the Quebec Regional Board. The question submitted to the said Regional Board was the proper method which should be adopted in the merging of the cost-of-living bonus with the basic rate, as required by Section 15 and Schedule A of P.C. 9384. The Union had contended that the bonus should be applied to a 48-hour week. The Regional Board in an order dated May 12, 1944 decided that the contention of the Union was correct. Subsequently it revoked its ruling.

The Company appearing on the hearing urges that inasmuch as the agreement in effect on February 15, 1944 provided that:

> "The normal work week varies from one of 48 hours to one of 60 hours and the normal working day varies from one of 8 hours to one of 10 hours. The basis of payment for overtime shall be time and one-half for all hours worked by any employee covered by this agreement in excess of 10 hours in any one day or in excess of 48 hours in any one week",

the established rate under P.C. 9384 should be determined by applying the amount of weekly bonus to the number of hours normally worked by the respective groups of employees, namely, 48 hours, 54 hours and 60 hours. Substantially the same argument is advanced by the other companies in their written submissions. By Schedule A the rates are to be established by adding to the previous basic hourly rate the amount arrived at by dividing the amount of bonus by the number of normal working hours in each week. The Order provides a definition of what is meant by "normal working hours" (Section 13 (1) (*g*)), as follows:

> "normal working hours" means the hours normally worked by an employee on a full time basis in the standard work week established by practice or collective agreement *and not considered to be overtime,* and where an employer has established a standard work week in accordance with instructions of the National Board for the purpose of computing cost-of-living bonus payable under the War-time Wages Control Order, means the hours comprised in such standard work week."

It seems to us, having regard to the clause in the contracts providing for payment of overtime after 48 hours, that for the purpose of Schedule A the "normal working hours" are 48.

The Regional Board in its later decision referred to section 37 of the previous Order, P.C. 5963, and to the definitions therein contained. However, we are of opinion that the terms of P.C. 9384 govern the determination of this question and must prevail over an interpretation based upon definitions contained in the Order in Council now repealed.

We shall therefore allow the appeal and restore the Regional Board's initial decision dated May 12, 1944. The effective date will be February 15, 1944.

October 4, 1944.

Re: Alberta Nitrogen Products Limited (Calgary), *and* International Union of Mine, Mill and Smelter Workers, Local 690

Reasons for Decision

By leave granted below, the Company appeals from decisions of the Alberta Regional Board dated May 1, 1944 and May 8, 1944 authorizing two weeks' holidays with pay after 5 years' service for hourly-rated employees and directing payment of double time after the first four hours of overtime have been worked.

The appellant, as a practical matter, takes the authorization on vacations with pay as a direction and we shall treat it as a direction. This is another case illustrating the uselessness of issuing authorizations in *contested* cases.

On the matter of holidays with pay, we have in some cases, at the request of the *employer,* allowed 2 weeks' vacation with pay after 5 years' of service or a graduated scale on the basis of one additional day (i.e. additional to the one week under D.B. 17) for each year of service after the first year. But we have never "legislated" an employer into a vacation plan which went beyond the general terms of D. B. 17. It will be noted that in the case of Consolidated Mining and Smelting Company (L.G., August, 1944, p. 950 at 952), the Company had already established conditions more favourable than those of D.B. 17 for its employees of long service. There being a D.B. 17 plan in operation in

this plant, we shall not order the Company to go beyond it.

With respect to the overtime feature, our policy has been against the rule applied for (Canadian Car & Foundry Company Limited, L.G., April, 1944, p. 474; Victory Aircraft Limited, L.G., June, 1944, p. 727), and we find no reason to depart in this case from the policy followed in these previous decisions.

The result is that the appeal is allowed.

We would like to express our appreciation of the care given to the preparation of the material filed by the appellant.

October 2, 1944.

Re: M. Kohen Boxes (Oshawa, Ontario), *and* United Automobile Workers of America, Local 222

Reasons for Decision

An appeal by the Union from that part of a decision of the Ontario Regional Board dated May 26, 1944, directing an hourly rate of 62 cents (cost-of-living bonus included) for "lumber unloaders and pilers". The rate requested was 75 cents.

The Regional Board have directed a schedule of rates for the box-making industry in Oshawa and have set the rate for this classification in this and other similar establishments upon the basis that the work involved was unskilled. There are no circumstances to justify an interference on the part of this Board. The decision of the Regional Board is sustained and the appeal is dismissed.

October 4, 1944

Re: Oshawa Box & Lumber Co., Limited (Oshawa, Ontario), *and* United Automobile Workers of America, Local 222

Reasons for Decision

An appeal by the Union from that part of a decision of the Ontario Regional Board dated May 26, 1944, directing an hourly rate of 62 cents (cost-of-living bonus included) for "lumber unloaders and pilers". The rate requested was 75 cents.

The Regional Board have directed a schedule of rates for the box-making industry in Oshawa and have set the rate for this classification in this and other similar establishments upon the basis that the work involved was unskilled. There are no circumstances to justify an interference on the part of this Board. The decision of the Regional Board is sustained and the appeal is dismissed.

October 4, 1944

Re: Le Syndicat d'Oeuvres Sociales Limitée (Le Droit, Ottawa), *and* Le Syndicat des Imprimeurs-Relieurs Inc.

Reasons for Decision

This is an appeal by the employees' syndicate from a decision of the Ontario Regional Board dated April 19, 1944. The only point in the appeal is that of the effective date. The history of the case briefly is as follows:

In November, 1943, the employees affected notified the Company that when their agreement would be considered on January 1, 1944, that they would require increases in wages amounting in some instances to 20 cents per hour. The Company intimated that it was willing to increase all wages by 8 per cent, effective from January 1, 1944, but that the necessary approval would have to be given by the Regional War Labour Board. Application was made to the Regional War Labour Board on January 10, 1944. The application was heard on March 30, 1944, and decision was given on April 19, 1944, which in effect directed increases in wage rates of approximately 9 per cent, effective from the 1st day of April, 1944. It should also be pointed out that at the hearing the Company had submitted its inability to pay the increases sought and the financial position of the Company was discussed before the Board and was considered by the Board, as is apparent from the material filed by the Regional Board for the purpose of this appeal.

It would, therefore, appear that the Regional War Labour Board had, in exercising its discretion as to the proper effective date under Section 30, Sub-Section 2, of P.C. 9384, taken into consideration all the relevant facts in the matter and that as a result its decision should not be disturbed.

October 4, 1944

Re: Metal Stampings Limited (Toronto) *and* Aluminum Workers of America, Local 35

Reasons for Decision

This is an appeal by the Company from a decision of the Regional Board for Ontario dated January 20, 1944, directing under P.C. 5963 the discontinuance of an incentive bonus system, the establishment of occupational classifications and payment of a schedule of basic hourly rates. The Regional Board gave leave to appeal.

Prior to November 15, 1941, the Company paid individual incentive bonuses in addition to basic rates. Sometime in November, 1942, the Company introduced a plant-wide system of production bonus to solve the difficulties which it alleges had arisen under the individual system.

The Regional Board found that the conversion of the incentive plan from an individual to a collective basis was done illegally, i.e. without proper authorization of the Regional Board, and it proceeded to reclassify the employees and ordered payment of a new set of basic rates.

The evidence of the Company before this Board was quite definite in asserting that the Regional Board had made no proper investigation of the job classifications and plant bonus before introducing the new job and rate schedule.

To require at this time that the provisions of the Finding and Direction of the Regional Board should be made effective would undoubtedly cause disturbance of operations and of employee-employer relationships in the plant. There might be justification for adjustment of some occupational classifications and ranges of wage rates therefor as well as some revision of the details, if not of the principle of the Company's production bonus plan. The National Board is not in a position to give approval to the plan as it stands.

To determine definitely what should be the occupational classifications, the ranges of wage rates therefor and the terms of the production bonus plan, would require additional information regarding plant operations. Any adjustment of these conditions for the future could only properly and satisfactorily be determined in joint consultation between representatives of the Company and of its employees, possibly together with representatives of the Board.

There is also a question as to the existing authorized bargaining agency representative of the Company's employees.

We have, therefore, come to the conclusion that the appeal should be allowed subject to the understanding that representatives of the Company and of the employees should confer with officers of the National Board to determine the classes of work actually performed in the plant operations, the schedule of occupational classifications and ranges of wage rates which might reasonably and fairly be adopted for them under P.C. 5963, as well as the details of the production bonus plan to be applied in connection with such classifications and wage rates.

When this has been accomplished, the determination of the date from which the revised conditions shall be made effective will be a matter for decision.

Finding and Direction will issue accordingly. October 4, 1944

Re: Burns and Company, Limited (Calgary, Alta.)

Reasons for Decision

An appeal from a decision of the Alberta Regional Board dated June 22, 1944 approving in part only an application for an increase of basic rate for occupational classification termed "general supervisor of standards".

The Regional Board have considered the application in the light of all relevant circumstances and we are of opinion that their decision cannot be disturbed and that the appeal must be dismissed.

We wish to note that the salary rate exceeds $250 per month and the employee concerned, by Section 15 (1) of P.C. 9384, is presumed to be above the rank of foreman or comparable rank. It appears to this Board on the evidence submitted that the case might be governed by the Wartime Salaries Order, P.C. 1549. October 5, 1944

Re: Canada Bread Company, Limited, Weston's Bread and Cake (Canada) Limited, Bryce Bakeries, Limited and Picardy, Limited, all of Winnipeg, Man. *and* Canadian Bakery Workers' Union, Local No. 1

Reasons for Decision

This is an appeal by the Union from a direction dated May 31, 1944 of the Manitoba Regional Board standardizing wage rates in the four larger Winnipeg bakeries, with some exceptions in the case of Picardy Limited, ordering payment of a night-shift premium and establishing a standard 48-hour week with

overtime paid at time and one-half. Leave to appeal was granted by the Regional Board.

Applications for wage adjustments had been previously made in these establishments under P.C. 5963, and the Regional Board had on those occasions made a careful study of the rates. Again on this application, a careful and thorough analysis of rates and working conditions was undertaken by the Board and we have reached the conclusion, after full consideration of the Union's submissions, that it is impossible for us to disturb in any particular the Regional Board's finding and direction.

However, it may be useful to express our views with respect to the Union's main ground of appeal, namely, that the Regional Board did not give full effect to the provisions of Section 20 (1) (*b*) of P.C. 9384, by the terms of which a Board may, when it considers it fair and reasonable to do so, authorize or direct employers to increase single rates or rates within a range if such increases do not increase the rates paid in August, 1939, by more than the amount of the appropriate maximum cost-of-living bonus ($4.60 per week or 18·4 per cent of the weekly rate as the case may be).

The evidence indicates that the adjustments made by the Regional Board, prior to this application, when added to the bonus being paid on February 15, 1944 ($1.95 and $1.55 per week), exceed $4.60 in some cases and in other cases are less; the situation varies as between plants. The effect of the section should not be that $4.60 be added to the 1939 rates of the highest paying bakery and then require all others to come up to the same level. We do not think we can properly interfere with the exercise made of its discretion by the Regional Board.

The Companies made reference to this Board's decision in Milne & Middleton, Limited (L.G., April, 1944, p. 471), and to the statement there made that "the cost-of-linving bonus has seen its day". It must be noted that that decision was written under P.C. 9384 as it stood before the enactment of P.C. 1727 and was not governed by the present provision contained in Section 20 (1) (*b*). The cost-of-living bonus, in a sense, was revived for a limited purpose by the amending order and the epitaph inscribed for it in the Milne & Middleton decision became somewhat inaccurate.

October 11, 1944.

Re: Canadian Car & Foundry Company, Limited (Fort William, Ont.) *and* Office Employees' Union No. 23302

Reasons for Decision

By leave granted below, the Company and the Union appeal jointly from a decision of the Ontario Regional Board dated June 26, 1944 refusing approval of the following paragraph in their agreement for 1944-45:—

> In the event of more than the normal day shift being necessary, employees on the second shift will be paid a bonus of $1 per week and for the third shift $1.75 per week. People normally employed at night are excluded from this provision.

Payment of a night work premium to office workers is not a common practice, but no reason appears to us for withholding the premium from office workers when it is being paid to production workers. In line, however, with our recent decisions in the John Inglis & Company Ltd. case (L.G., August, 1944, p. 960), and in the Dominion Bridge Company Limited case (L.G., August, 1944, p. 964), we shall approve the clause only in so far as it affects employees on the third shift. To that extent, the appeal is allowed. Approval will be retroactive to the effective date of the current agreement.

October 11, 1944.

Re: Sun Oil Company, Limited (Toronto, Ont.)

Reasons for Decision

An application for leave to appeal from a decision of the Ontario Regional Board dated June 24, 1944 refusing permission to grant 3 weeks' vacation with pay to employees with 15 years' service or more. Leave to appeal was refused by the Ontario Board.

From the material it appears that the Regional Board in this case held to the view taken in the Northern Electric Company case (L.G., July, 1944, p. 842). We do not think we should interfere and the application is dismissed.

October 11, 1944.

Re: Toronto Asphalt Roofing Manufacturing Company, Limited

Reasons for Decision

An appeal by the Company from a decision of the Ontario Regional Board dated June 10, 1944 declaring the company's "supervisor of production" to be of the rank of foreman and subject to the provisions of the Wages Control Order. As a consequence he would have been entitled to cost-of-living bonus. Leave to appeal was granted by the Regional Board.

The employee's salary was less than $250 per month, and the presumption mentioned in Section 15 (1) of P.C. 9384 does not operate in this case. The question for determination was whether his duties involved "direct supervision" of employees (Section 13 (2) (*b*)). It is admitted that he exercises direct supervision of the employees in the boiler room, paint shop and those unloading raw materials, but on the production machine there are machine runners who exercise constant supervision. In a situation of this kind in a small plant, it is difficult to give the employee concerned a rank above that of a foreman and we are unable to say that the Regional Board made a wrong decision.

The appeal is dismissed.

October 11, 1944.

Re: Messrs. E. & A. Gunther Company, Limited (Brantford, Ont.)

Reasons for Decision

An appeal from a decision of the Ontario Regional Board dated May 18, 1944 declining an application for salary increases to the following classifications: department manager, factory production manager and salesmen. Leave to appeal was granted by the Regional Board.

All of the employees involved are in receipt of a rate exceeding $250 per month and, because of the proviso to Section 15 (1) of the Wages Control Order, P.C. 9384, they are presumed to fall under the Wartime Salaries Order, P.C. 1549. We find on the evidence that the department manager and factory production manager are above the rank of foreman and that the application in respect of them should have been made under the Salaries Order. As to the salesmen we consider that they are not above the rank of foreman and under the circumstances disclosed in the company's brief, particularly to keep the salaried salesmen in line with the salesmen paid on a commission basis, an increase to $80 per week (cost-of-living bonus included) should be authorized from the date of the Regional Board's decision.

October 12, 1944.

Re: Terminal Warehouses, Limited (Toronto, Ont.), *and* Brotherhood of Railway and Steamship Clerks, Freight Handlers, Express and Station Employees

Reasons for Decision

The Company appeals from a decision of the Regional War Labour Board for Ontario dated May 11, 1944 increasing under P.C. 5963 basic wage rates for certain classifications employed in both dry and cold storage operations.

The question for determination is whether the Regional Board proceeded upon the proper comparative basis in applying Section 25. The Company contends that it did not and that its rates should be compared with those paid by certain competing warehousing firms in the area and not with those of the railways. The Regional Board established the dry storage rates on the basis of the railway rates then prevailing and the cold storage rates on the basis of comparison with certain other firms perhaps less competitive but paying higher rates than those referred to by the appellant.

Our conclusion is that the Regional Board having considered all of the factors involved in a proper application of the comparative formula, we can find no basis upon which we can disturb the decision.

The appeal will, therefore, be dismissed.

October 13, 1944.

Re: Chrysler Corporation of Canada, Limited, *and* United Automobile Workers of America, Local 127

Reasons for Decision

This is an appeal by the Union and a cross-appeal by the Company from a direction of the Regional War Labour Board for Ontario dated April 25, 1944 made under P.C. 5963. The facts are the following:—

In October, 1943 the Union applied for a general increase in basic wage rates for the hourly-rated employees in the Company's warehouse located in Chatham. On March 3, 1944 the Regional Board authorized an increase of 5 cents per hour for all the classifications except millwrights and common labour, effective from November 1, 1943. The authorization, as usual in disputed cases, did not settle the matter and the controversy came back to the Regional Board. Then, in accordance with the provisions of Section 25 of the Order, an investigation was made of comparative rates and the Board issued the direction now under appeal granting increases ranging from 2 cents to 7 cents, effective from

January 1, 1944. There is no common labour classification in the schedule attached to the direction.

The Union requests that the general 5-cent increase authorized on March 3, 1944 become mandatory with retroactivity to November 1, 1943. The Company cross-appeals in respect of two classifications which it says should not have been increased, namely, female packers and stockmen. It also submits that the effective date should not be earlier than the date of the Regional Board's decision.

The authorization of March 3 appears to this Board to have been in the nature of a rather rough attempt to dispose of the case; while the subsequent direction of April 25 proceeded from a comparative basis which, having in mind the latitude given by the section, cannot be seriously challenged.

With respect to the Company's cross-appeal, we do not think that the record discloses a reason for upsetting the rates set for the two classifications mentioned therein. The submission that the rate for stockmen should not exceed the common labour rate, which it is said they were getting and remains unchanged, can hardly prevail in the face of the Company's own schedule of classifications and wage rates attached to its original brief to the Regional Board; this schedule makes no mention of there being a common labour classification in the establishment.

As to the effective date, we find that although there is much to be said for the Company's view, we do not think that we should interfere with the exercise which the Regional Board made of its discretion.

The result is that both the appeal and the cross-appeal are dismissed.

October 13, 1944.

Re: Kent Grill, Limited (Chatham, Ont.)

Reasons for Decision

An appeal from a decision of the Ontario Regional Board dated May 29, 1944, by leave granted by the said Board. The application was for approval of a wage schedule which had been established without the authorization of the Regional Board. The appeal is concerned with the following classifications only: head chef, cook and hostess, for which the rates approved were less than those applied for. The Regional Board based its decision upon a comparative survey and had special knowledge of all the circumstances, and we do not propose to interfere with its disposal of the case.

The brief in support of the appeal contains a request for the establishment of a wage rate for two classifications (assistant chef and cashier) which do not appear to have been before the Regional Board. We recommend to the appellant to place the matter before the Ontario Board.

October 12, 1944.

Re: Canadian International Paper Company

Reasons for Decision

An appeal from a decision of the Regional War Labour Board for Quebec dated August 14, 1944 determining that the company's assistant resident managers (Noranda and Maniwaki woodlands divisions) were above the rank of foreman or comparable rank, and revoking its decision of November 23, 1943 by which the resident manager of the Clova division had been ruled to be not above that rank. Leave to appeal was granted by the Regional Board.

The submission is that the duties involved are supervisory rather than executive in character.

We conclude, from the material filed in this case and in the case of the Gaspé division, that the employees concerned in this appeal do not exercise the "direct supervision" contemplated by Section 13 (2) of the Wartime Wages Control Order, 1943, P.C. 9384. It is to be noted also that the proviso to Section 15 (1) creates the presumption that these salaries are controlled by P.C. 1549, the Wartime Salaries Order.

As a consequence we agree with both branches of the Regional Board's decision and the appeal will be dismissed.

October 25, 1944.

Re: Toronto Hydro-Electric System *and* Canadian Electrical Trades Union, Branch No. 1

Reasons for Decision

The Union appeals from a decision of the Ontario Regional Board dated August 29, 1944 refusing to allow an amendment to the agreement between the parties which would give 3 weeks' vacation with pay to certain hourly-rated employees after 15 years of continuous service, and a day off in lieu of statutory holidays for shift employees. Leave to appeal was granted by the Regional Board. The Commissioners did not oppose the application in the first instance nor do they oppose this appeal.

On vacations, the Regional Board followed its accustomed policy of refusing to approve at the present time extensions of vacation plans to 3 weeks. We shall do as we did in the Northern Electric Company (L.G., July, 1944, p. 842), and Sun Oil Company (October 11, 1944) cases and refrain from interfering.

With respect to the other matter mentioned in the application, there does not appear to have been any decision taken by the Regional Board and rather than express an opinion on the subject of time off to compensate for work performed on statutory holidays, we think we should suggest that that aspect of the case be placed before the Regional Board again.

As to the vacations feature, the appeal is dismissed.

October 25, 1944.

Re: Canadian International Paper Company

Reasons for Decision

An appeal from a decision of the Regional War Labour Board for Quebec dated July 28, 1944 determining that the company's acting resident manager, Gaspé Woodlands Division, was above the rank of foreman or comparable rank. Leave to appeal was granted by the Regional Board.

The submission is that on a previous occasion the Regional Board has ruled that a resident woodlands manager was not above the rank and that the duties involved are supervisory rather than executive in character.

We conclude from the material filed that resident managers in the company's woodlands division do not exercise the "direct supervision" contemplated by Section 13 (2) of the Wartime Wages Control Order, 1943, P.C. 9384. It is to be noted also that this is a case where the proviso to Section 15 (1) creates the presumption that the salary is controlled by P.C. 1549, the Wartime Salaries Order.

As a consequence we agree with the Regional Board in finding that its decision of November 23, 1943, was erroneous, and with its conclusion in this case.

The appeal is dismissed.

October 25, 1944.

Re: Reliance Industries, Limited (Belleville, Ont.), *and* United Automobile Workers of America, Local 426

Reasons for Decision

This is an appeal by the Union from a finding and direction of the Regional War Labour Board for Ontario dated April 5, 1944 made under P.C. 5963 and establishing a schedule of ranges of basic rates. Leave to appeal was obtained from the Regional Board.

The appeal in its final form requests a 5-cent hourly increase in the maximum of the range for toolmakers, storesmen and male inspectors, a 70-cent rate for female inspectors and that all storesmen be paid the increased maximum of the range for that classification, namely 75 cents. The Company in its reply brief agrees to a 5-cent increase in the maximum rate for storesmen, but there is no agreement that all should receive the maximum rate.

The Regional Board having based its decision upon a comprehensive and carefully prepared comparative survey of rates both in the industry and in the area, we are unable to give effect to the appeal with regard to maximum rates for toolmakers and male inspectors; nor is the Board prepared to eliminate the range for storesmen. Also we are of opinion that the evidence does not warrant an intervention in the matter of rates for female inspectors.

With regard to the increased maximum for stores employees, we believe the new maximum rate agreed upon should be submitted as part of the new case presently under development before the Regional Board.

The appeal is, therefore, dismissed.

October 26, 1944.

Re: Old Sydney Collieries, Limited (Sydney Mines, N.S.) and Acadia Coal Company, Limited (Stellarton, N.S.), *and* United Mine Workers of America, District 26

Reasons for Decision

This is an application by the Union to bring the datal rate of the electricians employed by these Companies up to the rate paid in the main machine shop and in the electrical department operated by Dominion Coal Company Limited at Glace Bay.

By a previous decision of this Board (L.G., April, 1944, p. 468) the rates in the Dominion Coal electrical department and main shop were made the same, because from its investigator's report the Board had concluded that the work and skill required was such as to warrant equalization, but the Board also

found that the rates paid at Glace Bay should not apply to colliery electricians of Dominion Coal. On this application, the Board does not find that the Glace Bay rates should be extended to the electricians employed by the companies above-noted. These employees perform maintenance work of a more restricted nature than that done at Glace Bay. There is also the added feature that there are agreements in effect which were negotiated in 1944.

The application must be denied.

October 27, 1944.

Re: Dominion Coal Company, Limited (Sydney, N.S.) *and* United Mine Workers of America, District 26

Reasons for Decision

The application is made by the Union for an increase in the contract rate for rock brushing in No. 16 colliery at New Waterford. The request is for payment of $1 for each hole over 5 holes drilled in a brushing face and compensation at 64·7 cents per cubic yard for loose rock stowed at a distance of more than 17 feet from the high side of the roadways. The present contract provides that brushing includes the stowing of broken rock at a distance not greater than 17 feet from either side of the roadways.

The Union bases its claim upon the necessity for special rates to meet abnormal conditions. The Company asserts that present brushing conditions in the colliery do not justify the alterations demanded and that when particularly difficult roof conditions did occur, added compensation was paid to the brushers.

We have come to the conclusion that we should not assume the function of writing into the agreement between the parties special rates to compensate for abnormal working conditions which are not shown to be prevalent, especially when the agreement was signed shortly before this application was made and terminates on January 31, 1945. We must, therefore, deny the application.

October 27, 1944.

Re: B.C. Shipbuilders' Federation *and* Dock and Shipyard Workers' Union of Vancouver and District, Local No. 2

Reasons for Decision

This is an application by the Union for equalization of wage rates paid in each class of sub-foremen and charge hands employed by the four Vancouver shipyards, namely: North Van Ship Repairs Limited, Burrard Dry Dock Company Limited, Burrard (Vancouver) Dry Dock Company Limited and West Coast Shipbuilding Limited.

The request is that the highest rate presently established in the four yards for each of the eight classes of sub-foremen and charge hands be made the uniform single rate for the class, and that where a differential exists as between male and female charge hands, the female rate shall be brought up to the male rate.

The prevailing single rates and ranges of rates are those which were approved by this Board in Findings and Directions issued in January, March and July, 1943, after a study of all the related circumstances.

It has not been shown that any change in conditions has taken place since that time which would now justify the equalization asked for. Certainly it has not been shown that a gross injustice or gross inequality now exists.

We must have in mind that the general purpose of the Wartime Wages Control Order, 1943, P.C. 9384, is the stabilization of wages as established on February 15, 1944. That purpose cannot be achieved by equalization or by recourse to the process which was contemplated by Section 25 of the former Order.

The application must be refused.

October 27, 1944.

Re: Western Canada Flour Mills Company, Limited (Goderich, Ont.) *and* International Union of Operating Engineers

Reasons for Decision

An appeal by the Company from a decision of the Ontario Regional Board dated June 19, 1944 under P.C. 9384 ordering increased hourly rates for power plant employees as follows:—

Shift Engineers from	70 to 95 cents
3rd Class Engineers from	66 to 80 cents
4th Class Engineers from	63 to 70 cents
Coal Passers from	53 to 60 cents

The main argument in support of the appeal is that the wage rates paid to this group of employees were fair and reasonable when compared to rates paid both to similar occupational classifications in the Goderich area and to the other employees in the plant. This kind of submission was pertinent under Section 25 of the previous order in council, but under the present order the comparative situation is not a determining element. The

Boards are now given the power to authorize or direct only such increases as are "necessary to rectify a gross inequality or gross injustice". Evidently Boards have a wide discretion under a formula of this kind.

In this case the Regional Board found that the rates were low and that this condition created the kind of inequality or injustice which the Order contemplates. To rectify the condition it ordered hourly increases of 7 cents for coal passers and 4th class engineers, 14 cents for 3rd class engineers and 25 cents for shift engineers. Evidently the 95-cent rate for shift engineers is a target or ceiling rate which the Regional Board have set in consultation with the provincial authorities dealing with stationary engineers and it proposes to raise rates up to that level. This is a step in a process which would achieve the main purpose of wage control, namely stabilization of the wage structure, but at the level fixed by the Regional Board itself; while what the Order contemplates is that stabilization shall take place at the level established on February 15, 1944 (section 14). Consequently we are unable to accept the amount of increases for shift and 3rd class engineers.

We think that the Regional Board's decision should be varied and that the new rates effective from April 19, 1944 will be:—

Shift engineers (2nd and 3rd class certificates)	80 cents
Firemen (3rd class engineer's certificate)	73 cents
Firemen (4th class engineer's certificate)	70 cents
Coal passers	60 cents

Finding and Direction accordingly.

October 30, 1944.

Re: The Ontario-Minnesota Pulp and Paper Company, Limited (Fort Frances Division) *and* International Association of Machinists, Lodge 760

Reasons for Decision

This is an appeal by the Company from a ruling of the Regional War Labour Board dated June 19, 1944, determining in effect the hourly rate required to be established in accordance with Section 15 and Schedule A of P.C. 9384 for the classification covered by a collective agreement with the respondent Union. The rate to be established under the ruling was the previous basic rate plus 9 cents per hour. The authorized weekly bonus previously paid was $3.57½. Leave to appeal was granted by the Regional Board.

The problem is to apply the definition of the expression "normal working hours" contained in Section 13 (1) (*g*) of the order for the purpose of establishing the new time rate pursuant to Section 2 (1) of the schedule. The definition is the following:—

> "Normal working hours" means the hours normally worked by an employee on a full time basis in the standard work week established by practice or collective agreement *and not considered to be overtime*, and where an employer has established a standard work week in accordance with instructions of the National Board for the purpose of computing cost-of living bonus payable under the Wartime Wages Control Order, means the hours comprised in such standard work week."

There was no standard work week established "in accordance with instructions of the National Board for the purpose of computing cost-of-living bonus payable under the Wartime Wages Control Order".

The relevant clause of the collective agreement reads as follows:—

> "For Fort Frances, the regular hours of employment for day workers shall be 8 A.M. to 5 P.M., Mondays and 8 A.M. to 4 P.M., Tuesdays to Fridays, inclusive, with one hour lunch period beginning at 12 Noon; and 8 A.M. to 12 Noon Saturdays.
>
> "Regular hours of employment for tour workers shall be eight (8) hours per day with tours starting at 8 A.M., 4 P.M. and 12 Midnight.
>
> "All work performed at other than the regular hours of employment shall be considered as overtime and paid for as such at one and one-half times the scheduled hourly rate. An exception to this rule applies in the case of tour workers when waiting for their regular relief in which case straight time is to be paid."

The Union admits that for the tour workers the "normal working hours" are 48 and the amount to be added to the basic hourly rate is 7½ cents, but it insists that for the other employees covered by the agreement the hours are 40 and the resultant hourly addition 9 cents.

It must be noted that rule 5 of Schedule A of the Order referred to in the Company's brief deals with incentive rates, while the rates involved in this appeal are time rates.

The Company submits that for all classifications employed in its mills at Fort Frances and Kenora the normal week is taken as 48 hours and makes it clear that by in effect increasing the rate of the relatively small number of employees concerned in this appeal by 1½ cents long established differentials are disrupted and its wage structure is thrown out of line. That is of course true, but it is a consequence not of the terms of the de-

finition but rather of the introduction of a 40-hour week into this particular agreement. We are of opinion that the Regional Board's ruling was the only one it could make under the Order.

The appellant requests that we give relief from the inexorable effect of the Order, under Section 15 (2). It must be observed that the power referred to is a limited one: we may make rules additional to and not inconsistent with the rules set out in Schedule A, but that is not to say that we can change the meaning given by the Order itself to the expression "normal working hours".

The appeal is dismissed.

October 31, 1944.

Re: Calgary Hotel Licensees and Hotel and Restaurant Employees, Local 282, Calgary

Reasons for Decision

(Oral Decision)

I do not think it is necessary for the Board to delay the decision in this appeal.

The suggestion now made by the Association as to its inability to pay need not be considered. The Association in its submission to the Board having agreed to pay a certain scale of rates on a forty-eight hour week which when properly converted to a fifty-four hour week would mean substantially the same over-all cost as that directed by the Regional Board in the order appealed from, the plea of inability to pay cannot be considered a very serious one.

On the submissions made to the Board to-day we are of the opinion that the appeal should be dismissed. We wish to add this observation: that the basis of comparability used by the Regional Board, namely, that of a comparison of the rates under consideration with the rates in the city of Edmonton, does not appear to the Board to be correct.

The appeal is disallowed.

October 31, 1944.

Re: Canadian Manufacturers' Association *and* Brotherhood of Carpenters and Joiners of America

Reasons for Decision

(Oral Decision)

This Board, having considered the written application on behalf of the companies for leave to appeal, and having heard the representations on behalf of the Union presented by Mr. Christopherson, refuses to grant leave to appeal; and the Board wishes to go on record as strongly disapproving the delaying procedure which is evident in this case. This application should have been brought on for hearing months ago.

October 31, 1944.

Industrial Disputes and Conciliation

Introduction

THE *Industrial Disputes and Conciliation* section contains monthly articles dealing with proceedings under the National Wartime Labour Relations Regulations, Conciliation Work of the Department of Labour, and Strikes and Lockouts in Canada, Great Britain and other countries.

Recent Proceedings under the Wartime Labour Relations Regulations.—Under the Wartime Labour Relations Regulations, P.C. 1003, the Government has extended its jurisdiction over employer-employee relations which are normally exclusively within the provincial field to the extent considered necessary to cover adequately employers and employees in industries "essential to the efficient prosecution of the war", but without attempting to include other industry which has not a direct bearing on war production. In so far as these latter industries are concerned, each province can make its own decision as to whether or not they shall be brought under the Regulations.

Agreements have been made under the Regulations between the Dominion and every province except Alberta and Prince Edward Island providing for the setting up of provincial agencies for the administration of the Regulations.

The work of the Wartime Labour Relations Board (National) is here described in two separate articles. The first deals with applications made by unions for certification and their disposition by the Board; the second describes conciliation proceedings under the Regulations and includes the reports of Boards of Conciliation.

Conciliation Work of the Industrial Relations Branch.—Conciliation proceedings are carried on by the Industrial Relations Branch of the Department of Labour under the provisions of the Conciliation and Labour Act which empowers the Minister to inquire into the causes and circumstances of a dispute, to take such steps as seem expedient for the purpose of bringing the parties together, and to appoint a conciliator or an arbitrator when requested by the parties concerned.

Strikes and Lockouts.—The latest information concerning strikes and lockouts in Canada is published monthly in tabular form, with a summary appearing once a year. The summary of strikes and lockouts in Canada and other countries during 1943 appeared in the LABOUR GAZETTE for March, 1944.

The latest available information as to strikes and lockouts in Great Britain and other countries appears from month to month.

Correction

On page 1236 of the October issue of the Labour Gazette, paragraph 4 of the Report of Board in Dispute between Sitka Spruce Lumber Co. Ltd., Vancouver, B.C., and Employees, the number "54" appears. The chairman of the Board has reported that the figure should be "131."

Applications for Certification Under the Wartime Labour Relations Regulations

THE Wartime Labour Relations Board (National) met for four days during the month of October. During this period the Board received 15 applications, held 6 public hearings, issued 12 certificates designating bargaining representatives, rejected one application for certification, ordered 3 representation votes and gave decisions in two appeal cases.

Certificates Issued

(1) *International Brotherhood of Teamsters, Chauffeurs, Warehousemen and Helpers, Local No. 932 and McArthur & Son Limited and McArthur Transportation Company Ltd., Brandon, Man.* (L.G., August 1944, p. 968).—Following an investigation by an officer of the Board, the local Union and Messrs. E. Houle, S. Strawn, J. Bjarnason, R. Hart, and J. O. Rennick were certified as bargaining representatives for the employees of both companies, except executives, stenographers, clerks, cashiers, despatchers, accountants, and superintendents (foremen).

(2) *National Union of Machinists, Fitters, Blacksmiths, Moulders and Helpers, Local No. 1 and Grand Trunk Pacific Development*

Company Ltd., Prince Rupert, B.C. (L.G., September, 1944, p. 1109).—The Union and Messrs. Malcolm McLeod, G. S. Culhane, L. Duey, J. B. Smith, J. Wide, G. Cowie and D. McPhee were certified as bargaining representatives for all the blacksmiths, hammermen, machinists, machine fitters, moulders, coremakers, ships grinders, furnace men, cupola tenders, brass mixers, crane operators, chargehands, journeymen, improvers, specialists and helpers in the machine shop, blacksmith shop and foundry of the Prince-Rupert Dry Dock and Ship Yard, Prince Rupert, B.C., except foremen, assistant foremen and other supervisory officials. Certification followed an investigation of the application by an officer of the Board.

(3) *Boilermakers and Iron Shipbuilders Union of Canada, Local No. 4 and Grand Trunk Pacific Development Company, Ltd., Prince Rupert, B.C.* (L.G., September, 1944, p. 1109).—Following an investigation of the application by an officer of the Board, the Union and Messrs. G. Stanton, M. MacLeod, A. MacPhee, J. Nicoll and W. White were certified as the bargaining representatives for all the anglesmiths, punchers, shearmen, press operators, bumper men, countersinkers, roll operators, labourers, handymen, chippers, cementers, cementer seams, boiler cleaners and scalers, dockmen, tackle riggers, ships riggers, signalmen (locomotive crane), tower crane signalmen, stockkeepers, issuers, receivers, tractor drivers, bolters-up, truck drivers, steel checkers, tower crane operators, platers-marker boys, platers' boys, boilermakers, burners, welders (electric and acetylene), riveters, holders-on, heaters, passers, reamers, drillers, tappers, steel caulkers, steel chippers, loftsmen, hoister operators (non-swinging booms), bolting-up machine operators, slab mechanics, slabmen, winchmen, steel rackers, linermen, erectors, furnacemen (slab) and chargehands, journeymen, improvers, specialists and helpers of the Grand Trunk Pacific Development Company Ltd. at the Prince Rupert Dry Dock and Ship Yard, Prince Rupert, B.C.

(4) *The Brotherhood of Painters, Decorators and Paper Hangers of America, Local No. 1442 and the Grand Trunk Pacific Development Company Ltd., Prince Rupert, B.C.* (L.G., September, 1944, p. 1109).—Following an investigation of the application by an officer of the Board, the Union and Messrs. T. J. Evans, A. C. W. Piggin, A. C. Lawrence, Joe Bayzand, A. C. Cartwright and Robert Stephenson were certified as the bargaining representatives for all the painter finishers, brush painters, spray painters and journeymen's helpers and chargehands employed by the Grand Trunk Pacific Development Company Ltd. at the Prince Rupert Dry Dock and Ship Yard, Prince Rupert, B.C.

(5) *The International Union of Operating Engineers, Local No. 510, and the Grand Trunk Pacific Development Company Ltd., Prince Rupert, B.C.*—(L.G., September, 1944, p. 1109).—The local Union and Mr. John Mulroney were certified as bargaining representatives for all the engineers and firemen engaged in the powerhouse of the Prince Rupert Dry Dock and Ship Yard except the chief engineer, assistant chief engineer and helper. Certification followed an investigation of the application by an officer of the Board.

(6) *The International Brotherhood of Electrical Workers, Local B344 and the Grand Trunk Pacific Development Company Ltd., Prince Rupert, B.C.*—(L.G., October, 1944, p. 1221).—Following an investigation of the application by an officer of the Board the local Union and Messrs. C. W. Wardale, T. H. Wilford, J. W. Forman, F. M. Kempton and A. J. Chappell, were certified as the bargaining representatives for all the electrical department chargehands, journeymen, specialists, helpers, improvers and electrical bridge crane operators in the shipfitting shed of the Grand Trunk Pacific Development Company Limited at the Prince Rupert Dry Dock and Ship Yard, Prince Rupert, B.C.

(7) *The International Union of Operating Engineers, Local No. 510, and the Grand Trunk Pacific Development Company Ltd., Prince Rupert, B.C.*—(L.G., October, 1944, p. 1221). Following an investigation of the application by an officer of the Board, the local Union and Mr. John Mulroney were certified as bargaining representatives for all the locomotive crane engineers and compressor operators and the locomotive crane engineer chargehand, gas and diesel crane operators (live boom) and engineers and firemen employed at the staff houses, dining halls and recreation building operated by the Grand Trunk Pacific Development Company Limited at the Prince Rupert Dry Dock and Ship Yard, Prince Rupert, B.C.

(8) *The United Brotherhood of Carpenters and Joiners of America, Local No. 1735 and the Grand Trunk Pacific Development Company Ltd., Prince Rupert, B.C.*—(L.G., September 1944, p. 1109). The Local Union and Messrs. Jack Fisher, J. S. Black and William Page were certified as bargaining representatives for all the carpenters, joiners, shipwrights, wood caulkers, sawyers, patternmakers, stagers and woodworkers' helpers and the chargehands, journeymen and improvers of the Grand Trunk Pacific Development Company Limited at the Prince Rupert Dry Dock and

Ship Yard, Prince Rupert, B.C. Certification followed an investigation of the application by an officer of the Board.

(9) *The Canadian Seamen's Union and the Park Steamship Company (Tankers), Montreal, P.Q.*—(L.G., September, 1944, p. 1109). Following an investigation of the application by an officer of the Board, the union and Messrs. J. A. Sullivan, D. Ferguson and C. E. Lenton were certified as bargaining representatives for the unlicenced personnel of the Tankers operated by the Park Steamship Company.

(10) *The United Association of Journeymen Plumbers and Steamfitters, Marine Fitters, General Pipefitters and Helpers, Local Union 180 and the Grand Trunk Pacific Development Company, Limited, Prince Rupert, B.C.*—(L.G., September 1944, p. 1109). The union and Messrs. Nicholas Bird, J. D. Cameron, William Sterland, John W. Bruce and Frank Carlisle were certified as bargaining representatives for the Pipefitter Chargehands, Pipefitters, Steamfitters, Improvers and Helpers employed by the Grand Trunk Pacific Development Company, Limited, Prince Rupert, B.C. Certification followed an investigation of the application by an officer of the Board.

(11) *The Canadian Brotherhood of Railway Employees and Other Transport Workers and the Canadian National Railways (Fort Garry Hotel), Winnipeg, Man.*—(L.G., October, 1944, p. 1221). Following an investigation of the application by an officer of the Board, the union and Messsrs. T. McGregor and J. S. McNabb were certified as bargaining representatives for employees of the Engineers' Department, Fort Garry Hotel, Canadian National Railways, Winnipeg, Man.

(12) *Sheet Metal Workers International Association, Local 280 and Grand Trunk Pacific Development Company, Prince Rupert, B.C.*—The union and Messrs. Carl Launer, James Walker and A. J. Crawford were certified as bargaining representatives for the Sheet Metal Workers, Chargehands, Improvers and Helpers in that classification employed by the Grand Trunk Pacific Development Company, Limited, Prince Rupert, B.C. Certification followed an investigation of the application by an officer of the Board.

Application for Certification Rejected

Shipwrights, Joiners and Caulkers Industrial Union No. 2 (C.C.L.) and Grand Trunk Pacific Development Company Limited, Prince Rupert, B.C.—(L.G., September, 1944, p. 1109). Following an investigation of the application by an officer of the Board, the Board rejected the application for the reason that the applicant union in choosing bargaining representatives did not act with the authority of the majority of the employees affected.

Representation Votes Ordered

Representation votes were ordered by the Board on the following applications:—

1. *International Union of Mine, Mill and Smelter Workers and Dominion Bridge Company and Riverside Iron Works, Ltd., Calgary, Alta.*—(L.G., Aug., 1944, p. 968). A representative of the applicant union appeared before the Board while a written submission was presented by the Companies. It was decided by the Board that votes should be taken separately for the following occupational classifications:

(*a*) all journeymen moulders, including coremakers, giving them a choice between the two unions involved, namely, the International Union of Mine, Mill and Smelter Workers, and the International Moulders and Foundry Workers' Union of North America, Local No. 360.

(*b*) all other classifications of employees involved to ascertain whether they authorized the applicant union to elect or appoint bargaining representatives on their behalf. Foremen and all others having the right to hire and discharge, and office workers, were excluded.

2. *Canadian Seamen's Union and Foote Transit Company, Limited, Toronto, Ont.*—(L.G., Oct., 1944, p. 1221). Representatives of the applicant union, the Company and the National Seamen's Association as Intervener appeared before the Board following a preliminary investigation of the application by an officer of the Board. The bargaining unit was the unlicensed personnel of the S.S. *F. V. Massey*.

Applications for Certification under Investigation

(1) The Canadian Seamen's Union on behalf of unlicensed personnel employed on ships owned and/or operated by the Colonial Steamship Company and Subsidiary, Sarnia Steamship Company, Port Colborne, Ont.

(2) Brotherhood of Railway and Steamship Clerks, Freight Handlers, Express and Station Employees on behalf of the Plant Unit (all employees below the rank of superintendent) of the Grain Elevator of the Canadian Pacific Railway, Port McNicol, Ontario.

(3) Brotherhood of Railway and Steamship Clerks, Freight Handlers, Express and Station Employees on behalf of certain elevator

employees of the Aberdeen Elevator Company, Midland, Ontario.

(4) Brotherhood of Railway and Steamship Clerks, Freight Handlers, Express and Station Employees on behalf of certain elevator employees of the Midland Simcoe Elevator Company Ltd., Midland, Ontario.

(5) Brotherhood of Railway and Steamship Clerks, Freight Handlers, Express and Station Employees on behalf of certain elevator employees of the Midland Grain Elevator Company Ltd., Midland, Ontario.

(6) Sheet Metal Workers International Association, Local No. 280 on behalf of sheet metal chargehands, sheet metal workers, sheet metal improvers, and sheet metal helpers of the Grand Trunk Pacific Development Company at the Prince Rupert Dry Dock and Shipyard, Prince Rupert, B.C.

(7) International Moulders and Foundry Workers of North America on behalf of all maintenance and production workers, excluding executives, foremen, office employees and all others having the right to hire and discharge, of the Northwestern Brass Limited, Calgary, Alta.

(8) Rolling Mill Employees Union, Local 23180 (A.F. of L.) on behalf of all roughers, stranners, catchers, finishers, edgers, hotbed men, billet boys, heaters, spell heaters, rundownstockers, cinder men, yard stockers, pitmen, shearmen, melters, furnace helpers, stockers, ladlemen, cranemen and all other labour not having the right to hire or discharge in the plant of the Dominion Bridge Company Ltd., Calgary Rolling Mill Department, Calgary, Alberta.

(9) Brotherhood of Railway and Steamship Clerks, Freight Handlers, Express and Station Employees on behalf of certain elevator employees of the Sarnia Elevator Company Ltd., Sarnia, Ontario.

(10) Brotherhood of Maintenance of Way Employees, on behalf of employees at coaling stations at intermediate points on the Canadian National Railways (Western Lines).

(11) Brotherhood of Locomotive Firemen and Enginemen on behalf of operators of motor power services in the conveyance of passengers between Kamloops, B.C., and Kamloops Junction, B.C., Canadian National Railways (Western Region).

(12) National Union of Firebosses, Local No. 1 (CCL), on behalf of firebosses in coal mines, Drumheller and district, employed by the Drumheller Coal Operators Limited, Drumheller, Alberta.

(13) The International Longshoremen's Association, Local 38-162, on behalf of certain employees of the Canadian Stevedoring Company Limited, Vancouver, B.C.

(14) The International Longshoremen's Association, Local 38-162, on behalf of certain employees of Victoria and Vancouver Stevedoring Company Limited, Vancouver, B.C.

(15) The International Longshoremen's Association Local 38-162, on behalf of certain employees of the Empire Stevedoring Company Limited, Victoria, B.C.

Decision of Board in Appeal Cases

The following appeals from decisions of the Ontario Labour Relations Board and applications for leave to appeal therefrom were considered by the Wartime Labour Relations Board (National) and judgment given.

(1) The Board denied the appeal of eight intervening craft unions, namely, Brotherhood of Painters, Decorators and Paper Hangers of America, Local 1365; International Brotherhood of Electrical Workers, Local 1023; International Alliance of Hotel and Restaurant Workers, Local 553; United Association of Journeymen Plumbers and Steamfitters of the United States and Canada, Local 629; International Brotherhood of Boilermakers, Iron Shipbuilders, Welders and Helpers of America, Local 461; International Hod Carriers, Building and Common Labourers Union of America, Local 1016; International Union of Operating Engineers, Local 865; United Brotherhood of Carpenters and Joiners of America, Local 850; International Moulders and Foundry Workers' Union of North America, Local 205; International Association of Machinists, and International Brotherhood of Blacksmiths, Drop Forgers and Helpers, Local 607, from the decision of the Ontario Labour Relations Board in directing a vote by craft divisions of employees of the Port Arthur Shipbuilding Limited, Port Arthur, Ontario. In dismissing the appeal the Board stated that the vote ordered by the Ontario Board would proceed.

The appellants contended that the term of a collective agreement made by their former bargaining agency, the Metal Trades Council of Thunder Bay had not expired having been renegotiated in September and October, 1943, and in January, 1944, when new agreements were executed by the employer with three additional craft unions. The National Board supported the opinion of the Ontario Board that the former agreement was not thus renegotiated.

The appellants also contended that the original agreement was made for the duration of the war alleging that a representative of the Minister of Munitions and Supply insisted upon this term and suggested that in view of this, Section 9 of the Wartime Labour Relations Regulations could not have been intended to apply to "duration agreements"

but only to collective agreements for a definite term of years. The Board ruled that the words of the Section are plain and unequivocal and must be interpreted as applying to all collective agreements.

During the hearing of the appeal it was suggested that the Board fix the date of termination of the agreement in effect between the Company and the unions. The Board found that the term of the agreement was not an issue in the appeal, the question at issue being the right to appoint bargaining representatives and that when such representatives were appointed they could deal with the proper method of determining the agreement.

(2) The Wartime Labour Relations Board (National) denied the application of the Packard Electric Company, Limited, St. Catharines, Ont., for leave to appeal from the decision of the Ontario Labour Relations Board directing a vote of the employees of the Company as to whether they desire to be represented by the representatives elected or appointed by the United Electrical, Radio and Machine Workers of America, Local 529.

The following were the contentions of the company and the judgment of the Board with respect thereto.

1. The employer contended that the union had not established that it represented a majority of the employees. There was evidence produced before the Ontario Board to show that the union represented a majority of the employees at the time the bargaining representatives were elected. The Ontario Board accepted this evidence and the National Board was not prepared to disagree with its decision.

2. The employer contended that the bargaining representatives were not elected at a meeting of the employees. The National Board held that according to Subsection (2) of Section 5 of the Wartime Labour Relations Regulations this was not necessary.

3. The employer contended that at the time of the application the union had no charter. The Board decided it should not grant leave to appeal on this ground, in view of the proceedings before the Ontario Board.

4. The employer contended that there was an agreement outstanding between the Company and the Employees' Council which remained in effect because 30 days' notice of termination of it was not given prior to May 1, 1944. Under Section 9 of the Regulations the Board did not find it necessary to decide whether or not this agreement remained outstanding since new bargaining representatives were elected and application for certification made before May 1, 1944, that is, after the expiration of ten months of the term of the collective agreement.

5. The employer also objected to the form of ballot and contended that the name of the Employees' Council should have been included as an alternative choice to the union. It was pointed out that in the Reasons for Judgment of the Ontario Board no notice of intervention was filed on behalf of the Council and none of the employees opposed to the application of the union for certification was sufficiently interested in the matter to take any active part in the proceedings. In view of this the Ontario Board limited the choice to be offered on the ballot to whether or not the employees wished to bargain with the respondent company through the bargaining representatives chosen by the union and the National Board was not of the view that this decision was wrong.

Conciliation Proceedings Under the Wartime Labour Relations Regulations

THE Wartime Labour Relations Regulations provide for conciliation machinery to attempt settlements of disputes where negotiations for an agreement have been unsuccessfully continued for thirty days following certification of bargaining representatives. Disputes of this nature are referred to the Minister of Labour by the Wartime Labour Relations Board (National) or by the Provincial Boards. A conciliation officer is then appointed to confer with the parties and endeavour to effect an agreement. If the conciliation officer is unable to bring about settlement of the matters in dispute and reports that in his view an agreement might be facilitated by the appointment of a Board of Conciliation, a Board is established by the Minister of Labour forthwith. The duty of such a Board is to endeavour to effect an agreement between the parties on the matters in dispute and to report its findings and recommendations to the Minister.

Board Reports Received

During October reports were received from four Boards of Conciliation:

Concerning Fittings Limited, Oshawa, Ontario, and the United Steelworkers of America, Local 1817.

Concerning Canadian Oil Companies Limited, Petrolia, Ont., and the National Union of Petroleum Workers, Local No. 1.

Concerning C. Lloyd & Son, Limited, Wingham, Ont., and the National Union of Woodworkers, Local No. 3.

Concerning Lakeshore Mines, Limited, Kirkland Lake, Ontario, and Local 240, Kirkland Lake Mine and Mill Workers' Union.

Boards Fully Constituted

During October four Boards of Conciliation were fully constituted:

John Inglis Company Limited, Toronto, Ont.—The Board of Conciliation established to deal with a dispute between the John Inglis Company Limited, Toronto, Ontario, and United Steelworkers of America was fully constituted on October 12, with the appointment of the Chairman, His Honour Judge J. J. Coughlin of Sandwich, Ontario. Judge Coughlin was appointed by the Minister in the absence of a joint recommendation of the other two members, Mr. J. S. D. Tory and Mr. Bora Laskin, both of Toronto, appointed on the nomination of the employer and employees respectively.

Steel Company of Canada, Ltd. (Hamilton and Ontario works), Hamilton, Ont.—On October 30, the Board of Conciliation established to deal with a dispute between the Steel Company of Canada, Ltd. (Hamilton and Ontario works) Hamilton, Ont., and the United Steelworkers of America, Local 1005, was fully constituted on October 30 with the appointment as Chairman of Dr. Cecil A. Wright of the Osgoode Hall Law School, Toronto, Ont. Dr. Wright was appointed by the Minister in the absence of a joint recommendation of the other two members, Mr. John J. Robinette, and Mr. Drummond Wren, both of Toronto, the nominees of the employing company and of the employees concerned.

Beardmore and Company Limited, Acton, Ont.—On October 14 the Board of Conciliation established to deal with a dispute between Beardmore and Company Limited, Acton, Ontario, and the National Union of Shoe and Leather Workers, Local No. 26, was fully constituted with the appointment as chairman of Dr. Cecil A. Wright of Toronto, Ont. Dr. Wright was appointed on the nomination of the other two members of the Board, Mr. Norman L. Mathews and Mr. Lewis Duncan, both of Toronto, members of the Board nominated by the company and the employees respectively.

Noranda Mines Limited, Noranda, Quebec.—On October 18, the Board of Conciliation established to deal with a dispute between Noranda Mines Limited, Noranda, P.Q., and Local 688, International Union of Mine Mill and Smelter Workers, was fully constituted with the appointment of the Chairman, His Honour Judge Charles E. Guerin. Judge Guerin was appointed by the Minister of Labour in the absence of a joint recommendation from the other two members of the Board, Mr. Walter A. Merrill and Mr. Guy Desaulniers, both of Montreal, who had been appointed on behalf of the company and the employees respectively.

Boards Established

During the month two Boards of Conciliation were established but not fully constituted.

Senator Rouyn Mines, Limited, Rouyn, Quebec.—On October 5 the Minister of Labour established a Board of Conciliation to deal with a dispute between the Senator Rouyn Mines Limited, Rouyn, Quebec, and Local 688, Rouyn Mine Mill and Smelter Workers' Union. Mr. R. Trepanier of Montreal investigated the case as Conciliation Officer. On October 4, Mr. Trepanier's report was received recommending the establishment of a board.

Appointed to the Board were Major J. M. Eakin of Noranda, P.Q., on the nomination of the employing company, and Mr. Guy Desaulniers on the nomination of the employees concerned. Major Eakin and Mr. Desaulniers have been requested to confer on the nomination of a chairman and third member of the Board.

Steel Company of Canada Limited, Gananoque, Ontario.—On October 28 a Board of Conciliation was established to deal with a dispute between the Steel Company of Canada Limited, Gananoque, Ontario, and Local 3208, United Steelworkers of America. Mr. H. Perkins of Toronto had investigated the case as Conciliation Officer and on October 26 had reported and recommended the establishment of a Board.

The parties concerned were requested to nominate persons for appointment as members of the Board.

Agreements Facilitated by Conciliation

Globe Furniture Limited, Waterloo, Ontario.—On September 29, Mr. H. Perkins, Industrial Relations Officer, Toronto, had been appointed Conciliation officer to confer with the Globe Furniture Company, Limited, Waterloo, Ontario, and Local No. 7, Canadian Aircraft Association, to attempt to effect an agreement between them. (L.G. Oct., 1944, p. 1225).

On October 16 a report was received from Mr. Perkins indicating the successful conclusion of the negotiations and the signing of an agreement on October 7.

Dominion Wire Rope Company, Lachine, Quebec.—On September 14, Mr. Raoul Trepanier, Industrial Relations Officer, Montreal, had been appointed Conciliation Officer to confer with the Dominion Wire Rope Company of Montreal, and Lodge 1288 International Association of Machinists to attempt to effect an agreement between them. (L.G. Oct., 1944, p. 1224).

On October 7 Mr. Trepanier reported that negotiations had been successful and that an agreement had been reached.

Modern Tool Works Limited.—On September 29, Mr. F. J. Ainsborough, Industrial Relations Officer, Toronto, had been appointed Conciliation Officer to confer with the Modern Tool Works Limited, Toronto, Ontario, and United Steelworkers of America, and attempt to effect an agreement (L.G. Oct., 1944, p. 1225). On October 6, Mr. Ainsborough's report was received indicating that negotiations had been successful and that an agreement had been completed.

Assignments of Conciliation Officers

Union Transfer and Storage Company Limited, Moose Jaw, Sask., Moose Jaw Cartage and Jack's Jiffy Delivery, Moose Jaw, Sask.—On October 2, the Minister of Labour was advised by the Saskatchewan Wartime Labour Relations Board that negotiations between the Canadian Brotherhood of Railway Employees and Other Transport Workers, Division No. 187, and three companies, viz: Union Transfer and Storage Company Limited, Moose Jaw Cartage Company Limited; and Jack's Jiffy Delivery, Moose Jaw, Saskatchewan, had been continuing for thirty days and there was no indication of the successful completion of an agreement.

Mr. H. S. Johnstone, Industrial Relations Officer, Winnipeg, was appointed Conciliation Officer to confer with the parties and attempt to effect an agreement.

Peacock Brothers, Limited, Ville LaSalle Quebec.—On October 3, the Minister of Labour was advised by the Quebec Wartime Labour Relations Board that negotiations between Peacock Brothers Limited, Ville La Salle, and Local 651, International Association of Machinists, had been continuing for thirty days with no indication of the successful completion of an agreement.

The Minister, therefore, appointed Mr. Raoul Trepanier, Industrial Relations Officer, Montreal, as Conciliation Officer to confer with the parties and attempt to effect an agreement.

Consumers' Gas Company Ltd., Toronto, Ont.—On October 6, the Minister of Labour was advised by the Ontario Labour Relations Board that negotiations had been proceeding for thirty days between the Consumers' Gas Company, Toronto, Ont., and Local 1616, International Chemical Workers Union, and that there was no indication of a successful completion of an agreement.

On October 10, Mr. J. P. Nicol, Industrial Relations Officer, Toronto, was requested to confer with the parties and attempt to effect an agreement.

Dairy Pool Co-operative Association, Prince Albert, Sask.—On October 10, the Minister of Labour was advised by the Saskatchewan Wartime Labour Relations Board that negotiations had been proceeding for thirty days without an agreement between the Dairy Pool Co-operative Association, Prince Albert, Saskatchewan, and Local 241, United Packinghouse Workers of America.

On October 10, Mr. H. S. Johnstone, Industrial Relations Officer, Winnipeg, was appointed Conciliation Officer to confer with the parties and attempt to effect an agreement.

Robin Hood Mills Limited, Moose Jaw, Saskatchewan.—On October 10, the Minister of Labour was advised by the Saskatchewan Wartime Labour Relations Board that negotiations had been proceeding for thirty days between the Robin Hood Mills Limited, Moose Jaw, Saskatchewan, and Local 201, United Packinghouse Workers of America, and that there was no indication of a successful completion of an agreement.

On October 11, Mr. H. S. Johnstone, Industrial Relations Officer, Winnipeg, was appointed Conciliation Officer to confer with the parties and attempt to effect an agreement.

Saguenay Quebec Telephone Company Limited, Chicoutimi, Que.—On October 12, the Minister of Labour was advised by the Quebec Wartime Labour Relations Board that negotiations had been proceeding for thirty days between the Saguenay Quebec Telephone Company, Chicoutimi, Quebec and the National Catholic Syndicate of Telephone Employees of Saguenay, and that there was no indication of a successful completion of an agreement.

On October 20, Mr. L. Pepin, Industrial Relations Officer, Montreal, was appointed Conciliation Officer to confer with the parties and attempt to effect an agreement.

Fairchild Aircraft Limited, (Restaurant Division) Longueuil, Quebec.—On October 12, the Minister of Labour was advised by the Quebec Wartime Labour Relations Board that negotiations had been continuing for thirty days between the Fairchild Aircraft Limited (restaurant division), Longueuil, Quebec, and the Hotel and Restaurant Employees Union, Local 382, and that there was no indication

of a successful completion of an agreement. On October 20, Mr. Raoul Trepanier, Industrial Relations Officer, Montreal, was appointed Conciliation Officer to confer with the parties and attempt to effect an agreement.

Upper Canada Mines Limited, Dobie, Ontario.—On October 13, the Minister of Labour was advised by the Ontario Labour Relations Board that negotiations had been continuing for thirty days between the Upper Canada Mines Limited, Dobie, Ontario, and Local 240, Kirkland Lake Mine, Mill and Smelterworkers' Union, and that there was no indication of a successful completion of an agreement.

On October 18, Mr. F. J. Ainsborough, Industrial Relations Officer, Toronto, was appointed Conciliation Officer to confer with the parties and attempt to effect an agreement.

Ingersoll Machine and Tool Company, Limited, Ingersoll, Ontario.—On October 13, the Minister of Labour was advised by the Ontario Labour Relations Board that negotiations had been continuing for thirty days between Ingersoll Machine and Tool Company Limited, Ingersoll, Ontario, and Local 2918, United Steelworkers of America and that there was no indication of a successful completion of an agreement.

On October 18, Mr. James Hutcheon, Industrial Relations Officer, Toronto was appointed Conciliation Officer to confer with the parties and attempt to effect an agreement.

Joseph Stokes Rubber Company Limited, Welland, Ontario.—On October 13, the Minister of Labour was advised by the Ontario Labour Relations Board that negotiations had been continuing for thirty days between the Joseph Stokes Rubber Company, Limited, Welland, Ontario and Local 253, United Electrical Radio and Machine Workers of America.

On October 18, Mr. Harold Perkins, Industrial Relations Officer, Toronto, was appointed Conciliation Officer, to confer with the parties and attempt to effect an agreement.

The National Grain Company Limited, Reliance Grain Company Limited, Northland Terminals Limited, Superior Elevator Limited: Port Arthur and Fort William, Ontario, and Winnipeg, Manitoba.—On October 19, the Minister of Labour was advised by the Wartime Labour Relations Board (National) that negotiations had been continuing for thirty days between these companies and Local 650, Brotherhood of Railway Clerks, Freight Handlers, Express and Station Employees, and that there was no indication of a successful completion of an agreement.

On October 28, Mr. H. S. Johnstone, Industrial Relations Officer, Winnipeg, was appointed Conciliation Officer to confer with the parties and attempt an agreement.

Ontario Steel Products Limited, Chatham, Ontario.—On October 23, the Minister of Labour was advised by the Ontario Labour Relations Board that negotiations had been continuing for thirty days between the Ontario Steel Products Limited, Chatham, Ontario, and the International Union United Automobile, Aircraft and Agricultural Implement Workers of America, U.A.W.—C.I.O., and that there was no indication of a successful completion of an agreement.

On October 24, Mr. James Hutcheon, Industrial Relations Officer, Toronto, was requested to confer with the parties and attempt to effect an agreement.

C. Richardson & Co., St. Mary's, Ontario.—On October 23, the Minister of Labour was advised by the Ontario Labour Relations Board that negotiations had been continuing for thirty days between C. Richardson, and Co., St. Mary's, Ontario, and the Dairy Utensil Workers' Union and that there was no indication of the successful conclusion of an agreement.

On October 24, Mr. H. Perkins, Industrial Relations Officer, Toronto, was appointed Conciliation Officer to confer with the parties and attempt to effect an agreement.

Canadian Industries Limited, Toronto, Ont.—On October 23, the Minister of Labour was advised by the Ontario Labour Relations Board that negotiations had been continuing for thirty days between Canadian Industries Limited, Toronto, Ontario, and the Canadian Industrial Workers' Union, Local No. 1 and that there was no indication of the successful completion of an agreement.

On October 24, Mr. F. J. Ainsborough, Industrial Relations Officer, Toronto, was appointed Conciliation Officer to confer with the parties and attempt to effect an agreement.

Ontario Steel Products Company Limited, Oshawa, Ont.—On October 27, the Minister of Labour was advised by the Ontario Labour Relations Board that negotiations had been continuing for thirty days between the Ontario Steel Products Company Limited, Oshawa and Local 222, International Union United Automobile, Aircraft, and Agricultural Implement Workers of America, and that there was no indication of the successful completion of an agreement.

On October 31, Mr. F. J. Ainsborough, Industrial Relations Officer, Toronto, was appointed Conciliation Officer to confer with the parties and attempt to effect an agreement.

Canners Machinery Limited, Simcoe, Ont.—On October 27, the Minister of Labour was advised by the Ontario Labour Relations Board that negotiations had been continuing for thirty days between Canners Machinery

Limited and the International Union United Automobile, Aircraft and Agricultural Implement Workers of America, Local 257.

On October 31, Mr. F. J. Ainsborough, Industrial Relations Officer, Toronto, was appointed Conciliation Officer to confer with the parties and attempt to effect an agreement.

Steel Company of Canada (Canada Works) Hamilton, Ontario, and Local 3250, United Steelworkers of America.—On October 27, the Minister of Labour was advised by the Ontario Labour Relations Board that negotiations had been continuing for thirty days between the Steel Company of Canada (Canada Works) and Local 3250, United Steelworkers of America.

On October 31, Mr. J. P. Nicol, Industrial Relations Officer, Toronto, was appointed Conciliation Officer to confer with the parties and attempt to effect an agreement.

Report of Board in Dispute between Fittings, Limited, Oshawa, Ont., and United Steelworkers of America, Local 1817

On October 3, the Minister of Labour received the report of the Board of Conciliation established to deal with a dispute between Fittings, Limited, Oshawa, Ont., and Local 1817, United Steelworkers of America. A minority report was submitted by Mr. J. S. D. Tory.

The Board was under the chairmanship of Dr. Cecil A. Wright, Osgoode Hall, Law School, Toronto, Ont., appointed by the Minister in the absence of a joint recommendation from the other two members, Mr. J. S. D. Tory and Mr. Bora Laskin, both of Toronto, appointed on behalf of the company and the employees respectively.

The text of the Board's report and of the minority report follows:

Report of Board

Re Wartime Labour Relations Regulations, P.C. 1003, and re Dispute Between Fittings, Limited, Oshawa, Ontario, and Employees, Members of Local 1817, United Steelworkers of America.

To the Honourable Humphrey Mitchell,
Minister of Labour,
Ottawa, Ontario.

The Board of Conciliation appointed by you pursuant to s. 13 of P.C. 1003, begs to repc t as follows:

On August 3 and 14 sittings of the Board were held in Oshawa at which representatives of the Company and the Union made written and oral submissions. At these two meetings the Company was represented by A. G. Storey, President; W. G. Bowden, Director and Sales Manager; and J. C. Adams, K.C., Counsel. The Union was represented by W. J. Smith, Chairman of the Negotiating Committee of Local 1817 and M. J. Fenwick, International Representative of United Steel Workers of America. Subsequent meetings were held in Toronto on September 7 and September 20 at which Mr. Fenwick and Mr. Adams attended on behalf of the respective parties.

At the first meeting in Oshawa, which was of a formal nature, the Union filed a written brief as supplementary to the oral argument which had been delivered to the same Board in connection with a dispute concerning Pedlar People Limited of Oshawa. Mr. Adams, for the Company, sought an adjournment for two months on the grounds (1) that time was required to prepare a reply to the Union's submissions and (2) that the Company was a member of an employer's institute which hoped to evolve by that time a policy to guide its membership on such union proposals as the union shop and check-off which were in issue in the present case. In view of the Union's refusal to agree to such an adjournment and having regard to the provisions of section 13(2) which require an earlier report, the Board rejected the application for such an adjournment, but, with the consent of the Union, granted an adjournment until the 14th of August, to enable the Company to prepare a brief in reply. On August 14 the Company brief was filed and oral argument heard on behalf of the parties.

In the course of these hearings it appeared that the parties had not reached an agreement on any point and the Board, in effect, was being asked to negotiate a renewal agreement. In its brief the Union charged the Company with a failure to bargain in good faith and on its part the Company likewise charged the Union with making "no real attempt . . . to bargain in good faith."

The fact that charges of this nature were made before this Board is sufficient in itself to indicate that relations between the Union and the Company are, to use a neutral expression, not completely satisfactory. The Union, whether rightly or wrongly, feels that the Company's attitude towards it has not been particularly co-operative, and the member employees feel that they have been unable, during seven years of collective bargaining, to obtain any concessions from the Company save after prolonged negotiations, and that the Company has never been willing to meet the Union even half-way on various proposals. On the other hand, the Company's brief itself discloses that "our relationship with the Union has been almost at the breaking point on

many occasions" during the last three years, and that the relationship between the Union and the Company is such as to lead the Company to the conclusion that union shop status "is even more remote than it was when we entered into contractual relationship with them." This is probably due to the fact that in the course of lengthy negotiations, the employee members of the Union have become exasperated at what they felt was unnecessary delay, and on more than one occasion have threatened to "walk out" unless some action was taken on matters being discussed.

In light of this unsatisfactory relationship one can perhaps understand, even if one cannot sympathize with, the failure of the parties to present a concluded agreement on any point to this Board. The parties entered their first collective bargaining agreement on May 29, 1937, so that the Union is now well into its eighth year as the collective bargaining agency for what, from the employer's list of hourly paid and piece workers, being the eligible employees, amounted to 469 persons as of June, 1944.

In the course of negotiating the renewal agreement for the present year, the Union put forward the request that the following two clauses be included in that agreement.

It is agreed that all employees now members of Local 1817, United Steelworkers of America, shall, as a condition of employment, remain members in good standing for the duration of this Agreement; that those at present employed who are not already members shall join the Union within four weeks after the date of this Agreement; and that all employees hired during the life of this Agreement shall become members of the Union within one month of the date on which they were hired. Upon presentation of proper authorization from an employee, the Company agrees to deduct $1 each month from his earnings, as Union dues; such money to be remitted monthly to Local 1817, United Steelworkers of America.

The Company having definitely refused this, the Union took advantage of the provisions of P.C. 1003 looking toward the establishment of a Conciliation Board. Prior to a meeting at which a conciliation officer was to confer with the parties, the Company's counsel indicated that if the Union were looking towards a Board to deal with the union shop issue, the Company would only negotiate on the basis of an entirely new draft collective bargaining agreement, a copy of which was presented to the Union. The Union, which had been negotiating on the basis of their existing agreement, felt that this was a method adopted by the Company to discourage it from insisting on the union shop clause, since the Union was told that if it withdrew its request for the union shop, the Company would withdraw its draft and negotiate on the basis of the Union's draft contract. Whether negotiations should have gone further between the parties in order to reach an agreement on at least some terms is not for this Board to say, since under P.C. 1003 a Conciliation Board is only set up after negotiations in good faith have continued for thirty days and if a conciliation officer has reported as required in section 12. This Board feels, however, that P.C. 1003 does not contemplate a Board drafting an entire agreement for the parties, since there must, if negotiations are properly carried on, be many points on which no serious difference of opinion can arise.

In an endeavour to conciliate the present dispute, at the meeting of August 14, the Board suggested that the parties continue their negotiations and attempt to reach an agreement so far as possible, the Board retaining the issue of the union shop clause and voluntary check-off as items on which no agreement at that time was possible. This the parties agreed to do. As the Union felt that the Company draft was only brought forward to resist its demand for a union shop, and as the Company indicated that the attitude of the Union in refusing to negotiate on the new draft was an indication of the Union's unfitness to ask for any form of union security, the Board felt that the result of further negotiations might be helpful in arriving at a solution of the matters in dispute. This was particularly so since the Company had indicated in the course of its strongly pressed request for an adjournment of two months, that, if granted, "it is quite possible that we might then be able to make a counter proposal to the Union which would be accepted by them."

As the Union had advanced as one of its reasons for leaving the entire matter of the new agreement to a Board the fact that it could not understand the necessity of the more elaborate and lengthy draft agreement submitted by the Company, the Company suggested, and the Board agreed, that if one of its members, Mr. Laskin, the nominee of the employees, sat in at negotiations, it might be helpful. This was done, and at a subsequent meeting of the Board in Toronto on September 7, it was apparent that considerable progress had been made by the parties, and that most of the provisions in the Company's draft had been agreeable to the Union, when properly explained to them, and that other matters towards the conclusion of an agreement were still in process of negotiation. In particular, there had been questions in issue between the employees and the Company concerning wage increases, and on August 10, Mr. Fenwick and Mr. Adams had agreed to a survey of wage rates in the district being made by a third party whose report, in the event that the

parties were not able to agree, would be accepted as a final arbitration. This was a particularly hopeful indication of improvement in the relations between employees and Company which had, at various times in the last few years, been strained. As this survey was not completed on September 7, and as negotiations would still be carried on with the Company in this matter; and as a report[1] of a Conciliation Board had been made in a dispute between the Ontario Malleable Iron Company Limited (carrying on business in the same locality as the present company) and its employees, members of the same Local involved in the present dispute; and it was felt that any action taken by the parties to that dispute pursuant to the Report made therein might be helpful to the parties in the present dispute, the Board obtained consent to a further adjournment to September 20, so that negotiations might be continued in the hope of reaching a settlement.

On September 20 the parties indicated that there was no hope of reaching an agreement on the union shop and check-off clauses and the Company repeated its opposition to any form of union shop even if recommended by a Board of Conciliation. The parties therefore requested that this Board should make an Interim Report dealing with that issue alone, leaving any other subsidiary matters on which they had not yet agreed to be worked out by further negotiations between the parties with the right to reconvene the Board in the event of any of those other issues failing to be agreed upon between the parties themselves.

This Report, therefore, is confined to the Union's request for the clauses set forth earlier, dealing with union shop and check-off, the parties having agreed to continue negotiating on the balance of the Agreement, and to notify this Board if they are unable to agree on any other clauses now under consideration.

If nothing further is accomplished by this Board, its efforts at conciliation will not have been wholly without effect, since we believe that the renewal of negotiations, in the main successful, is not only in the proper spirit of collective bargaining, but should materially assist in developing co-operation between the parties and dispelling, in part at least, the feeling of mutual distrust with which both parties came before this Board.

The Company is a manufacturer of malleable and grey iron castings carrying on business in Oshawa, Ontario. As mentioned previously the Union has been the bargaining agency for all hourly paid and piece workers, excepting foremen and clerical employees since May 29, 1937 when the first collective agreement of the Company was signed. There is no doubt that the Union has commanded a large majority of the employees since the inception of its collective bargaining relations with the Company and of the 469 eligible employees on the Company's June 1944 pay roll the Union claims that 384, or some 81·9 per cent were members in good standing of the Union. There has been some slight decrease in membership as of September 15 when the members in good standing were, according to the Union, 369. The Union's explanation of this is that some members left the employ of the Company or entered the army. Of the 85 non-union members as of last June, about 25 were, according to the Union, French Canadians brought in under direction of the Selective service authorities.

On these facts it is apparent that the Union has established itself thoroughly in this plant and has every prospect of normal continuance. The Union's arguments in favour of the union shop clause were the same as those which were set out in a report of a Conciliation Board in the case of Ontario Malleable Iron Company Limited on August 23 of this year. That Report is of particular importance in connection with the present dispute for the following reasons:

(1) The Companies are in the same general business.
(2) Local 1817 of the United Steelworkers of America is the collective bargaining agency in each plant.
(3) Collective bargaining relations with this Local have continued for the same length of time in both plants.

While this Board is strongly of opinion that every dispute before a Conciliation Board should be settled on its own particular facts, it is apparent that in an industrial centre as small as Oshawa, given the same type of industry, the same Union, and the same length of bargaining experience, the facts which would warrant this Board in making a different recommendation from that in the other like industry, should be cogent and capable of clear statement and analysis. The majority of this Board—who were also the majority of the Board, differently constituted, in the Ontario Malleable dispute—do not feel that they could set forth any reasons which would justify a different recommendation in this case than they made previously in the Report concerning the Ontario Malleable Iron Company Limited.

It is true that on the facts as disclosed in the Report concerning the Ontario Malleable Iron Company there was a 100 per cent union membership which had existed prior to the introduction of employees under Selective Service regulations. In the present case the Union has never claimed 100 per cent

[1] L.G., Sept., 1944, p. 1117.

membership. Indeed, the facts as disclosed before this Board show that in 1943 friction caused by the presence of nine non-union employees in the moulding department of Fittings Limited was such as to cause concern to both the Company and the Union as to the possibility of a continuance of peaceful industrial relations unless non-union members joined the Union. The Company apparently realized the seriousness of this situation as well as the Union, because at that time they posted a notice suggesting that "in the interests of harmony" the Company "urges all employees who are not in the Union to join so that dissatisfaction over the matter can be eliminated." It appears that this notice was posted by the Company at the instigation of the Union's representative, after a strike of one and a half days, ostensibly based on a dispute over piece work rates, as a means of getting the employees back to work.

The Company states that there have been constant threats to enforce the request for a union shop, and it objects to threatening attitudes to obtain what it feels should, and could only be the result of "affection" on the part of the Company for the Union. This Board, however, cannot blind itself to the fact that in normal times an issue over union shop might well have developed into something much more serious than a one and a half days' strike. There is no evidence that any strike was fostered or approved by the Union, and indeed the Union representative did everything to get the men back to work. As far as the Board is concerned the incident in question is merely important as showing the strong feeling of the employees with regard to an overwhelming majority carrying the burden and expense of union bargaining activities without participation of the other employees of the plant.

The question remains whether the difference between 82 per cent and 100 per cent—discounting employees introduced by Selective Service—is in itself sufficient to distinguish the situation in the Malleable Iron Company dispute from the present. If the question were one of granting a union shop in the sense of compelling existing non-union employees to join the Union as a condition of continued employment, this difference might be important. This Board refuses to recommend under existing war conditions that present employees who obtained employment at a time when union shop conditions did not apply should be forced either to abandon their employment or join the Union. Whatever merit there may be in the view that a majority in normal times should have freedom to bargain for such a provision among its working conditions, this Board is of opinion that in time of war, as a general rule which may, of course, admit of exceptions, labour should not expect an employer to agree to provisions that might seriously dislocate, even temporarily, maximum production. In the public interest, to say nothing of the possibility of prejudicing through adverse public opinion whatever merits there may be in the strict union shop by pressing such claims at the present time, we believe that labour would be well advised to leave the development of this next step—if it is to develop at all—until after the war. But if labour is willing to do this it should have a right to expect that its position to assert those claims which it might otherwise have done during war will not be prejudiced by a change of conditions after the war. Further, it is surely good policy to eliminate so far as possible for the future those causes of friction which have irritated in the past and which the generally observed policy against strikes has prevented from leading to more serious dislocation of business. Such, among other things, were the underlying principles behind the recommendations of the majority in the Ontario Malleable Iron dispute for maintenance of membership and membership in the Union as a condition of employment of future employees so far as compatible with Selective Service regulations.

The question of maintenance of membership of existing employees does not seem to be at all affected by the difference between 82 per cent and 100 per cent union membership and the majority of this Board repeat what they said in the Ontario Malleable Board, that they can see no reason why existing members of a bargaining agency should not be compelled to continue to support the agency of their choice in order to insure not only the proper functioning of collective bargaining relations, but to insure and emphasize as well the individual responsibility of employees in electing a bargaining agency. So far as making membership of the Union a condition of future employment, the fact that friction exists in the plant to the degree evidenced by the incident of 1943, should in itself indicate that other things being equal it is desirable to obviate this friction which is bound to exist between an overwhelming majority and a small minority of non-union members. It was the unanimous opinion of all three Board members in this dispute that in the matter of numbers alone, there was nothing to justify different recommendations in this dispute to those made in the Ontario Malleable Iron Company.

A much more serious question, giving rise to a difference of opinion in this Board, concerns the nature of the relations which have existed between the parties in the past and its effect on the recommendations this Board should

make. This Board is unanimously of opinion that a collective bargaining agency should not lightly demand provisions for union security. Generally speaking, unless the union has had some considerable experience in the plant, and unless the particular union has demonstrated its ability to attract an overwhelming majority of members in that plant, this Board does not feel it should request the co-operation of an employer in maintaining its strength and membership. Likewise, if a union's actions can be considered as irresponsible this Board would have no hesitation in refusing to recommend any cooperation by the employer to maintain its strength. On the other hand, a majority of this Board feel that a trade union which has been a collective bargaining agency for a majority of employees over a period of seven to eight years cannot possibly be treated indifferently by an employer without prejudicing successful collective bargaining. During that period the collective bargaining agency has had a sufficient length of time in which to demonstrate its suitability and qualifications. Underlying the report of the Board in the Ontario Malleable dispute was the idea that during the seven to eight year period there, this same Union had "deserved and enjoyed the confidence of employees and employer alike". While in that dispute it was evident that relations between the parties were good, and the employer had confidence in his bargaining agency, it is unfortunately the fact that in the present case, involving the same Union, the present employer through his counsel has stated that the Union has not the confidence of the employer. As put in the Company's brief "they (the bargaining agency) cannot establish themselves in our affections in any other way than by convincing us by their conduct that they are a necessary and desirable part of our industrial enterprise. They have not done so to date." If collective bargaining itself had depended on a trade union gaining the "affection" of employers, collective bargaining would not have attained its present recognized status, and it is unfortunate that in the present case a company should state that it feels that a bargaining agency with which it has been negotiating for some seven to eight years, and which during that time has enjoyed the full confidence and support of a majority of its employees, is neither a "necessary" nor "desirable" part of its industrial enterprise. This could be interpreted as the Union employees have done, as meaning that the Company would be pleased to have an unnecessary and undesirable part of their business removed. That is one reason why a claim for union security is made in this case.

We do not believe that the Company really means to take this extreme position. It has demonstrated by its past collective bargaining with this Union, even before such collective bargaining was made mandatory, that it recognized the claim of the employees to a choice of bargaining representative. It does say that it has not confidence in the present Union, and this Board has no reason to doubt the sincerity of that statement. To refuse progress in collective bargaining relationships, however, *merely* because an employer states he has no confidence in the Union would be, in effect, to lend countenance to the belief that employers embrace only agencies which they can control or which, for any other reason, agree entirely with their views of industrial relations. So far as a Board of Conciliation is concerned, and in the absence of any policy laid down to govern recommendations of a Board on matters of this kind, this Board can only recommend what it feels in the circumstances would be reasonable. Of prime importance in determining the reasonableness of a request for some form of union security is, as expressed in the report of the Malleable Company dispute, the confidence which an employer has in the Union. As confidence existed in that case it was uncessary to go further, but it would seem self-evident that in any determination of reasonableness the Board must be concerned with the question whether a union should reasonably be entitled to the confidence of an employer. This must be so, otherwise the whole purpose of collective bargaining could be frustrated by an employer taking a position of lack of confidence on nothing more substantial than unreasoning prejudice to collective bargaining generally and a specific union in particular.

The present dispute is particularly in point on this issue, since the majority of this Board have found in the Ontario Malleable Report that this Union had obtained the confidence of its employer. The issue in the present case would therefore seem to be not one of the confidence of the employer in the Union, because at the outset of the proceedings before this Board and throughout, it has been made apparent that the employer had none, but rather whether that lack of confidence was justified by any facts produced before this Board.

The Company was asked to specify any particulars which indicated a lack of responsibility on the part of this Union. Two or three instances were put forward by the Company as showing why, in their opinion, the Union did not merit confidence. One of these was the failure of the Union to consider the terms of the new form of collective agreement brought out in response to the Union's demand for a union shop during the present negotiations. This incident has already been

referred to and the Company's argument, shortly put, is that as this agreement was in its nature a reasonable one, the refusal of the Union to deal with it could only be treated as a sign of irresponsibility. It is sufficient to say that this argument has little weight with the Board, because if the Company were willing to bargain on the terms of the old agreement if the Union dropped the union shop clause, as the Company indicated, the introduction of the new draft was more or less bound to create suspicion of the Company's motive. The fact that when the agreement was adequately explained to the Union, negotiations proceeded satisfactorily on the basis of the new agreement, seems sufficient to deprive the incident of any weight, particularly when one bears in mind the background of dealings between the Union and the Company, which will be referred to below.

Another incident put forward by the Company was the fact that in January of the present year, with the existing collective agreement expiring in May, the Union asked for an increase in wages which the Company felt should be postponed until the termination of the collective bargaining agreement. Notwithstanding this objection on the part of the Company the Union made application to the Regional War Labour Board which the Company considered as a refusal to bargain. The Regional War Labour Board ruled against the application and an appeal to the National War Labour Board was lodged by the Union. As all this transpired at the time negotiations for the present agreement were pending, the Company suggests that this attitude on the part of the Union was ill-advised and is evidence, if not of irresponsibility, then at least of unsuitability to merit the further confidence of the Company. In addition, members of the moulding department went out on strike on August 2nd over the decision of the Regional Board and the Company feels that this could only be interpreted as a club to obtain the wage increases refused by the Regional Board.

It is sufficient to say with regard to this strike which lasted for one and a half days only, that it was not carried out with the approval of the present Local and we are satisfied that the international representative was instrumental in persuading the men to go back to work and continue negotiations. While from one point of view the Union may be considered as ill-advised to have made an application to the Regional War Labour Board and to have taken steps to prosecute an appeal, we do not see how this Board can consider that a Union which avails itself of legal procedure can be deemed irresponsible. With the policy of that procedure this Board is in no way concerned. Similarly, the Board fails to appreciate why the Company should consider the Union's setting in motion proceedings which eventually resulted in the present Conciliation Board can be considered as evidence of the Union's unsuitability to be given any further recognition by the Company. It has become quite evident in the course of the prolonged conciliation attempts made by this Board that agreement on any form of union security was impossible. In that event it is not for the Company to object to a union availing itself of an invitation held out by Order in Council. Whether the parties should have agreed on other issues has been dealt with before and this Board is not prepared to say that the blame for failure to reach agreement on preliminary points should lie anywhere than on both parties equally.

Had there been any evidence of strikes which the Union had called or failed to handle in a responsible manner, this would have been particularly relevant to the issue of union irresponsibility. There was one strike in 1940 which was concerned with wage raises and which lasted from two to three weeks. This same strike involved the employees of the same Local at the Ontario Malleable Iron Company Limited. Before the Board dealing with the dispute in the latter Company no reference was made to that strike and the Company, indicated its full confidence in the Union. In the present case the Company did not rely on the 1940 strike as indicating any particular unsuitability of the Union. There was another strike in the present plant in July, 1943, which lasted for one and a half days and which the Union claimed arose from the refusal of the Company to observe piece work rates. The Company suggested that this strike was really concerned with a demand for a union shop. As we have previously indicated, whatever the true cause was, one of the effective means used by the international representative to get the employees to return to work was the request by the Company, publicly posted, suggesting that all employees join the Union. The fact that the employees were persuaded to return in as short time as they did does not seem to us to afford any evidence of lack of suitability, but on the contrary is evidence, even on the Company's interpretation of the strike, that the union shop demand was serious enough at that time to result in the short flare-up which took place. As mentioned before, members of the moulding department went out on strike over the decision of the Regional War Labour Board for one and a half days just previous to the first sitting of this Board in Oshawa. Again the Union was in no way responsible and was

instrumental, in part at least, in procuring men to return to work.

This record of itself does not warrant a finding of irresponsibility but when placed against the general background of collective bargaining in this plant does afford evidence of a state of unrest among the employees which, we believe, has perhaps been fostered by what the employees feel is a non-cooperative attitude on the part of the Company and which the Union Officials, in view of that attitude, seem to have handled fairly well and in accordance with the no-strike policy generally observed during the present war. It is idle for this Board to speculate, but one cannot help feeling that had it not been for the war the general lack of harmony in this plant might well have resulted in much more serious disturbance than has been the case.

The Board feels that inasmuch as relations between this Union and another similar company in the same community have been amicable, and as the Company in the present case after invitation to do so has been able to produce only incidents of the nature outlined above, there is no reason why this Board should find that the present employers had reasonable grounds for failing to have that confidence in the Union which eight years of bargaining experience should merit and which it has merited in a similar industry. This is in no way to place any blame on the part of the Company; nor did the present Union seek to do so. The Union in the present case made no specific charges against the Company or its management. Rather its feeling was that the Company had adopted an attitude amounting almost to indifference with regard to the Union's activity and a feeling that the Union had been able to obtain benefits for the employees and concessions from the Company only after unnecessary and prolonged negotiations and after the Company had delayed as long as they felt able to do so.

One specific instance which indicates the basis for the Union's belief and shows the attitude of the Company is furnished by the long drawn-out negotiations leading to a group insurance plan. In April, 1943, the Union asked for a plan of group insurance. When the contract was signed two months later it contained no provision regarding group insurance. The Union was assured shortly thereafter that the Company was still considering the matter. The same thing was said some six months later. As a result of this the Union circulated a petition asking for group insurance which was signed by some 339 employees. The Union was again assured by Mr. A. G. Storey that the Company would go along with the plan. In January, 1944, while wage increases were being discussed the Company said there would be no group insurance plan put into effect. Mr. Fenwick, who appeared before us, stated that at that time feeling in the Union was so high that he had to persuade the men not to strike over the insurance issue. Negotiations continued until May and a delegation of the employees again attended on Mr. Fenwick and indicated that they would walk out on May 15 unless the insurance plan was put into effect. Mr. Fenwick wrote the Company advising them of the employees' attitude and asking for a decision. On June 24 the group insurance plan was finally adopted. Such delay the Union cites as typical of the Company's attitude on union requests, an attitude which has fostered a feeling amongst the employees that they have a grievance against the employer, particularly since fellow workmen in the Malleable plant are, apparently, not subjected to what they describe as the delaying tactics of the present Company.

It is unfortunate that this Board should have to make comparisons or distinctions between different employers. In view of the small community and the common purpose served by the one local this seems to be unavoidable in the present case. Certainly the members of this Union do so in their everyday contacts. The Board wishes to make clear that there is not the slightest evidence of bad faith on the part of the present Company. It can only say that the management of the present Company has perhaps been slower to meet or recognize reasonable requests made by a bargaining agency in its plant than other employers in the same district. It is inevitable that these differences in human nature should exist, but so far as this Board is concerned it can see no reason why, in making recommendations on the failure of the parties to agree it should consider the difference in temperament and outlook of an employer as the sole distinguishing feature on which to make a different recommendation on conditions essentially similar in other respects. In the minority report of the Board in the Ontario Malleable case, it was stated that it is conceivable that in some cases "where a company refuses to co-operate and where by that want of co-operation a lip service recognition of the Union renders real recognition nugatory, a modified form of union shop might be recommended in order to protect the union." Without going so far as to say that the present Company gave only lip service recognition to the Union, the present Board feels that there are no valid reasons why, granting substantially the same conditions in two similar industries, under the circumstances under which they find themselves in this community, different recommendations should be made in the case of a less co-operative employer than in the case of one who has expressed his confidence and willingness to co-operate to the full.

For these reasons the present Board cannot distinguish on any substantial ground the present case from that before the Board in Ontario Malleable Iron Company Limited dispute, and therefore this Board considers it should make the same recommendations as were made in that case.

It may be urged that the present Report pays undue regard to the findings of another Board in a different dispute, and that the present dispute should be treated as though it stood alone and without reference to what might have been recommended in another business. We do not believe this is either possible or desirable under the facts of the present situation. But even if this dispute could be treated totally apart from what may have been recommended in the case of the Malleable Company, this Board is of opinion that the Union in the present case and under the circumstances as disclosed is entitled to assurances from the Company guaranteeing its future maintenance. In view of the 82 per cent union membership after eight years of collective bargaining, this Board feels that the Company should reasonably be expected to make a concrete and substantial effort to recognize the bargaining agency in their plant as an integral part of its industrial organization. Voluntary check-off, as suggested by a unanimous Board in the Pedlar People Limited dispute[1] and in the Ontario Malleable Iron dispute, is a gesture of co-operation which cannot harm a company and which should assist in promoting good relations. Thus it was unanimously recommended in the Pedlar dispute where the Union's bargaining experience had been confined to a period of less than a year. It seems that something much more than that is required to alleviate the feeling of mere toleration which reflects the Union's view of the employer's position in the present case after eight years of bargaining. Certainly under these circumstances the maintenance of existing membership should be recommended for the period of the next agreement if only as an experiment looking to improvement in relations which both the Company and Union admit have not been of the happiest. We believe, however, that in addition to the reasons given in the decision of the Board in the Ontario Malleable dispute, such a provision should be recommended on the facts of the present case, in order to assure a union that the position which it has earned in times of full employment, (which position, save for the war might have resulted in a Union forcing the issue of union shop) should not be impaired in the unsettled conditions which may occur on the termination of hostilities.

[1] L.G., Oct., 1944, p. 1231.

We do not believe that existing non-union employees should, at this time, be compelled to join the Union as a condition of continued employment, but once admit that a union is entitled to maintenance of membership we can see no valid reason why a union with as strong support as 82 per cent should not ask the employer, subject to Selective Service regulations, to cooperate and reduce for the future friction due to the presence of persons who are willing to accept the benefit of collective bargaining without assuming the burden. If it were possible to compel future employees to contribute something in the nature of a "service charge" for such benefits without being compelled to become a member of the Union itself, we think that much objection that has been raised to the union shop compelling persons to surrender their individual beliefs would be obviated, but only at the expense of another doctrine of "no taxation without representation". In a practical world, if a choice has to be made between what are, after all, theoretical conceptions, we should compel the extreme individualist for whose freedom so much concern has been shown at the expense of the majority's freedom, to contribute his share and voice his individualism to his fellow workers through the union of their choice, even as the individualist in the wider political sphere must operate from within a system with which he may find himself in complete disagreement. Therefore, on grounds quite independent of consistency with recommendations made on what are, for all material purposes the same, we recommend that the collective bargaining agreement between the parties for the next year include a clause which provides for:

(*a*) existing employees who are members of the Union remaining in good standing for the duration of the agreement as a condition of employment;

(*b*) all future employees hired during the life of the agreement shall become members of the Union within one month from the date of hiring and shall remain members in good standing as a condition of employment;

(*c*) voluntary check-off of Union dues on receipt by the Company of proper authorization from employees.

The Board recommends against the necessity of existing employees who are not members of the Union joining the Union as a condition of employment. This may be included as a proviso to (*a*) or omitted altogether as the parties see fit.

One point raised in argument should perhaps be mentioned. The Company drew our attention to the fact that under s. 19 (1) of P.C. 1003 an employer is forbidden to "contribute financial or other support" to a trade

union or employees' organization and suggested that this forbade a company agreeing to a voluntary check-off as a separate item since this would be a contribution of "other support" to a trade union. The Company took the position that if a voluntary check-off were given along with either maintenance of membership or union shop it became part of the "coercion" referred to in s. 20 and was saved by the proviso to s. 20 (1) exempting provisions in a collective agreement. The section in question is far from clear and in the absence of a saving provision regarding a collective bargaining agreement such as is found in s. 20 (1) the Board appreciates that on a strict construction "other support" might conceivably be constructed as covering the expense of a company incurred in making the check-off if the latter could be considered as a direct benefit from company to union. This Board has said on another occasion, however, (Pedlar People Ltd. Report) that voluntary check-off authorizations "stand in no very different position than ordinary assignment of debts in private commercial relations." The mere fact that a trade union receives the benefit of an assignment of wages made by an individual employee is not, in our opinion, sufficient to bring into operation the prohibition in s. 19 (1). The latter would seem to contemplate a direct benefit conferred on an employers' own initiative rather than the incidental benefit which results from obliging an employee. Even if voluntary check-off were recommended alone, the Board is, therefore, of opinion that there is nothing in P.C. 1003 to prevent the Company agreeing to such a provision in a collective agreement, since each individual employee can still determine for himself whether he wishes the company to oblige him concerning the matter. Had the Board been of opinion that a voluntary check-off provision was contrary to s. 19 (1) it might have been necessary to examine more closely the Company's argument that when such check-off was included along with maintenance of membership or union shop it became a form of "coercion" under s. 20 (1) and was protected by the saving proviso of that clause. Under the circumstances, this is unnecessary.

All of which is respectfully submitted.

Dated at Toronto this twenty-seventh day of September 1944.

Member.

Minority Report

Re: Wartime Labour Relations Regulations, P.C. 1003 and re Fittings, Limited, Oshawa, Ontario, and Employees, Members of Local 1817, United Steelworkers of America.

To the Honourable Humphrey Mitchell,
Minister of Labour,
Ottawa, Canada.

As I find myself unable to concur in all the findings and recommendations of the majority of this Board, I am submitting herewith a separate report.

I have had the advantage of reading the majority report, which sets out in considerable detail their understanding of many of the facts essential to a consideration of the dispute between the parties on the "union shop" and "check-off" issues which, by consent, are the only issues being dealt with by the Board at this time, the parties being still in the course of negotiating all other matters in dispute. Throughout the proceedings the Company representatives endeavoured to avoid recrimination and the raking up of past differences. The Board did not think it necessary or advisable to hear the evidence of individual witnesses as to various statements which were made by both parties and I do not propose to harrow that ground nor to argue over details. In my opinion that would serve no purpose other than to keep old issues alive and add fuel to the fire.

The difference of opinion between the majority of the Board and myself relates, not so much to the facts themselves, but to the inferences to be drawn from those facts and the recommendations which should properly be made in all the circumstances, having regard to the history and state of the relations between the parties. In short, I feel that my conclusions and recommendations are supported by the statement of facts outlined in the majority report without haggling over details.

All members of the Board are unanimous in finding that the relations between the Union and the Company are not, and have not been, completely satisfactory and that the Company, acting sincerely and in good faith, has not confidence in the Union. This lack of confidence and a feeling of mistrust has, unfortunately, been mutual. The majority of the Board feel, however, that such lack of confidence on the part of the Company was not justified by any facts produced before the Board, and make the same recommendation as they made in the case of Ontario Malleable Iron Company Limited on August 23rd, 1944. I was not a member of the Ontario Malleable Board and happily am not in any way em-

barrassed by the report in that case, nor in any way bound by it.

It seems to me important not to confuse the issue of collective bargaining with the issue of the union shop. Under P.C. 1003 the obligation to bargain collectively is imposed by law upon employers and has nothing whatever to do with the state of the employer's mind or the degree of "affection" in which he holds the Union. Collective bargaining can and does exist and flourish without a demand for any form of "union security". Once a Union has been recognized as the collective bargaining agent of the employees in an appropriate bargaining unit, any collective agreement which may be arrived at by the employer and such agent is "binding on every employee in the specified unit of employees" by virtue of Section 8 (1) of the Regulations.

So far as the content of the agreement is concerned, however, and in particular the question of union shop, this does depend upon the state of the relations between the parties. As has been repeatedly pointed out, there is no legal compulsion on an employer against his will to agree to a provision for union shop, maintenance of membership or any other form of so-called "union security"; nor has any Government policy been laid down with a view to encouraging, much less obliging, an employer to compel any employee to relinquish his freedom of choice as to whether or not he will join a Union. P.C. 2685, which has not been revoked, purports to ensure freedom of action in this respect; and the most that P.C. 1003 can be said to do is to make legal any provision for union shop or maintenance of membership if mutually agreed to by the parties to a collective bargain—something which would otherwise be illegal coercive action.

Leaving out of account altogether the provisions of the National Selective Service Regulations and the legal rights of discharged members of the Armed Forces, I would have difficulty in any event in recommending that an unwilling or reluctant employer, who is acting in good faith and sincerely lacked confidence in the Union which represented his employees, should be asked or expected to agree to a provision for a union shop or maintenance of membership. Holding the view I do of the relations and conduct of the parties in this case, and all the circumstances of the matter, it is unnecessary to discuss that position or to consider what my attitude would be if (as is not the case here) it could clearly be demonstrated that an employer lacked such good faith or sincerity and refused to agree to a provision which was common to the industrial practices of the industry and locality in which he carried on business.

The fact that the Union in this case is the same Union as in the Ontario Malleable case (although with a slightly different bargaining committee) and may, in the opinion of the majority of the Board in that case, have gained the confidence of another employer in the same community, has no necessary bearing on whether this employer should have good relations with or confidence in it. The successful conduct of industrial relations, like the conduct of all other human relations, must take into consideration differences in human nature, as well as differences in temperament, outlook and background of the parties.

As a result, it may very well be that different employers will take different attitudes to various aspects of industrial relations and practices, and that one may take more time than another to "think things over" before hurrying into important decisions. Similarly, the distribution or lack of concentration of authority in one plant may result in action taking different forms than in another. However, when appraising this Company's method of conducting industrial relations with its employees it must not be forgotten that it voluntarily recognized the Union years ago as the exclusive bargaining agent for its employees and, as a result, can hardly be described as "old fashioned" or "indifferent" to the Union.

If reasonableness is to be the test of what should govern the relations of the parties, it seems to me that the Union has been unreasonable in expecting this employer to conduct industrial relations with his employees in exactly the same manner as a competitor with whom the Union has similar relations. To assume, as the Union apparently does, that it is entitled to exactly the same treatment from all other employers as it receives in quarters where it is most favoured, is entirely unwarranted. To expect an employer, whom the Union claims is by nature slow in making concessions demanded by his employees, to march at the head of the collective bargaining procession by granting a union shop or maintenance of membership in a community and in an industry where such provisions are in no way general, if they exist at all, is in my opinion far from reasonable. In any event, it does not yet appear that the Ontario Malleable Company has accepted, or intends to accept and act upon, the recommendation of the majority of the Board in that case.

The Majority of the Board in the Ontario Malleable case and the unanimous Board in the Pedlar People case declared that a high

degree of confidence in the Union should exist on the part of the employer before he could reasonably be asked to agree to Union membership as a condition of employment. Such a condition admittedly does not exist here. It is significant, however, that this Board is unanimous in finding that the relations of the parties have noticeably improved since the establishment of this Board and that mutual feeling of distrust is being eradicated. As mentioned in the majority report, the parties are still negotiating, with every hope of success, on other points which have been in dispute. Surely it is not unreasonable to recommend that the Union should welcome this improvement in relations and not at this time seek to force union security provisions upon an unwilling employer; but rather that it should build on these new foundations and demonstrate to the employer, by a change in its approach, that it deserves his confidence and support.

While it may be that the management has not always been as quick as the Union would like in making decisions on Union demands, I think that the Union's method of conducting its whole programme has had the inevitable effect of putting management on the defensive. Regularly confronting an employer with concessions which are said to have been readily obtained from his competitors may be effective in some cases as a method of collective bargaining, but it cannot be said in the case of this employer to have been conducive to more harmonious relations, or the establishing of confidence. I gained the distinct impression during the proceedings that the management, rightly or wrongly, felt that it was being continually threatened and "badgered" by the Union. And I think the facts recited in the majority report support this view.

I am of opinion, therefore, that apart altogether from the merits or demerits of union shop or maintenance of membership provisions, either in principle or in practice, the employer cannot in the present circumstances reasonably be asked to agree to the acceptance or maintenance of union membership as a condition of employment either in the case of present employees (whether or not members of the Union) or in the case of future employees.

So far as concerns present employees who are members of the Union, it seems to me that requiring them to maintain their membership for the period of the agreement (as the majority have done) will merely aggravate the feeling which is said to exist between present union and non-union employees. If it is true, as the Union alleges, that the real problem in the plant arises from the failure of present employees to join the Union and carry their share of the expense of collective bargaining, surely it cannot help, but only aggravate, the situation to make it impossible for those who now voluntarily support the Union to change their mind at any future date, while leaving the same non-union employees free to remain outside the Union. In addition, there was no evidence before the Board of any defection in Union membership so that, in my opinion, the recommendation of the majority in favour of maintenance of membership solves no real problem.

So far as concerns present employees who are not members of the Union, and whose presence in the plant is said to give rise to the real problem in the plant, even the majority do not suggest that they should be compelled to accept Union membership as a condition of continued employment; and so far as concerns future employees, I have already indicated my view that, apart from all other considerations, this employer cannot reasonably be asked, in the circumstances, to agree to Union membership as a condition of their employment.

As to a provision for voluntary revocable check-off of Union dues on receipt by the Company of proper authorization from the employees, I am in agreement with the majority in their recommendation, provided that the arrangement is made between each employee and the Company, for the convenience of the former, and is not operated in such a way as to be an instrument of pressure for increasing Union membership. Any attempt by the Union to obtain the check-off in any form which could be used as a means of coercing unwilling employees to join the Union or to make it appear that their employment depended upon their acceptance of the check-off arrangement, would, in my opinion, be sufficient justification for the employer to refuse to make any such arrangement.

I agree with the majority that in some circumstances there may be great weight in the Company's contention that where the check-off is claimed as a concession to the Union, and for its convenience and benefit, it may very well be contrary to Section 19 (1) of P.C. 1003. As a private arrangement between employee and employer, for the convenience of the former, I think a provision for the check-off can be made unobjectionable notwithstanding that it may incidentally result in some benefit to the Union itself. It should, however, be pointed out that no evidence was presented in this case to establish any practical difficulty in contacting employees for collection of dues and that the Union's case in support of its claim for such a provision was

based rather on the convenience of the Union and resulting benefits to it than on the convenience and benefits resulting to the individual employees.

I think, however, that an arrangement for check-off in some form which would not be objectionable within the meaning of P.C. 1003 should, in all the special circumstances of this case, be offered to the employees as a gesture of good-will and as evidence that the employer's attitude is one of co-operation and not merely one of "toleration" or "indifference" as suggested by the Union.

I therefore recommend:

(*a*) that the Company arrange for a voluntary revocable check-off of Union dues on receipt by it, direct from any employee, of proper authorization; and

(*b*) that the Union drop its demand for a union shop clause as put forward before this Board.

All of which is respectfully submitted.

Dated at Toronto this 27th day of September, 1944.

Report of Board in Dispute between Canadian Oil Companies, Limited, Petrolia, Ontario, and its Employees.

On October 10 the report of the Board of Conciliation established to deal with a dispute between the Canadian Oil Companies Ltd., Petrolia, Ont., and the National Union of Petroleum Workers, Local No. 1, was received by the Minister of Labour.

The personnel of the Board was as follows: Mr. Charles Weir of Sarnia, Ontario, nominated on behalf of the company, Mr. Herbert Orliffe, the nominee of the employees concerned, and His Honour Judge J. J. Coughlin, the Chairman appointed on the nomination of the other two members.

A minority report signed by Mr. Weir was also received.

Following are the texts of the report and of the minority report:

Report of Board

In the matter of the Wartime Labour Relations Regulations, P.C. 1003, and of a dispute between Canadian Oil Companies, Limited, Petrolia, Ont., Employer, and National Union of Petroleum Workers Local No. 1 (C.C.L.) Employees.

To: The Honourable Humphrey Mitchell, Minister of Labour:

The Board of Conciliation appointed pursuant to the above regulations hereby presents its report as follows:—

The dispute in this matter revolved around the form of what is called a "maintenance of membership" clause.

The Company originally opposed the insertion of any such clause on the grounds it apprehended such a clause might work hardship on old time employees.

The Union originally demanded a clause preventing any defection of members during the duration of the contract on the grounds that having assumed obligations to the Company under the contract its power to enforce obedience to its terms by its members would be impaired if they could withdraw from membership at will.

Both sides offered some concession from the original position but there still remained a gap to be bridged.

We think that the respective dangers anticipated by each side are much less than apprehended. We have, however, arrived at a formula for a proposed amendment which in our opinion should be regarded as a satisfactory compromise substantially guarding against the apprehended dangers.

We therefore recommend the inclusion in the agreement in substitution for paragraph 4 thereof, the following:—

4. "All employees who are members of the Union in good standing in accordance with the constitution and by-laws of the Union, and all employees who hereafter become members, shall, as a condition of employment, remain members of the Union in good standing for the duration of this agreement, subject to the following provisos:—

(*a*) Any employee who is now or shall hereafter become a member of the Union may resign his membership by written notice signed by him and delivered or mailed to the president of the Union between the first and fifteenth days of November inclusive in any year.

(*b*) If any Union employee shall be expelled from the Union for non-payment of dues for a period of three months the grievance chairman shall notify the plant superintendent in writing, whereupon the Company shall within ten days terminate such employee's employment.

(*c*) If any Union employee shall be expelled for any cause other than non-payment

of dues the grievance chairman shall give the like notice but the Company shall in such case not be obliged to terminate the employee's employment until the sufficiency of the grounds of such expulsion is established by an appeal to an impartial umpire. Such appeal may be taken by the grievance chairman at any time after ten days from the giving of the above notice to the plant superintendent and shall be governed in other respects by the provisions of Section 14."

All of which is respectfully submitted.

Dated at Sarnia this 3rd day of October, 1944.

Minority Report

In the matter of the Wartime Labour Relations Regulations, P.C. 1003, and of a dispute between Canadian Oil Companies, Limited, Petrolia, Ont., Employer, and National Union of Petroleum Workers Local No. 1 (C.C.L.) Employees.

To: The Honourable HUMPHREY MITCHELL, Minister of Labour:

The undermentioned member of the Board of Conciliation appointed pursuant to the above regulations hereby presents his minority report as follows:—

From the outset of the hearing three facts were very clear. The relations between the Union and the Company were good. A collective bargaining agreement had been in existence since May 1, 1943. All amendments affecting the employees as individuals had been agreed to by the Company as requested by the Union. For the Board of Conciliation there was no matter affecting the individual employee, such as wages or conditions of work. The sole point was more academic than practical. The Union wanted the insertion in the agreement of a "maintenance of membership" clause by which an employee, once a union member, would forfeit his employment with the Company if he left the Union. The Company's attitude was that in addition to being free to join the Union of his choice, an employee must be as free to resign at any time he so desired.

Where the interest of individuals is affected the ordinary rules of compromise can effect a settlement, but here no individual is affected. Two principles are in conflict, one of which has to yield. As frankly stated by Mr. Robson, the union representative, the Union preferred an agreement with no "maintenance of membership" clause to one not to the Union's liking. In deciding which principle shall govern, the long view must measure each by the yardstick of democracy.

The Union's argument for the insertion of such a clause was that it had been a responsible Union maintaining good relations with the Company, and that the protection of the Union by the Company was in the Company's own interest—in the Company's interest because compulsorily held Union members can be disciplined by the Union, competing Unions can be kept from pirating the Union's membership and non-Union employees will not be able to agitate the bound union members, all of which would result in union tranquillity with resulting tranquillity of union-company relations.

The Company's argument was that in the democratic way of life an employee must be as free to resign from as to join a Union and that the matter was an internal Union problem.

There is no doubt on the legality of any "maintenance of membership" clause. The provisions of P.C. 1003 aimed at preventing opposition to unions are well known, but P.C. 1003 appears also intended to protect the employee's freedom of choice. Section 19, 2(*b*)—"No employer or employer's organization and no person acting on behalf of same shall impose any condition in the contract of employment seeking to restrain an employee from exercising his rights under these regulations." These rights are defined in Section 4 (1)—"Every employee shall have the right to be a member of a trade union or employee's organization and to participate in the lawful activities thereof." If an employee has the right to be a member of any union, it follows that he has the right to resign from one and join another competing union. So fundamental that it does not require written statement in Canada is his right to resign and join nothing. Section 20 (1) may make it legal for the Union to ask for a "maintenance of membership" clause but it does not make it legal for the Company to make the retention of a particular Union membership a condition of employment.

But whether or not legal, a "maintenance of membership" clause is the continuation of a principle which should cause concern to anyone interested in democracy. A workman frozen to his job, and frozen in the Union as a condition precedent to retention of the job. The final step for the respectable but individualistic employee dismissed for non-concurrence will be a conviction under the vagrancy sections of the Criminal Code. To such a result can the forgetting of fundamental principles lead.

It was interesting to note the admission in the Union's argument that English trade unionism relies on education and not collective agreements. In that country trade unionism is the growth of years. Willingness to conform resulting from educated self interest is democratic. The compulsion of the penalty of loss of employment is fraught with danger at this early stage of Petrolia unionism.

If this Union had a background of protection of the individual employee obtained through reasonable negotiation with the Company over a period of years, some deviation from the principle I have outlined might be considered. But it should be borne in mind that this Union is not the Canadian Congress of Labour, and, we are informed by the labour representative, not bound to follow the policy of the Canadian Congress of Labour. From its number, Local No. 1, it appears to be the first branch of this union in the oil industry. It has been in existence only about eighteen months. The collective agreement has just been revised after its first year. Till the point now in issue arose the Company had acceded to every Union request. Neither by time nor stress has this Union proved it is a responsible union in the oil industry or justifies deviation from a fundamental principle.

In the meantime no right is being infringed. Time will enable the applicant Union to establish its responsibility and gain confidence in the free choice of its members.

I therefore recommend that no change be made as requested by the Union. The majority report violates a fundamental principle whose right to exist must sometime be again decided.

All of which is respectfully submitted.

Report of Board in Dispute between C. Lloyd and Son, Ltd., Wingham, Ont., and the National Union of Woodworkers, Local No. 3 (C.C.L.)

On October 20, the Minister of Labour received the unanimous report of the Board of Conciliation established to deal with a dispute between C. Lloyd & Son, Ltd., Wingham, Ontario, and the National Union of Woodworkers, Local No. 3 (C.C.L.).

The Board was under the chairmanship of Dr. Alexander Brady of Toronto, Ontario, who was appointed on the joint recommendation of the other two members, Messrs. Norman L. Mathews and Herbert Orliffe, both of Toronto, the nominees of the company and the employees respectively.

The text of the Board's report follows:

Report of Board

Re: *Wartime Labour Relations Regulations P.C. 1003, and re C. Lloyd and Son Limited, Wingham, Ontario, and employees, members of Local No. 3, National Union of Woodworkers (C.C. of L.).*

To the Honourable Humphrey Mitchell,
Minister of Labour,
Ottawa, Ontario.

Sir:

The Board of Conciliation appointed by you has investigated the above dispute and has effected conciliation between the parties. It begs now to submit its report.

Four points were in dispute in the negotiation of an agreement between the Union and the Company. The first pertained to the scope or coverage of the proposed agreement, and here the principal point of disagreement pertained to the status of Mr. S. Bateson, who was claimed by the company to be a foreman and not included in the bargaining unit whereas the Union denied that Bateson was a foreman because his work was not of a truly supervisory nature.

After discussion with the parties the Board was successful in getting them to agree on two points: (1) That Bateson should be regarded as a member of the bargaining unit until such time as the Company recognized him more formally as a foreman than it had done in the past; for example, by writing him a letter specifying his foreman status and recognizing his supervisory power. (2) Workers, in the future, when formally recognized as foreman with the supervisory authority of foremen, should not be included in the bargaining unit.

The second matter in dispute concerned the length of the probation period before employees should be covered by Agreement. The Union asked for a period of thirty days and the Company in rejecting the Union request asked for a six months period. The parties, on the suggestion of the Board, finally agreed to accept the compromise of a four months probation period.

The third cause of dispute centred on the request of the Union for a Union shop clause in the agreement that would require all employees within the scope of the agreement to become members of the Union as a condition of their employment. This request was rejected by the Company. After much discussion the Board persuaded the Union to

drop its request for a union shop in order to demonstrate its will to facilitate an agreement.

The fourth cause of dispute pertained to the request of the Union for a check-off and the refusal of this request by the Company. At the suggestion of the Board a compromise was agreed upon wherein both parties accepted a voluntary check-off. The Board recommends that the following clauses be inserted in the collective agreement:

DEDUCTION OF UNION DUES

The Company will, during the life of this Agreement, if, and to the extent, authorized by each employee in the manner herein set out but not otherwise, deduct from the first pay cheque due to each such employee in each calendar month while such authority is in effect the sum of $1.00 and remit the same prior to the 10th day of the month following the month in which the deduction is made to the Treasurer of the Union. Any such authority to the Company shall be given in writing on the form set out in Schedule A hereto, shall be revocable at any time after six months from the date of such authority by notice to the Company and shall be signed in duplicate and delivered by the employee concerned to the Company's time-keeper. The original shall be left with such time-keeper and the duplicate given to the Union Treasurer. Any such authority shall take effect within ten days following the date of its receipt by the Company. Any such authority shall be irrevocable for a period of six months from its date unless within that time the employee quits the employ of the Company or ceases to be a member of the Union.

The Company will, at the time of making each such payment to the Treasurer of the Union, name the employees from whose pay such payment has been deducted and those who have revoked their authorization to the Company since the last such payment was made.

The revocation of any such authority shall be given in writing on the form set out in Schedule B hereto, shall be signed in duplicate and shall be delivered by the employee concerned to the Company's time-keeper. The original shall be left with such time-keeper and the duplicate given to the Union Treasurer. Any such authority shall take effect within ten days following the date of its receipt by the Company.

SCHEDULE A

Wingham, Ont. .....
(Date)

I hereby request and authorize C. Lloyd and Son Limited to deduct the sum of $..... for my Union dues from my first pay cheque each calendar month and to remit same to the Union Treasurer.

This authority is given voluntarily and without coercion of any kind.

.....
Employee

SCHEDULE B

Wingham, Ont. .....
(Date)

I hereby revoke the authority previously given C. Lloyd and Son Limited to deduct my Union dues and to remit same to the Union Treasurer and request that no further deductions be made for Union dues from my pay cheques.

This revocation is given voluntarily and without coercion of any kind.

.....
Employee

In conclusion the Board would like to express its appreciation that, although at the outset the two parties were strongly opposed on the points at issue, they both accepted with good will the suggestions of the Board in order to insure industrial peace.

All of which is respectfully submitted.

Dated at Toronto this eighteenth day of October, 1944.

(Sgd.) ALEXANDER BRADY
(Sgd.) HERBERT ORLIFFE
(Sgd.) NORMAN L. MATHEWS.

Report of Board in Dispute between Lake Shore Mines, Ltd., Kirkland Lake, Ont., and Local 240, Kirkland Lake Mine and Mill Workers' Union.

On October 28 the Minister of Labour received the unanimous report of the Board of Conciliation established to deal with a dispute between Lake Shore Mines, Ltd., Kirkland Lake, Ontario, and Local 240, Kirkland Lake Mine and Mill Workers' Union. A supplementary report was also submitted by Mr. Bora Laskin.

The Board was under the chairmanship of His Honour Judge John T. Mulcahy, of Pembroke, Ont., who was appointed on the joint recommendation of the other two members, Professor C. G. Williams and Mr. Bora Laskin, both of Toronto, the nominees of the company and the employees respectively.

The text of the Board's report and of the supplementary report follows:—

Report of Board

In the matter of the Wartime Labour Relations Regulations, P.C. 1003, and in the matter of Lake Shore Mines Limited, Kirkland Lake, Ontario (Employer), and Kirkland Lake Mine and Mill Workers' Union, Local 240 (Employees).

The Board of Conciliation, established in the above matter by Order of the Minister of Labour, bearing date 31st day of August, 1944, begs to report to the Honourable the Minister of Labour as follows:

1. The Board consisting of Judge John T. Mulcahy, Pembroke, Mr. Bora Laskin, Toronto, and Mr. C. G. Williams, Toronto, has held sittings at Toronto on the 17th, 19th, 20th, 21st and 23rd days of October, 1944.

2. Briefs outlining the positions of the respective parties, upon the points in dispute referred to this Board, were filed with the Board by the Employer and by the Employees, Union Local 240. This Board, at its sittings on 20th October, had the advantage of able assistance in the oral presentation of the views of the respective parties by Messrs. A. G. Slaght, K.C., and Lynn Beman for the Employer, and by Messrs. T. F. McGuire and Dougherty for the Employees.

3. The Employees are a Chartered Union, Local 240 of the International Union of Mine, Mill and Smelter Workers C.I.O., and local Union 240 was certified by the Supreme Court of Ontario as Bargaining Agency under the Ontario Collective Bargaining Act on 8th day of April, 1944. This certification was granted after a vote was taken of the employees of Lake Shore Mines Limited entitled to vote. This vote showed a majority in favour of Union Local 240. The figures regarding the vote, as given to this Board, are that out of 471 eligible to vote, 453 persons cast votes, and of these 453 voters, 236 were in favour of Union Local 240, and 213 were against Local 240 and in favour of Lake Shore Workmen's Council. No evidence was given before us that the situation has altered amongst the employees of the Lake Shore Mines Limited since the taking of this vote.

4. Negotiations between the Employer and Union Local 240 were undertaken on 22nd April last, and were continued through the months of May and June and fore part of July—the result being the agreement, copy of which is attached as Exhibit "A" to the Employees' Brief filed before this Board, and which is dated 15th July, 1944.

5. Out of a total of nineteen points which were in negotiation between the Employer and Union Local 240, all were settled by this Agreement except the three following, namely:

(1) Check-off;
(2) Time and one-half over eight hours in any one day;
(3) Time and one-half for the last one of the following four holidays, if an employee works on that day:—New Year's Day, Dominion Day, Christmas Day, Labour Day.

These three points in dispute are the matters referred by the Order of the Honourable the Minister of Labour to be dealt with by this Board under the terms of P.C. 1003.

6. This Board appreciates that the War Labour Board has final jurisdiction upon the questions arising in the sub-clauses 2 and 3 of paragraph 5 hereof, but in view of the requirements of Section 13 (2) of Order P.C. 1003, this Board has made a serious endeavour to bring the parties to an agreement upon the wage questions involved in the said two sub-clauses (2 and 3), and regrets to report that its effort at conciliation in that regard has been ineffectual.

7. The request of the Union, Local 240, for a "check-off" is contained in the reference to this Board in the words following:

> "The Company agrees on proper authorization from the Union to deduct the amount of one dollar ($1.00) each month from the wages due such employee who so authorizes such deduction and remit all such monies deducted to the Secretary of the Union not later than the 10th day of each month.
>
> Each employee who authorizes such deduction may cancel said authorization for deduction upon fifteen (15) days' written notice to the Union and Company of this desire."

8. After perusal of the Briefs filed by the Employer and by the Employees, and after lengthy and careful consideration of the oral arguments addressed to us by those appearing for the respective parties, this Board agrees, unanimously, that we do not find present here, circumstances which warrant us in recommending the "check-off" requested. The question of the legality of the "check-off" in view of the prohibitions contained in Section 19 (1) of P.C. 1003 was squarely raised before us by Counsel for the Employer, but, inasmuch as this Board has decided against the check-off on the merits, under the circumstances here existing, we make no ruling upon the point of legality.

All of which is respectfully submitted.

Dated at Toronto, this 23rd day of October, 1944.

Member.

Supplementary Report

In the matter of the Wartime Labour Relations Regulations, P.C. 1003, and in the matter of Lake Shore Mines Limited, Kirkland Lake, Ontario, and Kirkland Lake Mine and Mill Workers' Union, Local 240:

I concur with my colleagues in their refusal to recommend that the Company agree to a voluntary revocable check-off, but I wish to make explicit the considerations which lie back of my conclusion. There is no doubt that the Union's certification on April 8th, 1944, was unwelcome to the Company, for the history of the attempt of the Union to organize the Company's employees admits of no other interpretation. There is equally no doubt that the Company, being faced with the necessity of bargaining with the Union, did not flout the law, but entered into negotiations which culminated in a collective agreement dated July 15th, 1944. Having in mind (and this is a matter of public record) the bitterness which had existed between the parties, the conclusion of the collective agreement represents considerable progress towards the elimination of feelings of mutual distrust.

It is evident to me, however, that the parties are still at arm's length, for in their respective briefs, filed with the Board, and in their supplementary oral submissions, there was little that could be characterized as an approach to reciprocal cordiality. The development of harmonious relations is still before the parties, but so long as the Company remains unreconciled to the Union as the bargaining agency of the Company's employees, progress towards such relations will be halting.

This lack of reconciliation runs almost as a theme throughout the Company's brief. Thus, the brief states (page 3), "We have little reason to believe that the interests of the Union in this case coincide with the interests of the whole body of our employees"; again (page 4), "The Company finds that the check-off does make it difficult for employees to change their bargaining agency should they desire a change"; and again, (pages 5 to 6), "The Company cannot ignore its responsibility towards 212 of its employees now serving in His Majesty's forces (who must be re-employed) . . . (and) . . . since . . . there is strong difference of opinion amongst our present employees as to the collective bargaining agency proper to represent them, and with such a large group of our employees unable, because of active service, to register their preference, the Company is especially adverse to taking any action that might in any way provide or even be construed as preferential treatment for one union". The foregoing excerpts are typical; the brief in effect ignores that the applicant Union is the *certified* bargaining agency of all production employees, a factor which makes it entirely decorous for the Company to unbend in a few co-operative gestures.

I would not be much moved by the Company's unwillingness to give a check-off or by the absence of any custom of check-off in the gold mining industry, were I convinced on the facts adduced before the Board that such a request was, in the circumstances of this case, reasonable or that its implementation would at this stage strengthen the collective bargaining relations between the parties. The evidence presented to the Board suggests to me, however, that the request for a check-off is premature. While I regard the check-off as an aid to union stability, which is important to good collective bargaining, I do not think that it should be made the means of initiating that stability, saving perhaps cases where it appears that an employer's unfair labour practices have prevented a union from establishing itself on a solid footing. To the facts bearing on the union-company relationship already recited, may be added the following observations. No evidence was adduced by the Union as to its membership position, nor did it indicate in any way that the situation as at the time of its certification about six months ago, had undergone substantial change. There was no evidence before the Board of any interference by the Company in the Union's organizing efforts or that the Company was promoting or encouraging the Workmen's Council as against the Union. Nor did the Union represent that it had any difficulty, physical or otherwise, in collecting dues.

The Union is on the threshold of collective bargaining relations with the Company, its legal right to represent the Company's employees newly and narrowly won. Sympathetic reward for its hard struggle in the form of a recommendation for a check-off is not its present need but an opportunity to develop its program and to service employees' grievances under the terms of the agreement of July 15th, 1944. This the law assures it for one year, more or less.

My conclusion on the merits makes it unnecessary to deal with the Company's arguments as to the illegality of a voluntary revocable check-off under Section 19 (1) of the Wartime Labour Relations Regulations but I may perhaps reiterate the opinion on this issue expressed by another Board of Conciliation, of which I was a member, in reporting on a dispute between Fittings Limited, Oshawa,

and Local 1817, United Steelworkers of America.[1] That Board stated that Section 19 (1) "would seem to contemplate a direct benefit conferred on an employer's own initiative rather than the incidental benefit which results from obliging an employee". I may add that the narrow and technical interpretation advanced by counsel for the Company would go a long way, if it prevailed, in stultifying the give and take process which is collective bargaining, and would deprive collective agreements of those evidences of reciprocal courtesies as between employers and unions in which they now abound.

Dated at Toronto this twenty-third day of October, 1944.

(*Member*).

Conciliation Work of the Industrial Relations Branch During October, 1944

DURING the month of October officers of the Industrial Relations Branch were called upon to handle 17 industrial disputes or controversial situations involving 4,325 workpeople employed in 21 different establishments. Of these 14 were new disputes which originated during the month, while 3 were situations which had been unterminated as of September 30 and received further attention in October. They were dealt with under the provisions of the Conciliation and Labour Act, and, as such, were distinct from and in addition to cases coming under the Wartime Labour Relations Regulations to which reference is made elsewhere in this issue.

Industrial Relations officers of the Department of Labour are stationed at Vancouver, Winnipeg, Toronto, Ottawa, Montreal, Fredericton, N.B., and Glace Bay, N.S. The territory of the two officers resident in Vancouver comprises British Columbia and Alberta; two officers stationed in Winnipeg cover the provinces of Saskatchewan and Manitoba and Northwestern Ontario; four officers resident in Toronto confine their activities to Ontario and work in close collaboration with the Provincial Conciliation service; two officers in Montreal are assigned to the Province of Quebec and two officers resident in Fredericton, N.B., and Glace Bay, N.S., represent the Department in the Maritime Provinces. The headquarters of the Industrial Relations Branch and the Director of Industrial Relations and staff are situated in Ottawa.

Classified by industries, the disputes occurred as follows:—

MINING AND SMELTING, ETC.:	
Coal Mining	5
MANUFACTURING:	
Animal Foods	2
Metal Products	7
Non-Metallic Minerals, Chemicals, Etc.	1
TRANSPORTATION AND PUBLIC UTILITIES

Following are summaries of a few of the cases dealt with during the month.

Foundry Workers, Montmagny, P.Q.—As a result of a complaint made during September that an employee of A. Belanger Foundry, Limitée, Montmagny, P.Q. had been dismissed for the reason that he was a member of and active on behalf of the International Moulders' and Foundry Workers' Union of North America, the Department instituted a preliminary investigation by Mr. L. Pepin, Industrial Relations Officer, Montreal, P.Q. As the circumstances seemed to warrant a

more formal inquiry, the Minister of Labour on September 21 appointed the Honourable Mr. Justice Alfred Savard, of the Superior Court of the Province of Quebec, as an Industrial Disputes Inquiry Commissioner to conduct an investigation under the provisions of Order in Council P.C. 4020. Following a hearing of the case in the Court House, Montmagny, on October 13, the Commissioner reported to the Minister that the charges of the Union had not been substantiated.

Metal Workers, Hamilton, Ont.—Late in September the Department was asked to appoint a Commissioner to investigate charges that the International Silver Company of Canada, Limited, Hamilton, Ont., had dismissed an employee because of his union membership and activity. The complaint was made by the United Electrical, Radio and Machine Workers of America. Following a preliminary investigation by Mr. H. Perkins, Industrial Relations Officer, of Toronto, the Minister of Labour appointed his Honour Judge W. T. Robb, of Orangeville, Ont., to deal with the case as an Industrial Disputes Inquiry Commissioner under the terms of Order in Council P.C. 4020. At the end of the month the report of the Commissioner had not been received.

Coal Miners, Midlandvale, Alta.—On October 20 the Department was advised that some 200 miners employed by the Midland Coal Mining Co., Ltd., Midlandvale, Alta., had gone on strike in connection with a dispute over a claim by certain employees that they should be paid 35 cents per car for loading "bone" in cars in entries of the mine. The men involved were members of a local union of District No. 18, United Mine Workers of America. About a month earlier, Mr. F. E. Harrison, Western Representative of the Department of Labour, Vancouver, B.C., had been called upon to deal with the same dispute and had held conferences with representatives of the Company and the Union. Both parties agreed to refer the matter to arbitration before an independent chairman under the provisions of the Collective Agreement between them. Later a difference of opinion arose as to whether it should be agreed in advance that all decisions of the independent chairman should have retroactive effect to the date the dispute arose. The Company was willing to have the independent chairman decide upon the retroactivity of his award, but refused to consent to the Union's proposal that any award should automatically have effect from the date the dispute arose. Mr. F. E. Harrison again intervened in the situation in an effort to determine the practice which had been established by custom in the district among members of the Drumheller Coal Operators Association. Finally the parties agreed to a formula under which the independent chairman could set the date on which his award should become effective, but, if a date were not set, the decision would be retroactive to the time the dispute was first taken up with the management. At a meeting convened in Drumheller by Mr. Harrison on November 1 and 2, District Officers of the Union recommended that the men accept the settlement and the miners voted to resume production on November 4.

Metal Workers, Montreal, P.Q.—Under the terms of an Agreement between Cambridge Machine Tools and Aircraft Supplies, Ltd., and the United Electrical, Radio and Machine Workers of America, the Department was asked in Mid-October to appoint the chairman of a Board of Arbitration to deal with a dispute over the dismissal of an employee of the Company. The man in question had been discharged because of absenteeism, which the Union claimed was unjust treatment since his absences had been caused by illness. Mr. Bernard Rose, K.C., of Montreal, was appointed as Chairman of the Arbitration Committee, upon which the Company and Union also had representatives. After the hearing of medical evidence, the Chairman suggested a reconsideration of the case. Following meetings between the Company and Union representatives, the employee was reinstated.

Metal Workers, Belleville, Ont.—By joint consent of the parties, Mr. F. J. Ainsborough, Industrial Relations Officer of Toronto, on October 11 and 12 acted as Chairman of a Board of Arbitration to deal with various disputes between Reliance Industries, Ltd., Belleville, Ont., and its employees, members of Local 426, United Automobile Workers of America. Hearings were held in nine cases involving some 15 workpeople. The claims of the Union were denied in five cases, while decisions favourable to the employees were rendered in four. A few other cases were withdrawn by the Union after partial hearings.

Coal Miners, River Hebert, N.S.—Following a breakdown in mine haulage apparatus, some 122 employees of the Standard Coal Company Ltd., River Hebert, N.S., went on strike on October 24th, alleging that the management had violated a clause in the contract between the Company and the United Mine Workers of America providing for one hour's lost time due to failure of machinery. When the president of the Local Union, No.

7461, requested mediation on the part of Mr. Allan MacDonald, Industrial Relations Officer, Glace Bay, N.S., the latter informed the District Executive of District 26, United Mine Workers of America, that the men should be advised to resume work immediately pending investigations in accordance with established grievance procedure. Such advice was tendered to the local union by the Secretary-Treasurer of District 26, and also by Mr. H. R. Pettigrove, Industrial Relations Officer, Fredericton, N.B., but the miners refused to return to work until the arrival of a representative of the District Executive. Mr. Pettigrove then intervened with the Sub-district Board Member of the Union, who arranged a conference on October 30th with the management of the Mine and Local Union representatives. An agreement was reached the following day whereby employees would be paid for the time that they remained in the mine after the failure of the haulage machinery. The men resumed production on November 1st.

Strikes and Lockouts in Great Britain and Other Countries

THE latest available information as to strikes and lockouts in various countries is given in the LABOUR GAZETTE from month to month, bringing down to date that given in the March, 1944, issue in the review of "Strikes and Lockouts in Canada and Other Countries". The latter included a table summarizing the principal statistics as to strikes and lockouts since 1919 in the various countries for which such figures are available. Statistics given in the annual review and in this article are taken, as far as possible, from the government publications of the various countries concerned.

Great Britain and Northern Ireland

The British *Ministry of Labour Gazette* publishes statistics dealing with disputes involving stoppages of work and gives some details of the more important ones.

The number of work stoppages beginning in August, 1944, was 167 and ten were still in progress from the previous month, making a total of 177 during the month, in which 33,800 workers were involved and a time loss of 125,000 working days was caused.

Of the 167 work stoppages commencing in August, 16 arose out of demands for increased wages, seven over proposed reductions in wages, 60 over other wage questions, two on questions as to working hours, 27 over questions respecting the employment of particular classes or persons, 49 over other questions respecting working arrangements, four over questions of trade union principle and two were in support of workers involved in other stoppages.

New Zealand

The number of industrial disputes recorded for the first six months ended June 30, 1944, was 93, involving 18,695 workers, with a time loss of 39,471 working days.

United States

Preliminary figures for September, 1944, show 390 strikes beginning in the month, in which 185,000 workers were involved. The time loss for all disputes in progress during the month was 660,000 working days. Corresponding figures for August are 485 strikes, involving 190,000 workers, with a time loss of 935,000 working days.

Strikes and Lockouts in Canada During October, 1944

DURING the month of October strike activity in Canada remained low. There was a slight increase as compared with the previous month, but a very substantial decline was registered as compared with October, 1943. Preliminary figures for October, 1944, show 12 strikes in existence during the month, involving 4,157 workers and causing a time loss of 6,935 man-working days, as compared with 9 strikes in September, with 1,034 workers involved and a time loss of 800 days. In October, 1943, there were 36 strikes with 6,092 workers involved and a time loss of 25,639 days.

Preliminary figures for the first ten months of 1944 show a total of 172 strikes, involving 74,391 workers with a time loss of 485,924 man-working days. Comparative figures for the same period last year show 358 strikes, with 165,866 workers involved and a time loss of 885,282 days.

There were no strikes carried over from September and of the twelve which commenced during October three resulted in favour of the workers, five in favour of the employers and two were indefinite in result work being resumed pending final settlement. At the end of the month two strikes of coal miners, both at Midlandvale, Alta., were unterminated.

The record does not include minor strikes such as are defined in another paragraph nor does it include strikes as to which information has been received indicating that employment conditions are no longer affected but which the unions concerned have not declared terminated.

STRIKES AND LOCKOUTS IN CANADA, JANUARY TO OCTOBER, 1943-1944

Cumulative totals	358		165,866		885,282

* Preliminary.

† Strikes unterminated at the end of the previous year are included in these totals.

The record of the Department includes lockouts as well as strikes but a lockout, or an industrial condition which is undoubtedly a lockout, is seldom encountered. In the statistical table, therefore, strikes and lockouts are recorded together. A strike or lockout included as such in the records of the Department is a cessation of work involving six or more employees and lasting at least one working day. Strikes of less than one day's duration and strikes involving less than six employees are not included in the published record unless ten days or more time loss is caused, but a separate record of such strikes is maintained in the Department and the figures are given in the annual review. The records include all strikes and lockouts which come to the knowledge of the Department and the methods taken to obtain information preclude the probability of omissions of strikes of importance. Information as to a strike involving a small number of employees or for a short period of time is frequently not received until some time after its commencement.

STRIKES AND LOCKOUTS IN CANADA DURING OCTOBER, 1944*

Industry, occupation and locality	Number involved		Time loss in man-working days	Particulars†
	Establishments	Workers		
Strikes and Lockouts Commencing During October, 1944				
MINING—				
Coal miners, Nacmine, Alta.	1	193	193	Commenced October 18; protesting alleged improper cleaning of undercuts; terminated October 18; return of workers; in favour of employer.
Coal miners Midlandvale, Alta.	1	200	2,000	Commenced October 20; interpretation of clause in agreement *re* payment for loading out bone in mine cars; unterminated.
Coal miners, Drumheller, Alta.	1	120	120	Commenced October 23; for payment for travelling time when moving coal cutting machines from one place to another; terminated October 24; return of workers; in favour of employer.
Coal miners, River Hebert, N.S.	1	130	910	Commenced October 24; for payment for time lost following mechanical breakdown; terminated October 31; conciliation, federal; in favour of workers.
Coal miners, Midlandvale, Alta.	1	82	492	Commenced October 25; *re* number of miners from whom drivers to haul coal and for lunch period for surface workers on company time; unterminated.
Coal miners, Bellevue, Alta.	1	*(a)* 300	300	Commenced October 27; protesting delay of man-trip in taking men from mine; terminated October 27; return of workers; in favour of employer.
MANUFACTURING—

Growth of Joint Production Committees in Great Britain

SPEAKING in the British House of Commons on August 3, the Parliamentary Secretary to the Minister of Production commented on the "great development" of joint production committees in Great Britain that has taken place in the last two or three years. He said that in that time almost 5,000 such committees had been established, and added: "The House will feel that the scale of this movement is a significant feature of our war production effort."

He pointed out that in addition to their direct contribution to production in the form of technical suggestions, the committees had proved their usefulness in a variety of important matters. He mentioned specifically their helpfulness in fuel economy, campaigns for salvage, prevention of fire and accidents, and measures to reduce losses in production through enemy attacks. He declared also that they were a valuable channel for the dissemination of information about changes of program. "They have done an immense amount to remove many avoidable causes of friction," he stated, "to provide answers to hosts of questions, to the 'whys' and the 'why nots' which, if not answered, are a potent cause of friction. Friction, of course, means waste."

Admitting that "in a few cases there may have been a tendency on the part of these committees to criticize the management and the management perhaps looking suspiciously and rather impatiently on the suggestions of the workers," he said that there has been, on the whole, a "fine and useful spirit of co-operation shown between the two sides."

Continuing, he declared: "The unity of purpose which has been established during the war has found its organic expression at the top in the national Production Advisory Council, which advises the Minister of Production and the Supply Ministers, and the Joint Consultative Committee which advises the Minister of Labour. The joint production committees or works councils, as they are sometimes called, are an expression of the same spirit at the factory level."

He expressed the hope that this machinery for labour-management co-operation would continue during the peace. "It would be lamentable," he said, "if the spirit embodied in it were to evaporate at the end of the war. The task of reconstruction will need all the collaboration we can get, and in my view we simply cannot afford to dispense with this spirit of collaboration after the war."

He stated that the Minister of Labour, the Honourable Ernest Bevin, was in active consultation with the Trades Union Congress, with the Employers' Federation, and with branches of industry "with a view to arriving at proposals for the maintenance of this machinery of collaboration in the post-war period."

Labour-Management Production Committees and Absenteeism

An illustrated booklet published by the United States War Production Drive, Washington, as a guide for plant labour-management production committees is entitled *Ways of Dealing with Absenteeism.*

The booklet recommends that committees appointed to investigate absenteeism in a particular plant begin by computing the amount of absenteeism that exists, and continue by determining the causes. Types of absence should be analyzed, and attempts made to deal with them according to their causes, whether illness and accident, fatigue, shift difficulties, transportation problems, bad housing, housekeeping responsibilities, low morale resulting from poor production practices or grievances, or various other factors.

Among the remedies proposed are sub-committees to deal with specific problems, attempts to gain community co-operation, publicity and information programs, personal interviews and home visits, and awards and competitions between groups.

Collective Agreements and Wage Schedules

Recent Collective Agreements

COLLECTIVE agreements received in the Department are outlined in the LABOUR GAZETTE from month to month. It is not possible because of limitation of space to include all agreements received. The agreements are in most cases signed by representatives of the employers and workers, but schedules of rates of wages, hours of labour and other conditions of employment drawn up and verbally agreed to by representatives of the employers and workers are also included.

Agreements made obligatory under the Collective Agreement Act in Quebec are summarized in a separate article following this.

Manufacturing: Tobacco and Liquors

TORONTO, ONTARIO.—W. C. MACDONALD, INC. AND THE TOBACCO WORKERS' INTERNATIONAL UNION, LOCAL NO. 235.

Agreement to be in effect from March 31, 1944, to March 31, 1945. This agreement is similar to the one previously in effect and summarized in the LABOUR GAZETTE, March, 1943, p. 338, with these exceptions:

Vacation: in addition to one week's vacation to employees with one year's service, an extra three days is granted after 10 years' service, 4 days after 15 years' service and 5 days after 20 years' service.

All employees who are now members of the union or hereafter become members will remain members in good standing. All new employees shall become members of the union.

Manufacturing: Fur and Leather Products

BATAWA, ONTARIO.—BATA SHOE COMPANY LTD. AND THE BOOT AND SHOE WORKERS UNION, LODGE 715.

Agreement to be in effect from September 6, 1944, to May 1, 1945 and thereafter from year to year subject to notice. The company recognizes the union as the sole collective bargaining agency. No discrimination or coercion against any employee because of his union membership or non-membership. Check-off: the company will deduct union dues from the weekly wages of union members so requesting it.

Hours: 48 hours of productive work weekly, and in addition a 10-minute rest period and 10 minutes for cleaning machinery, etc. each day. Overtime is payable at time and one-half. Vacation: one week with pay to employees with one year's service. Wages are on a piece rate basis, but every employee is guaranteed a basic wage: for men, $24 to $26 for a 50-hour week; for boys, $15.60 to $20.80 for a 50-hour week; for women and girls, $15.60 to $18.50 for a 50-hour week; for girl beginners, $12.50 to $15.60.

Provision is made for the settlement of disputes.

Manufacturing: Printing and Publishing

CALGARY, ALBERTA.—THE CALGARY HERALD AND THE CANADIAN NATIONAL PRINTING TRADES UNION, LOCAL NO. 1.

Agreement to be in effect from July 8, 1944, to July 7, 1947. Only union members to be employed, if available.

Hours: 45 per week. Overtime is payable at time and one-half; work on Sundays and eight specified holidays, double time.

Minimum wage rate: $1 per hour for day work; $1.06 per hour for night work; $1.10 per hour for lobster shift.

Apprentices serve for five years; one apprentice allowed to every ten journeymen; apprentices to be paid from 25 per cent of journeymen's scale in first year to 75 per cent during fifth year.

Provision is made for the settlement of disputes.

Manufacturing: Metal Products

LACHINE, QUEBEC.—DOMINION BRIDGE COMPANY AND UNITED STEELWORKERS OF AMERICA, LOCAL NO. 2843.

Agreement to be in effect from August 26, 1944, to August 25, 1945, or 1946. The company recognizes the union as the sole collective bargaining agency. No discrimination by the company or the union against any employee on account of his union membership or non-membership.

Hours: 9½ per day for 5 days, a 47½ hour week. Overtime is payable at time and one-half; double time for all work on Sundays and seven specified holidays.

Minimum hourly wage rates are not to be considered a settled part of the agreement. Minimum rates for some classes: boring 80 cents; planing, turning, milling 75 and 80 cents, shaping 75 cents, grinding 75 and 80 cents, drilling 65 to 75 cents, tradesman 95 cents, fitting 70 to 80 cents, pattern making 80 cents, turning 65 and 70 cents, blacksmithing, toolsmithing, anglesmithing and forging 80 cents, punching 70 cents, riveting and welding 80 cents, spray painting 75 cents, cleaning 65 cents, tinsmithing and pipefitting 70 to 80 cents, carpentry 70 to 80 cents, painting 65 cents, electric crane driving 65 to 75 cents, labourers 56 cents. For night work, a differential of 5 cents per hour is paid as a premium.

Vacation: plant will be shut down for one week during July or August, commencing in 1945, and each hourly rated employee will be paid 1/52 of his total earnings for the year

preceding June 30, of each year. In addition employees with five years' service to have another week's vacation with pay each year.

Provision is made for apprenticeship regulations, for seniority rights and for the settlement of disputes.

TORONTO, ONTARIO.—S. F. BOWSER CO. AND UNITED STEEL WORKERS OF AMERICA, LOCAL 2901.

Agreement to be in effect from January 31, 1944, to January 31, 1945. The company recognizes the union as the sole collective bargaining agency for all hourly rated employees except foremen and charge hands. No discrimination against any employee by the company or the union on account of union membership or non-membership. Check-off: from the last pay period in March, the company agrees to a check-off of union dues to those who request same in writing; until that pay period shop stewards were to be permitted to collect union dues on the company's time.

Hours: for day employees, 8 per day, 4 on Saturdays, a 44-hour week; for night shift, 8⅘ hours per shift, Monday to Friday, also a 44-hour week. Overtime is payable at time and one-half; all work on Sundays at time and one-half; all work on six specified holidays or other holidays declared by government statute or decree, at double time.

Wages: rates of pay and classifications shall not be considered stationary. Vacation: subject to approval of the National War Labour Board, one week with pay after one year's service. Provision is made for seniority rights and the settlement of grievances.

Construction: Buildings and Structures

TORONTO, ONTARIO. — GENERAL CONTRACTORS' SECTION OF THE BUILDERS' EXCHANGE AND CONSTRUCTION ASSOCIATION AND THE UNITED BROTHERHOOD OF CARPENTERS AND JOINERS, TORONTO AND DISTRICT COUNCIL OF CARPENTERS AND MILLMEN.

Agreement to be in effect from May 6, 1944, to May 1, 1945, and thereafter from year to year, subject to notice.

Hours: 8 per day for 5 days, a 40-hour week. Where shifts are worked, time and one-seventh for the second or third shift. Overtime is payable at time and one-half. All work on Saturdays, Sundays and eight specified holidays, at double time. If required to work on Saturdays in connection with the pouring of concrete, straight time to be paid in the morning and time and one-half after noon.

Minimum wage rate for journeymen carpenters: $1.07. Apprentices are governed by the Ontario Apprenticeship Act.

Provision is made for a joint arbitration board for the settlement of disputes.

HAMILTON, ONTARIO.—MASTER PAINTERS' ASSOCIATION OF HAMILTON AND THE BROTHERHOOD OF PAINTERS, DECORATORS AND PAPERHANGERS, LOCAL 205.

Agreement to be in effect from March 1, 1944, to February 28, 1945, and thereafter subject to 30 days' notice. Union shop conditions will prevail and preference be given to union men.

Hours: 8 per day, 4 on Saturdays, a 44-hour week. For work on night shift, 9 hours' pay for 8 hours' work. Overtime is payable at time and one-half; all work on Sundays and six specified holidays, at double time.

Minimum wage rate for painters and paperhangers is 86 cents per hour; spray painters 96 cents.

HAMILTON. ONTARIO. — HAMILTON MASTER PLUMBERS AND THE UNITED ASSOCIATION OF PLUMBERS AND STEAMFITTERS, LOCAL 67.

Agreement to be in effect from February 15, 1944, to February 16, 1945, and thereafter from year to year, subject to notice. Only union members to be employed, if available, and members of the union will work only for members of the master plumbers' association if work is available.

Hours: 8 per day, for 5 days, a 40-hour week. Overtime is payable at time and one-half until midnight and double time thereafter; all work on Saturdays, Sundays and eight specified holidays, at double time, except that the setting of sleeves and inserts on Saturday morning may be done at straight time.

Minimum wage rate for journeymen plumbers and steamfitters: $1.06½ per hour. Apprentices are employed in accordance with the Ontario Apprenticeship Act. A joint conference board is provided for the settlement of disputes.

Collective Agreement Act, Quebec

Recent Proceedings Under the Act

IN Quebec, the Collective Agreement Act provides that where a collective agreement has been entered into by an organization of employees and one or more employers or associations of employers, either side may apply to the provincial Minister of Labour to have the terms of the agreement which concern wages, hours of labour, apprenticeship and certain other conditions made binding throughout the province or within a certain district on all employers and employees in the trade or industry covered by the agreement. Notice of such application is published and thirty days allowed for the filing of objections, after which an Order in Council may be passed granting the application, with or without changes as considered advisable by the Minister. The Order in Council may be amended or revoked in the same manner. Each agreement is administered and enforced by a joint committee of the parties. Further information concerning this legislation is given in the LABOUR GAZETTE, January, 1943, p. 86. Proceedings under this Act and earlier legislation have been noted in the LABOUR GAZETTE monthly since June, 1934.

Recent proceedings under the act include the extension of three new agreements and

the amendment of nine others, all of which are noted below. A request for the amendment of the building trades agreement at St. Jerome was published in the *Quebec Official Gazette*, October 7. A request for the amendment of the printing trades agreement at Quebec was gazetted October 14. In the October 21 issue, a request for amendment of plumbers and sheet metal workers agreement at Three Rivers was gazetted. Requests for the amendment of building trades agreement at St. Johns and the barbers and hairdressers agreement at Three Rivers were published October 28.

Orders in Council were also published during October approving or amending the constitution and by-laws of certain joint committees and others approving the levy of assessment on the parties.

Manufacturing: Fur and Leather Products

FUR MANUFACTURING INDUSTRY (WHOLESALE AND RETAIL), MONTREAL

An Order in Council dated September 28, and gazetted October 7, extends the term of the previous Orders in Council for the Wholesale Fur Industry (L.G., Jan., 1943, p. 87, Sept., 1940, p. 970; May, 1944, p. 637, July, p. 867, Aug., p. 1005, Sept., p. 1141), to November 1, 1944.

Another Order in Council dated October 6, and published October 14, makes obligatory the terms of an agreement between The Fur Manufacturers' Guild Incorporated, about two hundred other fur establishments and The International Fur and Leather Workers' Union of the United States and Canada and The Joint Board of the International Fur Workers' Union of Montreal and locals 66 and 67.

Agreement to be in effect from October 14, 1944, to October 13, 1945, or to April 30, 1946 if no notice given for 1945. Agreement covers all the wholesale fur industry whether they have signed the agreement or not; only retailers who have signed the agreement are subject to its provisions.

The territorial jurisdiction comprises the island of Montreal and within a radius of 50 miles of it. Zone I comprises the island of Montreal and a radius of 10 miles; zone II comprises the balance of the territorial jurisdiction.

Hours in zone I: for manufacturers, 8 per day, a 5-day week; for retailers, a 5-day week of 7 hours and 5 hours on Saturday. Hours in zone II: a 48-hour week. Overtime is payable at time and one-half. Employees are to be paid for seven holidays; if required to work they shall be paid at double time and a half. Vacation: one week with pay to employees with at least six months' service.

Minimum weekly wage rates: cutters $38.50 and $46, operators (male) $30 and $37.50, operators (female) $23.50 and $28.50, male finishers $29 and $35, female finishers, $21.50 and $26.50, blockers and trimmers $30, blockers $22, trimmers $25, examiners, $23 and $33, apprentice cutters $30, lining makers (female) $21.50; lining makers (female), who cut and sew $23.50, apprentices from $10 during first six months to $16 during fourth six months. Employees who have not received a 5 per cent increase since May 1, 1944 are to receive one.

Manufacturing: Textiles and Clothing

MEN'S AND BOYS' CLOTHING INDUSTRY, PROVINCE OF QUEBEC

An Order in Council, dated October 26, and gazetted October 28 amends the previous Orders in Council for this industry (L.G., Aug., 1944, p. 1005, Sept., p. 1141) and makes it obligatory on all employers that the second ten per cent bonus of July 1, 1941 and the five per cent bonus of July 1, 1944 be paid on earnings of employees, and not on the minimum rates.

Manufacturing: Pulp, Paper and Paper Products

PAPER BOX (UNCORRUGATED PAPER) MANUFACTURING INDUSTRY, PROVINCE OF QUEBEC.

An Order in Council, dated October 12, and gazetted October 14, amends the previous Orders in Council for this industry (L.G. Sept., 1944, p. 1141 and other issues as therein mentioned).

Minimum hourly wage rates for female employees: hand-work, first class 28 cents in zone I, 26 cents in zone II; S & S machine operators, top piece machine operators, staying machine operators, covering machine operators, tiers, stitchers, 27 cents in zone I, 25 cents in zone II; hand-fed table gummers 25 cents in zone I, 23 cents in zone II. For male employees: scorers 50 cents in zone I, 47½ cents in zone II; cutters on knife 45 cents in zone I, 42½ cents in zone II; end piece operators single and double, 40 cents in zone I 37 cents in zone II, four-corner stayer operators 46 cents in zone I, 43½ cents in zone II, four-corner stayer feeders 27 cents in zone I, 25 cents in zone II; slitter operators 35 cents in zone I, 33 cents in zone II; punch operators 30 cents in zone I, 28 cents in zone II.

Manufacturing: Printing and Publishing

PRINTING TRADES, MONTREAL.

An Order in Council, dated September 28, and gazetted October 7, extends the term of the agreement (L.G., May 1944, p. 637, August p. 1007, and previous issues) to December 31 1944.

Manufacturing: Metal Products

CLOCKMAKERS, MONTREAL.

An Order in Council, dated September 28, and gazetted October 7, extends the term of agreement (L.G., Nov., 1943, p. 1530; Aug., 1944, p. 1007) to October 9, 1945.

Construction: Building and Structures

BUILDING TRADES, CHICOUTIMI AND LAKE ST. JOHN DISTRICT.

An Order in Council, dated October 12, and gazetted October 21 amends the previous Orders in Council for this industry (L.G., August, 1941, p. 1009, November, p. 1425, December, p. 1573; December, 1942, p. 1490; February, 1943, p. 219) by substituting "Le Conseil régional Saguenay Lac St-Jean des Syndicats nationaux des métiers de la construction" as party of the first part for the separate councils in each town.

BUILDING TRADES, SHEERBROOKE.

An Order in Council, dated October 19 and gazetted October 29, amends the previous Orders in Council for this industry (L.G., Oct., 1942, p. 1209; Feb. 1943, p. 220; Aug. p. 1131). The amendment does not affect the summary already given.

BUILDING TRADES, MONTREAL

An Order in Council, dated September 28, and gazetted October 7, amends the previous Orders in Council for this industry. (L.G., March, 1944 p. 359, July, p. 868). The amendment does not affect the summary already given.

Service: Public Administration

MUNICIPAL EMPLOYEES, JOLIETTE.

An Order in Council, dated October 12, and gazetted October 21, amends the previous Orders in Council for this industry (L.G., June, 1944, p. 754).

Hours: 8-hour day, 48-hour week for all employees. Overtime is payable at time and one-half, for work done after eight hours excepting firemen, constables, and hydraulic system employees. Work done on Sundays and specified holidays is payable at time and one-half if it is deemed urgent and essential. Vacation: two weeks with pay after one year's service for permanent employees, one week with pay after one year's service for non-permanent employees.

Service: Business and Personal

HOSPITAL EMPLOYEES, QUEBEC.

An Order in Council dated October 12, and gazetted October 14, makes obligatory the terms of an agreement, between "L'Association patronale des Services hospitaliers de Québec, Inc." and "L'Association des Gardes-Malades catholiques licenciées"; "le Syndicat féminin des Employées de Maisons hospitalières de Québec et District"; le Conseil des Métiers de la Construction des Syndicats nationaux de Québec"; "le Syndicat national catholique des Services hospitaliers de Québec, inc."; "le Syndicat national catholique des Mécaniciens de machine fixe de Québec, inc.".

Agreement to be in effect from October 14, 1944 to August 1, 1945 and thereafter from year to year. The territorial jurisdiction includes the judicial districts of Quebec, Three Rivers, Abitibi, Chicoutimi, Roberval, Saguenay, Nicolet Arthabaska, Beauce, Montmagny, Kamouhaska, Rimouski, Gaspé and Bonaventure. Zone I is the city of Quebec; Zone II, the cities of Chicoutimi, Levis, Lauzon, Shawinigan Falls, Thetford Mines, Three Rivers; Zone III, remainder of the territorial jurisdiction.

Hours: no limitation of hours for chief cooks and chief enginemen; 60-hour week (average over 3 weeks) for orderlies, stationary enginemen, firemen, motor-vehicle drivers and their helpers, watchmen, skilled workers in the steam generating plant; 57-hour week for nurses on night work and 52-hour week for nurses on day duty; 56-hour week for employees on rotating shifts of 8 hours, excepting enginemen and firemen, 54-hour week for all other employees, 10-hour day for occasional hands unless they are paid by the day when their standard working day is 12 hours.

Minimum weekly wage rates: graduate nurses, for the three zones, $20 for the first six months, $21.50 for second six months and $23 after one year ($2 per week extra for night work); chief stationary enginemen $34 to $51 in zone I, $34 to $51 in zone II, $32 to $51 in zone III; enginemen 48 cents to 63 cents per hour in zone I, 48 cents to 63 cents in zone II, 45 cents to 60 cents in zone III; skilled workers 68 cents in all zones; firemen 38 cents in zones I and II, and 35 cents in zone III; chief cook $32 in zone I, $27 in zone II and $25 in zone III; assistant chief cook, $27 in zones I and II, $22 in zone III; bakers, $27 in zone I, $23.50 in zone II, $22 in zone III; chief launderer $27 in zone I, $23.50 in zone II and $22 in zone III; orderlies from $18.50 during first six months to $27 after five years in zone I, to $26 in zone II, and to $25 in zone III. Overtime is payable either at time and one-half or by a paid holiday equivalent to one and a half times employees hours of overtime; holiday to be given in the four weeks following that during which overtime has taken place.

Time off: Nurses, 4 days for four weeks of work, for other regular employees three days off to each four weeks of work; for employees doing night service, one complete night of rest per week. Vacation: for nurses, two weeks with pay after one year's service; to other employees excepting maintenance men, one week with pay. Employer may give equivalent in wages if it is difficult to permit the taking of vacations. Where room and board are provided employees may not be charged more than $6 per week for both.

BARBERS AND HAIRDRESSERS, CHICOUTIMI.

An Order in Council dated October 19, and gazetted October 28, amends the previous Orders in Council for this industry (L.G., Nov., 1941, p. 1425; Aug., 1942, p. 978). Territorial jurisdiction of the agreement includes the counties of Chicoutimi, Lake St. John and Roberval. Hours in all zones: 61 per week for barbers; 57 for hairdressers. One week's vacation with pay after one year's continuous service.

HOSPITAL EMPLOYEES, SHERBROOKE

An Order in Council, dated October 12, and gazetted October 21, makes obligatory the terms of an agreement between "L'Hôpital Général St-Vincent-de-Paul de Sherbrooke"; L'Hospice du Sacré-Cœur de Sherbrooke"; and "L'Association des Employés du Service Hospitalier de Sherbrooke inc."

The agreement, which applies to public charitable institutions, hospitals, homes and sanatoriums in the city of Sherbrooke and the territory comprised within a radius of three miles, is to be in effect from October 21, 1944 to October 20, 1945 and thereafter from year to year. It covers employees other than nurses. Hours for male employees: for orderlies, ward helpers 8½-hour day, 12 hours for night duty, during which time they may usually sleep 2 or 3 hours on duty, one day off per week if possible; invalid attendants 10 hours per day, 6-day week; for maintenance men 54-hour week; for stationary firemen and enginemen, 60-hour week; cooks and helpers, 9-hour day, 54-hour week; hourly paid employees 48-hour week. Hours for female employees: receptionists, doorkeepers, cleaners, ward helpers, female cooks, office employees, operating room helpers, laboratory and X-ray employees a 9-hour day, 6-day week. Minimum wages for male ward helpers from $12 per week during first six months to $17 after one year; for orderlies, from $17 to $25 after three years; $30 for skilled maintenance men, $21 for unskilled; chief stationary enginemen, from $36 to $53; enginemen 55 to 68 cents per hour: firemen 45 cents; cooks' helpers from $12 to $22, chief cook $40; all female employees from $12 to $18 after one year. Overtime: work over 12 hours in any day or over the regular weekly hours is payable at time and one half except for enginemen, firemen, elevator men, night watchmen. All employees excepting orderlies and ward helpers, receive a complete day or two half-days of rest every week. Vacation: with the exception of enginemen and firemen all employees receive one week with pay after one year's service. Provisions are made for board and lodging, hospital care, uniforms etc.

Canadian Vocational Training

Recommendations of Advisory Council on Rehabilitation and Apprenticeship Training

DURING the first week of October, the Advisory Council of Canadian Vocational Training held its semi-annual meeting at Ottawa under the Chairmanship of Dr. G. F. McNally, Deputy Minister of Education for Alberta. The members were welcomed by Mr. A. MacNamara, Deputy Minister of Labour who, in his address, assured Council that all its recommendations would be given serious and careful consideration and stated his belief that any constitutional difficulties could be surmounted by means of a partnership along the lines developed in the Training Program and with farm labour. Among the most important topics of discussion, leading to recommendations, were the subjects of rehabilitation training for discharged members of the armed forces, increased assistance to vocational schools and trades training under the Apprenticeship Agreements now existing in practically all provinces.

Rehabilitation

Although rehabilitation training accommodation for the present, appears adequate in most cases, delay in obtaining release of Government owned equipment and tools and buildings for the opening of additional training centres has been cause for considerable worry. However, recent negotiations with the officials concerned indicate that the most essential equipment required will presently be released. Experience indicates that more attention will be given to properly equipping a few centralized training centres to which those desiring or requiring classroom training may be sent. In particular will this plan hold good for present requirements in Ontario.

The Council was of the opinion that many discharged persons might refrain from taking training, first because training allowances were deductible from the Re-establishment Credit (Bill 184, Part 2, Section 10) and further, because training grants were subject to income tax.*

The Council felt that the Government was to be commended on its existing plan for rehabilitation of service personnel.

At the request of the Department of Pensions and National Health, Canadian Vocational Training was asked to undertake prematriculation training on the secondary school level for ex-service men and women who lacked the academic standing to enter university or such occupations as required matriculation qualifications.

Apprenticeship and Vocational Education

The need for promoting apprentice training, apart from that which will be done by provincial authorities, so that it may be developed in other than designated trades, was strongly emphasized and in this connection a committee was appointed to investigate and report at the next meeting of Council.

Consideration was also given to the retraining of war workers for civilian occupations but Council felt that no definite action could be taken on the matter at this time.

A strong plea was entered for united national action to provide for equal educational opportunities, regardless of residence. It was emphasized that this could be met only by Federal leadership which, while protecting provincial autonomy, would afford the essential financial impetus. This applies to vocational as well as academic education. It was also felt that greater publicity should be given to the facilities presently provided by the Department of Labour through Canadian Vocational Training, such as has been carried out under its Student Aid plan and agricultural and rural training agreements with the provinces. Several members of the Council stressed the urgent need of expanding vocational training facilities throughout the country if the needs of Canadian industry were to be met adequately in the future.

The Council reiterated its recommendations urging the Government to take required action with the least possible delay to provide Dominion assistance to vocational schools, as certain provinces had already amended their

* Since this was written, Order in Council P.C. 128/8367 of October 31, 1944, provides that the amount of such grants be determined on the basis that there should be no deductions therefrom by reason of taxation under the Income War Tax Act.

regulations to conform to the new arrangement and others had expressed a willingness to co-operate. The Director was of the opinion that Dominion action would be taken at an early date.

The Council, in its deliberations, recommended that the Minister urge upon the Dominion Government the desirability of arranging an early Dominion-Provincial Conference to deal particularly with the question of providing wider opportunities and adequate facilities for vocational education throughout Canada.

The Supervisory Training Programs, provided for industry, continue to meet with ever-widening favour. Additional courses are currently being introduced in the form of Job Safety Training. Dominion Government departments have also attached greater interest to this form of training since its introduction there earlier this year. Likewise, National Defence Headquarters for the Army and the Air Force are making greater use of them. Council expressed confidence in the importance of this type of training for the post-war period, inasmuch as it has already thoroughly proved its usefulness.

Following the meeting of the Advisory Council, the meeting of all Regional Directors was held with the Director of Training, at which was discussed departmental procedures and ways and means of handling joint Dominion-Provincial responsibilities.

Bulletin on Vocational Training

The Director of Training has recently prepared a comprehensive bulletin for vocational training of ex-service personnel which, although originally prepared for the benefit of counsellors in the armed services, is receiving a much wider distribution.

This bulletin sets forth the method that is being followed in providing vocational training to men and women discharged from Canada's armed forces and is designed primarily for the information of educational and vocational counselling personnel in the Navy, Army and Air Force. The bulletin is divided into three sections, the first of which deals with the general training organization and the principles of the policy followed and the methods by which training is given; the second section sets forth the location of training centres at present in operation and the types of training available; the third section gives occupational information concerning a number of the standard trades which should be useful to vocational counsellors in the services. Additional copies of this bulletin are available.

Enrolment Figures

Gross enrolment under Canadian Vocational Training as of September 30, 1944, has been as follows:

Training for Industry	235,768
Army Tradesmen	44,228
Navy Tradesmen	8,567
RCAF Tradesmen	65,139
Rehabilitation (discharged persons from the forces)	4,756
Students	5,373
Total	363,831

Further details may be found in the accompanying tables.

Annual Report of Dominion Director of Training

The report of the Dominion Director of Training for the fiscal year ending March 31, 1944, was issued recently. It provides in succinct form a record of the year's progress in the administration of the Vocational Training Co-ordination Act, 1942.*

It is stated in the report that "the policy of decentralized administration inaugurated at the outset of the Training Program has been continued. . . The broad policy for all training is determined by the Department of Labour at Ottawa, provision being made, however, for the Regional Directors, who act for the Department in the several provinces, to apply this broad policy according to the varying conditions" in their respective regions. These Regional Directors are assisted by small staffs of field representatives, a total of 25 of whom were acting in their official capacities at March 31, 1944.

A Vocational Training Advisory Council of sixteen members made up of representatives of employers, employees, women's organizations, agricultural interests, war veterans and the Canadian Association for Adult Education, as well as recognized authorities on technical education was convened twice during the year. The results of the deliberations of the Advisory Council were passed on to the Minister of Labour with a view to the progressive improvement of the Training plan.

Order in Council, P.C. 8993, of January 31, 1944, provides for Dominion assistance to the Provinces for apprenticeship training on a dollar-for-dollar basis, for either full-time or part-time class instruction in both practical work and related technical subjects to indentured apprentices registered under provincial legislation. The Federal Minister of Labour has authority to enter into ten-year agreements with the provincial governments for this work.

* A summary of provisions of the Act was published in the LABOUR GAZETTE, 1942, p. 921.

Activities of the Unemployment Insurance Commission

Statistical Analysis of Insurance Operations during September—Survey of Employment Situation for October—Conference of Supervisors of Special Placements

APPLICATIONS for Unemployment Insurance benefit in Canada totalled 3,715 in September, a slight increase over the 3,241 in August and more than three times the 1,013 registered in September, 1943.

The number of persons who signed the live unemployment register during the last week in September (5,746) was also slightly higher than during the last week in August when 5,408 signed. The number of males signing the live unemployment register remained virtually unchanged (3,938 in September and 3,918 in August) so the increase is attributable almost entirely to females.

A total of 4,373 claims were available for adjudication at Insurance offices during September (876 of which were pending at the beginning of the month). Of this total, 2,884 were considered entitled to benefit, 723 were considered not entitled to benefit and 766 were pending at the end of September. The two chief reasons for non-entitlement to benefit were: "voluntarily left employment without just cause" (420 cases) and "insufficient contributions and not in insurable employment" (178 cases).

During September 2,178 persons commenced receiving benefit payments, but a total of 4,625 persons were paid benefit during the month. This compares with a total of 4,746 who were paid benefit in August and 921 last September.

The 4,625 persons receiving benefit in September were paid $117,008 for 61,917 unemployed days as against $108,688 paid for 57,547 days in August and $20,066 paid for 11,408 days in September, 1943.

The average number of days paid per beneficiary was 13·4 in September, 12·1 in August and 12·4 last September. The average amount of benefit paid per beneficiary was $25.30 in September, $22.90 in August and $21.79 in September, 1943. The average amount paid per compensated day of unemployment was $1.89 in September, $1.89 in August and $1.76 last September.

Insurance Registrations

Reports received from Local Offices of the Unemployment Insurance Commission showed that as at October 31, 1944, 2,823,668 employees had paid contributions to the fund since April 1, 1944, an increase of 76,908 since September 30, 1944, and 617,912 since the commencement of the current fiscal year.

As at October 31, 1944, 140,265 employers were registered as having insurable employees, an increase of 1,537 from September 30, 1944.

Registration as at October 31, 1944, by regions follows:

*The column "Interest in Investments and Profits on Sale of Securities" represents:—
(a) Interest received on due dates of the various Government Bonds, with proper adjustments being made at the end of each year for interest accrued and amortization charges.
(b) Profit on sales of securities taken into account at the end of each year only.

The "Miscellaneous" column includes the following:—

Penalties	$ 3,367 92
Contributions in respect of services in the armed forces	268,956 51
Miscellaneous	1,553 03
	$ 273,877 46

Small Percentage of Fund Pays Benefits

The balance in the Unemployment Insurance Fund as at September 30, 1944, amounted to $228,911,172.50, which was an increase of $6,522,925.35 over the balance in the Fund as at August 30, 1944.

Since the inception of the Unemployment Insurance Act, 1940, only 1·7 per cent of the total contributions and interest paid into the Fund, has been disbursed in benefits. Table 8, page 1379, gives the condition of the Fund in detail.

Training Conference for Regional Supervisors of Special Placements

The first training conference for Regional Supervisors of Special Placements was held at the Head Office of the Unemployment Insurance Commission, Ottawa, commencing Monday, September 25, 1944. As a part of the training, those who attended the conference, visited the Regional offices at Montreal and Toronto to study at first hand the technique followed in the larger offices.

Messrs. A. M. Mitchell and R. J. Tallon, Commissioners, welcomed the group. Both stressed the importance of the phase of employment work in which the supervisors will be engaged, and emphasized the need of establishing contacts with all agencies working in the special fields of social welfare, guidance, and handicap placement.

At Montreal, the supervisors were addressed by the Chief Commissioner, Mr. L. J. Trottier, who emphasized the challenging character of the work of special placements.

Other officials who addressed the group were Messrs. H. F. Caloren, Chief Executive Officer, W. K. Rutherford, R. G. Barclay, E. P. Laberge and Col. H. S. Relph.

Messrs. H. C. Hudson, Supervisor of Special Placements, and T. Parkinson, Supervisor of Staff Training were in charge of the sessions.

Through the courtesy of Mr. Paul V. McNutt, Chairman, War Manpower Commission, Washington, Mr. K. Vernon Banta, Chief, Employment Service for the Handicapped, was present throughout the training course, where his addresses, and his active participation in the discussions proved an outstanding contribution to the success of the course. His first topic was, "The Broader Aspects of Handicap Placement Work". Mr. Banta defined a handicapped person as one who because of certain problems, requires selective placement. He traced the development of selective placement in the United States, since 1936, explaining that the approach to the problem had been through the occupational research field. The problem of the disabled comprises: (1) The preparation of the individual, through training, physical restoration, counselling and guidance for employment; and (2) The preparation of industry to receive these persons.

Mr. Banta stated that job analysis is the basis of selective placement. It involves matching the physical demand of jobs with the corresponding physical activities and working conditions. Another process necessitates matching the working capacity of the individual with the physical activities and working conditions of the job.

Mr. A. W. Crawford of the Department of Veterans' Affairs explained the entire scheme of rehabilitation of veterans into civilian life.

At Montreal, Surg. Lt.-Com. J. Preston Robb, of the Neurological Institute, addressed the group on "The New Approach to the Problem of the Physically Handicapped and the Emotionally Disturbed". Dr. Robb gave interesting examples of personality changes resulting from service in the Armed Forces. He stressed the need for close co-operation between special placement sections and social agencies. Special placements must be a dynamic organization. "It is not good enough merely to place a man in a job; he must be placed in the best job of which he is capable."

Dr. J. A. Nutter, orthopaedic surgeon of Montreal, addressed the group on the challenge which their work presented to them.

At Toronto, through the courtesy of Dr. Storms and Mr. John Campbell, the supervisors were shown through the treatment and workshop divisions of the clinic operated by the Ontario Workmen's Compensation Board. The conference concluded with an evening session, held in Toronto on Tuesday, October 3.

Employment Conditions by Industries during October as Reported by Employment Service, Unemployment Insurance Commission

CONDITIONS revealed by the survey of the employment situation in agriculture and industry for the month of October were generally satisfactory.

Agriculture.—In regard to agriculture, the service arranged by the employment offices with the assistance of Extension Services, under the Dominion-Provincial agreement, provided sufficient labour to harvest the crop. This crop has been larger than normal, requiring more workers than last year.

The harvest excursion from parts of Ontario and Quebec to the Prairie Provinces attracted 6,477 workers, of whom 5,400 were from Ontario, 10 per cent being women. Of these workers 1,113 were distributed in Manitoba, 3,780 in Saskatchewan, and 1,584 in Alberta. Many of these workers did not return to Eastern Canada until after October 31.

Logging.—Due to a demand for high quality lumber, a program was initiated during the latter part of October to move 500 Eastern Canadian harvesters who were already on the Praries to assist in logging and mill work on the Pacific coast. The response has been encouraging, some 200 workers accepting this employment.

Within each region arrangements have been made for the recruitment of workers not required on farms for employment in other essential industries. Since, of necessity, a number of workers must remain in agriculture, some areas were defined as those in which no recruiting would take place, others as those in which restricted recruiting would be conducted and still others in which open recruiting would be permitted. The Provincial Farm Service forces have thrown their weight into the program. As a result this recruiting has brought considerable relief to industries requiring winter workers, the meat packing industry, mines, feed plants and lumber operations having absorbed the greater number.

Temporary labour shortages were experienced in the packing plants. This situation has been alleviated, and the packing houses, apart from their National program, were in fairly satisfactory condition.

Manufacturing.—In the industrial field, the aircraft and allied industries were characterized by progressive lay-offs. A further curtailment in the R.C.A.F. training program resulted in additional cut-backs in production schedules for trainer aircraft. In the field of combat planes the most important recent development has been the change-over in production at Boeings, Vancouver Plant, involving a lay-off of 3,000 employees.

A campaign was carried on to place these workers in other essential industries inasmuch as the change-over and retooling will require several months. Few of the workers affected are capable of heavy labour, as a large percentage of them are women.

Current labour requirements of the Aluminum Company of Canada were met through transfers within their own organization. This was made possible by recent curtailment in production schedules.

Labour demand in the rubber industry eased somewhat. Requirements for heavy factory labour in many of the tire plants, remained urgent.

As manufacturers of heavy ammunition had been called on for increased production, the labour requirements of firms engaged in this work were stepped up. This new demand had not yet been fully met, but both men and women were being recruited in centres in which lay-offs have occurred.

In the building trades the situation remained almost unchanged during the past month. Conditions in the shipbuilding industry have been more or less stable, with the exception of the Halifax district where an urgent demand continues for skilled labour. Efforts to supply this need were concentrated on shipyards contemplating lay-offs.

The brick and tile industry is still in urgent need of labour. The demand here has been partially met by employment of prisoners of war; reports indicate that where this type of labour has been used it has proved entirely satisfactory.

Construction.—The short labour supply has continued in the construction industry. The most pressing need is for labourers and reinforcing steel men, shortage of these types of labour seriously retarding concrete projects which are underway. Current effort is to have men return to this type of work, from other classes of employment.

Transportation.—In the transportation industry demand for labour has shown no indication of abatement. Men for railway track maintenance were urgently required in view of the approaching winter season. It is anticipated that the return to agricultural workers from the Western harvest fields will relieve the situation. Steps have also been taken to have soldiers used in this type of

employment. Good strong labourers continued to be in urgent demand for employment at the Lakehead terminal grain elevators.

Employment of Women

In so far as the employment of women is concerned, the prospect of the continuance of the war for some time has increased the urgency for female labour for the heavy munition program, and this need is being given all possible preference.

There were indications of a gradual levelling off of the general female labour situation in regions other than Quebec and Ontario, though shortages still exist in certain lines of employment.

Among essential civilian industries the shortage of workers for textile plants has caused grave concern. Production in general is down and many more female workers are urgently required. Training schools have been established in many plants in an endeavour to fill the need for skilled operators.

The placement in employment of women discharged from the Armed Forces is progressing smoothly. Placements are followed up and every help is given to these women in their adjustment to employment.

A limited number of lay-offs involving women have taken place. In every such case arrangements have been made to offer them all available opportunities of suitable employment.

The shortage of professional staff for hospitals is still great although the supply of female workers for non-professional work in hospitals is improved somewhat. To remedy the situation, the Minister of Labour announced on October 19, that professional and non-professional workers for hospitals may now be hired directly without passing through Local Employment and Selective Service Offices.

Women officers of the Unemployment Insurance Commission from all parts of Canada met in Ottawa on October 12 to discuss the responsibilities of the Employment Service in the transition and post-war period, and the plans which should be adopted to assist workers when the change-over to normal production occurs. A report of this conference will be found on page 1309 of this issue of the LABOUR GAZETTE.

Trend of Employment, Hours and Earnings in United States during August

The trend of employment, earnings and hours in the United States for the month of August is summarized in the October issue of the *Monthly Labour Review*, published by the U.S. Department of Labour.

Non-Agricultural Employment

It is stated that "the total number of employees in non-agricultural establishments was 38,771,000 in August, 47,000 more than in July, but a million less than in August, 1943." It is pointed out that the gain during the month reflects a seasonal expansion of manufacturing and the addition of 36,000 workers to Federal, State and local governments.

Hours of Work

The average work-week in all manufacturing in August as reported to the United States Department of Labour was 45·1, slightly longer than in August, 1943. Total manufacturing hours per week for the durable-goods group as a whole amounted to 358 million, an increase of about five million as compared with July. This occurred in spite of declines in employment totalling 38,000, and reflects the lengthening of the work-week from 45·7 to 46·6 hours.

The work-week in the non-durable group as a whole averaged 43·0 in August, the same as in July. However, owing to expanding employment, the total hours worked were 2,250,000 greater.

Earnings

Average hourly earnings for all manufacturing were slightly below July, but about 5·5 per cent above August, 1943. The apparel group was the only major group which reported a considerable increase in hourly earnings. The increase was from 78·5 cents to 80·7 cents. Average weekly earnings in all manufacturing averaged $45.85, an increase of 40 cents over July. The earnings in the durable-goods group averaged $51.79, and in the non-durable-goods group they amounted to $37.16.

The weekly earnings in the bituminous coal mining industry were 13 per cent higher than last year, but the work-week was about nine per cent longer than in August, 1943. In anthracite mining the earnings were six per cent greater and the hours 3·5 per cent shorter than in August, 1943.

Employment and Unemployment

Summary

INFORMATION in this section regarding the employment situation in Canada is based upon reports from the following sources:

The employment situation at the beginning of September, as reported by employers.—The Dominion Bureau of Statistics receives each month reports from firms employing fifteen or more employees. These firms represent practically all industries except agriculture, fishing, hunting and highly specialized business operations.

The Bureau has been receiving these reports for many years; hence, although the figures given show considerably less than the total number of persons employed in Canada, they give a valid picture of the *trend* of employment in Canada over a period of years.

There was a further rise in general industrial employment at the beginning of September, according to returns received by the Dominion Bureau of Statistics from 14,837 establishments with staffs aggregating 1,882,790 men and women, as compared with 1,870,741 at August 1.

The gain of 12,049 workers, or 0·6 per cent, brought the index (1926=100) to 185·5 as compared with the revised figure of 184·3 on August 1, and 186·2 at September 1, 1943.

Information is also embodied in this article concerning payrolls which is furnished each month by the co-operating firms. The per capita weekly earnings advanced slightly from $31.63 at August 1 to $31.69 at the beginning of September. At September 1, 1943, the indicated average was $31.30; that at September 1, 1942 was $29.29, while at September 1, 1941, the figure had been $26.04.

Unemployment as reported by the Unemployment Insurance Commission.—Claims for unimployment insurance benefit again showed an increase over the preceding month. During September, 3,715 claims were filed as compared with 3,241 in August. These claims were well above the total of 1,013 claims filed during September, 1943, but considerably below last February's maximum of 12,284.

Applications for Employment; Vacancies and Placements; September, 1944.—From the Employment and Selective Service Offices of the Unemployment Insurance Commission come reports showing the number of positions reported as vacant across the Dominion, together with the number of applications for employment and the number of placements effected.

Reports received from the Offices during the four-week period September 1 to September 28, 1944, showed a substantial gain in the average number of placements made daily when compared with the previous five weeks and a fairly large loss when compared with the four-week period September 3 to September 30, 1943. Manufacturing, trade, and forestry and logging were mainly responsible for the gain under the first comparison though all industrial divisions except agriculture registered increases. In comparison with the four-week period September 3 to September 30, 1943, the loss was almost entirely contributable to the decline in manufacturing although all other industrial groups but forestry and logging, and trade showed increases. During the period under review there were 236,504 vacancies reported, 196,572 applications for employment and 141,641 placements effected in regular and casual employment.

Unemployment in trade unions.—The Department of Labour receives reports from the local trade unions throughout Canada, showing the number of their members who were unemployed during the period under review.

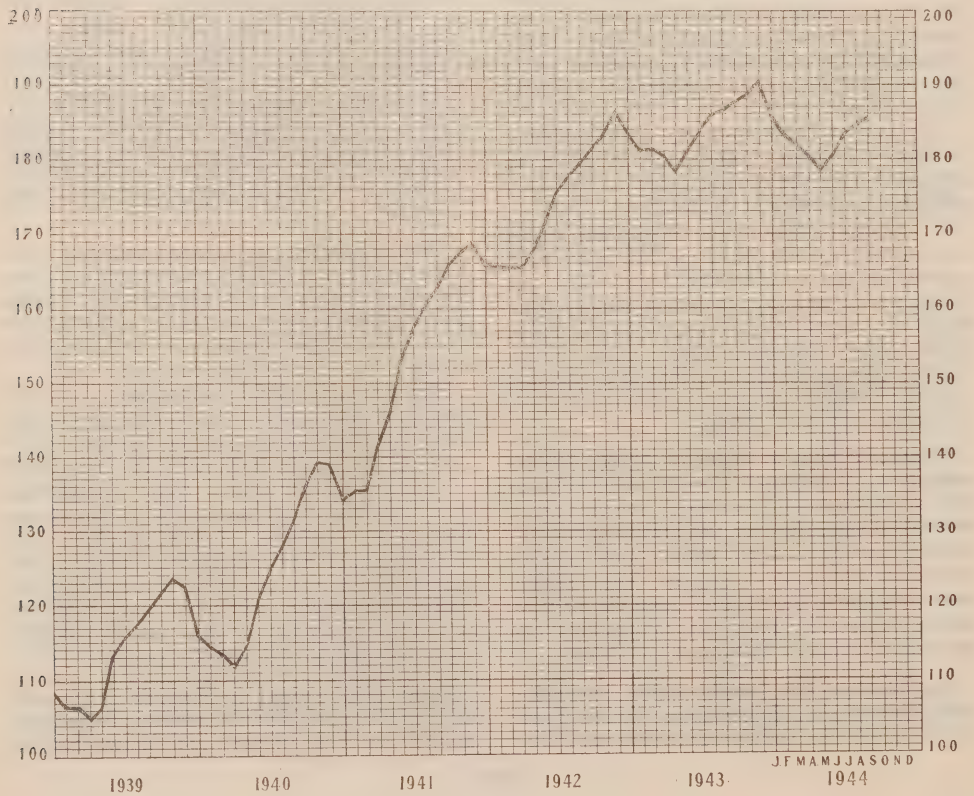
The statistical article summing up the information contained in these reports is published quarterly in the LABOUR GAZETTE.

At the beginning of October the percentage of unemployment among trade unions was 0·3. This figure was identical with that shown both at the beginning of July, at which date the percentage was indicated as for the June quarter and at the beginning of October, 1943. The October figure was based on returns received from 2,377 labour organizations having a total membership of 416,664 persons.

Total employment in Canada.—An estimate of Canada's total manpower distribution at June 1, 1944, has been made by the Re-

search and Statistics Branch of the Department of Labour. At that date it is estimated that 4,232,000 persons, 14 years of age and over, were gainfully occupied, of whom 3,232,000 were in non-agricultural industry, including 975,000 in war industry. In addition there were 784,000 persons in the Armed Forces.

The Employment Situation at the Beginning of September, 1944, as Reported by Employers



THERE was a further rise in general industrial employment in the Dominion at the beginning of September, when the percentage increase approximated the average at September 1 in the experience of the years, 1921-1943. It was, however, considerably smaller than at that date in any preceding year of the war, with the exception of 1943. The 14,837 establishments furnishing information to the Dominion Bureau of Statistics reported the employment of 1,882,790 men and women, as compared with 1,870,741 at August 1. The gain of 12,049 workers, or 0·6 per cent, brought the index, (1926=100), to 185·5, as compared with the revised figure of 184·3 in the preceding report, and 186·2 at September 1, 1943.

Since the improvement in employment as a whole in Canada at the beginning of September was about normal for the early autumn, the seasonally-corrected index number, at 178·3, showed no change from the revised August 1 figure.

Manufacturing establishments reported moderately heightened activity at September 1, when they recorded a gain of 6,249 em-

EMPLOYMENT IN CANADA AS REPORTED BY EMPLOYERS

NOTE.—The curve is based on the number of employees at work on the first day of the month as indicated by the firms reporting, in comparison with the average number of employees they reported during the calendar year 1926 as 100.

ployees. This increase is the smallest at the beginning of September in any year since 1936. There was a further reduction in the production of durable manufactured goods, notably of iron and steel products, while the non-durable goods division showed heightened activity of a seasonal character. Within the latter, there were important gains in vegetable food preserving, in which the expansion was above-average for the time of year.

The trends in the non-manufacturing industries were mixed, that in communications, construction and maintenance and trade being moderately upward, while the movement in logging, mining and transportation was retrogressive. The declines in logging and mining were contra-seasonal.

Payrolls

The firms co-operating in the current survey at September 1 reported the disbursement of weekly salaries and wages totalling $59,671,139, as compared with $59,167,005 at the beginning of August. This increase of 0·9 per cent exceeded that of 0·6 per cent in the personnel, with the result that the per capita weekly earnings slightly advanced, rising from $31.63 at August 1 to $31.69 at the beginning of September. At September 1, 1943, the indicated average was $31.30; that at September 1, 1942, was $29.29, while the September 1, 1941, figure had been $26.04.

In comparison with September 1 of last year, the index of aggregate payrolls showed the fractional gain of 0·6 per cent, accompanying the falling-off of 0·4 per cent in the index of employment. The rise in the average weekly earnings amounted to 1·2 per cent.

If the statistics for the finance group are included with those given above for the eight leading industries, the survey shows that the number in recorded employment at September

[1]This classification comprises the following:—iron and steel, non-ferrous metals, electrical apparatus, lumber, musical instruments and clay, glass and stone products.

ber 1, 1944, amounted to 20·8 per cent, and that in payrolls, to 48·5 per cent. The explanation previously given for the relatively greater rise in the salaries and wages than in the numbers employed may again be stated: —(1) the growing concentration of workers in the heavy manufacturing industries, where rates of pay are above the average and, in addition, there has been a considerable amount of overtime work, (2) the payment of a cost-of-living bonus to the majority of workers; the rates at which these allowances were calculated were increased on more than one occasion before their incorporation in the basic wage-rates as from February 15, 1944. (3) the progressive up-grading of employees as they gain experience in their work, and (4) the granting of higher wage-rates in numerous cases.

Table II summarizes the latest statistics of employment and payrolls for the leading industrial groups, the provinces and economic areas, and the 20 leading industrial cities, and gives comparisons as at August 1, 1944, and September 1, 1943, where these are available.

As a result of wartime conditions, there have been especially noteworthy advances in employment and payrolls in factories, in which the rate of expansion in the period of observation had been decidedly greater than in the non-manufacturing industries; the index of employment in the former has risen by 34·6 per cent from June 1, 1941, to September 1, 1944, and that of payrolls has gained by 68·6 per cent, proportions decidedly exceeding those elsewhere given for the eight leading industries. The factors stated above as influencing the general trends have had an even greater effect in the case of manufacturing.

The production of durable goods has shown particularly important gains from the beginning of the record of payrolls, the index of employment having risen by 50·2 per cent, while the salaries and wages distributed by the co-operating employers have advanced by 92·3 per cent between June 1, 1941, and September 1, 1944. Although the non-durable manufactured goods have been adversely affected by the existing labour situation, the index number of employment in this group at

[1] The relative weight shows the proportion of employees reported in the indicated industry, to the total number of employees reported in Canada by the firms making returns at the date under review.

the date under review was higher by 20·8 per cent than at June 1, 1941, since when there has been an increase of 44·3 per cent in the payrolls disbursed by the co-operating establishments.

In regard to the marked variations in the average earnings of workers in the different industrial classes, it must again be pointed out that the sex distribution of such persons is an important factor, frequently associated with variations in the age groups. In general, the female workers tend to belong to the younger age classes, in which the earnings are naturally lower than among those of greater experience. The matter of short-time or overtime may also considerably influence the reported aggregates and averages, which likewise reflect variations in the extent to which casual labour is used; the degree of skill generally required of workers in the industry is of course also an extremely important factor.

Report on Employment Conditions for October, 1944

THE following summary of employment conditions for the month of October has been prepared by the Research and Statistics Branch, Department of Labour, on the basis of reports received from Local Employment and Selectice Service offices across Canada.

Maritime Region

Agriculture.—In spite of the delay caused by heavy rains in some areas, the harvesting of grain and potatoes on the mainland is almost completed. Soldiers on loan are returning to their units and a large number of farmers are now free to engage in bush-work and other essential industries.

On Prince Edward Island the inclement weather was more prolonged, and it is believed that many farmers there are behind-hand with their crops. As a result, the Farm Labour Board has requested and obtained further assistance from members of the Armed Forces.

Apple harvesting in the Annapolis valley is about two-thirds completed. Here, too, members of the Armed Forces are giving valuable assistance.

Logging.—There are heavy demands for woodmen in the logging sections of the region and lumber operators are taking advantage of canvassing privileges to recruit throughout the territory. The Halifax office has orders on file for 200 loggers which will probably be placed in clearance, as the men are not available locally. Truro requires 140 bushmen. One company at Bridgewater is bringing in men from Newfoundland, and arranging for temporary permits for a considerable number of others.

In New Brunswick, reports indicate that while the existing shortage of logging labour is of some proportions, plans to meet the need have been well laid. In the Campbellton area, it is expected that conditions will be improved within the next few weeks by recruitment of farm workers for the winter months. Prospects are also bright for procuring the additional 500 men required by one large operator in the Bathurst section.

Mining.—Coal mining operations in the maritime region are fairly normal. In the neighbourhood of New Glasgow all collieries are producing on a full-time basis. Some 33 applicants have been placed during October, and unfilled vacancies now total 82 miners and 48 mine workers. In the Saint John area a definite shortage of heavy labour for lime rock mining exists.

Manufacturing.—During the month a considerable number of workers in the ship-building industry were laid off. One large plant at Bridgewater, with contracts completed, is releasing at least 500 workers. During the week ending October 14, some 256 men and 24 women were laid off. Of these, about 100 of the men returned to their homes in northern New Brunswick and the province of Quebec, and another 100 were transferred by the same company to a new project at Peninsula, Ontario.

Halifax shipyards are busy. The two local companies are urgently in need of skilled and unskilled workmen. It is hoped that several of the men laid off at Bridgewater may be obtained to relieve the shortage in some measure. At Fredericton, too, carpenters and labourers are still needed for barge-building work.

In all parts of the Maritimes light labour, both skilled and semi-skilled, is being sought by many industries, and very few suitable applicants are procurable. The textile, candy and fish-canning plants of St. Stephen are in need of additional female helpers.

Construction.—Carpenters and labourers are required for building projects in all parts of the region, and many undertakings, both civil and military, are being held up by the lack of such workers. Clearance orders placed in a number of instances have met with slight response.

Transportation.—While there is still a definite lack of railway maintenance workers, the most immediate need is for labour at the port of Saint John. Freight movements are especially heavy at this time and a large number of freight handlers are needed at once to assure the prompt "turning around" of many ships.

Quebec Region

Agriculture—Summer and fall agricultural activities in the Quebec region are nearly completed. In Lotbiniere, Bellechasse and Dorchester counties, potato digging and cabbage picking are still going on, but the only farm labour demand is for all-year workers. Farmers and their assistants are applying for permits to enter the bush or engage in essential industries in the cities, and recruiting agents are busy throughout the province.

Logging—Logging operators who normally employ hundreds of farm workers for bush operations during the winter months are already increasing their working forces from this source. South of the St. Lawrence river, 3,437 bushmen are wanted in the Matane area and are being recruited as rapidly as possible. At Megantic, on an order for 600 loggers, 400 have been placed and the balance are available. Winter orders for 2,000 men have been placed in the Rivière du Loup office and should be procurable locally.

In the Quebec City area logging operations will be on a broader scale this season and there is a great demand for workers. However, farmers in considerable numbers are becoming available daily. Val d'Or, too, will be able to fill the greater part of its 200 orders with men released from their farms.

The office at East Angus has partly filled its current orders for 200 pulpcutters, Hull reports 900 vacancies for bushworkers on Gatineau timber limits, and Campbell's Bay states that, in spite of the increase in local applicants, a great shortage still exists.

Mining—In the mining industry of the province, all the northern gold mines are in great need of additional labour, and more than 150 miners are required to fill the quota provided by the special "B" priority rating.

Manufacturing—Montreal reports that industrial lay-offs have been numerous during the past month. Some 1,400 men have been released by an important aircraft company during October, and the lay-off of women have also begun. At another aircraft factory, the staff reduction will be more gradual, and is being taken care of, in part, by transfers within the plant and by not replacing normal withdrawals. Defence Industries Limited is accelerating the rate of release of workers from its Verdun and Montreal operations, and lay-offs for October comprise some 1,000 men and women, in equal proportion.

During the latter part of the month, lay-offs have increased, with shipbuilding establishments following the lead of aircraft and munitions factories. A large proportion of the shipbuilding workers affected are being absorbed elsewhere, and it is notable that in at least one large munitions plant, more men are being engaged for operations previously performed by women.

Montreal packing plants require between 300 and 400 male workers, but their labour shortage is being lessened weekly as agricultural workers are received for temporary employment. Women sewing machine operators are much in demand in all textile and allied establishments of Montreal and other parts of the province, and there is little improvement in the labour situation of the children's garment trade.

Mass shipbuilding lay-offs at Quebec are releasing many semi-skilled and unskilled workers, who cannot be placed locally and will have to be directed elsewhere on clearance orders.

At Shawinigan Falls the aluminum plant has stepped up production in the past week, and an additional 200 potmen are required. These heavy labourers will be procured from the surrounding farms, and with the co-operation of other N.S.S. offices.

Construction—In all parts of the region construction projects of every sort are being delayed as a result of the lack of experienced tradesmen. In another month this shortage should cease to present so great a problem. In Hull, the dearth of labour for the erection of 150 wartime houses is complicated by the fact that, with workers unavailable locally, orders cannot be placed in clearance because of the lack of housing accommodation for outsiders.

The Montreal office reports that several important projects are being held up by a considerable shortage of bricklayers. There is as yet no indication of seasonal let-up in the city's construction activity and the transfer of labourers to outside points is being restricted as far as possible.

Ontario Region

Agriculture.—Excellent autumn weather in Ontario made it possible for farmers to do much extra fall ploughing, which should result in additional acreage for spring sowing. Many farmers are engaged in apple picking, and when this harvest is over they will be free to

enter other essential industries for the winter months. However, the movement off the land is much later than last year, and no general migration to logging camps and manufacturing plants has yet taken place. The only manpower need of agriculturists at this time is for dairy farm hands, and these are difficult to obtain.

Logging.—There are indications that the logging camps in the Ontario region will be under-staffed during the coming winter. Practically every local employment office in a lumbering section stresses the difficulty of filling current orders, and anticipates greater trouble later in the season. Pembroke has 750 orders on hand, with little hope of filling them locally. Sault Ste. Marie, North Bay, Kirkland Lake and Timmins are short of workers and, as yet, little assistance has been received from the farmers.

The Kapuskasing office reports that 50 to 75 loggers have been placed daily during the past month, and there is no sign of a let-up. One large power and paper company in the district expects to have upwards of 2,000 men in the bush this winter. Pulp contractors and sawmill operators in the Hearst district are also endeavouring to secure larger than usual quotas of bush workers.

Mining.—There is little change in the manpower situation in Ontario's mines. Some 200 experienced miners and another 200 beginners are needed for the gold operations in the Kirkland Lake area, and Timmins is similarly short. At Sault Ste Marie there has been little response to clearance orders for miners, and few are available locally: skilled men especially are greatly needed.

Manufacturing.—No great improvement is noticeable in the province's undermanned manufacturing industries and war plants. Company canvassers among the farmers have been only moderately successful, and the heavy demand for reliable general labour continues to outweigh the available supply. Packing plants, flour mills and foundries in every part of the region are seriously affected by this shortage.

The Toronto office reports that employers' requisitions for workers continue to come in at the rate of over 3,000 male and 1,900 female orders weekly, and in the men's division, out of a total of 11,400 vacancies over 6,500 are in "A" and "B" priority industries.

London, too, reports little improvement in the local labour situation, and few agricultural workers are as yet available. While a definite lack of skilled men for Hamilton's iron and steel industries persists, recent lay-offs in the vicinity have eased the situation somewhat, but in Kingston there has been no such benefit from a recent staff reduction in the Aluminum Company's plant, and 200 men are still required for essential industries.

The stepping-up of production on a number of government contracts has increased the immediate manpower needs of a number of Ontario employers engaged in munitions production.

While there have been several lay-offs during the month, these have been confined to a few manufacturing centres, and have not been of sufficient magnitude to improve the over-all position of the province's labour force. In Brantford, the shell division of one plant has reduced its staff from three shifts to one only, and the consequent lay-off of men and women is proceeding gradually, with no difficulties. Another establishment which has similarly reduced its shell output is absorbing practically all the male and female workers involved into other departments of the plant, the farm implement divisions in particular.

In New Toronto several canneries have released all their temporary employees, and their only present requirement is a few full-time workers. In Stratford there has been a considerable reduction of staff in the two local aircraft plants, but all the men affected have gone to other essential industries.

Construction.—Construction companies in all parts of Ontario have more work on hand than they can possibly complete, handicapped as they are by the prevailing labour shortage. However, the program of military hospital building is going forward according to schedule.

Transportation.—Although agricultural workers are relieving the shortage somewhat, railway maintenance gangs are still the chief problem of the transportation industry. The Toronto Transportation Commission requires many male and female operators but few referrals are possible on account of the high physical requirements. St. Thomas, also, is short of competent drivers and mechanics for its bus lines.

Prairie Region

Agriculture.—Except in isolated parts affected by inclement weather, harvesting operations on the prairies are practically over. The only demand for farm labour at present is for winter workers, and of the thousands of volunteers who have relieved the seasonal crisis, many of the eastern harvesters have returned home and others have gone farther west to British Columbia logging camps. Farmers and their helpers are being enrolled in steadily increasing numbers for packing plants, logging camps and other essential operations of the region, and female harvest helpers are return-

ing to urban areas, relieving the womanpower shortage in hospitals and restaurants.

Logging.—Although the completion of the harvest has released many agricultural workers for bush operations, many more will be needed. At Fort Frances alone, in spite of a slight increase in placements, unfilled vacancies amount to 1,000. Winnipeg reports heavy demands, and very few suitable applicants, while at The Pas it is expected that about 350 bushmen will be required. Dauphin, too, registers an increased demand, with 350 loggers in all, required.

The Edmonton office reports that orders are coming in rapidly, and a campaign is under way to try to recruit at least 500 of the eastern harvesters in that locality for bush work in British Columbia.

Coal Mining.—Smaller coal mining properties in the prairie region are in full production, with only a few additional workers needed, but the labour requirements of the larger collieries for skilled and unskilled workers is relatively great. The situation is more acute in Alberta than in Saskatchewan. Hope is entertained that much assistance will be obtained from farmers during the winter months.

Base Metal Mining.—In the region's base metal mines manpower requirements are not so great as at this time a year ago, possibly due to the fact that some properties are easing off in their production. There is also a noticeable tendency not to accept all applicants and a decrease in the amount of development and exploration work.

Manufacturing.—The available labour supply is inadequate for the needs of the packing industry. In Winnipeg, there has been a gradual transition from war production to other essential manufacturing, and lay-offs have been absorbed without much difficulty. There is still, however, a critical lack of heavy labour, for packing houses in particular. Brandon shares this shortage, (extending also to its fuel plants) and many service men in the area have been directed to these establishments for part-time work.

In Calgary the lack of heavy labour is serious, not alone in packing plants, but also in the milling industry, and in spite of some assistance of workers from the farms this shortage will prevail until the harvest is completed. In Edmonton, too, the packing plants are calling urgently for additional experienced men—butchers and knifemen for the most part.

Present production in the aircraft factory at Fort William does not require overtime or Sunday work. A small lay-off has taken place in the shell department of the plant. In Port Arthur, 35 additional craftsmen are needed for shipbuilding operations.

Construction.—More building labourers are needed in the region, although the completion of some projects is causing the lay-off of skilled artisans. There is no urgent need for workmen of any particular trade, nor any present probability of unemployment for construction tradesmen.

Transportation.—With the approach of winter men are urgently needed by the railway companies for track maintenance work. The help provided by farmers is offset by the departure of trappers and hunters to engage in their customary winter occupations. It is possible that a fairly large number of the Armed Forces may be placed on right-of-way maintenance to complete urgent work. The running trades of both railways are in almost equal need of additional workers.

Pacific Region

Agriculture.—The fruit crop is practically all harvested in British Columbia. Dairy farm assistants are, however, in constant demand, but seldom procurable. A few farmers and their hired help are entering industry, but the movement from the land as yet is slight.

Logging.—Improved weather has enabled logging operators to increase production. Some districts are obtaining help from farmers and fruit packers, but the general need for logging labour continues to be great. There is a serious shortage of skilled and unskilled bush-workers throughout the province.

Sawmills.—While there is an over-all demand for sawmilling labour, the situation on the lower mainland has improved somewhat as a result of the recent aircraft lay-offs. However, unskilled, heavy labourers and some artisans are still in demand. On Vancouver Island, Nanaimo, Courtenay and Victoria can make use of all types of sawmill labour and Courtenay is experimenting with the use of R.C.A.F. men in their off-hours.

Mining—The Fernie office reports that operations at Crow's Nest Pass coal mines are definitely short of underground workers.

Some manpower relief for the base metal mines is hoped for from the agricultural workers of the province. Operations in the vicinity of Vernon are especially short of underground workers, while at Nelson miners and timbermen have become more plentiful during the past few weeks and the chief difficulty is the lack of experienced muckers.

A drop in production at the Kimberley smelters has resulted from a shortage of about 100 underground labourers. Some relief is expected from the Prairies. The labour position of the smelter at Princeton has improved

slightly, with more workers coming in on clearance, but a considerable number of underground labourers are still needed.

Manufacturing—During the month, many lay-offs have occurred in the province's manufacturing establishments. With the exception of fish processing plants, the majority of the province's canneries completed their season's work. The Boeing aircraft plant at Chilliwack is gradually ceasing production, releasing its crews as specified assignments are completed, while at Nelson, the company is closing down its local operations by the end of the month, and about 65 employees have been laid off already. Some of those laid off at Chilliwack have been placed, but others have filed Unemployment Insurance claims. A number of the women laid off at Victoria are also filing insurance claims, but others, along with most of the men are being absorbed by other essential industries.

In New Westminster, the engineering and foundry plants have outstanding orders for a few skilled machinists and moulders, as well as heavy labourers. During the past six weeks C. P. Air Lines (Overhaul Division) has had three mass lay-offs of approximately 500 men and 300 women. Release of the last group was effective October 19 to 24. Approximately 33 per cent of the number are from Vancouver and are being transferred there for other types of employment.

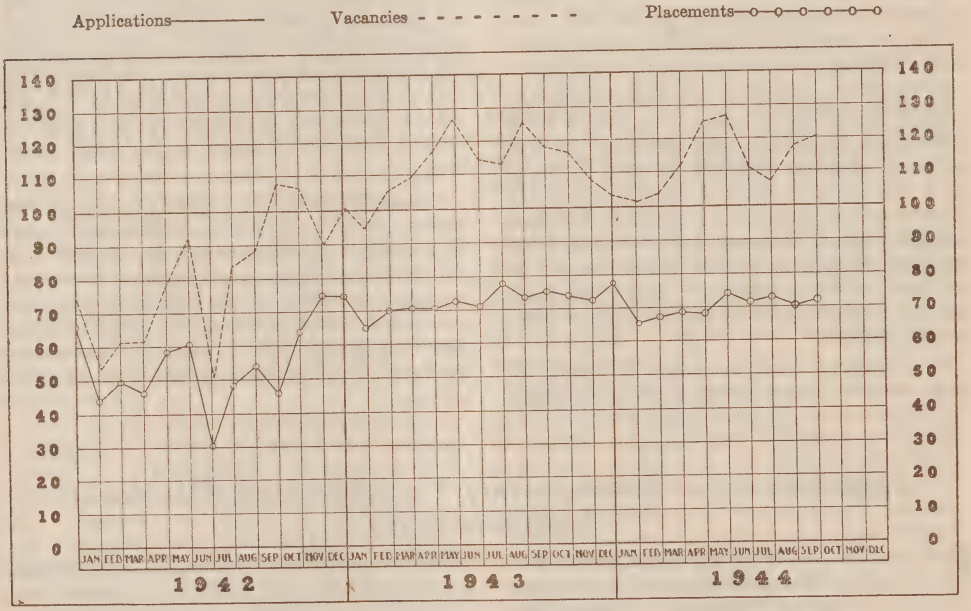
In Vancouver, the reduction in staffs of local aircraft factories and their sub-contractors has made a number of men available, but the majority are not skilled and are incapable of heavier work. The call for moulders and core-makers in Vancouver foundries continues to be pressing. It has been necessary to withdraw moulders from other firms to fill more urgent requirements. First-class machinists are also needed by many plants, and sheet metal workers for both high and low priority jobs. An increase in the general demand for female factory workers is noted by the Vancouver office, which states that the Boeing lay-off has increased the number of women applicants for employment.

Construction—Labour conditions in the construction industry are generally satisfactory. The existing demand for carpenters and labourers is chiefly for private building. There has been no difficulty in obtaining the labour necessary for high priority construction, with the exception of bricklayers. An urgent call for these tradesmen is being made by the R.C.N. Dockyard at Esquimalt, and there is also an increased demand on the lower mainland.

Transportation—The railways in the Pacific region are still far short of their transportation labour requirements and the British Columbia Electric lines are in similar straits, as few men capable of such heavy work are procurable. The demand for garage mechanics has, however, been met to some extent by light labour released by the aircraft plant lay-offs.

Applications for Employment; Vacancies and Placements; September, 1944

REPORTS received from Employment and Selective Service Offices of the Unemployment Insurance Commission during the four-week period September 1 to September 28, 1944, showed an increase of 16·1 per cent in business transacted, when compared with the preceding five-week period, July 28 to August 31, 1944, but a loss of 14·6 per cent in comparison with the four weeks September 3 to September 30, 1943, this computation being based on the average number of placements recorded daily. Under the first comparison all industrial groups except agriculture registered gains, the most noteworthy being a substantial increase in manufacturing and considerable expansions in trade, forestry and logging, and services. When compared with the four weeks ending September 30, last year, a moderate gain was recorded in forestry and logging and a minor increase in trade. Finance and insurance, and fishing, hunting and trapping remained practically unchanged but all other industrial groups recorded losses, the greatest being in manufacturing.



The accompanying chart shows the trend of employment since January, 1942, as represented by the ratios of vacancies notified and of placements effected for each one hundred applications for work registered at Employment and Selective Service Offices throughout Canada. It will be seen from the graph that the trends of the curves of vacancies and placements in relation to applications took upward courses. The ratio of vacancies to each one hundred applications was 120·3 during the four weeks ending September 28, 1944, in contrast with 117·3 during the preceding five weeks and 117·9 during the four weeks September 3 to September 30, 1943. The

ratio of placements to each one hundred applications was 72·0 as compared with 70·3 in the previous period and 75·2 in the four-week period ending September 30, a year ago.

The average number of vacancies reported daily by employers to the offices of the Commission throughout Canada during the period under review was 10,283 compared with 8,838 during the preceding five-week period and 11,315 during the period September 3 to September 30, last year. The average number of applications for employment received daily by the offices during the four weeks September 1 to September 28, 1944, was 8,547 in comparision with 7,534 for the previous five weeks and 9,594 in the four weeks in September, 1943. The average number of placements made daily by the offices during the four weeks September 1 to September 28, 1944, was 6,158 of which 6,008 were in regular employment and 150 in work of one week's duration or less, as compared with a total daily average of 5,304 during the previous five weeks. Placements in the four weeks ending September 30, last year, averaged 7,212 daily, consisting of 7,066 placements in regular and 146 in casual employment.

During the period September 1 to September 28, 1944, the offices of the Commission referred 194,745 persons to vacancies and effected a total of 141,641 placements. Of these, the placements in regular employment were 138,183 of which 80,363 were of males and 57,820 of females, while casual placements totalled 3,458. The number of vacancies reported by employers was 153,855 for males and 82,649 for females, a total of 236,504, and applications for work numbered 196,572, of which 113,947 were from males and 82,625 from females. Reports for the five weeks July 28 to August 31, 1944, showed 265,146 positions available, 226,032 applications made and 159,117 placements effected, while from September 3 to September 30, 1943, there were recorded 260,224 vacancies, 220,650 applications made and 165,885 placements in regular and casual employment.

POSITIONS OFFERED AND PLACEMENTS EFFECTED FOR EACH ONE HUNDRED APPLICATIONS FOR EMPLOYMENT

The following table gives the placements effected by employment offices, each year, from January, 1934, to date:—

Year	Placements		
	Regular	Casual	Totals
1934	223,564	182,527	406,091
1935	226,345	127,457	353,802
1936	217,931	113,519	331,450
1937	275,300	114,236	389,536
1938	256,134	126,161	382,295
1939	242,962	141,920	384,882
1940	320,090	155,016	475,106
1941	316,168	191,595	507,763
1942	809,983	85,638	895,621
1943	1,890,408	53,618	1,944,026
1944 (39 weeks)	1,261,332	35,371	1,296,703

Nova Scotia and Prince Edward Island

During the four weeks ending September 28, 1944, the daily average of positions offered through Employment and Selective Service Offices in Nova Scotia and Prince Edward Island was 389, compared with 280 in the previous period and 474 during the four weeks ending September 30 last year. There was a daily average of 216 placements compared with 196 in the preceding five weeks and 288 during the period September 3 to September 30, 1943. The reduction in placements from the four weeks ending September 30, a year ago, was greatest in manufacturing with decreases of more moderate proportions in construction, mining, public utilities operation and services. Of the changes in all other groups, a moderate increase in agriculture was the most important. Industrial divisions in which most of the placements were effected were: manufacturing 1,511; services 1,027; trade 888; construction 517; public utilities operation 429; agriculture 338 and mining 152. Regular placements numbered 2,908 of men and 1,976 of women.

New Brunswick

Opportunities for employment at Employment Offices in New Brunswick during the period ending September 28, 1944, numbered 320 daily in comparison with 237 in the preceding five weeks and 329 during the period ending September 30, 1943. Placements showed a higher average during the four weeks under review, being 181 daily in contrast with 150 in the previous period and 175 during the four weeks ending September 30 last year. The increase in placements over the four weeks September 3 to September 30, 1943, was small for the province as a whole under this comparison. The most significant changes were losses in forestry and logging, manufacturing, and gains in mining and services. Placements by industrial divisions numbered: manufacturing 1,216; services 835; trade 638; public utilities operation 472; construction 464; mining 266; forestry and logging 125, and agriculture 112. There were 2,558 men and 1,557 women placed in regular employment.

Quebec

Orders received at Employment Offices in the Province of Quebec during the four weeks under review, called for an average of 3,186 workers daily compared with 2,453 in the previous period and 3,429 during the four weeks September 3 to September 30, last year. Placements showed a daily average of 1,751, in comparison with 1,378 in the preceding period and 1,924 during the four weeks ending September 30, 1943. When comparing placements by industrial divisions with the period ending September 30, of last year, a fairly large increase was recorded in forestry and logging with moderate gains in trade, agriculture, and finance and insurance. This improvement, however, was entirely offset by a substantial reduction in manufacturing and moderate losses in mining and services. Industries in which employment was found for more than 500 workers included: manufacturing 18,297; services 5,759; forestry and logging 4,236; construction 4,043; trade 3,507; public utilities operation 2,993; finance and insurance 621, and mining 578. Placements in regular employment numbered 26,427 of men and 13,774 of women.

Ontario

Positions offered through Employment Offices in Ontario during the period ending September 28, 1944, averaged 4,142 daily compared with 3,830 in the preceding five weeks and 4,635 during the period ending September 30, last year. The average number of placements registered daily was 2,536, in comparison with 2,253 during the previous five weeks and 2,977 in the period ending September 30, a year ago. A substantial reduction in placements in manufacturing augmented by decreases of much smaller proportions in construction, agriculture and public utilities operation accounted for the loss from the four weeks September 3 to September 30, 1943. Advances, however, were recorded in forestry and logging, services and trade, the greatest being in the first-named group. Placements by industrial divisions numbered: manufacturing 27,410; services 10,053; trade 7,863; public utilities operation 4,229; construction 3,277; forestry and logging 2,826; finance and insurance 1,008; agriculture 940 and mining 718. Regular placements numbered 30,824 of men and 26,667 of women.

Manitoba

The demand for workers on a daily average as indicated by orders listed at Employment Offices in Manitoba during the period under review was 473, as compared with 396 in the previous five weeks and 485 during the period ending September 30, 1943. There was a daily average of 286 placements compared with 243 in the preceding five weeks and 357 during the period September 3 to September 30, a year ago. With the exception of a moderate gain in trade and a minor increase in agriculture, all industrial divisions recorded declines in placements from the four weeks ending September 30, last year, the largest reduction being in manufacturing followed by

smaller losses in public utilities operation and services. Placements by industrial groups included: trade 1,932; manufacturing 1,684; services 1,613; public utilities operation 611; construction 270 and agriculture 247. There were 2,330 men and 3,241 women placed in regular employment.

Saskatchewan

Orders listed at Employment Offices in Saskatchewan during the four weeks ending September 28, 1944, called for a daily average of 252 workers, compared with 244 in the preceding period and 295 during the four weeks ending September 30 last year. The average number of placements effected daily was 161, in contrast with 160 during the five weeks ending August 31, 1944, and 271 in the period ending September 30, 1943. The decrease in placements from the four weeks ending September 30, of last year, was mainly due to a fairly large loss in agriculture, although moderate declines were reported in services and manufacturing. The only improvement registered was a moderate gain in trade. Industrial divisions in which the largest number of placements were effected were: trade 1,046; services 1,024; agriculture 596; manufacturing 521; public utilities operation 285 and construction 134. Placements in regular employment numbered 1,750 of men and 1,617 of women.

Alberta

There was an increase in the average number of positions available daily at Employment Offices in Alberta during the period ending September 28, 1944, when compared with the five weeks ending August 31, but a decrease in comparison with the period ending September 30 last year, the daily average being 484 during the four weeks under review, 386 in the previous period and 498 during the four weeks September 3 to September 30, 1943. Placements showed a daily average of 293, in contrast with 262 during the preceding period and 352 in the four weeks ending September 30, a year ago. With the exception of a moderate gain in agriculture and a nominal increase in finance and insurance, all industrial groups recorded decreases in placements when compared with the period ending September 30, 1943. The most important reductions were in construction, manufacturing, mining and public utilities operation. Placements by industrial groups numbered: services 1,735; agriculture 1,267; trade 1,115; manufacturing 904; public utilities operation 719; construction 533 and mining 333. There were 3,867 men and 2,384 women placed in regular employment.

British Columbia

Employment opportunities, an indicated by orders received at Offices in British Columbia during the four weeks ending September 28, 1944, showed a daily average of 1,037, compared with 1,013 in the preceding period and 1,169 during the four weeks ending September 30 last year. During the period under review, the average number of placements recorded daily was 734, in contrast with 662 in the previous five weeks and 867 during the period ending September 30 last year. A fairly large decrease in manufacturing together with smaller losses in construction, mining, agriculture and trade were responsible for the decline in placements when compared with the four weeks September 3 to September 30, 1943. A moderate increase was noted in forestry and logging, while the changes in other groups were unimportant. Industrial divisions in which most of the placements were effected were: manufacturing 5,150; services 3,487; trade 2,935; forestry and logging 1,758; public utilities operation 1,592; construction 1,347; finance and insurance 250; mining 204 and agriculture 157. Regular placements numbered 9,699 of men and 6,604 of women.

Quarterly Report of Employment and Selective Service Offices, June 30 to September 28, 1944

REPORTS received from the Employment and Selective Service Offices of the Unemployment Insurance Commission during the quarter June 30 to September 28, 1944, showed declines of 15·7 and 17 per cent respectively in vacancies notified and placements effected, when compared with those reported by the offices in the corresponding quarter of 1943. All industrial groups except agriculture, forestry and logging, and mining recorded decreases in vacancies and all but agriculture and forestry and logging showed reductions in placements, the losses in manufacturing being the greatest in both instances. Apart from an increase of placements in Prince Edward Island, all provinces registered declines in both vacancies and placements.

From the chart appearing elsewhere, which accompanies the article on the work of the Employment and Selective Service Offices for

the four-week period September 1 to September 28, it will be noted that the curve of vacancies in relation to applications followed a downward course during July but rose during August and September, while the curve of placements showed a slight incline in July, then a decline in August and an upward trend in September, the levels at the close of the quarter being higher for vacancies and lower for placements than those shown at the end of the corresponding period last year. During the thirteen weeks June 30 to September 28, 1944, there was a ratio of 115·0 vacancies and 71·6 placements for each one hundred applications for employment, as compared with 119·3 vacancies and 75·4 placements during the corresponding period a year ago.

The average number of positions offered daily during the quarter under review was 9,320; of applications registered 8,098; and of placements effected 5,806 in contrast with a daily average of 10,923 vacancies, 6,757 applications and 6,903 placements during the same quarter 1943.

During the three months July to September, 1944, the offices reported that they had re-

ferred 593,363 persons to positions and had effected a total of 441,265 placements, of which 430,386 were in regular employment and 10,879 in casual work. Of the placements in regular employment, 260,975 were of males and 169,411 of females. A comparison with the corresponding period of 1943, shows that 531,410 placements were then made, of which 520,260 were in regular employment and 11,150 in casual work. Applications for employment during the period under review were received from 369,816 males and 245,635 females, a total of 615,451 in contrast with the registration of 704,933 during the same period last year. Employers notified the offices during the quarter July to September, 1944, of 708,285 vacancies of which 455,433 were for males and 252,852 for females, as compared with 841,054 opportunities for work offered during the corresponding period a year ago.

The accompanying table gives the vacancies and placements of the Employment and Selective Service Offices by industrial groups in the various provinces during the period June 30 to September 28, 1944.

Unemployment in Trade Unions at the Close of the Quarter Ending September 30, 1944

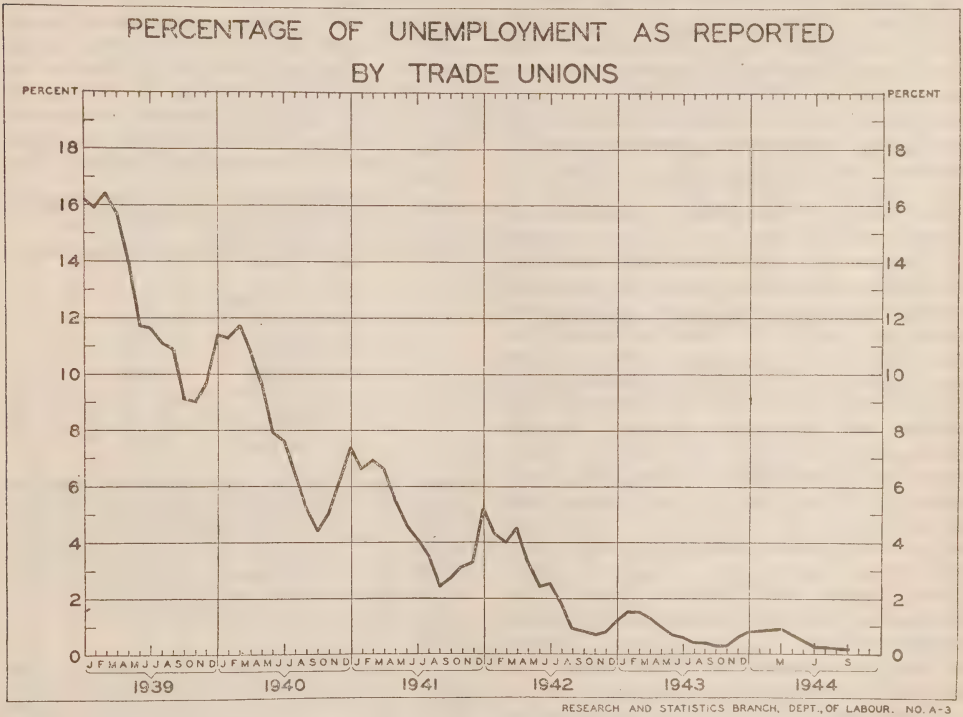
UNEMPLOYMENT in the following report has reference to involuntary idleness due to economic causes. Persons who are without work on account of sickness, a strike or a lockout, or who are engaged in work outside their own trades are not considered as unemployed. As returns from unions making reports vary from quarter to quarter, with consequent variations in the membership, upon which the percentage of unemployment is based, it should be understood that such figures have reference only, to the organizations reporting.

Returns were tabulated at the close of the September quarter from 2,377 local trade unions, in which the total membership numbered 416,664 persons, of whom, 1,262 or a percentage of 0·3 were listed as without work. This percentage remained unchanged from that of the previous quarter and it was identical, also, with that shown for the month of September, a year ago. In this connection it should be noted that any unemployment indicated at the present time and also for the monthly or quarterly periods as covered during the past few years, has been due principally to temporary lay-offs. Employment at this date, as in June, continued at the highest level shown in any of these tabulations since the inception of the trade union report in December, 1915.

Although the Dominion percentage remained unchanged, there were some fluctuations within the various trade groups. Slight contractions were reflected in returns received from unions of fishermen as well as for those in the communication, mining and service divisions. These were offset by the slightly higher employment level which was observed among union members in the building and construction trades. The very high levels of activity which were reflected in returns received from unions in the large manufacturing and transportation groups, remained unchanged, while among lumber workers and loggers, as in the June quarter, no unemployment was apparent.

The percentage of those without work by provinces is shown in Table I. As indicated therein, these figures ranged from 0·1 per cent in Manitoba and Alberta to 0·7 in New Brunswick. As compared with the situation at the close of the preceding quarter, conditions in Manitoba and Alberta were very slightly improved; very high employment levels prevailed among these workers at both dates. For members in Quebec, Ontario and Saskatchewan, no changes were manifested, while the situation in Nova Scotia, New Brunswick and British Columbia reflected slight employment contractions only. In comparison with conditions in September, 1943, minor advances in work were apparent in Ontario, Manitoba and Saskatchewan, while the situation in Quebec and Alberta remained unchanged. A very slight recession was observed in Nova Scotia, while in New Brunswick and British Columbia employment contractions were slightly more pronounced, although, as will be observed in Table I, little unemployment was indicated in any of the periods.

A separate compilation is made in each quarter of those without work in the largest city in each province, with the exception of Prince Edward Island. At the end of the September period, these figures ranged from no unemployment in Saint John to 0·4 per cent in Vancouver. In comparison with the June quarter, Regina union members were moderately better employed, while in Montreal and Winnipeg there were very minor improvements only. A very slight employment advance was recorded to show full employment in Saint John, while in Halifax, Toronto and Edmonton, the percentages of those without work remained unchanged. In contrast to these conditions, the situation in Vancouver showed a slight contraction. As compared with conditions at the end of September a year ago, union members in Montreal, Toronto, Winnipeg and Regina manifested rather slight employment increases, while in Saint John, a very minor betterment, as was noted also in the June comparison, was necessary to attain full employment. The percentages of those without work in Halifax and Edmonton remained unchanged, while in Vancouver, as in the previous comparison, a slight employment contraction was apparent.



The accompanying chart illustrates the trend of unemployment from January, 1939, to date. The point of the curve in the September quarter remained at the same level as was indicated in the June period and was unchanged, also, from that of September, a year ago.

For the manufacturing industries 868 returns were tabulated having a combined membership of 220,441 persons, of whom, 328, or a percentage of 0·1 were listed as unemployed. This figure was identical with that of the June quarter; in September, 1943, the percentage of those without work was 0·2. As in the previous period adequate employment was apparent, according to reports received, for electric power production employees, hat,

cap and glove, rubber, clay, glass and stone, mineral products, chemical, unclassified manufacturing and non-ferrous metal workers. This latter group covers returns from such organizations as metal polishers, etc., jewellery, aluminum and mine, mill and smeltermen. In the animal products division, in which are included returns from butchers, meat and fish packers, etc., leather and fur workers and in the large iron and steel group, the percentages of those without work were identical with those of June. As will be seen in Table II employment in both of these sections remained at very high levels. On the other hand, slight recessions were reflected in returns

members indicated a minor increase in activity. Full employment was apparent, according to returns received, for those in the non-ferrous metals and unclassified manufacturing sections; in these latter groups, very slight improvements occurred to attain this result. In contrast to these betterments, slightly lower levels were indicated for papermakers, woodworkers, garment workers and for union members in the vegetable products division.

Returns were tabulated from 58 unions of coal miners having an aggregate membership of 19,779 persons. Of these, 40, or a percentage of 0·2 were listed as without work, in comparison with the fully engaged situa-

received for union members in the vegetable products group, in which are included reports from soft drink workers, etc., cigar and tobacco workers and bakers and confectioners, etc. Slightly lower employment levels were reflected, likewise, for union members in the printing and publishing trades, papermakers, woodworkers, textile and carpet and garment workers; the latter group includes returns from union members of both men's and women's clothing workers. As compared with conditions in September, a year ago, a moderately higher employment level was manifested for those in the animal products section, while in the printing and publishing division, union

tion reported for these members in both the preceding quarter and in September, 1943. As in June and in September, a year ago, full employment was reflected in returns from Nova Scotia, Alberta and British Columbia unions; in New Brunswick there was a substantial decline in mining activities from those of both the June quarter and the month of September, 1943, at which dates no one was listed as without employment. The recession in September was brought about by the destruction of the shaft house, during a forest fire.

In the metallic ores and non-metallic minerals section of the mining division,

returns were tabulated, which covered totals of 9,457 and 3,863 members, respectively. As in June, no unemployment was observed among those in the former groups, while in the latter employment was at a slightly lower level. As the figure for those without work in the metallic ores group in September, a year ago, was less than one per cent, very slight betterment, only, was necessary to reach full employment. On the other hand, the work available for members in the non-metallic minerals section showed a rather moderate contraction.

The returns tabulated for unions in the building and construction trades numbered 199. The combined membership of these totalled 31,498 persons, of whom 213, or a percentage of 0·7 were without work, in comparison with percentages of 0·9 at the end of the June quarter and 1·0 in September, 1943. As compared with conditions in the previous period, bricklayers, masons and plasterers reflected moderate improvement, while plumbers and steamfitters were slightly better employed. A minor increase in work, only, enabled union members of bridge and structural iron workers to indicate a fully employed situation. Carpenters and joiners continued to report the same high employment level, while among wood, wire and metal lathers adequate work was apparent at both dates. On the other hand, slight contractions were observed among steam shovel men, electrical workers, hod carriers and unclassified building workers, granite and stonecutters and painters, decorators and paperhangers. In comparison with September, a year ago, the employment level for carpenters and joiners was moderately higher, while slight increases in work were reflected in returns from unions of bricklayers, masons and plasterers, granite and stonecutters, and hod carriers and unclassified building workers. On the other hand, returns for electrical workers and steam shovel men reflected fair employment recessions.

Reports were tabulated from 882 unions in the transportation division. The total membership was listed as 84,704 persons, of whom 282, or a percentage of 0·3 were without work. This figure remained unchanged from June; in September, 1943, the corresponding percentage was 0·4. Nearly 80 per cent of the entire group membership reported was included in the steam railway division. A slightly higher employment level was observed among these workers than for that of the previous quarter. Among street and electric railway employees, the very high level of activity remained unchanged, while at both dates adequate work was available for teamsters and chauffeurs, etc. A moderate decline in work was indicated for those in the navigation group. In comparison with the situation in September, a year ago, union members in the steam railway division reflected a somewhat higher employment level, although conditions were very good in both periods. As in the previous comparison, no change was manifested among street and electric railway employees, while as in June, reports from unions of teamsters and chauffeurs indicated that their members were fully engaged. About the same degree of employment contraction, as that shown in the previous comparison, was reflected among union members in the navigation division.

As in the June quarter and in September, a year ago, union members in the retail and wholesale trades, whose reports covered about 3,000 members, did not report anyone as out of work. In the service group, returns are included for civic employees, as well as for hotel and restaurant employees, theatre and stage employees, barbers, stationary engineers and firemen and unclassified workers. The

TABLE I.—PERCENTAGES OF UNEMPLOYMENT IN TRADE UNIONS, BY PROVINCES

total number of members covered in these returns was 28,319. The percentage of unemployment in this division, when taken as a whole, increased slightly over June, but was moderately lower than for September, 1943, thus reflecting a fair employment increase since that date.

Returns were received which covered a total of 225 fishermen and 6,978 lumber workers and loggers. In the latter group as shown in the previous quarter and in September, a year ago adequate employment was provided. Among fishermen, however, there was a moderate contraction in activity both as compared with conditions in the June quarter and for those of September, 1943. In those periods no one was reported as without work.

Table I shows by provinces the average percentage of union members who were unemployed each year from 1933 to 1943, inclusive, and also the percentage of those without work for September of each year from 1932 to 1942, for each month of 1943 and for the quarters ending with March, June and September, 1944. Table II summarizes the returns in the various groups of industries since 1932.

Employment and Wages in Pulp and Paper Industry

It is pointed out in a preliminary report on the pulp and paper industry recently issued by the Dominion Bureau of Statistics that "for the fourth consecutive year new records were established in the industry in 1943." The salaries and wages are stated to have been 2·2 per cent higher than in 1942 and amounted to $71,199,422. However, the average employment—37,020 persons—was 2·6 per cent lower than the record of 38,002, established in 1942. While complete statistics for the other industries were not available for 1943, when the report was issued, it is pointed out that in 1942 pulp and paper ranked fourth with respect to wage and salary distribution and sixth with respect to employment.

The following table shows that employment in the industry by provinces and by sexes, together with the salaries and wages paid during 1942 and 1943.

Province	Employment						Salaries and Wages	
	Total		Male		Female			
	1942	1943	1942	1943	1942	1943	1942	1943
							$	$
Quebec—								
On Salaries	2,483	2,675	1,962	2,029	521	646	6,551,684	7,267,156
On Wages	16,013	15,443	16,617	14,977	396	466	26,163,613	25,978,002
Ontario—								
On Salaries	1,519	1,566	1,107	1,100	412	466	4,369,486	4,525,044
On Wages	9,615	9,436	9,346	9,061	269	375	17,431,599	17,735,123
British Columbia—								
On Salaries	516	553	415	430	101	123	1,322,425	1,374,881
On Wages	3,501	3,314	3,426	3,074	75	240	6,296,008	6,784,623
Other Provinces—								
On Salaries	553	590	388	413	165	177	1,374,883	1,496,574
On Wages	3,802	3,443	3,778	3,395	24	48	6,146,695	6,038,019
Canada—total—								
On Salaries	5,071	5,384	3,872	3,972	1,199	1,412	13,618,478	14,663,655
On Wages	32,931	31,636	32,167	30,507	764	1,129	56,037,915	56,535,767

There was no overall decline in employment of 1,295 in 1943, but there were 1,660 fewer males employed. The latter was offset, in part, by an increase of 435 in the number of women employed in the industry. On the other hand, there was an overall increase in salaries and wages of nearly half a million dollars, or a little more than two per cent, in spite of a decline in the wages paid in Quebec and "other provinces".

Labour Law

Recent Regulations under Dominion and Provincial Legislation

AN interdepartmental committee has been set up to co-ordinate the information activities of Government departments connected with demobilization, rehabilitation, readjustment to civil life and similar matters. The Department of Veterans' Affairs Act and the Department of National Health and Welfare are now in effect. An amendment has been made to P.C. 1004 concerning compensation and treatment to Government employees travelling between Canada and Newfoundland. Controllers of the Montreal Tramways Company have assumed control of property and assets to carry on the transportation services of the company. An amendment regarding pay to persons performing alternative service has been made to N.S.S. Civilian Regulations.

Three Orders in Council govern the payment of and deductions from veterans' pensions, and extend the War Veterans' Allowance Act to veterans of the present war and the North West Rebellion.

In the provincial field the Alberta Apprenticeship Act came into effect October 1, 1944. A new Female Minimum Wage Order has been made governing inexperienced employees, piece work, overtime and deductions. Certain elevator repair crews have been exempted from the Alberta Hours of Work Act for a period of seven months. The occupation of office machine mechanics has been added to the list of designated trades under the British Columbia Apprenticeship Act. Regulations under the British Columbia Health Act have been amended regarding the partition separating a barber shop from any other room or part of the premises, and the wearing of a white washable coat by all persons engaged in barbering. Regulations have been issued under the Manitoba Apprenticeship Act, and certain trades have been added to the list of designated trades in Schedule A to the Act. Female employees in hotels and restaurants in Nova Scotia must have at least 24 hours of continuous rest in every seven days. New regulations have been issued under the Ontario Apprenticeship Act governing the motor vehicle repair trade. The provisions of the Saskatchewan Minimum Wage Act have been extended to include certain cities and all industries, businesses, trades or occupations of any nature with certain exceptions.

Dominion

Dominion Civil Service Superannuation and Militia Pensions

Order in Council P.C. 120/8058 made October 18, 1944, and gazetted October 30 waives overpayments of superannuation or Militia pensions made prior to November 1, 1944, to annuitants under the Civil Service Superannuation Act, 1924, or to pensioners under The Militia Pension Act who have been employed by the Inspection Board of the United Kingdom and Canada.

Committee on the Activities of Government Departments connected with Demobilization

By an Order in Council (P.C. 8096) made October 17, 1944, and gazetted October 23, the Minister of Labour is to appoint one member to an interdepartmental committee authorized to co-ordinate the information activities of government departments connected with demobilization, rehabilitation, readjustment to civil life and related matters among both members of the armed forces and the general public, and to institute information programs on such matters. The committee is to be kept informed of the programs of Government departments and agencies and may make recommendations to the various departments. The necessary funds are to be allocated to the Wartime Information Board from the War Appropriation, subject to approval of estimates of expenditure and allotment of funds by the Treasury Board.

Department of Veterans' Affairs and Department of National Health and Welfare

The Department of Veterans' Affairs Act (L.G., 1944, p. 1173) and the Department of National Health and Welfare Act (L.G., 1944, p. 1172) were proclaimed in effect November 4, 1944.

Government Employees Compensation Regulations

An Order in Council (P.C. 160/7934), made October 14, 1944, and gazetted October 23, amends Order in Council P.C. 1004 (L.G., 1943, p. 390) concerning provision for payment of compensation to Government employees who are injured by accident in Newfoundland or while travelling between Newfoundland and Canada, or to their dependants in the case of death.

The section is amended which stipulates that such an accident is deemed to have occurred in the province in which the employee is ordinarily resident. It now states that where a Government employee ordinarily resident in Canada suffers an accident in Newfoundland or while travelling between Canada and Newfoundland, the accident will be deemed to have occurred in Ontario or, if the employee, or his dependants in the case of his death, give notice within one month after the accident has occurred, in the province in which the employee is ordinarily resident.

A further amendment is made by the addition of a section stating that medical or surgical treatment or X-ray or hospital services received in Newfoundland are to be paid for, where authorized by the Minister of Transport, in accordance with the tariff of fees and allowances set out in this Order.

Montreal Tramways Company

Order in Council P.C. 8211, made October 24, 1944, and gazetted November 6, amends P.C. 6416 (L.G., 1944, p. 972) governing control exercised over the business of the Montreal Tramways Company.

Article 2, concerning Controllers of the Company, is revoked and a new Article is substituted which stipulates that the Controllers will have the custody and control of the amount of property and assets of the Company necessary to manage, operate and carry on the transportation services of the Company. The Controllers have the authority of the board of directors of the Company for the purpose of carrying out these operations.

Article 5, governing the board of directors, is also revoked and another Article substituted which states that the authority of the board of directors and the shareholders in respect to the management, operation and carrying on of the transportation services of the Company is suspended until the above rights of the Controllers are revoked.

National Selective Service Civilian Regulations Amendment

Order in Council (P.C. 8212) made October 24, 1944, amends the N.S.S. Civilian Regulations (L.G., 1943, p. 16, 17) by revoking Subsection (3) of Section 251 governing pay to persons performing service in lieu of military training to whom postponement orders have been granted.

The amending Order substitutes another Subsection (3) which stipulates that the Minister must not pay less than 50 cents per day to every person performing alternative service, more than 75 cents per day to any such person appointed as sub-foreman, and not more than $1 per day to any such person appointed as foreman.

New Brunswick Wartime Labour Relations

In New Brunswick a Proclamation has been issued making applicable in that Province the provisions of the amendment to the Wartime Labour Relations Act made by Order in Council P.C. 6893 of September 1, 1944 (L.G., 1944, p. 1106).

Owing to the establishment of a separate Department of Labour in New Brunswick an Order in Council (P.C. 8293) was issued October 27, 1944, to amend Order in Council P.C. 3455 (L.G., 1944, p. 610), which set up the New Brunswick Wartime Labour Relations Board.

The amendment substitutes the words "the Minister of Labour for the Province of New Brunswick" for "the Minister of Health and Labour for the Province of New Brunswick".

Veterans' Dual Service Pension Order

An Order in Council (P.C. 160/7746), made October 14, 1944, and gazetted October 9, governs the payment of pensions to former members of His Majesty's Forces in the War of 1914-18 and the present war, and to former members of the Canadian Expeditionary Forces who have served in the present war.

A pension is payable to any veteran who is either 60 years of age or is permanently unemployable because of physical or mental disability, or who is incapable, and is unlikely to become capable, of maintaining himself because of economic handicaps combined with physical or mental disability or insufficiency. A pension is also payable to the widow of a veteran if she is either 55 years of age, or is incapacitated and unlikely to become capable of earning a livelihood because of mental or physical disability and is in necessitous circumstances. She must also have been living with her husband previous to his death but the administering authority retains the power to waive this qualification. An orphaned child in necessitous circumstances is also eligible for a pension.

No pension for a veteran or a widow of a veteran, who is a bachelor, widower or widow without a child, may exceed $365 per year. A

pension in the case of a married man, a widower or a widow with dependent children, must not exceed $730 per year. The maximum pension for children is $360 per year for a single child, $648 for two children, or $730 for more than two. No married person, widower or widow is entitled to a pension in excess of that payable to a bachelor unless the person and his wife, or the person and one or more children reside together. No pension is payable in respect of any period prior to the date of the application. A pension is payable only to persons who have lived in Canada for the six months immediately preceding the proposed commencement of the pension.

A pension is subject to reduction by the amount of income of the pensioner, but "income" does not include:—

(*a*) any special allowance for attendance, wear and tear on clothing, etc. payable to disabled veterans under the Pension Act;

(*b*) any additional allowance payable to the pensioner under the Pension Act on account of his children;

(*c*) any pension or grant received by the pensioner by reason of his having been awarded the Victoria Cross, the Military Cross, or the Distinguished Conduct Medal;

(*d*) casual earnings of less than $125 in any year;

(*e*) Provincial or Municipal relief money or Mothers' Allowance paid to or on behalf of the pensioner on account of dependent children;

(*f*) payments specifically excepted from the meaning of "income" as defined in the Regulations made under the Old Age Pensions Act;

(*g*) unearned income received by the pensioner less than $25 per annum; or

(*h*) war service gratuity of a deceased veteran paid, under the War Service Grants Act, to the pensioner as a dependent of such veteran.

Where any person has made a voluntary transfer of property in order to qualify for a pension or for a larger pension, the income from such a property must be taken into account in determining the amount of the pension.

Pensions are payable monthly, on a date fixed by the administering authority. They are subject to review from time to time and the pensioner may be required to submit any statement necessary to determine the continuance of the pension. The administering authority may direct the payments to be made to some other person if it believes that the pensioner is spending the amount to other than the best advantage. A pension may be suspended while the pensioner— (*a*) is a prisoner undergoing punishment for an offence; (*b*) is maintained by the Canadian Government in any institution; or (*c*) is not resident in Canada, but a part of the pension may be paid to the dependants of any pensioner under (*a*) for a period not exceeding 12 months or to the dependants of a pensioner under (*b*) for as long as the pensioner is maintained in an institution. The administering authority has the right to obtain from the Dominion Bureau of Statistics a statement of the age of any applicant for a pension from a census taken more than 20 years before the date of application for such information.

No pension is subject to alienation or transfer by the pensioner, or to seizure in satisfaction of a claim against him.

The Crown may recover the amount of any pension payments made by reason of wilful non-disclosure of facts or of fraudulent misrepresentations. No person may receive a pension under this Order if he is entitled to an allowance under the War Veterans' Allowance Act, or is receiving a pension under the Old Age Pensions Act.

The Minister of Pensions and National Health is charged with the administration of the Order and is authorized to appoint an administering authority. The War Veterans' Allowance Board was appointed on October 5. Payments under this Order are taken from the War Appropriation. The Order came into force October 1, 1944.

An Order in Council, P.C. 161/7746, made October 4, 1944, and gazetted October 9, provides that no deduction may be made from payments under The War Veterans' Allowance Act by reason of payments made under The War Service Grants Act.

Order in Council, P.C. 162/7746, made October 4, 1944, and gazetted October 9, extends the benefits of The War Veterans' Allowance Act to veterans of the present war and of the North West Rebellion of 1885.

Other Orders

The following Orders are summarized elsewhere in the LABOUR GAZETTE: P.C. 7429 regarding the employment of Home Defence Troops; P.C. 7993 governing the establishment of a Cabinet Committee on reconstruction.

Provincial

Alberta Apprenticeship Act

By a Proclamation issued September 12, 1944, and gazetted September 30, the Alberta Apprenticeship Act (L.G., 1944, p. 788) was put in force October 1, 1944.

Alberta Female Minimum Wage Act

Order No. 15 under this Act pertaining to female minimum wages for inexperienced employees, for piece work, for overtime, and as regards deductions, was gazetted October 14, 1944, and comes into effect December 1, 1944.

The Order applies to all female employees not exempted from the Female Minimum Wage Act by special Orders or agreements, including female apprentices and female employees in hospitals and nursing homes with the exception of office staff. The minimum wage for every female employee to which this Order applies, is $15 per week, when the week consists of 30 or more hours. When a week consists of less than 30 hours, the minimum wage is 35 cents per hour, providing that no employee receives less than $1.40 when a day consists of four consecutive hours or less. A mealtime period not greater than one hour is not considered as part of the four-hour period.

Inexperienced female employees must receive not less than $10 per week for the first month, $12 per week for the second month, $14 per week for the third, and the regular $15 per week thereafter. Inexperienced female employees on an hourly or piecework basis must receive the same minimum weekly rate, with not more than a monthly period of averaging being permitted in the latter case. The overtime rate is to be one and one-half times the ordinary rate.

Where meals and/or lodging are furnished as part of the weekly wage, these deductions must not exceed $2.50 for 18 meals in a working-week of six days, $3 for 21 meals in a work-week of seven days, $1.50 for lodging for a work-week of seven days, and 15 cents for single meals. No deductions may be made for meals not consumed. Uniforms, where required by an employer, must be furnished, repaired and laundered free of charge to the employee. Accidental breakages may not be charged to the employee. No deduction is to be made from the wages of any employee for time not worked on any statutory holiday. No more than 25 per cent of the total number of female employees may be inexperienced. Orders 1, 2, 3, 4, 5, 6, 7, 8, and 12 governing female employees in: factories; laundries cleaning and dyeing; hotels and restaurants; beauty parlours; theatres; garages, gasoline service stations, operators of freight and passenger elevators; offices; shops; and greenhouses, are rescinded from December 1, when this Order comes into effect.

Alberta Hours of Work Act

An Order in Council (O.C. 1443-44) issued September 12, 1944, and gazetted September 30, approves Order No. 32 of the Board of Industrial Relations which exempts elevator repair crews of United Grain Growers Limited, Alberta Wheat Pool and Northwest Line Elevators' Association from the operation of The Hours of Work Act for one year, extending from April 1 to October 31, 1944. The Order was necessitated because the work of repair crews is of a seasonal nature, full repair programs are impossible due to the shortage of both men and materials and the repair work cannot be done by ordinary casual labour. A review of such exemption will be made by the Board from year to year.

British Columbia Apprenticeship Act

An Order in Council made October 14, 1944, and gazetted October 19, amends Schedule A, which enumerates trades to which the Act applies. This amendment adds to the list, the occupation of office machine mechanic, which includes the manufacture, servicing, and repair of all counting, recording, and correspondence devices such as cash registers, typewriters, adding-machines, sealing and addressing devices, and all other office machinery.

British Columbia Health Act

Regulations under this Act have been amended by an Order in Council made September 30, 1944, and gazetted October 5.

Regulation I is amended by the addition of particulars regarding the partition separating the barber shop from any other room or part of the premises. This partition, of solid wood, metal or part-glass extending from floor to ceiling, must, by the New Order, measure not less than 10 feet on any one side of the floor-space for the first chair. Barber shops must be inspected and approved by a local health authority before opening for business.

Regulation 15 governing the wearing of white coats by all barbers, apprentices, or students is rescinded, and another section substituted. This section states that all barbers, apprentices or students must wear a coat of a white washable material, covering all clothing from the hips upward. This coat must be kept clean to the satisfaction of the Sanitary Inspector.

Manitoba Apprenticeship Act

Regulations under this Act, adopted October 7, 1944, and gazetted October 21, deal with educational qualifications, application and agreements, wages, terms of service, duties of the employer and employee, hours of work, disputes, examinations and fees governing apprentices.

No person may become an apprentice until he has completed the work of Grade 9 or its equivalent. Application for the registration of an agreement must be made on a form supplied by the Provincial Apprenticeship Board, and must be forwarded to the director with a medical certificate.

Each agreement must provide that the agreement between the employer and apprentice may be terminated within three months. If the apprentice is a minor he must have the written consent of his parent, guardian or the Director of Public Welfare, to terminate the agreement. The apprentice forfeits his wages for non-attendance at classes. The director may cancel any agreement on application to the employer if the apprentice is absent without reasonable excuse. An apprentice may be placed for temporary training under a perscon other than his employer if the employer gives the director 10 days' notice of the change, in writing. Before advancing to a further 12 months of his apprenticeship period, an apprentice must complete, in 12 consecutive months, at least 2,000 hours, inclusive of the time spent in day classes. When the Apprenticeship Board is not satisfied that the apprentice has made satisfactory progress in his training, the apprenticeship period may be extended from time to time, as required. Either party to the agreement may make application, in writing, to the director for a revision of the rate of wages fixed in the agreement. The director may then appoint a time and place for a hearing, at which he may alter or amend the rate of wages. Each apprentice must be paid on an hourly basis. He is responsible for the proper use of the tools and goods of the employer and must avoid waste. He must furnish an adequate excuse to his employer for any absence from his employment, attend the prescribed classes in trade training, and notify the director immediately when he ceases for any reason to be employed by the employer to whom he is apprenticed. Every employer must register with the director within three (3) months after his trade becomes a designated trade, notify the director when employing a minor or an apprentice in any designated trade, provide adequate training for each apprentice, keep each apprentice employed as long as work is available, pay the apprentice the wages set out in the agreement, co-operate with the director in the transfer of any apprentice, and submit an annual report to the Board on a furnished form regarding the conduct of each apprentice.

The hours for apprentices must not exceed those of a journeyman in the same trade, and those for a male apprentice under 17 and any female apprentice must not exceed 48 hours per week. A male apprentice may work overtime, but such overtime must not reduce the period of apprenticeship.

Three copies of each agreement must be sent by the employer to the director for approval by the Board and for registration. One copy must be retained by the director, one sent to the employer and one to the apprentice. The director must furnish the apprentice with an identification card which must be carried at all times while at work. A permanent transfer of an apprentice from one employer to another must be executed in triplicate and registered as a new agreement. A permanent transfer must be approved by the Board but a temporary transfer may be arranged by the trade advisory committee or by the director.

Any dispute arising between an employer and an apprentice may be referred by either party for settlement to the director, who will notify the trade advisory committee. Each member of the trade advisory committee is to hold office for three years, or until he is either re-appointed or a successor appointed. The trade advisory committee may make rules, in respect to the particular trade, governing age qualifications of apprentices, educational requirements, the apprenticeship period, the ratio of apprentices to other employees, technical school classes to be attended by apprentices, technical school curriculum, schedule of shop work, trade tests and final examinations, and hours of employment. The committee may make recommendations to the Board regarding minimum wages of apprentices, and may also issue permits to authorize persons who have satisfied the Board that they are competent to work at a designated trade without fulfilling the period of apprenticeship.

The Board makes arrangements for the technical school training and other educational classes to be taken by apprentices, trade tests and final examinations.

When an apprentice has completed his term, training, trade tests and final examinations conducted by the Department of Education, he receives a certificate.

The fee for registration of an agreement, registration of assignment of an agreement, each final trade examination, certificate of qualification, and permit is $1, and 50 cents for the replacement or renewal of a certificate (or a permit).

These fees must be paid into the Revenue Division, Consolidated Fund of the Province of Manitoba.

These regulations will come into effect November 1, 1944.

A Proclamation, issued October 6, 1944, and gazetted October 21, adds the following trades to the list of designated trades in Schedule A to the Apprenticeship Act: Automobile repair mechanics, bricklayers, carpenters, electricians ,electric motor winders and repairmen, internal combustion engine mechanics, marble workers and tile setters, masons, painters and decorators, plasterers and lathers, plumbers, steamfitters, woodworkers (factory).

Nova Scotia Minimum Wage Act

An amendment gazetted October 11, 1944, has been made to Order No. 3 of the Nova Scotia Minimum Wage Board governing female employees in hotels, restaurants, refreshment rooms, boarding houses, tea rooms, ice cream parlours, light lunch stands, and hospitals, with the exception of student and graduate nurses. The amendment adds a subsection to Section 3 pertaining to hours of work and stipulates that every employer engaged in carrying on any such establishment must allow every female employee at least 24 continuous hours of rest in every seven days. The maximum number of hours is 10 for any one day and 54 for any one week.

Ontario Apprenticeship Act

New regulations under this Act were made October 3, 1944, and gazetted October 28.

Every person between 16 and 21 who enters the motor vehicle repair trade must enter into a contract of apprenticeship. Where the employer of a garage or other place engaged in the repair of motor vehicles is a mechanic or where he employs a mechanic, one apprentice may be employed. An additional apprentice may be employed for each additional five mechanics.

The period of apprenticeship is five years, except where the apprentice has attended a technical or vocational school approved by the Appenticeship Board, has specialized in a course in motor mechanics for at least two years and is certified by the school, in which case the apprentice must be given credit for serving two years apprenticeship. The age of a person over 21 who proposes to become an apprentice may, in the discretion of the Director, be reduced by a period not exceeding any period spent in a technical or vocational school.

The minimum rates of wages for apprentices are a percentage of the rates for mechanics: 30 per cent for the 1st year, 40 per cent for the second year, 50 per cent for the third, 60 per cent for the fourth, and 70 per cent for the fifth year.

Every person, other than a registered apprentice, engaged in the motor vehicle repair trade must hold a current certificate. No other person may be employed in this trade unless he can satisfy the provincial advisory committee, within two years of the coming into force of this regulation, that he had been engaged in the motor vehicle repair trade for a period of five years preceding the coming into force of these regulations.

Examinations will be held as directed by the provincial advisory committee. Examiners will be appointed by the Board and will recommend the issue of certificates to the provincial advisory committee. A candidate who fails to pass an examination may try another prescribed by the committee. Fees for examination and re-examination are $1. The fee of $1 is payable when a certificate is issued. This certificate must indicate the section of the motor vehicle repair trade in which the mechanic is qualified. Certificates and renewals will expire on the following October 31, provided that certificates and renewals issued before October 31, 1944, continue in force until January 31, 1945.

An application for renewal must be attached to the certificate, and the completed form with the prescribed fee must be forwarded to the Director. A certificate not renewed for three consecutive years may be renewed only after the applicant has successfully completed an examination prescribed by the Board, provided that, until two years after the coming into force of these regulations, a certificate may be renewed without examination. The fee for renewal of a certificate after its expiration will be $2 and will be increased by $1 for every year during which failure to renew continues, but this regulation will not come into force until two years after the coming into force of these regulations. The fee for issuing a duplicate certificate will be $1.

The Board may cancel a certificate on the recommendation of the provincial advisory committee where the committee finds that the holder has impersonated another at any examination held under these regulations, or has been impersonated by another person, or has been guilty of improper practice in connection with the trade. Such a cancellation

may not take effect until 10 days after notification has been sent by prepaid registered mail to the person concerned. Such a person may appeal to the Board by delivering a notice of appeal to the Director at any time before the cancellation becomes effective. The certificate will continue to be valid until the Board confirms the cancellation or decides that the certificate may continue to be valid.

Certificates must be prominently posted in the garage or workshop. The proprietor of every garage engaged in motor vehicle repair work must complete and forward to the Director all required forms. Members of the Armed Forces may be exempted from the provisions of any of these regulations by the Director while undergoing training under any plan of rehabilitation.

Saskatchewan Minimum Wage Act

Order in Council, O.C. 1166/44, made October 12, 1944, and gazetted October 31, rescinds Order "I" made August 10, 1944 and approved September 19, by O.C. 1073/44. (L.G. 1944, p. 1283) and approves a new Order.

The new Order ("L") stipulates that on and from November 16, 1944, the provisions of the Act are to be extended to apply to the following towns: Assiniboia, Biggar, Gravelbourg, Indian Head, Maple Creek, Melfort, Moosomin, Nipawin, Rosetown, Rosthern, Tisdale, Watrous and Wilkie, including the territory within a five mile radius of these towns.

Order in Council, O.C. 1167/44 issued October 12, 1944, and gazetted October 31 rescinds Order "J" made August 10 and approved September 19, 1944, by O.C. 1074/44. (L.G., 1944, p. 1283) and approves the following Order.

The new Order ("K") stipulates that on and from November 16, 1944, the provisions of the Minimum Wage Act will apply to all industries, businesses, trades or occupations of any nature, except agriculture, domestic service and employment in the Public Service of Saskatchewan, or in the service of any Department of the Executive Government of the Province, or in the service of any Board or Commission created by any Saskatchewan Act, or in the service of any municipal corporation.

British Industry and Education

A REPORT of the Education Committee of the Federation of British Industries was published in May in a bulletin entitled "Industry and Education", and shows the educational background which the Federation considers desirable for persons entering the administrative, managerial or technical sides of British industry,

The report points out that recent mechanization trends may reduce the need for skilled craftsmen but the Government's educational policy and present population trends may result in a reduction in intake of persons between 15 and 18. Quality, therefore, becomes essential. Education should provide a foundation for training in industry. The report gives as essentials the ability to read, write and speak clearly, a sound understanding of elementary mathematics, including geometry, an elementary knowledge of the basis of the natural sciences, a general impression of the main outlines and proportions of world history, and of political and economic geography, with some knowledge of social and cultural conditions in Britain and other lands. Physical education is also deemed important, not only for the health of the employee, but for the contribution which organized activities such as school holiday camps can make to the development of self-discipline and the team spirit. The report suggests that there should be "less emphasis on the acquisition of facts and specialized knowledge and more on the desired broad understanding of general principles and trades", while physical training and some degree of social responsibility training should receive additional attention.

The report discusses the advantages of the proposed reorganization of the educational system so that technical and modern schools shall have the same status as the grammar schools. Steps should also be taken to enable a child's aptitudes to be given more weight but while these aptitudes should be paramount in determining occupation, openings for employment in the locality should also be taken into consideration.

The report stresses the desirability of industry co-operating more closely with the local education authorities, including, closer contact with the schools themselves and with the local employment advisory committees, provision for pupils to visit factories, release of a proportion of its employees for part-time or full-time teaching and an increase in the number of works schools. It is considered that the whole period up to the age of 21 should be regarded as an educational period. The report further suggests that industry might take greater advantage of national educational facilities by providing bursaries.

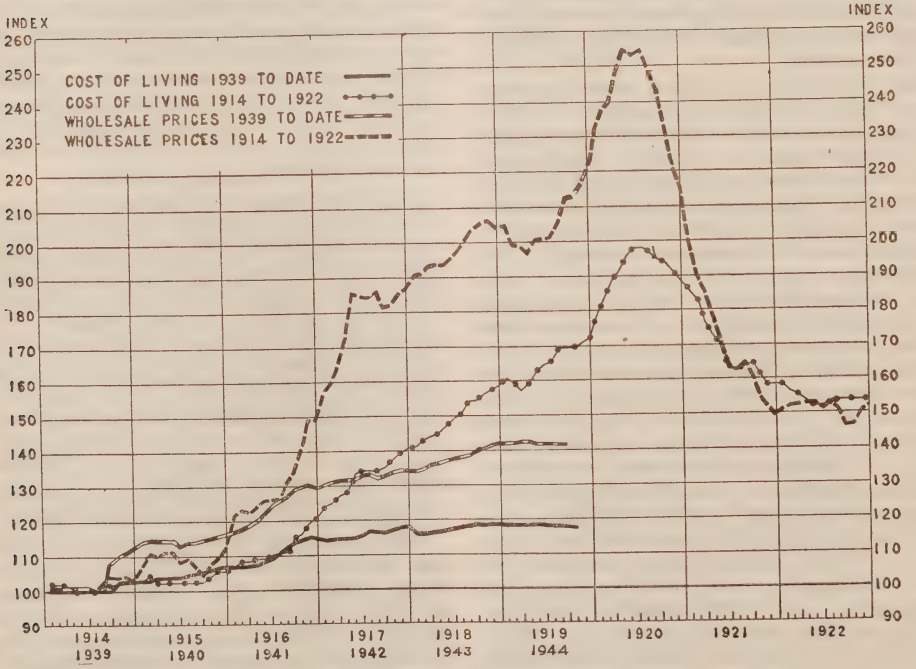
Adult education, the report states, is valuable, and might take the form of organized group discussions and conferences, weekly meetings to discuss the work and the difficulties encountered, and consideration of recent developments in business administration, production technique, works management, sales development and marketing.

Prices

Prices, Retail and Wholesale, in Canada, October, 1944

Cost of Living, Prices of Staple Articles, and Index Numbers, as Reported by the Dominion Bureau of Statistics

BETWEEN September 1 and October 2, 1944, the official cost-of-living index declined from 118·8 to 118·6, further decreases in fresh vegetable prices being primarily responsible. The food index fell 0·4 points to 130·8 as small increases for butter, eggs, and lard were out-weighed by price reductions for vegetables, citrus fruits, and lamb. The miscellaneous index fell 0·1 to 108·9, but rents advanced from 111·9 to 112·0 and clothing from 121·5 to 121·6. Other group indexes remained unchanged, fuel and light at 108·7, and homefurnishings and services at 118·4.



Between August 1 and October 2, eight regional city indexes recorded changes varying from an increase of 0·2 points to a decrease of 0·9 points. Declines occurred in six of the eight cities with Halifax and Saint John showing the greatest reductions. Winnipeg and Vancouver indexes moved upward by 0·1 and 0·2 points, Vancouver being the only one of the eight regional cities in which foods averaged higher in October than in August. The Winnipeg rise resulted from a small increase in the rent index, higher barbers' fees, and increases in motor repair labour costs. Food prices were mainly responsible for declines in the other six cities.

Retail Prices

The accompanying table on retail prices of staple foods, coal and rentals (Table IV) is

COST OF LIVING AND WHOLESALE PRICES IN CANADA 1914-1922 AND 1939-1944

BASE: PRICES IN JULY, 1914 AND IN AUGUST, 1939=100

prepared each month by the Dominion Bureau of Statistics. It shows the prices of these commodities in 64 cities across Canada at the date under review.

The prices of the staple food items included in the table are all used in the calculation of the index of the food group in the official cost-of-living index, and give a reasonably complete picture of prices throughout Canada as used in the calculation of the index of this particular group. They are the averages of prices of goods reported to the Bureau by independent stores. They do not include prices from chain stores. As the movement of chain store prices agrees closely with the movement of independent store prices it was considered that the extra work and cost involved in compiling and printing a separate table for chain store prices were not warranted although chain store prices are used in the calculation of the index.

The coal and rental figures given are also used in the official cost-of-living index. Quotations are shown for anthracite coal in the provinces of Ontario and Quebec, and for bituminous coal in the rest of Canada, where this type of coal is more generally used.

Rental figures given in the table are typical of rents being paid by tenant households in each city. In some cities, flats and apartments are more numerous than single houses; in such cases rents for flats and apartments are shown while figures for other cities represent single-house rentals. In all cases figures represent rents being paid, not the rent asked for vacant dwellings. The basis of these figures is the record of rents for every tenth tenant-occupied dwelling collected in the 1941 census of housing. The movement of rents since that time has been determined from reports submitted by real estate agents. The 1941 census averages have been adjusted in accordance with the change indicated by these reports, and the printed figures show a $4 spread centred around each city average.

Table III is designed to show the variation in the retail prices of commodities since the beginning of the war. Taking the Dominion average retail price of each of the commodities at August, 1939, as 100, the table shows the percentage changes in prices since that date; also the actual price on the first of the current month.

The Dominion Bureau of Statistics issues an index number of retail prices of commodities included in the cost-of-living index excluding rents and services. This index is now being included in Table I.

The accompanying chart shows the trend of the cost of living and wholesale prices since the beginning of the present war compared with the trend in the period of 1914-1922.

Explanatory Note as to Cost-of-Living Index

The index number of the cost of living was constructed on the basis of a survey of expenditure by 1,439 families of wage-earners and salaried workers with earnings between $600 and $2,800 in 1938. The average expenditure was $1,413.90, divided as follows: food (31·3 per cent), $443; shelter (19·1 per cent), $269.50; fuel and light (6·4 per cent), $90.50; clothing (11·7 per cent), $165.80; home furnishings (8·9 per cent), $125.70; miscellaneous (22·6 per cent), $319.40.

The last-named group includes health (4·3 per cent), $60.80; personal care (1·7 per cent), $23.90; transportation (5·6 per cent), $79.30; recreation (5·8 per cent), $82.10; life insurance (5·2 per cent), $73.30. Other expenditure not directly represented in the index brought the total family living expenditure to $1,453.80.

A description of the cost-of-living index, how it is calculated, and the complete list of items included in each of the principal groups, food, fuel, rent, clothing, home furnishings, etc., with their weights, was published in the Labour Gazette for July, 1943, page 1057.

The control of prices under an Order in Council of November 1, 1941, P.C. 8527, became effective on December 1, 1941 (L.G., 1941, page 1371). The order provided that no person should sell any goods or supply services at prices higher than during the period September 15 to October 11, 1941, except under the regulations of the Wartime Prices and Trade Board. The activities of the Board in the operation of the price control policy are summarized from time to time in the Labour Gazette under the title, *Activities of the Wartime Prices and Trade Board.*

Wholesale Prices, October, 1944

Increases in vegetable and animal products were responsible for a gain of 0·1 to 102·4 in the general index of wholesale prices during October. Vegetable products moved up 0·3 to 94·7, reflecting higher prices for rye, hay, corn, oats, turpentine, rosin, lemons and bananas which outweighed decreases for potatoes, onions and malt. In the animal products section a gain of 0·3 to 106·3 was due to upturns for prepared meats, butter, eggs, lard, calves and codfish. These more than counterbalanced weakness in steers, hogs, lambs and fresh meats. Non-metallic minerals, the only other group to record a change, receded 0·5 to 101·8 following reduced prices for gasoline. October index levels for other groups were as follows: textile products

TABLE I.—DOMINION BUREAU OF STATISTICS INDEX NUMBERS OF THE COST OF LIVING IN CANADA

* For the period 1913 to 1934 the former series on the base 1926=100 was converted to the base 1935-1939=100.
‡ Commodities in the cost-of-living index excluding rents and services.

91·7; wood products 118·1; iron products 117·0; non-ferrous metals 79·7, and chemical products 100·1.

At a level of 103·0 for October, the composite index for Canadian farm products was up 2·0 points over the September figure. A gain of 4·2 points to 122·0 in animal products was principally responsible, and reflected an increase in fluid milk following the October 1st advance in the subsidy from 35 cents to 55 cents per cwt. Egg prices were firmer in this section also, while livestock quotations continued downward. In the field products section a gain of 0·6 to 91·6 reflected strength in grains and hay which outweighed decreases in potatoes and onions.

TABLE II.—DOMINION BUREAU OF STATISTICS INDEX NUMBERS OF THE COST OF LIVING FOR EIGHT CITIES OF CANADA AT THE BEGINNING OF OCTOBER, 1944

(Base: August, 1939=100)

—	Total	Food	Rent	Fuel	Clothing	Home Furnishings and Services	Miscellaneous

(b) The basis of these figures is the record of rents collected in the 1941 census of housing. The movement since then has been determined from reports from real estate agents, the census averages being adjusted in accordance with the changes indicated by these reports.

(c) Rents marked (c) are for apartments or flats. Other rent figures are for single houses. Apartment and flat rents have been shown where this type of dwelling is more common than single houses.

(a) First of month. (b) Middle of month. (c) Last week or month. (d) Quarterly. (e) New wartime price series on base December 1942=1000, computed quarterly beginning March, 1943. (f) Yearly averages are for period from July of preceding year to June of year specified. (g) July. (h) June. (i) Revised.

Fatal Industrial Accidents in Canada During the Third Quarter of 1944

DURING the third quarter of 1944 there were 293 fatal industrial accidents, including deaths from industrial diseases, reported by workmen's compensation boards, etc. This compares with 325 fatal accidents during the third quarter of 1943. Of the 293 fatalities during the period under review, 96 occurred in July, 116 in August and 81 in September. Fatal accidents during each year are recorded by quarterly periods in the issues of the LABOUR GAZETTE for May, August and November of that year, and in February of the following year.

The supplementary lists of accidents not reported in time for inclusion in the reports covering the periods in which they occurred, contain 33 fatalities for the first half of 1944 and two fatalities for 1943.

In this series of reports it is customary to record industrial accidents under the dates of their occurrence, and fatal industrial diseases under the dates on which they prove fatal.

Information concerning accidents was received from the provincial Workmen's Compensation Boards, the Board of Transport Commissioners, certain other official sources, as well as from the correspondents of the LABOUR GAZETTE and newspaper reports.

Classified by groups of industries the fatalities occurring during the third quarter of 1944 were as follows: agriculture, 43; logging, 24; fishing and trapping, 1; mining, non-ferrous smelting and quarrying, 33; manufacturing, 70; construction, 28; central electric stations, 4; transportation and public utilities, 60; trade, 13; service, 17.

Of the mining accidents, 22 were in "metalliferous mining," eight in "coal mining," and three in "non-metallic mineral mining and quarrying, n.e.s."

Of the accidents in manufacturing, one was in "vegetable foods, drink and tobacco," two in "animal foods," one in "textiles and clothing," one in "leather, fur and products," one in "rubber products," seven in "saw and planing mill products," one in "wood products," eight in "pulp, paper and paper products," two in "printing and publishing," 27 in "iron, steel and products," four in "non-ferrous metal products," four in "non-metallic mineral products," four in "chemical and allied products," and seven in "shipbuilding."

In construction there were 17 fatalities in "Buildings and structures," two in "railway," six in "highway and bridge," and three in "miscellaneous."

In transportation and public utilities, there were 23 fatalities in "steam railways," nine in "street and electric railways," two in "air transportation," 16

FATAL INDUSTRIAL ACCIDENTS IN CANADA DURING THE THIRD QUARTER OF 1944, BY GROUPS OF INDUSTRIES AND CAUSES

in "local and highway transportation," seven in "storage," one in "telegraphs and telephones," and one in "express."

In trade there were three fatalities in "wholesale," and 10 in "retail."

Of the fatalities in service, 10 were in "public administration," two in "recreational," and five in "personal, domestic and business."

There was no major disaster resulting in the loss of a large number of lives during the period under review. Accidents involving the loss of two or more lives were as follows:

Six grain elevator employees lost their lives when burned in an explosion and fire which wrecked an elevator, at Midland, Ontario, on July 8. The explosion was caused by spontaneous combustion while the men were sweeping up dust. Two men were killed instantly and the other four died on July 9.

When sprayed and burned following an explosion of a vat of molten galvanizing solution, six tube factory workers received fatal injuries, at Montreal, on July 21. One man was killed instantly, four died on July 23 and one on July 26.

Three labourers engaged in building construction were electrocuted when a ladder on which they were standing touched a high voltage wire, at St. Redempteur, Quebec, on August 3.

A crane chaser and his helper were fatally injured when crushed by steel billets falling from a crane, at a steel plant, at Sydney, N.S., on July 7.

At Swan Plain, Sask., on August 2, a farmer and his son fell from a ladder and were drowned while cleaning a well.

On August 18, two labourers died when overcome by gas fumes while working in a sewer, at an airport, at Brandon, Manitoba.

Supplementary Lists of Accidents

A supplementary list of accidents occurring during the first half of 1944 has been compiled which contains 33 fatalities of which five were in logging, six in mining, non-ferrous smelting and quarrying, six in manufacturing, seven in construction, six in transportation and public utilities, one in trade, and two in service. Two of these accidents occurred in March, four in April, seven in May, and 20 in June.

A further supplementary list of accidents occurring in 1943 has been made. This includes two fatalities, both of which occurred in manufacturing. One of these accidents occurred in September and one in November.

New Apprenticeship Program Projected in Great Britain

In its monthly review, *Labour and Industry in Britain* for September, the British Information Services outlines "a new apprenticeship program for British Industry."

The plan was evolved at a convention of 52 young workers, representing 100,000 of their fellows aged 18 to 21 in the British machine and metal industries. It is asserted that it was the first meeting of its kind ever held and was convened at the instance of the Amalgamated Engineering Union.

The declared purpose of the convention was to discuss a program designed "to put an end to 'blind-alley jobs which lead to the scrap heap at 18', and to remove the narrow conception that boys should be trained with one firm for one trade." It was pointed out by a leading unionist who attended the convention that "young workers of the future must be flexible, well-educated and versatile and more technical even than their fathers."

The new training program, which is the result of joint discussions between employers and unions in the British engineering industries, was unanimously accepted by the conference. It is proposed that Industrial Juvenile Advisory Panels, representing employers and unions, be set up in each area "to control the entry into the engineering industry, guide and advise the recruits and supervise standards and conditions of youth's employment." Between the ages of 16 and 18 years apprentices would be released in the employer's time for two whole days weekly, one day for a training course and one day for attendance at one of the new "Young People's Colleges", which are to be set up under the new Education Act. The training courses provide both practical and theoretical teaching, cover more than one type of job, and will usually make it possible for apprentices to serve under more than one employer, or, in the case of a large firm, in more than one department.

It was reported that union leaders attending the convention declared that "there was a greater measure of agreement between labour and management on the new training program than on any other issue."

Conventions of Labour Organizations

DURING recent weeks conventions were held by three of the major labour organizations of Canada—The Trades and Labour Congress of Canada, the Canadian Congress of Labour, and the Canadian and Catholic Confederation of Labour. In the deliberations of all three bodies labour's important participation in the war effort and its concern for the post-war situation was naturally reflected in the decisions taken—probably this was even more in evidence in the 1944 conventions than in previous wartime meetings. Summaries of the proceedings of all three conventions are given in the following pages.

Trades and Labour Congress of Canada

THE Diamond Jubilee convention of the Trades and Labour Congress of Canada was held in the Royal York Hotel, Toronto, Ontario, during the week commencing October 23, 1944. Credentials were received from 715 delegates, representing 329,000 members organized in 1,755 local unions. The president of the Congress reported that there were 65 international organizations, 8 national organizations, 6 provincial organizations and 165 directly chartered federal labour unions, connected with the Congress. There were four fraternal delegates present representing the British Trades Union Congress, American Federation of Labour, Newfoundland Federation of Labour and the Latin America Federation of Labour.

The acting chairman Mr. Robert H. Brown, president of the Toronto Trades and Labour Council welcomed the delegates. His Worship Mayor S. J. Conboy, in extending a civic welcome, paid tribute to the leaders of the labour movement "who had initiated those things that have brought happiness to our people." He referred to the relationship between the people of Canada and the United States of America, which he said was brought about to a large extent by international trade unionism.

Hon. Charles Daley in welcoming the delegates on behalf of the Province of Ontario mentioned the fact that he had held membership in Local 38, United Brotherhood of Carpenters and Joiners of America, St. Catharines, Ont. The Minister spoke of the part played by Mr. Tom Moore, who he considered one of the great labour leaders in Canada. Mr. Daley said he was in favour of labour organization, as it can be of assistance to employers and employees alike. Organized labour, he stated, was responsible for the high standard of living in Canada. The Minister expressed the opinion that trade union organizations should be free from politics. They should be free to choose the government they saw fit. "Confine your activities as you have in the past and go forward to greater achievement" was Mr. Daley's advice. He expressed appreciation for the co-operation that existed between the Congress and the Provincial Government and stated that the aims of both were the same, to make Ontario the best province in the Dominion.

Address of President Bengough

Mr. Percy Bengough, in his Presidential address remarked that meetings such as these are a factor in creating national unity as they bring together delegates living thousands of miles apart. He reviewed the early history of the organization and stated that at the close of the organization's current year the membership stood at 329,000 comprised in 2,132 chartered and affiliated unions. The president asserted that practically every piece of Canadian labour legislation had been initiated by the Trades and Labour Congress of Canada. Speaking of the post-war period Mr. Bengough stated that full employment can be maintained if the same provision can be made for reconstruction as has been made for destruction. "We are pleased to see that the Dominion Government has recognized the need of effectively dealing with the post-war problems and has now set up a department of reconstruction, headed by Hon. C. D. Howe," declared President Bengough. "Artificial bottleneck of finance or squirrel-minded individuals accumulating far more money than they can possibly need in the way of financial wealth" he said, "must not be allowed to cause unemployment, want, fear and misery when a more sensible and humane distribution would guarantee to those who have fought for us, and every other Canadian, a real democracy. In it, all desiring to work

can have employment with earnings that will allow for a good home and happy surroundings, with efficient treatment for the incapacitated and full protection for the aged."

Address of Hon. Humphrey Mitchell

Hon. Humphrey Mitchell, Federal Minister of Labour, paid tribute to the pioneers in the trade union movement, stating that "the contribution they have made to social advancement down through the years has been a challenge to others to follow in their footsteps. The discussions and resolutions of local unions and trades councils have been responsible for many of the changes that have benefited our people as a whole, and I am thinking of compulsory education, free text books, free libraries, mother's allowances, old age pensions, public health, unemployment insurance and workmen's compensation. . . . "We cannot have freedom without ownership", he said, "and when freedom based on this principle is destroyed, free trade unions as we understand them will cease to be."

The Minister, in discussing the immediate post-war period, advised the delegates that when this tremendous war industrial set-up no longer is necessary, there may be some unemployment during the move back to peace-time production, but he predicted that full employment and prosperity could be achieved. "There should be plenty of jobs once our plants are again turning out automobiles, furniture, refrigerators, and all other things to which we in Canada have been accustomed" said Mr. Mitchell.

In the post-war period, National Selective Service "will become a national employment service" with offices in all important areas to assist in the placing of workers in peace-time industry, he said.

In speaking of the Family Allowances Act, the Minister stated he "would like to make it clear that this Act was passed solely for the purpose of equalizing as far as possible the opportunities for our children" and declared "it is not a substitute for decent wages." In the opinion of the Minister, "the fair distribution of the wealth of a nation is the best guarantee for contentment and for the maintenance of social stability."

A strong appeal was made to the Congress for its full support of the government's measures to rehabilitate the ex-service men and women.

The Minister referred to the passing of the Wartime Labour Relations Regulations, Order in Council P.C. 1003, providing for the setting up of a National and of Provincial Boards, and "under which has been legalized an inalienable right of the working man—collective bargaining."

He drew attention to the anti-inflation controls instituted to safeguard the country from inflation such as was experienced during the last war but insisted that this stabilization policy of the government has not meant "pegging wages at indecently low levels."

In closing, Mr. Mitchell again paid tribute to the leaders of the labour movement in their endeavours to further the interests of the wage earners.

Address of Mr. A. MacNamara, Deputy Minister of Labour

Mr. MacNamara referred to the manpower policy, of which he said "two points stand out clearly above all others." The first is "that Canadian men and women have responded nobly to appeals for their services, whether to carry arms or to make munitions." and the second point is "that having responded to that call, the achievement has been up to and beyond expectations."

Claiming for Selective Service a share of the credit for the large percentage of the population in war work and in essential civilian industry, the Deputy Minister said: "We have induced thousands of men and women to change over to more essential work. We had to do a pioneering job and do a lot of improvising to meet sudden emergencies. Looking back, it is easy to say that perhaps we could have done it a little better in certain cases, but it was a choice of doing nothing—to our peril—or risking making mistakes."

Discussing post-war employment, Mr. MacNamara pointed out that there was a great shortage of labour in the lumbering industry and "Canada's own construction program will itself be an integral part of the post-war employment program." By the end of the war with Germany "the government program to re-establish members of the armed forces in civilian life will be well under way" he said. "Our responsibility to the men and women in the production line is to see that they too are provided with employment after the war, and that no possibility is left unexplored to achieve that objective."

The delegates were informed that the Department of Labour has already undertaken surveys in industry to see what the nature and extent of the employment prospects are and where government action may be necessary to fill in the gap left by industry. "During this transition period, some of the tremendous sum which is now held in trust by the Unemployment Insurance Commission will be paid out in insurance benefits until new work is found for those who cannot be placed immediately," stated Mr. MacNamara.

Speaking of manpower control and how long it will be continued, he said: "Each of our

employment controls is virtually a complete plan of its own, and has been adopted to meet a special need. When that need disappears. the control will be dropped."

Report of Executive Council

In the report of the Executive Council, the members were urged to show their determination to see that there shall be in the post-war period full employment for all who need employment with salaries and wages to guarantee a full and complete life. The report further stated that "from the experience gained in the last five years we all know that involuntary mass unemployment in our country is unnecessary and preventable and we must not permit a recurrence of depression and misery" but must "work and strive, without let-up or hindrance, for a Canada in which all can enjoy a full life as complete as our modern scientific age makes possible, with efficient treatment for the incapacitated and full protection for the aged."

A review of the legislative policies presented to the government and also a summary of the major matters of concern to labour dealt with by the Federal Government, was given in the report.

The report indicated that a representative from the Congress had been selected to attend the World Trade Union Conference which was scheduled to convene on June 6, 1944, in London, England, and sponsored by the British Trades Union Congress. When the conference was postponed, President Bengough of the Trades and Labour Congress of Canada, and Sir Walter Citrine, Secretary of the British Trades Union Congress, endeavoured to have the conference in Canada but the various governments were unable to guarantee the passage of the delegates from the various countries, and therefore it was decided that the meeting would be postponed until a more favourable time when all delegates could be in attendance.

The Government was complimented on the inclusion of labour representatives on the administrative boards on certain corporations which it had set up.

In connection with lay-offs in industries, the executive appealed to the Government to immediately take steps for the establishment of a national committee to study this matter, such committee to be composed of equal representatives from Government, labour and management.

It was suggested to the Government as a matter of policy that in placing orders or contracts for war, preference be given at all times to those employers who have labour agreements with their employees, who employ union workers and observe union conditions.

The Government was further complimented for the passing of Order in Council P.C. 1003 establishing the right of employees in industries essential to the prosecution of the war to bargain collectively through the medium of the chosen representatives of their unions, and also for the co-operative consultation between the Minister of Labour and members of his Department, and officers of the Congress prior to its introduction.

Other subjects dealt with in the executive report were: shipping; national health, post-war period, civil servants, old age pensions, family allowances, and beer and liquor regulations.

Address of Señor Vincent Lombardo Toledano, Secretary of the Latin American Confederation of Workers

Sr. Toledano of Mexico City, who is a member of the governing body of the International Labour Organization, appealed to the members of the Trades and Labour Congress requesting its support for Argentine trade unions "in their fight against fascism." In the post-war period he looked forward to a greater solidarity between all people of the Western Hemisphere, and emphasized his conviction that Canada and Latin America could profitably increase their trade with one another. The delegates aplauded when the secretary suggested that the trade unions of North and South America set up a continental congress of labour, with unions of all countries represented. He also urged that a world trade union congress was necessary for the post-war period to help achieve post-war peace and prosperity.

Mr. Anthony Valente

Mr. Anthony Valente, President of the United Textile Workers of America, delegate from the American Federation of Labor, declared that Canadians and Americans have a common interest in the successful prosecution of this war, until final and complete victory is achieved and it is also the common interest of both to see to it that ample provisions are made for full employment and adequate security for the post-war period. He stated "that among the post-war plans, the American Federation of Labour insists there should be legislation providing emergency post-war employment insurance for the wage-earners of the country in order that there may be sustained income for demobilized industrial workers who will have to be provided with jobs under a peacetime economy.

Mr. Harry Oxford

Mr. Harry Oxford, president of the Newfoundland Federation of Labour, gave a review

of the war effort in his country. He referred to the thousands of his countrymen who have come to Canada to work in war factories. Speaking of labour organizations in Newfoundland, the president informed the convention that the Federation represents about fifteen thousand out of about thirty thousand organized workers in the country.

Mr. John Brown

Mr. John Brown, fraternal delegate from the British Trades Union Congress, stated that "the greatest danger for labour in the future will be disunity." He expressed the hope that all labour movements would be represented at the proposed international gathering in London, possibly next year. The delegates were also informed that the Congress had asked the government to retain controls for some time after the end of hostilities until material and manufactured goods have reached a high state of supply.

Mr. A. Staal

Mr. A. Staal, Chief of the Workers Organization Service of the International Labour Office, said that "this Jubilee convention was a very suitable occasion to recall that during the last twenty-five years, the Trades and Labour Congress of Canada has, without interruption, collaborated in the work of the I.L.O., not only by sending representatives to the annual conferences but also by allowing its foremost leaders to accept posts on the Governing Body of the I.L.O., though this necessitated their absence from Canada on frequent occasions." In speaking of the implementation of the conventions of the I.L.O., he advised the delegates that they could not be imposed upon the members; their implementation had to be brought about by persuasion. Mr. Staal called on organized labour to exert all its power to make the principles and program laid down in the Declaration a live reality.

Address of Mr. Donald Gordon

"Price control has worked because the people of Canada have been determined to make it work" declared Donald Gordon, Chairman of the Wartime Prices and Trade Board, in addressing the convention. "With the concurrence of the Government we have concluded that it is vitally important to continue to maintain the existing price ceiling principle intact. We believe this to be absolutely necessary to prevent the inflation which still threatens, and to give Canada a better chance of getting through the transition period in an orderly manner", he said. By guarding against inflation today the Canadian people are also reducing the risk of deflation after this war, the delegates were informed. The Chairman warned of a post-war "danger zone" in which the prices of the necessities of life might rise as they did following the last world war, unless price controls were strictly enforced.

Mr. Gordon stated "that suggestions have been made that the Prices Board should keep certain production restrictions in force until every firm in an industry is ready to resume civilian production." On this point Mr. Gordon observed: "The Prices Board takes the view that it should not restrict some firms just because others are not ready to resume production. Our prime concern is to increase the supply of civilian goods as fast as conditions allow. Controls imposed to meet special war emergencies should be removed as soon as these emergency conditions have passed."

"With this factor in mind we have also removed the very strict control which the Board formerly placed on the individual or firm wanting to start up in a new business. Now that Canada is reaching the point where many wage-earners will be dependent on new businesses and new lines of production to provide them with employment, and where additional production is necessary and possible, we have begun to grant permits quite freely.

"The extension of social security measures—the principle of which has only recently come to be accepted on this continent—should contribute substantially to the creation of more stable economic conditions. Social security measures can go a long way towards maintaining the flow of consumer spending, thereby benefiting workers and industry alike", the speaker contended. "As I see it", he said, "welfare and social security payments help to create a 'floor' under consumption, thereby removing one of the big risks facing all business. If industry knows that there is no chance of the bottom dropping out of its markets, it can make its plans for expansion with more confidence than it has sometimes been able to do in the past. That means a better employment and wage situation."

Address of Hon. C. D. Howe

Hon. C. D. Howe, Minister of Munitions and Supply and Reconstruction, informed the delegates that the one objective he had for the Department of Reconstruction was "a job and a fair income for all those able and willing to work . . . . . I would like to be able to talk over, with representatives of organized labour, the individual problems of reconversion as they arise, and obtain their help in

making the change-over as painless as possible" he said. The delegates were warned that certain war plants, for example, shell-filling plants and explosives plants, must go out of business. Other plants must close for a time, to permit conversion to new lines of production.

"Such statistics as I have been able to gather indicate that the achievement of our objective will demand one million jobs more than were to be had at the outbreak of war." Mr. Howe stated, "and I do not regard one million new jobs as an impossible objective."

"The Government cannot compete with private industry in marketing goods through ordinary trade channels, either at home or abroad. Therefore, it must be the objective of the Government, in the reconstruction period, to dispose of government-owned war plants, which cost some 900 million dollars, to private industry, except for such plants as can be advantageously operated by the government to fill a nation-wide want, such as the synthetic rubber plant at Sarnia."

The Minister felt that too much emphasis has been placed on large scale public projects as a means of creating employment. "In my opinion," he stated, "large scale public projects should wait until needed to take up any slack in our over-all employment situation, or until we require them to take care of spotty employment. Private building should be given the right-of-way, at least until our building industry is caught up, and only then should our large scale public projects be brought forward."

"Merchant ships, built to meet the necessities of war, will provide a peacetime Canadian merchant marine, in keeping with our present position as the world's third exporting country" he said.

Address of Major.-General G. Brock Chisholm

"The welcoming a soldier home with bands and flags and civic committees is not a solution to the problem. The responsibility of Canadians will be nothing short of a complete acceptance of the returned soldier into a responsible position in civilian life" Maj.-Gen. G. Brock Chisholm, Director-General of Medical Services, declared, in addressing the delegates.

In speaking of the change-over from army life to civilian life the speaker stated that "for years all these men have felt themselves to be of great importance to a world cause. Their greatest necessity in civilian life will be to feel valuable, important to the community and regarded as assets. If the lack of integration should go far, the degree of segregation by returning soldiers which might be produced, would prove a really disruptive force in Canada."

Report of Secretary-Treasurer

The report of the Secretary-Treasurer, Mr. J. A. Sullivan, showed total receipts from all sources, including balance from last year, for the fiscal year ending July 31, 1944, amounting to $105,045.33, with expenditures and depreciation of $101,952.61, leaving a balance of $3,092.72. The total membership upon which per capita tax had been paid was 246,791. The total membership in affiliation with the Congress at the date of the convention was reported to be over 329,000.

Report of the Standing Committee on Post-war Rehabilitation and Reconstruction

The Standing Committee on post-war rehabilitation and reconstruction of the Congress under the chairmanship of Mr. Bruce, General Organizer, of the United Association of Journeymen Plumbers and Steamfitters submitted a very comprehensive review of social, economic and industrial problems and suggestions for control of these problems in the interests of the workers, for the consideration and action of the convention. Among the recommendations of the committee adopted by the convention were the following:

Demanding of the Federal Government assurances that the provision of the Atlantic Charter will be fulfilled.

That no employed person in Canada under present conditions shall receive less in wages than an aggregate sum of $1,500 per year so as to maintain a minimum standard of living.

The immediate establishment of a maximum 40-hour work-week in all branches of industry, with the ultimate adoption of the 6-hour work-day and 5-day work-week with no reduction in earnings.

A non-contributory sick and invalidity insurance act with full compensation during illness.

Demanding that all workers be granted at least two weeks holidays with pay and the making available means of transportation to health and natural recreation centres at a minimum of cost.

Raising the compulsory school age to 16 years and every facility granted to assure them educational, scientific and cultural instructions with opportunities for free continuation courses up to and including universities.

A more liberal and equitable system of pensions with retirement at 60 years and granting such allowances as will maintain them in decency and comfort based upon a recognized national minimum standard.

Extension of the Housing Act and that it be removed from the control of the banks and mortgage companies and that all loans be made directly through a government agency such as the Bank of Canada.

Adoption by the Federal Government of a slum clearance program.

Creation of a National Planning Commission with labour representation.

Calling for the dissolution of all monopolies or cartels holding controls over any or all materials or processes that control the means of life or employment opportunities.

Development of our natural resources such as the St. Lawrence Waterway scheme.

Political Action

Fourteen resolutions urging political action were referred to the Committee on Resolutions. One of these asked the Congress to endorse the Co-operative Commonwealth Federation, while another condemned that body. Seven resolutions called for the establishing of political action committees within the local union. After a lengthy discussion on the subject the convention endorsed a substitute resolution presented by the Resolution Committee which read as follows:

That to enable organized labour to play its full part in post-war reconstruction and to be able to play a non-partisan constructive role in the formulation and enactment of progressive policies for peace, that we reiterate our decision for the organization of political action committees within the affiliated unions of the Trades and Labour Congress:

That this convention instruct the incoming officers to take under advisement the setting up of a national political action committee which will be fully representative of the membership of this Trades and Labour Congress of Canada, this committee to serve as an instrument for rallying the widest public support to the post-war program and aims of this Congress, and to aim for the achievement of co-operation for the realization of our program of full employment, a higher standard of living, and social security for all Canadians.

Compulsory Voting

A number of resolutions were submitted to the Resolution Committee in connection with compulsory voting. The following substitute resolution was presented by the committee:

That this Congress request the Dominion, Provincial and civic authorities that steps be taken to immediately extend the franchise to all citizens over eighteen years of age and remove all restrictions now in the way of proper exercise by our young people of their rights as citizens: that the executive council of the Congress be instructed to give particular study to the compulsory voting legislation enacted in other democratic countries with a view to determining whether some similar form of legislation may be considered beneficial to promote a wider use of the franchise by the working people of this country.

Labour Unity

On the subject of unity there were seven resolutions submitted, each calling for closer co-operation and united action by organized labour. After considerable discussion on the subject the following resolution was adopted:

That this convention instruct the incoming executive to give most serious study to the possibility of achieving one trade union centre in Canada with proper safeguards for all unions with respect to jurisdictional rights while at the same time enabling labour to speak with one powerful voice on all matters affecting the welfare of Canada as a nation.

Family Allowances

Following a prolonged discussion, the convention adopted a substitute for four resolutions on family allowances presented to the convention, as follows:

That this convention go on record as approving in principle the payment of family allowances, while emphatically declaring that such allowances must not take the place of an adequate wage rate, and that we will continue our efforts to achieve a proper wage level as a basic need for workers and their families as a fundamental condition for continued prosperity.

That the workers of Canada have it impressed on them in no uncertain terms that the application of this allowance be watched with great care so that it might not become an impediment in their normal progress towards an adequate standard of living.

Cost-of-Living Index

The delegates discussed at considerable length the cost-of-living index as appearing monthly in the LABOUR GAZETTE following which a substitute resolution submitted by the Committee was adopted, as follows:

That the present index be revised to make it a more truthful expression of expenditures and costs to the average worker. Regional cost of living indexes should be established to allow for differences in higher living costs between different parts of the country and that the figures on which the cost of living is computed be published in detail in the LABOUR GAZETTE each month.

Wartime Labour Relations Regulations, P.C. 1003

In dealing with this particular subject, the Committee on Resolutions had before it seventeen resolutions for consideration. A lengthy debate followed the introduction by the Committee of the following substitute which was subsequently adopted:

That, this Convention accept Order in Council P.C. 1003 as the minimum requirements for employer-employee relations and we urge the Federal Government to secure the approval of the provinces for the application of P.C. 1003, and acceptable amendments thereto, to all industries and occupations, and that efforts be made to reach an agreement with Provincial Governments whereby Order in Council P.C. 1003 may be enacted as a permanent measure after the war in order that uniformity of labour legislation may be secured throughout the Dominion, it being

understood that Provincial Governments may augment the Dominion legislation;

That, following amendments be sought:

1. Provisions for compulsory signing of contracts where unions are certified by the Labour Relations Board.

2. Outlawing any form of company unionism, and the listing of all unfair labour practices to eliminate the evasions now prevalent.

3. Provision that if a majority of employees demand a union shop that it must be granted.

4. Amend Section 19, paragraph (c) of P.C. 1003 to protect the rights of employers and employees to enter into and maintain collective agreements providing for a union shop, by substituting the following:

"provided that nothing in these regulations shall preclude an employer from making an agreement with a labour union (not established, maintained or assisted by any action defined in these regulations as an unlawful practice) to require as a condition of the employment, membership, therein, if such labour union is the representative of the employees as provided by these regulations, as the appropriate bargaining unit covered by such agreement when made."

Other Resolutions

Many other resolutions were passed by the convention, among which were the following:

Reiterating the no-strike pledge during the war emergency and assuring co-operation for the production of all necessary supplies.

Calling on the Federal Government to institute a national apprenticeship system.

Expressing gratitude to the leaders of the armed forces for their leadership and to the men under their command for their sacrifice and valour.

Requesting the Government not to use the armed forces as a substitute for civilian labour where civilian employees are available.

Endorsing the plan for a World Labour Body and pledging full participation in same.

Calling for government planning for the future of those workers and plants now engaged in the aircraft industry.

Favouring the calling of a world shipping conference.

Incorporation of the full cost-of-living bonus in the basic wage of all civil servants throughout Canada, in accord with the policy governing all industrial workers.

Instructing the executive to set up a permanent committee on education.

That collective bargaining rights be secured for employees working for the Crown.

Protesting the conditions under which the Wartime Prices and Trade Board are issuing licences and seeking to have a closer review made of the merits of the application of each licensee.

Seeking discontinuance of daylight saving.

Condemning the policy of stop-watch-timing systems and incentive bonus systems.

That the surplus war stocks be sold direct to the consumer as well as to private dealers.

The providing of a safety line behind the operator of public vehicles so as to afford freedom of front and side vision.

Abolition of all home work, where such work by common practice has been done in factories set up for that purpose.

Calling upon the Government to make available an adequate quantity of beer.

Favouring a health insurance scheme that will insure to the sick, proper medical care, attention and hospitalization and compensation during the period of inability.

Seeking mandatory legislation granting to the workers of Canada at least two weeks holidays with pay and pay for statutory holidays.

Requesting the putting into effect the eight-hour day with overtime at time and one-half on all ships of Canadian registry.

Favouring the setting up of Labour-Management Committees in all industries to facilitate reconversion of plants to peace-time production when demanded by a majority of the organized workers in a given industry.

Calling for the implementation of the recommendations in the Sirois Report.

Urging the Federal Government to sign a 20-year pact with the U.S.S.R.

Election of Officers

The election of officers resulted as follows: President, Percy Bengough, 172 MacLaren St., Ottawa; Vice-Presidents: Maritimes—J. A. Whitebone, Saint John, N.B.; Quebec—Arthur D'Aoust, Hull, P.Q.; Ontario—J. W. Buckley, Toronto, Ont.; Prairie Provinces—Carl E. Berg, Edmonton, Alta.; British Columbia—Bert Showler, Vancouver, B.C.; Secretary-Treasurer, J. A. Sullivan, 172 MacLaren St., Ottawa.

The following are the Provincial Executive Committees:

Nova Scotia—G. A. Smith (chairman), Halifax; Clarence Webber, Brooklyn; William Devona, Amherst; J. LaMont, Sydney.

Ontario—D. A. Dunlop (chairman), Toronto; Bruce Magnusson, Port Arthur; A. M. Lebano, Cornwall; J. Toms, Toronto.

Manitoba—J. B. Graham (chairman), Winnipeg; Ed. Houle, Winnipeg; J. McDuffe, Brandon; F. C. King, Winnipeg.

Saskatchewan—P. W. Haffner (chairman), Regina; F. W. Ingram, Moose Jaw, Sask.; S. J. Tabbut, Prince Albert; W. J. Smith, Saskatoon.

British Columbia—R. K. Gervin (chairman), Vancouver; C. E. Herrett, Vancouver; H. A. Webster, Ocean Falls; G. Wilkinson, Victoria.

(The provinces of Alberta, New Brunswick and Quebec having provincial federations of labour chartered by the Congress, the executive officers carry on the legislative work of these provinces.)

Fraternal delegate to the British Trades Union Congress, John Noble, Organizer for the American Federation of Labour, Toronto, Ont.

Fraternal delegate to the American Federation of Labour, A. Johnston, Organizer, Hotel and Restaurant Employees International Alliance and Bartenders International League of America, Toronto, Ont.

Windsor was chosen convention city for 1945.

Canadian Congress of Labour

WITH an attendance of 494 delegates representing a membership of approximately 250,000, the Canadian Congress of Labour held its fifth annual convention in the Chateau Frontenac, Quebec City, during the week commencing Monday, October 16.

The convention had before it more than 500 resolutions. Many of these were important not only from the standpoint of the organization's own internal affairs but also had a national importance in reflecting the views of a large section of organized labour on national problems.

The delegates were welcomed to Quebec City by Mr. George Pelletier, president of the Quebec Labour Council; Mr. Ernest Bolduc, vice-president of the Council; and Mr. Lucien Borne, Mayor of the City. The welcome of the Province of Quebec was extended by the Hon. Maurice Duplessis, K.C., Premier of the Province; and the Hon. Antonio Barrette, provincial Minister of Labour.

The convention was then addressed by the Hon. Louis St. Laurent, Federal Minister of Justice; Hon. Humphrey Mitchell, Federal Minister of Labour; and Mr. Arthur MacNamara, Deputy Minister of Labour.

Address of Mr. A. R. Mosher

The conduct and progress of the war and its influence on industry, politics and labour conditioned the address of the president of the Congress, A. R. Mosher. He urged that there should be no slackening of effort until complete victory had been achieved and that its lessons "must be learned and applied" if they were not to represent a total loss to the world. He commended the co-operative spirit that had dominated and inspired the war effort of the United Nations. This might be taken as a portent of better world relationships in the post-war years, he asserted.

In so far as Canada is concerned, Mr. Mosher contended that "the war has shown that production is not a matter of finance, but of the utilization of human skill applied to raw materials." He continued: "We have seen the nations of the world carry on the most expensive and devastating war in history . . . without becoming bankrupt . . ." Canada has produced vast quantities of war materials, employment has been at an all-time high level, workers have been allocated on a priority basis and "the income of the Canadian people reached unprecedented levels."

From being a predominantly agricultural nation, Canada has become "one of the greatest industrial nations of the world." Mr. Mosher continued: "Now we are faced with the problem of converting the national economy from a wartime to a peacetime basis." It will be necessary, he affirmed, to place "the financing and operation and control of the entire economic system of the nation under the control of the State." He declared that there was no obstacle to national prosperity and well-being, except selfishness and the desire to exploit for private profit. He gave it as his opinion that "no institution, no tradition, no vested interests must block the pathway of progress toward a social order in which economic security will be the lot of all." He believed that "this transformation of the economic system from a competitive to a co-operative basis is too big an undertaking for the labour movement alone." It is necessary to have the goodwill and support of all forward looking citizens.

"It is because the labour movement realizes the importance of prompt and energetic action to prevent a return to the pre-war economic system that they have shown such a deep and increasing interest in the development of political power," Mr. Mosher said. This consciousness of the need for political action had led to the endorsation by the Congress of Labour of "the Co-operative Commonwealth Federation as the political arm of labour." He pointed out, however, that "the Congress is not affiliated with the C.C.F. and that no Congress union, whether chartered or affiliated, is under any compulsion to become affiliated with the C.C.F." He referred approvingly to the elec-

tion to provincial legislatures of labour men affiliated with other labour union groups.

Mr. Mosher asserted that "the primary purpose of a labour organization is to protect and promote the economic interests of the workers it represents, and this is done chiefly through the negotiation and maintenance of collective agreements with employers." He expressed the opinion that "the development of political machinery is nothing more than an extension of the general purposes of labour organization."

Address of Hon. Humphrey Mitchell

The Honourable Humphrey Mitchell, Minister of Labour, in his address to the delegates, outlined the Government's wartime activities in fields of special interest to labour.

Praising the co-operation of employees and management in the development for war purposes of Canada's industrial resources, the Minister described the manpower controls as a policy essential to the allocation of the country's men and women into the most useful occupations. He stated that the employment permit system was, however, a wartime measure only and would be rescinded as quickly as possible after the war. National Selective Service would be dissolved as such, but the organization itself would continue as a country-wide Employment Service, which would play an important part in finding remunerative employment for those discharged from the forces and displaced by the closing up of war industries.

"In the post-war period," the Minister declared, "I am confident there should be work for almost everyone able and willing; and under proper organization of our economy and the co-operation of all interests this desirable condition should be realized." As encouraging signs he pointed to the shortage of consumer goods in Canada at the present time, and to the huge investments in victory bonds and war savings certificates held by the people. "They will want to build new homes, buy automobiles and accessories, furniture, carpets, refrigerators, radios, and scores of other items that they have not been able to obtain for so long," he said.

For the "unavoidable pockets of temporary unemployment" during the transition period, the unemployment insurance fund of $220,000,000 would be "of great help."

Mentioning the wage increases awarded by the National War Labour Board under the Wage Stabilization policy (see p. 1299) the Minister quoted the Dominion Bureau of Statistics as reporting that total wages and salaries in all industries in Canada had risen from 2½ billion dollars in 1938 to over 5¼ billion dollars in 1943. During approximately the same period wage rates, according to the Department's index, had risen by 32 per cent.

Referring to the Wartime Labour Relations Regulations (P.C. 1003) the Minister declared: "This code marks a milestone in labour legislation in the Dominion and is a fundamental departure in that it provides legal recognition of the right to organize in every province in the Dominion . . . . .

"The future of this order will be governed, in my opinion, by the degree of co-operation and recognition of its basic principles by industry and labour. While protecting the right of the individual to belong to a trade union it can have no other purpose than to hold the scales evenly in the administration of industrial relations."

The Minister spoke of the achievement of the War Emergency Training Program in training almost 360,000 persons. He then made reference to the apprenticeship order passed this year under which agreements have been signed with all the provinces except Quebec and Prince Edward Island.

"It is expected," he continued, "that the Dominion will spend two hundred and fifty thousand dollars in the current year under the order and a million dollars a year for the next nine years."

Referring to the Family Allowances Act he asserted that it was not intended to be a substitute for fair wages. In reply to the argument that some of the recipients would spend the money in an improvident way the Minister declared: "I do not think that any group in the community holds a first mortgage on improvidence." He considered that good and bad would prevail "on about the same law of averages that has always been the case." He thought that, as far as lay within its power, the state should see that all children were on an equal level as to advantages for a healthy upbringing, education and training for the "battle of life."

In conclusion the Minister thanked representatives of the Congress who had served on Government boards, including, he said, the War Labour Boards, Wartime Labour Relations Boards, the National Selective Service Advisory Board and regional branches, Unemployment Insurance Advisory Committees and many others.

Address of Mr. Arthur MacNamara

Mr. Arthur MacNamara, Director of National Selective Service, and Deputy Minister of Labour, stated that he was in full accord with everything that is being planned for the re-establishment of personnel discharged from the armed forces. At the same time he averred that "due credit and praise should be accorded those who made possible the production of war

equipment which enabled our battle-tested fighting men to achieve their objectives."

The working people of Canada, "by their industry, skill and loyalty, have provided that superior equipment and I rate their achievement as second only to the victories of our forces," he said. He held that "the responsibility which all Governments in Canada owe to its working men and women is to see that they are provided with full employment—that no possibility is left unexplored to ensure that objective."

Mr. MacNamara pointed out that Canada's working population, including members of the armed forces, now exceeds 5,000,000. "That represents a tremendous effort and achievement in a country of under 12,000,000 population."

In sketching the administrative organization of Selective Service, the Director made it clear that "the governing body of National Selective Service is the National Selective Service Advisory Board" and that "no significant regulations concerning manpower are recommended to the Government without the approval of this Board." He asserted that "it is probably the most democratic Board in Ottawa and on it are representatives of workers, farmers, employers, the Departments of National Defence, Munitions and Supply, Wartime Prices and Trade Board and Civil Service Commission, plus the Associate Directors."

Referring to the transition period that will follow the war, when the nation must change over from a wartime to a peacetime economy, Mr. MacNamara admitted that there would be cases "where it will not be possible to find immediately positions for groups of people." He expressed the hope that the number of these would be few and declared that it was his intention, in so far as he had a voice in shaping policy, "to urge every consideration for the men and women of this country who took in their stride all the sacrifices and irritations of these war years and did such a magnificent job for Canada." Continuing, he said: "I will endeavour to see that when a worker finds it necessary to move back to his home or to some new location that he is given service, not only in helping him find the new location, but also in matters of transportation, temporary shelter and assistance in meeting any emergency that may arise."

He drew attention to the "considerable sum which has accrued to the Unemployment Insurance Commission" which would be available to pay insurance benefits promptly to those who were entitled to them. Referring to the question that had arisen respecting the continuance of wartime controls of employment placements, transfers and separations after the war, Mr. MacNamara pointed out that "these controls are of various kinds. Each control is in itself a complete plan. They were adopted as the need became evident. Likewise as the need disappears the control will be dropped and there will be no attempt to hold on to controls for one month longer than necessary."

Address of Mr. Donald Gordon

"Price Control and the Wage Earner," was the theme discussed by Mr. Donald Gordon, Chairman of the Wartime Prices and Trade Board, in his address. "In the past, labour's interest in price control has been similar to the interests of all consumers, for labour is the largest consumer group in the community," he said. However, he believed that, as the nation approaches the change-over from war to peace, labour has a special interest in maintaining the price ceiling, inasmuch as price control can contribute much to the maintenance of employment.

Mr. Gordon defined inflation as "anything which lessens and destroys the buying power of your dollar." He asserted that high wages are not the only important thing. "Maintenance of employment after the war and the buying power of your dollar in terms of goods and services are just as important." Keeping prices and costs from rising "will work to maintain employment and failure to do so would create unemployment and plenty of it," he declared. Moreover, "inflation doesn't let you down gently. . . . when prices stop soaring they don't just flatten out, they suddenly plummet downward. That is deflation, the certain consequence of inflation." The speaker emphasized that "war and its aftermath has been by far the most insistent cause of inflation . . . It has happened before and is happening now in every belligerent country in the world where positive steps have not been taken to prevent it."

Mr. Gordon declared that the Canadian official cost-of-living index is "one of the most reliable cost-of-living indexes in the world," so that "it is fair to compare the rise (in the cost of living) of only 18 per cent in this war with 65 per cent in the last war." What is even more significant, he said, "is the fact that the index has risen only three per cent in Canada since the price ceiling became effective in December, 1941, whereas in the same period 25 years ago it rose 46 per cent."

The speaker referred in considerable detail to claims that there has been a deterioration in the quality of certain consumer goods since the advent of price control, which, it had been asserted, constituted "a concealed price increase." He admitted that a decline in quality had the same effect as a price increase, and that the charge in many instances is not always easy to disprove. However, he pointed out, "some change in quality has been inevitable because

of war-time substitutes of supplies cut off by enemy action or largely diverted toward war uses." To meet the situation, the Prices Board has set up a Standards Division with a staff of competent inspectors and examiners. When test checks by the inspectors indicate that the price-quality relationship has slipped the merchandise is followed back through each stage of distribution and manufacture until the offender is traced and prosecuted. However, Mr. Gordon conceded that "in spite of all we can do in this field it is impossible to give an assurance that all merchandise is maintained at 1941 standards of value." To stamp out all of this, he said, "would require an army of enforcement inspectors and examiners."

But in spite of these comparatively few instances of human cupidity and selfishness, and the defects in the controls that have appeared from time to time, Mr. Gordon asserted that the main reason the price control program has worked so well was "that every major group in the community has had enough good sense to realize that everybody's bargaining power is improved in wartime and that if everybody tried to take advantage of that fact we would all be in an auction sale with ourselves."

He spoke appreciatively of "the value of the voluntary labour liaison organization which has been built up through the Consumer Branch of the Board over the past two years." He revealed that "at the present time there are close to 400 trade unionists scattered across the Dominion, and representing 84 per cent of all unions who have voluntarily taken on the important job of explaining the work of the Prices Board to labour and of carrying back to the Board the opinions and criticisms of labour." He continued, "the success of the price ceiling suggests that, by and large, the wage stabilization policy has been accepted realistically . . . even though distasteful to labour . . . Without wage control, he said, price control would have long since broken down and we should now be in the midst of a severe inflation." He gave as the reason for this the fact that "labour costs are by long odds the most important (factor in) the cost of production" and even if other costs of production could be stabilized, or reduced, "as many of them have been," it would remain impossible to hold prices against steadily rising labour costs. "Moreover, rising wage rates would have brought about demands for higher prices and higher incomes from other groups, such as the farmer and the shopkeeper."

Mr. Gordon gave due praise to other groups than labour, such as business and management, for a like loyal support of the work of the Prices Board. In spite of objections from these groups in the early days of the price ceiling, their fears and prejudices have been left behind and the controls acknowledged as for the common good.

Address of Mr. A. Staal, Chief, Workers' Section, I. L. O.

Mr. A. Staal, chief of the Workers' Section of the International Labour Office, pointed out that trade unions are primarily and vitally interested in finding solutions "for such vast problems as the abolition of unemployment, poverty and insecurity and the elimination of the unevenness of social development." He urged the active co-operation of bona fide trade unions, first in their own national field and then with unions in other countries. He drew attention to the potential value of International Industrial Committees as proposed at the New York Conference of the I.L.O. in 1941. These should be competent to deal with both social and economic questions arising anywhere in the industries concerned. "The International Labour Conference only formulates plans, the implementation has to be brought about in every country individually." He declared that this implementation must come, in the first instance, from the national trade union movements. Governments, "however well intentioned, . . . need the spur of trade union activity . . . "

Other speakers to address the convention were: Dr. M. M. MacOdrum, of the National War Finance Committee; Mr. Reid Robinson, president of the International Union of Mine, Mill and Smelter Workers and Mrs. Mabel Mayne, Canadian Director of Women's Auxiliaries, United Automobile Workers of America.

Report of Executive Council

The report of the Executive Council covering its activities for the preceding year stated that there had been three meetings of the Council and five meetings of the Executive Committee during the year.

The report reviewed in detail the presentation of the Congress memorandum to the Federal Government on February 11 (L.G., March, 1944, p. 362.)

Among other things which were dealt with in the memorandum were labour representation on government bodies through the establishment of joint Management-Labour Committees; income tax regulations; a national fuel policy, welfare of the armed forces, and health insurance.

During the year, the Executive Council authorized the establishment of a Political Action Committee, the primary purpose of which was to educate workers with regard to the need for political action. The Council

also recommended to the convention that it go on record as "in favour of the union shop or other security provisions as well as the check-off, and as supporting every effort that can be made to obtain them".

It was further recommended that the convention endorse the appointment of a Standing Committee "for the purpose of meeting with representatives of the Trades and Labour Congress of Canada" with a view to promoting co-operation wtih that body.

Emergency Resolution

Reporting for the Resolutions Committee, Mr. H. A. Chappell, chairman, presented an emergency resolution dealing with the situation in regard to the packinghouse industry. This resolution—after declaring that the request of the packinghouse workers "for master agreements including security provisions is just and reasonable"—pledged its support to the union "in the pressure of its claims".

Before the adoption of this resolution there was considerable discussion, some delegates raising the question as to how far the Congress was committed in its support in event of the situation resulting in strike action. However, the preponderance of delegate opinion was in favour of unqualified support, "regardless of its implications". Accordingly, the resolution was adopted as presented and as concurred in by the Resolutions Committee.

Political Action Program

One of the major debates of the convention occurred over the endorsation of the program of the Political Action Committee of the Congress. (A summary of this program was published in the September issue of the LABOUR GAZETTE, page 1087).

Irrespective of the fact that the Congress executive officers declared that the resolution was concerned primarily with the program of the Political Action Committee, defining the post-war policies of the Congress and that it had no bearing on political affiliation, a considerable number of delegates saw in it a political complex. Accordingly, the political angle was injected into the debate, largely on the relationship between the Co-operative Commonwealth Federation and the Canadian Congress of Labour. The resolution was as follows:

> Be it resolved that this Convention endorse the program of the National Political Action Committee as an immediate and long-range program for the Congress and that we recommend to the Political Action Committee that emphasis be given to the immediate demands for the present and post-war period; and
>
> Be it further resolved that we recommend to the Political Action Committee and the incoming executive that they give consideration to the setting up of Provincial and Local Political Action Committees, as soon as time and money permit, and also that such political action committees be made representative of organizations affiliated with the Congress.

On a roll-call vote the resolution was adopted by 272 votes to 185.

Victory Pledge

A two-hour debate ensued on a substitute resolution termed the Victory Pledge. This resolution, which was adopted, was as follows:

> Be it resolved that this Convention of the Canadian Congress of Labour expresses its determination to do everything in its power to maintain continued all-out production until victory is achieved and re-iterates its pledge to do all in its power to avoid strike action, and calls upon the employers and the Government to pursue a fair and reasonable industrial policy in the interests of the war-effort.

Opponents to the resolution, who were outvoted on a show of hands, asked for a straight "no-strike" pledge.

Post-War Plans

Covering a large number of resolutions on the subject of post-war planning, the Resolutions Committee recommended a substitute resolution which was comprehensive in its scope, and which was adopted as follows:

> Whereas this Convention of the Canadian Congress of Labour realizes that, with the victorious end of the war coming closer, it is necessary that we enunciate those principles which we believe essential to the winning of the peace after we have won the war, and to this end adopt the following points, designed to facilitate an orderly transition from war to peace, and to provide thereafter an adequate and proper basis of living for the workers of this country:
>
> (1) We consider it a fundamental right of Canadians to have a job at adequate wages; the right to earn enough to provide food, clothing, shelter and recreation; the right of farmers to raise and sell their products for reasonable and decent returns; the right of business to trade in an atmosphere free from unfair competition and domination of monopolies; the right of every family to a decent home; the right to adequate medical care and an opportunity to enjoy good health; the right to protection from the economic evils of sickness, old age, accident and unemployment, and the right to a full and complete education for himself and his family;
>
> (2) Further we contend that any post-war plans cannot be successful without labour having a full part in the formation of them, and we therefore urge that on all planning commissions or committees labour be given full representation, and also that the Government should establish in all industries in this country, industry councils composed of representatives of labour, industry and Govern-

ment to plan and administer the reconversion program, and it should be one of the responsibilities of such industrial councils to make the necessary surveys to ascertain (a) what markets are available for manufactured products, raw materials and farm produce, (b) how many crown companies could be maintained in their present type of manufacturing, and how many could be converted to other types of civilian production, and (c) how many employees may expect gainful employment in new and peace-time industries; in the producing of raw materials, and the producing of farm products.

(3) Workers must be given concrete protection during, and after, reconversion in the form of dismissal pay in war plants not required after reconversion, and plans must be made to absorb war workers and service men and women in peace-time work. Included in this program provision should be made for a drastic reduction in the hours of work with no reduction in total earnings.

(4) As an immediate measure to deal with possible lay-offs in war industry, the Government should release materials for peace-time production, as war conditions permit, and also begin reconverting plants no longer needed for war purposes.

(5) Adequate provision must also be made for returning service men and women and disabled veterans, for their education, vocational training and for all of the other special problems they will face.

(6) In carrying out this program, and as an essential part of it, we urge that the Government encourage and expand the principles of social ownership; retain whatever economic controls are essential during the transition period; give preference to companies that operate under trade union agreements, when awarding Government contracts; and finally, immediately take steps to amend the B.N.A. Act, where necessary, to implement this program on a national basis.

Rehabilitation of Veterans

A large part of one session was devoted to the subject of veterans' rehabilitation. Prior to the resolution on this matter, the delegates heard Major-General G. B. Chisholm, Director-General of Medical Services, sound a warning that unless veterans were helped through the period of re-adjusting themselves to civilian life, they might sebrebate in groups which might lead to a disastrous conflict between veterans and civilians..

Following General Chisholm, Mr. J. C. G. Herwig, general secretary of the Canadian Legion, sought the co-operation of organized labour in a plan to protect the seniority rights of men who left their jobs to join the armed forces. He stated that his organization was concerned that seniority clauses in effect in the more highly unionized industries might operate to the disadvantage of veterans. As a solution he placed a three-point program before the convention:

(1) That Service personnel who have qualified for the Overseas Gratuity shall have preference in employment over any person whose service in industry is of a date subsequent to the enlistment date of the veteran.

(2) That if after a specified period an ex-service man or woman is found qualified he or she shall be placed on the seniority roster as from the date of enlistment and shall be entitled to the benefits therefrom as qualifications permit.

(3) That these privileges be subject to an agreed time limit.

In dealing with the proposals of the Canadian Legion the convention adopted the following resolution:

Be it resolved that we declare our determination to do everything in our power to ensure that the obligation our country owes to her ex-servicemen and women shall be honourably discharged; and to that end, this Convention:

(1) Welcomes the co-operation of all ex-servicemen's associations and invites all ex-servicemen eligible for membership who are not already members, to join our ranks and assist us in maintaining the greatest degree of job security for all by preserving the principle of seniority based upon length of service and ability;

(2) Insists that it is the responsibility both of the Government and industry to remove the handicap imposed by the loss of industrial experience, by providing ex-servicemen and women with suitable vocational training and refresher courses, at adequate rates of pay, until they are able to take their place in industry upon terms of equality with their fellow workers;

(3) Undertakes to press continually upon the Government so to plan our economy, in peace as in war, that an opportunity for work at a decent living wage shall be afforded to everyone willing to work;

And be it further resolved that the incoming executive be instructed to meet with representatives of the ex-servicemen's organizations, employers, associations and Government representatives for the purpose of discussing and framing a policy for the Canadian Congress of Labour with respect to the placement of returning veterans in industry.

Reorganization of Unions in Occupied Countries

When the convention was considering a resolution calling for financial and other assistance to the re-organization of unions in the recently occupied countries, Mr. J. McGuire, secretary of the Canadian Brotherhood of Railway Employees, told the delegates that trade union organizers from those countries played a vital part in the advances made by the Allies.

He said that representatives of a European transport union had been dropped by parachute into France shortly after the invasion to co-operate with underground organizations in organizing the transport workers to aid British and American forces. In Italy, one organizer had enlisted the support of 25,000 workers in three days. The resolution was referred to the incoming executive for action.

Wage Incentive Plans

The convention, in an adopted resolution, urged: "the National War Labour Board and the Minister of Labour to see that their Direction and Finding, dated May 2, 1944, covering the Shipyards of the Maritimes, in which they proposed the establishment of a committee to review and level-up the various incentive wage payment plans or systems, is immediately implemented, and the review take place without further delay."

Labour Representation on Government Bodies

On the question of labour representation on Government bodies, the convention reiterated "its demand that labour should have adequate representation on all boards that directly or indirectly affect the welfare of the workers" and instructed the incoming executive "to continue to urge upon the Government the necessity of giving labour this right and also to recommend to the Government that labour women be appointed as representatives on those boards where feminine abilities are peculiarly adaptable".

Foreign Policy

The convention adopted the following resolution on the foreign policy of Canada:

1. The first object of our foreign policy must be to win the war at the earliest possible time.

2. The future security of peace-loving nations will depend upon the extent and effectiveness of international co-operation. There is no security in national isolation. Canada must play its part in promoting international co-operation among the peace-loving nations, great and small.

3. The prosperity of all nations, as is their security, is indivisible. Economic isolation destroys economic security. Canada must play its part in promoting unrestricted trade and economic co-operation with other nations.

4. That Canada advance its good neighbour policy by joining the Pan-American Union for closer relations with South American countries.

5. That Canada strengthen its relations with its great northern neighbour, the Union of Soviet Socialist Republics and sign a pact similar to that in force now between Great Britain and the Soviet Union.

Education and Teachers

The convention went on record as supporting the following program of education:

1. That education, including text books, should be free from primary school to university, the cost to be borne by the Provincial Government.

2. Evening classes for adults should be established in areas where the need would warrant it.

3. Grants for students of merit to continue their education.

4. Teachers should be paid a living wage, comparable with skilled workers and professionals. They should enjoy security of tenure, freedom of association, the right of collective bargaining and freedom to run for public office with no fear of dismissal.

5. Teachers should be enabled to take refresher courses.

6. Compulsory schooling should continue until at least the age of 16, and part-time schooling for at least two years after.

7. Rural educational facilities be brought up to urban standards and federal assistance given to provinces which cannot maintain a high standard of education.

8. That a standard system of education for the Dominion be established to be administered by the local municipalities.

9. That native Indians be admitted to the public schools on the same basis and with the same privileges as other students.

In addition the convention endorsed the stand of the Canadian Teachers' Federation that no minimum salary lower than $1,200 per annum can be considered adequate.

Other Resolutions

Among the recommendations contained in a large number of other adopted resolutions were the following:

Endorsing the stand of the Montreal Tramway workers "in their desire for the establishment of a union shop contract" and pledging "fullest support in bringing this dispute to a successful conclusion".

Disapproving of the "principle of Crown companies entering into relationships with privately-owned companies on matters concerning their employees", and requesting the Federal Government "to take appropriate action, forbidding the managements of Crown companies from having memberships in Industrial Relations Institutes".

Recommending to all chartered locals affiliation with the Workers' Educational Association.

Urging all chartered unions to study and actively support the co-operatives in their drives to secure customers and members.

Urging the Federal Government to enact a National Health Bill providing cash benefits to maintain income during interruption of earning power; and integration of curative and preventive work so as "to guarantee to everyone maximum medical and dental benefits".

Recommending Governments "not only to advertise its program for supervision of feeding and schooling of children of all working mothers, as well as for the care of children ages 2-5, and educate parents as to its value, but also expand and improve the program, both as a war measure and as a permanent feature of post-war child care."

Petitioning the Federal Government to enact legislation which would protect the welfare of the children of Canada through free medical, nursery, dental and nutritional care.

Recommending federal and provincial governments to "enact and enforce legislation compell-

ing all persons to submit to periodic examinations to ascertain whether they are infected with venereal disease, and to compel those persons so infected to undergo immediate and proper treatment."

Urging upon the Government "the necessity of providing free fire-proof recreation centres".

Recommending the printing of a national Canadian textbook for use in every school throughout the Dominion.

Urging the establishing of a special board, "composed of equal representation of Government, science and labour, whose function it will be to institute government research projects, and act to translate the results of such projects into new industries and processes for the good and welfare of the citizens of Canada."

That the Congress take the necessary steps to bring before the Federal Government the establishing of a Canadian Merchant Marine, built, owned and operated by the Dominion Government.

Favouring a drive, initiated by the Government, to establish a reserve of blood plasma available to the public at minimum cost.

Endorsing the efforts of Cape Breton labour in the development of port facilities, the bridging of the Strait of Canso and the double tracking of the C.N.R. from Sydney to Moncton.

Requesting proper representation from organized labour on the Canadian administration staff of U.N.R.R.A.

"Condemning the action of the Federal Government in allowing the present system of granting to the chartered banks of Canada the right to put aside undisclosed amounts of untaxable profits in so-called hidden reserves, and demanding that the amount of such reserves already accumulated be disclosed, and all profits of the chartered banks be taxed".

Endorsing the establishment of the Prairie School for Social Advance.

Petitioning provincial Ministers of Education to investigate the possibilities of including a study course on the co-operative movement in the curriculum of high schools.

Reforming the electoral system on the basis of the Hare system of proportional representation.

Urging the Government to retain and enlarge industrial training centres "to give instruction to all who have aptitude and desire to get instruction in the trades".

Urging the Federal Government to give consideration to the advisibility of taking over Banff Springs Hotel and Lake Louise Chalet and place them in charge of a competent administrative and medical staff in order that these two institutions may be of national service to convalescent ex-service personnel.

Favouring control of all transport by a Board of Transport Commissioners.

Calling for maintenance and extension of technical training developed during the war.

Urging unions to give attention to programs which would attract youth to the organized labour movement.

Favouring release of Indian non-fascist prisoners and resumption of negotiations between the British Government and Indian National leaders.

Calling upon the Hon. George Drew, premier of Ontario, "to refrain from interfering in Dominion fields of jurisdiction".

Recommending that the Federal Government adopt legislation declaring anti-Semitism as a punishable crime.

Favouring a conference of Government, management and labour to ensure maintenance of the shipbuilding and ship repairing industry of Canada.

Resolutions Referred to Executive

Many other resolutions were referred to the incoming executive to deal with.

Among these were recommendations relating to the manufacture of penicillin; immigration; world trade union conference; equal pay for equal work; family allowances; evictions of soldiers' families; housing; standards of citizenship; amendments to National Labour Code; amendments to P.C. 1003 "in order to create better contractual relations between management and labour"; labour unity in the labour movement; establishment of a national wage policy; reconstitution of the National War Labour Board.

Report of Committee on Legislation

The Committee on Legislation had referred to it a considerable number of resolutions on legislative matters. Where such resolutions pertained to provincial legislation, the Committee recommended that these be not discussed at the convention, considering that they came under provincial Federations of Labour or Labour Councils. A number of other resolutions were referred to the incoming executive.

Report of Committee on Organization

The report of the Committee on Labour Organization affirmed "the position of the Canadian Congress of Labour towards industrial organization".

Emphasizing the "general desire expressed by the shipyard delegates for closer co-operation and organizational unity", the Committee recommended the establishment of an autonomous Shipyard Federation to cover shipyards in the Provinces of Quebec and Ontario, and a further Federation to cover the shipbuilding industry in the Provinces of New Brunswick and Nova Scotia, with the ultimate view of establishing a National Shipyard Workers' Union.

Constitutional Amendments

The convention adopted a number of amendments to the constitution. It was decided that the per capita tax of all chartered unions would be 50 cents per member per month. It was also decided that the representation at meetings of provincial Federations of Labour be on the same basis as at Congress conventions.

Officers Elected

The election of officers resulted as follows: President, A. R. Mosher; first vice-president, Alex McAuslane; second vice-president, Sol Spivak; secretary-treasurer, Pat Conroy; executive committee—S. Barrett, J. E. McGuire, C. H. Millard, T. Prezeau, George Burt. There were elections for all offices except that of secretary-treasurer to which Mr. Conroy was accorded an enthusiastic acclamation.

It was decided that Toronto would be the convention city for 1945.

Canadian and Catholic Confederation of Labour

THE twenty-third annual Convention of the Canadian and Catholic Confederation of Labour was held in Three Rivers, P.Q., during the four days commencing September 17. Two hundred and eighty-seven delegates attended the Convention at which over one hundred and eighty resolutions were considered.

The Confederal Bureau reported an increase in membership since the end of May, 1943, of 11,946 members, the total now being 65,249. During the year 28 new syndicates have been added, of which 16 were through federations and 12 directly.

The Convention opened with a High Mass at the Cathedral, celebrated by the General Chaplain, in the presence of the Bishop of Three Rivers.

Address of Mr. Paul Martin

There followed a banquet at which Mr. Paul Martin, Parliamentary Assistant to the Minister of Labour, represented the Hon. Humphrey Mitchell.

Mr. Martin praised the contribution of the Confederation to Canada's war effort. Referring to post-war planning he delared: "You have always said that human welfare should determine the character of economic and political systems, and the use which should be made of our social tools. . . . You are aware that social reforms conceived in scientific and economic detachment, have no moral principles, no standards of value, and are doomed to failure. Your attitude is therefore realistic in the deepest sense."

Quoting from the Philadelphia Charter adopted by the 1944 International Labour Conference, he stressed the need for action on an international scale to attain social objectives. "The war has shown us", he pointed out, "how internal conditions of the households of various members of the world family directly affect us; how our security and the level of our employment is dependent upon the prosperity of other nations."

He advocated that labour share in the discussions and in the "great administrative responsibilities" in the organization of peace.

"In the past", he continued, "the functions of trade unions have been defensive. They have been concerned with wages, hours, and conditions, and the general protection of their members.

"The war has added new functions, and unions have acquired new responsibilities at every stage of production; have come to be regarded as one of the principle parts of wartime machinery. They have passed beyond the defensive phase.

"If they are to have greater responsibility for the formulation and execution of policies in the future, particularly for industrial efficiency, their participation in industry must inevitably be extended.

"This means that they must now be equipped with their own educational and economic reasearch facilities in order to play their full part in the future.

"All of us must play a greater part in this working out of Canadian destiny among the other members of the world family.

"The survival of civilization will not be brought about by the use of a few dramatic and dogmatic tools, nor by pessimistic resignation to an unknown but fully determined future, or an optimistic resignation before the laws of progress. What will happen after the war will be better or worse, more or less hopeful, in so far as labour accepts her great international responsibilities.

"I venture to say that failure to accept this responsibility will mean shrinkage in the stature of labour for a generation."

Mr. Martin anticipated a further advance in labour-management co-operation, which, he declared, "had been given so great an impetus during the war years by organized labour and industry and through governmental promotion of labour-management production committees in industry . . .

"The extent to which voluntary co-operation has assisted the tremendous war production job of labour and industry is perhaps not fully realized by outsiders but labour and management are aware of the tangible benefits and, in my opinion, their awareness will mean the continuance of co-operation. In fact, I look for labour-management co-opera-

tion to evolve into a system of industry-wide councils composed of representatives of labour and management."

Summing up his advocacy of greater interest and participation by labour in social, economic and international affairs, Mr. Martin concluded: "What labour dreams, what labour accomplishes in the next ten years will set the pattern of Canada's history for a century."

Mr. Charpentier's Address

The president, Mr. Alfred Charpentier, in his opening address reminded the delegates that it was in the attractive city of Laviolette that, in 1913, the foundations of Catholic syndicalism were laid, and in the same city of Three Rivers that the 4th and 13th annual conventions were held.

The president pointed out the progress of syndicalism among the teachers of the Province of Quebec, collective agreements having been signed with a considerable number of rural and city school boards.

Collective agreements in the Province of Quebec now number around 100. He noted that from 30 to 40 of these collective agreements have been signed by syndicates opposed to the legislation favoured by the C.T.C.C.

Wages in Ontario and Quebec

"For the last two years", said Mr. Charpentier "a great deal has been said among us about the inequality in wages between Ontario and Quebec, the latter being ill-reputed for its wage scales."

Continuing the president said: "The principal causes of this situation date back to 1914-18, and are: the rapid industrialization of the province, the low cost of living, the appeal, to outside industries, of the pernicious 'cheap labour propaganda', the lack of labour organization.

"In this respect the situation in Quebec is not quite as bad as it is reputed to be. There has been considerable improvement during the last 10 years. The collective agreement legislation and the minimum wage act, up to the beginning of the war, had already increased wages in a number of industries. Dominion Orders in Council 7440 and 8352, also the last, 9384, have in some measure contributed to raising wages in our province. However, the wage ceilings fixed by Ottawa have affected a great many small and medium Quebec industries where salaries were already too low."

The Present Situation

"It would appear from certain statistics, that the cost of living at present in the Province of Quebec, is as high as in Ontario, possibly more so in Montreal than in Toronto. Before the war the contrary was true. However, since the establishment of the collective agreement system in the Province of Quebec it is a fact that in many industries the wage scales generally are comparable to those of Ontario within the same industries. They may sometimes be lower for certain operations but higher in many others. Within such industries where collective agreements are regulated by the Province, thousands of workers in all the small industrial rural centres of the Province are paid higher wages than obtain in the same industries in Ontario."

Mr. Charpentier considered that in a number of war industries wage rates have been brought up to the level of Ontario, which he attributed to wartime legislation. "It is, nevertheless a fact", observed Mr. Charpentier "that in quite a few other industries carrying out war contracts, the said legislation did not succeed, generally speaking, in enforcing the minimum wages of 35 cents and 45 cents for girls and boys respectively.

"It is true that in many industries not yet having the benefit of collective bargaining legislation the disparity between Quebec and Ontario salaries is really too great, but in this respect it would be unfair to generalize."

The policy of the National War Labour Board, he asserted, contributes in a large measure in equalizing the wage rates between the two provinces, although he was of the opinion "there is yet a great deal to be done in this direction." In a further analysis of wages Mr. Charpentier said: "There are those who claim that the equalization between wages of Ontario and Quebec should be absolute. This is undoubtedly true where wartime industries and large national enterprises are concerned, and also in industries where there is international competition and State subsidies, but it is not certain that the wage level should be equalized with respect to interprovincially competitive industries, where productivity is less in Quebec than in Ontario, and in industries exporting 80 per cent of their production outside of Quebec, and lastly, in small local or domestic industries."

The president affirmed that the aim of the Canadian and Catholic Confederation of Labour should be to insure, within all industries, reasonable wage scales coupled with a purchasing power higher than an inflationary wage scale with its reduced purchasing power. "This can be achieved only through a social policy aiming at a national income as high as is consistent with the permanency of employment, the efficiency of labour, and the proper relationship between the prices of industrial and agricultural products. Dominion

Order in Council 9384 is a measure in this direction and as such was recommended by the C.C.C.L. after certain amendments."

Order in Council P.C. 9384

"Incorporation of the cost-of living bonus in the wage rate inspires the hope that the present level of wages will be more easily stabilized after the war. The present level is not excessive, generally speaking, unless the cost of living were to be considerably reduced.

"Increases in wages are not now allowed unless there be 'inequality or gross injustice' (Order 9384). The National War Labour Board applies this rule in the light of the three following principles: (*a*) equal wages for equal work; (*b*) priority of wages over dividends; (*c*) capacity of the employers to pay. These principles should prevail in the legislation of the provinces of Canada with the respect to the fixing of minimum wages and to collective labour agreements. It would seem that an interprovincial wages committee could maintain the necessary balance in the provinces, especially the two industrial provinces of Ontario and Quebec."

Right of Union Organization

In discussing union organization the president Mr. Charpentier expressed himself as follows:—

"Dominion Order in Council P.C. 1003 and Quebec Bills 2 and 3 (Labour Relations Act and the Act respecting disputes between Public Services and their Employees) constituted the first real steps towards the development of such a right. A deep-seated, constantly increasing unrest in the labour world and in inter-union relations have prompted this new legislative development the dominant principle of which is the obligation of the employer to negotiate with the unions. The Government of the Province of Quebec has accepted the application of Dominion Order in Council 1003 only for war industries; the other provinces have accepted it for peacetime industries. Quebec did well, for Order 1003 is not an Act . . . it can be abrogated as soon as the war ends. Moreover, our provincial legislation is more complete; its effect is double: it distinguishes between those principles which should govern the right of union organization in municipal services and public utilities.

"Further, our two laws are more democratic in spirit with respect to minority syndicates. They do not lend themselves to the same extent to demagogic abuses of the union representation vote, with the result that labour organizations better realize the necessity of bona fide enrolment before negotiations can be entered into with an employer.

"Nevertheless here are a few observations on these Bills:—

"1. The powers of the Commission applying these laws should be less arbitrary;

"2. The recognition of the union group in a shop should be subject to certain rules in order to prevent the harmful division of workers into several unions in a same industrial establishment, and in order to promote the solidarity which should exist in employer-employee relations;

"3. Clarification of the measures prohibiting the imposition and maintenance of a closed shop by intimidation is equally urgent;

"4. It is unreasonable to require that a labour organization represent 60 per cent of the employees in any one establishment in order to be recognized as a bargaining agency —51 per cent as stipulated in the Dominion Order should be altogether sufficient. To maintain, and particularly to increase, this percentage, is not always easy in a new organization without a clause in the collective agreement insuring to the syndicate a minimum of numerical security and permanence so that it can remain the bargaining unit for every renewal of the agreement, unless for serious reasons it lose this privilege.

"The Labour Relations Act, intended as it is to induce the employer to negotiate collectively when the labour organization has fulfilled the required conditions, cannot logically justify the establishment and maintenance of a closed shop agreement by any but peaceable means. One idea which should be firmly implanted in the minds of all our Canadian legislators is that the functional character of the labour union, within a trade, deserves a closer attention on their part and should henceforth be considered the pivot of labour legislation."

In concluding this part of his address Mr. Charpentier was critical of the situation that developed out of the Montreal Tramways strike and claimed that the strike was "in contempt" of Quebec provincial law.

The resolutions adopted by the Convention dealt with both Federal and Provincial labour legislation. Following is a summary of the main resolutions.

Old Age Pensions

In the resolution on old age pensions it was represented that after the termination of hostilities "it will be very difficult for workers 60 years old and over to secure and hold jobs." Accordingly, the Convention reiterated its recommendation that the pensionable age

be reduced to 65 years for men and 60 for women.

Unemployment Insurance

By resolution the following amendments to the Unemployment Insurance Act were recommended:—

(*a*) That in war industries where the worker is "frozen" the Unemployment Insurance Commission pay the difference in wages for 48 hours per week whenever for some reason 48 hours' work is not required;

(*b*) That "an agent in charge" be stationed in localities where there are at least 400 workers;

(*c*) That claim forms be simplified so that the worker may obtain benefits immediately his employment ceases;

(*d*) That appellants called before Courts of Referees be required to notify the Unemployment Insurance Commission without delay if they intend to call witnesses, so that subpoenas may be issued, and that loss of time and travelling expenses be compensated by the Commission;

(*e*) That principle concerned in appeals to Referees of the Unemployment Insurance Commission or of National Selective Service be required to appear, whether appellant or not, within 7 days of filing of appeal, expenses to be paid by the Commission.

Selective Service

In regard to Selective Service it was urged:—

(*a*) That representatives of affiliated syndicates be authorized to issue permits;

(*b*) That, as a measure to foster and encourage the building of homes, especially for workers, the construction industry be not subject to Selective Service restrictions;

(*c*) That, as a measure to ensure redress when justice so requires, a higher tribunal be established for the revision of Appeal Committee decisions;

(*d*) That, in order to save time for applicants, lists of available jobs be posted in conspicuous places in Selective Service offices;

(*e*) That no one be called for military training before the full age of 18½ years.

Cost of Living and Price Control

Resolutions bearing on the cost of living and price control recommended:—

(*a*) That, in view of the existing indirect inflation through a lowering in the quality of goods, the authorities exercise a rigid check on prices and stamp out this kind of inflation;

(*b*) That a stop be put to the exaggerated evaluation of new rentals, which, it was suggested, should not be the same for large and small centres;

(*c*) That action be taken to put an end to the abusive practice, in Montreal and other large centres, of those who require, as a condition to renting, that old furniture he bought;

(*d*) That after ejection of a lessee, there be no increase in the rental price.

National War Labour Board

In connection with the War Labour Board it was recommended:—

(*a*) That Section 10, para. 2 of P.C. 9384 be amended so as to allow retroactivity in the revision of a Regional Board decision;

(*b*) That P.C. 9384 and P.C. 1727 be amended so as to require a decision within 30 days of date of application;

(*c*) That P.C. 9384 be amended so that comparison within the industry be not required in the matter of wages under 50 cents per hour—the only test to be the employer's capacity to pay.

Dominion Labour Code

"In view of the deplorable experience with the Montreal Tramways strike", it was strongly urged that P.C. 1003 be amended to conform to Bill 2 of the Provincial Labour Regulations Act in order to prevent strikes in public utilities.

Income Tax

With a view to easing the financial situation of workers in the lower wage brackets, it was suggested that the exemption for unmarried men be raised from $660 to $800 per annum; also that the exemption for married men be raised from $1,200 to $1,600 per annum. In this connection there was a further recommendation to the effect that all overtime pay be exempt and that the forms be simplified.

Embodied in resolutions in the provincial field of legislation were the following recommendations:—

(*a*) Increased fines for labour infractions;

(*b*) 40-hour week for women;

(*c*) Minimum wage of 35 cents per hour for beginners of both sexes;

(*d*) Increase in the scope of, and benefits under, the Workmen's Compensation Act;
(*e*) Establishment of training of war workers for new industries, under the Price plan;
(*f*) Free treatment of cancer;
(*g*) Provincial post-war employment projects;
(*h*) Amendment to Quebec law, enabling Minister of Labour to appoint Conciliation Commission or Board of Referees;
(*i*) Establishment of vocational guidance in schools;
(*j*) Creation of Labour Court to facilitate the hearing of prosecutions under the labour laws.

At the conclusion of the Convention Mr. Alfred Charpentier of Montreal was elected for a tenth term as President. Other officers elected were: vice-presidents: Messrs. Emile Tellier, Three Rivers; Osias Filion, Montreal; Alphonse Roberge, Quebec; and L. P. Boily, Jonquière; general secretary, Gérard Picard, Quebec; treasurer, Alphonse Bourdon. Montreal; assistant-treasurer, Roméo Ethier, Montreal; general chaplain, Lt.-Col., the Rev. Georges Coté.

The following were named Federation Directors:—

Asbestos—Emile Lessard, Thetford Mines; Aluminum—René Harmégnies, Arvida; Barbers—P. E. Cabana, Montreal; Fashioned hosiery—Roméo Vallée, Sherbrooke; Construction—Joseph Dorion, Quebec; Merchants—Lauréat Cloutier, Quebec; Leather & Shoes—Ernest St-Amand, Montreal; Gloves—Roméo Bellemare, Montreal; Printing—G. A. Gagnon, Montreal; Lumber—F. X. Légaré, Rimouski; Metallurgy— (new federation), appointment pending; Furniture—Henri Boisvert, Victoriaville; Pulp and Paper—Philippe Lessard, Port-Alfred; Textiles — Honoré d'Amour, Drummondville; Clothing—Irénée Rousseau, Victoriaville; Study Clubs—Lauréat Morency, Quebec.

Following is the new panel of Regional Directors:—

Quebec—Henri Petit, Quebec; Montreal—J. Bte. Delisle, Montreal; Sherbrooke—L. Lefebvre, Sherbrooke; Three Rivers—Eddy Duguay, Three Rivers; Hull-Ottawa—P. E. Sauvageau, Hull, P.Q.; Granby—Gérard Racine, Granby; Saguenay-Lac-St-Jean — (appointment pending); St-Hyacinthe—Odilon Chabot.

Workmen's Compensation in Ontario and British Columbia

THE Annual Reports of the Workmen's Compensation Boards of Ontario and British Columbia for 1943 were issued recently. A brief summary giving the more important features of each of these reports appears below.

Ontario

Accidents reported to the Board in 1943 numbered 131,458 as compared with 133,513 during 1942, a decrease of 2,055 or 1·5 per cent. Of this total, 121,237 accidents were paid for either by compensation or medical aid, or both. These included 343 deaths, 1,692 permanent disability cases, 46,670 temporary disability cases and 72,532 medical aid cases only.

During 1943, the payroll covered by Schedule I of the Workmen's Compensation Act (that part of industry under collective liability) was $1,076,780,000 as compared with $999,769,000 during 1942, an increase of 7·7 per cent, thus establishing another high record for any single year since the Board was established. The average rate of assessment was $1.03 for each $100 of payroll; the corresponding rate for 1942 was $1.10. There were 23,950 employers under Schedule I at December 31, 1943, as compared with 25,529 at the end of 1942.

The compensation and medical aid for Schedule I industries, including estimates for what is still to be awarded for accidents happening during the year and for prior years' accidents amounted to $9,702,307.44. The total amount of compensation awarded in Schedule II industries (those in which employers are individually liable for accidents to their workmen) including Dominion and Provincial Crown Companies in 1943, was $2,264,507.50, as compared with $1,733,376.40 during 1942. Of the 1943 total, $1,389,391.59 was for Dominion Crown cases and $79,097.02 was for Provincial Crown cases.

The provisional assessments paid for 1943 under Schedule I, amounted to $11,099,204.43, which amount includes estimated adjustments of $724,875, as compared with a total of $10,897,193.16 in 1942.

The Dominion Government (including Defence Industries) the Provincial Government, and employers in Schedule II pay for

accidents as they arise, on the adjudication of claims by the Board. Hence while accidents from these sources are included in the above totals, there is no inclusion of wage roll or assessment figures, as these industries do not pay assessment to the Board on a percentage of their payrolls.

The gross administration expenses of the Board in 1943 were $779,461.04. Of this amount, $129,267 was charged to Schedule II and Crown employers; $17,480.78 to silicosis account; $900.39 to mine rescue work; $4,653.75 to special hospital account; and $4,484.04 to clinic. The balance, $622,675.08 was charged to Schedule I.

The Disaster Reserve to meet any unforeseen disaster or other circumstance which might burden unduly the employers in any class of industry, amounted to $246,807.99 at the close of 1943. The Pension Fund to take care of future payments of pensions, totalled $32,387,801.89, and the reserve to complete claims amounted to $4,711,343.49 at December 31, 1943.

British Columbia

The Annual Report of the Workmen's Compensation Board of British Columbia for the year 1943 states that the volume of claims handled was the largest in any year since the Act became effective on January 1, 1917. The number of accidents reported in 1943 was 68,635 as compared with 65,475 in 1942. It is pointed out, however, that while the number of accidents had increased by less than five per cent the payrolls increased by 16 per cent over 1942. There was one accident reported for each $5,536 of estimated payroll in 1943, as compared with one accident for each $4.996 of payroll in 1942.

It is stated that the introduction of women to wartime employment and other accident-producing work formerly done by men is reflected in the accident figures. In 1943, 2,479 women were injured as compared with 1,193 in 1942 and 578 in 1941. Most of the women and boys injured were unaccustomed to accident hazards and were inadequately prepared for using dangerous machines in crowded places under wartime pressure.

The percentage of accidents resulting in three or more days loss of time arose out of the various industries as follows: Lumber industry, 26 per cent; steel ship-building, 23 per cent; general manufacturing and delivery, ten per cent; construction (excluding steel ship-building), nine per cent; servicing, repairing and machine shops, nine per cent; metal mining, five per cent; railroading, four per cent; coal mining, three per cent; all other classes, eleven per cent.

The total number of claims filed in 1943 was 68,635 of which 256 proved fatal and 979 awards were made for permanent partial impairment during the same year.

Revenue of the Board during 1943 amounted to a total of $15,361,664.76, of which $10,218,614.36 was obtained from 1943 assessments; $1,526,696.96 from assessments from 1942 and prior years, penalties, interest, etc.; $945,733.77 from medical aid contributions; $733,516.24 from medical aid dues from workmen; $9,905.08 from silicosis fund—pension transfers; and $1,927,198.35 from investments.

Disbursements during 1943 totalled $15,798,788.46, the major component items being, compensation to workmen, $4,100,840.21; medical aid $1,178,826.22; pension payments, $1,742,430.78; investments purchased, less sales, $8,464,936.14; general and administrative expense, $300,477.42. There was thus a cash balance of revenue over expenditure in 1943 of $1,257,996.75.

Ever since its establishment in 1917, the Board has carried on campaigns to prevent industrial accidents. In addition to systematic plant inspections and the correcting of unsafe conditions and practices, accident prevention education has been kept up consistently. In 1943, there was a noticeable growth in industrial safety organizations and an increase in the number of plant safety inspectors and safety directors. This increase in the number of men engaged in safety work has led the Board to organize a Provincial Industrial Safety Council. This Council devotes much effort to education and the spread of accurate accident prevention information among its members. A motion picture machine has been acquired by the Board to aid in the promotion of accident prevention. It is noted in the report that a commendable improvement has been brought about in many plants in the way of heating, lighting and working arrangements, as well as in a more sympathetic and co-operative attitude on the part of plant supervisors.

THE LABOUR GAZETTE

PREPARED AND EDITED BY

THE DEPARTMENT OF LABOUR, OTTAWA, CANADA

Minister—Hon. HUMPHREY MITCHELL

Deputy Minister—ARTHUR MACNAMARA

Editor—HARRY J. WALKER

VOLUME XLIV] DECEMBER, 1944 [NUMBER 12

Notes of Current Interest

World Trade Union Congress to meet in London

The World Trade Union Congress which had been scheduled to take place last summer and had been postponed owing to the war situation (L.G., May, 1944, p. 545), will be held in London, England, early in the New Year.

The meeting is being called by the British Trades Union Congress. A preparatory committee comprising representatives of the British, Soviet and American (C.I.O.) unions met in London on December 4 to formulate plans and a program for the Congress. (The American Federation of Labour declined an invitation to attend.)

The Trades and Labour Congress of Canada and the Canadian Congress of Labour are sending delegations to the World Congress.

A. MacNamara appointed to Governing Body of I.L.O.

Arthur MacNamara, L.L.D., Deputy Minister of Labour, has been named by Order-in-Council, P.C. 9149, as representative of the Government of Canada on the Governing Body of the International Labour Office.

Mr. MacNamara succeeds V. C. MacDonald, K.C., former Assistant Deputy Minister of Labour, who returned some weeks ago to his position as Dean of the Law School at Dalhousie University, Halifax.

New Saskatchewan laws on labour relations and holidays with pay

Bills dealing with labour relations and holidays with pay, passed by the Saskatchewan Legislature during its second session of this year, are described in detail elsewhere in this issue, in the *Labour Law* section.

The Trade Union Act repeals the provincial Labour Relations Act, passed earlier in the year, the Industrial Disputes Investigation Act and the Freedom of Trade Union Association Act. Applying to all industries in the Province, except those essential to the prosecution of the war and other industries under Dominion jurisdiction, it declares the right of employees to organize and to bargain with their employers through chosen representatives, and provides for a seven-member Board on which employers, employees and, if the Government considers it advisable, the general public, are equally represented.

The Board may make Orders determining agencies appropriate for collective bargaining, requiring employers to bargain with such agencies, directing reinstatement of employees discharged contrary to the Act, requiring the dis-establishment of company unions, and ordering any person to refrain from any of the unfair labour practices set forth in the Act. There is no appeal from any Order or decision of the Board and if an employer disregards or disobeys such an Order the

23488—1½

Lieutenant-Governor in Council, on application of the Board, may take possession of and operate the employer's business or plant. The Board may direct a vote to choose a bargaining agency and must do so on request of a union having a membership of 25 per cent or more of the employees of a plant. If votes are cast by a majority of those eligible to vote, a majority of those voting determines the bargaining agency. Check-off of membership dues is compulsory if the union and the employees request them. Maintenance of membership clauses are also compulsory in an agreement if the union requests it.

Provision is made for conciliation and arbitration in any industrial dispute by a board of conciliation established by the Minister of Labour or, on request of both parties, by the Labour Relations Board.

The Annual Holidays Act provides for an annual holiday of two weeks with pay for all employees except those employed on farms, ranches and similar work, and in undertakings employing only members of the employer's family.

Report on wage rates and hours of labour in Canada

Report No. 26 of the series *Wage Rates and Hours of Labour in Canada* will be issued shortly as a supplement to the LABOUR GAZETTE. Prepared by the Research and Statistics Branch of the Department, the report will show the wage rates and hours of labour in 1943 in various industries and occupations. The last report of this series was published as a supplement to the LABOUR GAZETTE for October, 1942, since which time the GAZETTE has published index numbers covering the years 1942 and 1943 (L.G., Oct., 1944, p. 1210).

Report No. 26 will include two series of index numbers showing wage rate trends by industrial groups. Average wage rates for 1943 will be shown by industry and occupation for provincial or regional areas.

Royal Commission on Coal

It has been officially announced in Ottawa that the Royal Commission on Coal, comprising Mr. Justice W. F. Carroll, Chairman, Angus J. Morrison, and Mr. Justice C. C. McLaurin, will commence its sittings in the Province of Nova Scotia, early in January, 1945. J. J. Frawley, K.C., of Edmonton, is Chief Counsel for the Commission and the Secretary is Robert D. Howland, Ph.D., on loan from the Federal Department of Labour.

The Commission is empowered to inquire into, and report upon, the problems of, and matters pertaining to, the coal industry in Canada, having regard generally to pre-war, present, and anticipated post-war conditions, and the probable future development of Canada.

These are very wide terms of reference and it is intimated that the Commission intends to cover all aspects of the coal problem during its inquiry. Production and distribution problems will inevitably claim a great deal of attention by the Commission but it is understood that such matters as industrial relations in the coal industry, the production of by-products and synthetic materials, the manufacture of coke and its by-products and marketing problems generally are to be studied.

It is clear that the Commission intends to make a comprehensive survey. Various limited private and Governmental inquiries have been carried out concerning the Canadian coal problem but this is the first time that the whole question in its broad national aspects has been studied. This is a task of the first magnitude.

Doubtless, various organizations in the country will be eager to volunteer assistance to, and co-operate with, the Commission. The various manufacturers' associations will have a vital interest in the adequate supply of industrial coal, while Boards of Trade will be alive to the interests of the consumers generally, particularly in the domestic field. Various Provincial Government bodies are taking an active interest in the specific coal problems as they relate to their provinces.

The Commission will hold hearings in the Maritime Provinces during the months of January and February, moving from there to the central Provinces and later to Western Canada and the Pacific. It has been impossible to secure definite advice as to specific sittings of the Commission but it is understood that Western sittings will be proceeded with towards Spring.

The Chairman, Counsel and Secretary of the Commission left Ottawa recently to conduct a preliminary tour of the Maritimes and to arrange for a series of hearings commencing at Sydney on Tuesday, January 16, 1945, and including, among other centres, New Glasgow, Halifax, Amherst, Moncton and Fredericton.

Plans for withdrawing restrictions on manufacture of civilian goods

In a speech given recently in Toronto before the Canadian Club, the Chairman of the Wartime Prices and Trade Board, Mr. Donald Gordon, outlined the administrative procedure that is being followed by the Board in removing prohibitions on the manufacture of

civilian goods as the war situation permits. The Board has removed restrictions on some 500 items of metal civilian goods, including a number of small domestic electrical appliances, although actual production depends on the availability of materials and labour.

Emphasizing that when the new goods began to appear they would be subject to price ceilings, Mr. Gordon stated that strict control of prices would be continued into the period of transition, since potential inflationary pressures were likely to remain great. He explained the procedure to be followed in applying controls to "new goods" not previously manufactured.

A summary of Mr. Gordon's statement appears elsewhere in this issue in the article, *Activities of the Wartime Prices and Trade Board.*

Increase in cost-of-living index

The Dominion Bureau of Statistics cost-of-living index advanced from 118·6 for October 2 to 118·9 for November 1, 1944. A sharp seasonal rise in egg prices overbalanced further declines in the index for domestic electricity costs. An increase in the food index from 130·8 for October to 131·6 for November was due almost entirely to higher egg prices, with further small declines in prices of fresh vegetables providing the only other change of any consequence. The fuel index dropped from 108·7 to 108·1, as the electricity declined from 93·2 to 91·4. Reductions in electricity rates during the past year have provided a stabilizing influence upon the general cost-of-living index. Other group indexes remained unchanged for November, as follows: rentals 112, clothing 121·6, home-furnishings and services 118·4, and miscellaneous items 108·9. After adjustment to the base August, 1939 as 100 the index was 118 at November 1.

Survey of personnel available for post-war technical jobs

An analysis is being undertaken by the Wartime Bureau of Technical Personnel of the individual records of Canada's engineers and scientists to determine the numbers and classifications likely to be available in various fields of post-war activity. Mr. Harold S. Kennedy, Montreal mining engineer, has been appointed to supervise the study.

The survey will be closely concerned with the post-war rehabilitation of science personnel. At present more than 10,000 of Canada's trained science graduates are on active duty with the Armed Forces, while at least twice that number are employed in vital war production or essential civilian work, according to the Technical Bureau's records.

While a proportion of those in industry will continue in the positions they now hold, many will be looking for permanent peacetime employment after the war. More than 11,000 engineers and science workers have undertaken work in high priority industries in the two and one-half years during which present manpower controls have been in effect.

The Wartime Bureau of Technical Personnel, established early in 1941 to survey and classify Canada's scientific manpower and to promote its efficient use, has a complete record of over 33,000 graduate scientists.

Officials of the Bureau state that results of the survey, which will be available in about six months, will be of value to prospective employers, scientific and technical institutes, and universities in search of teaching staff for science faculties.

Public hearing of Wartime Labour Relations Board

The Wartime Labour Relations Board (National) has announced that it will hold a public hearing on January 9, 1945, in the Railway Committee Room of the House of Commons for the purpose of allowing interested persons and organizations an opportunity to present evidence and make representations concerning the application of the Wartime Labour Relations Regulations to professional and scientific personnel in Canadian industry.

It is expected that a large number of persons representing various professional societies and labour organizations will appear before the Board to express their views concerning collective bargaining as it affects such personnel in relation to the Regulations.

National congresses and federations of labour and associations of employers have also been advised of the hearing and will have an opportunity to make representations.

Training grants not subject to income tax

An Order in Council of October 31 (P.C. 128/8367) provides that grants paid to a discharged member of the Armed Forces who is receiving vocational or technical training or other educational training shall not be liable to income tax.

The Order states that the amounts of such grants had been originally determined on the basis that there should be no deduction therefrom by reason of taxation. The Vocational Training Advisory Council had called attention to the situation at its semi-annual meeting last October (L.G., Nov., 1944, p. 1370).

The grants are on the basis of $60 monthly for a single person and $80 monthly for a man and his wife, with allowances for dependents.

Employment and industrial statistics

The table below shows the latest statistics available reflecting industrial conditions in Canada.

There was considerable curtailment of employment at the beginning of October, according to figures published by the Dominion Bureau of Statistics. This is the first time since the autumn of 1931 that the trend at October has been downward. The index, unadjusted for seasonal variations, was 183·3 at October 1 and 185·5 at September 1, as compared with 187·5 at October 1, 1943, and 121·7 at October 1, 1939. The

* Many of the figures in this table with an analysis are included in the Monthly Review of Business Statistics issued by the Dominion Bureau of Statistics, price $1.00 per year.

† Week ended November 23, 1944.

(1) Base, 1926=100. (2) Figures are for the end of the preceding month. (3) Base, June, 1941=100. (4) Base, 1935-1939=100. (5) Adjusted, where necessary, for seasonal variation. (6) Notes in the hands of the public at the end of the preceding month. (7) Figures for four weeks ended November 25, 1944, and corresponding previous periods. (8) Maclean's Building Review.

seasonally-corrected index declined from 178·3 in the previous month to 174·4 at October 1. The 14,921 establishments reporting to the Bureau showed a total working force of 1,884,176 at October 1, which was 1·2 per cent lower than at the month preceding. The total weekly wages and salaries paid to these employees increased by 0·9 per cent to $60,250,107 at October 1. The per capita weekly earnings advanced from $31.69 in September to $32.36 in October; this rise is partly seasonal in character and due in part to the payment of wages to railroad workers at the higher rates authorized by the National War Labour Board. The increased rates were made retroactive to September, 1943; adjustment could not be made in these figures of payrolls for such retroactive payments.

Since June 1, 1941, the number of persons in recorded employment has increased 20 per cent and their aggregate weekly payrolls, 51 per cent. The more rapid growth in the latter than in the former case has been explained by:

"(1) the concentration of workers in the heavy manufacturing industries, where rates of pay are above the average and, in addition, there has been a considerable amount of overtime work;
(2) the payment of cost-of-living bonuses to the majority of workers; the rates at which these allowances were calculated were increased on more than one occasion before their incorporation in the basic wage-rates from February 15, 1944;
(3) the progressive up-grading of employees as they gain experience in their work and
(4) the granting of higher wage-rates in numerous cases."

The largest declines in recorded employment at October 1, took place in manufacturing and construction. The largest contra-seasonal curtailment of employment in manufacturing occurred in iron and steel. While seasonal, the decline in construction was unusually large, noticeably in highway work in Quebec. Smaller losses were reported in mining, communications and services while there were small improvements in transportation and trade and important seasonal expansion in logging.

The index of the physical volume of business which was 239·5 in October, 1943, recorded a decline from 231 in September 1944 to 228 in October. The indexes for the distribution of goods, for electric power production and for industrial production were lower while mineral production, construction, and the volume of manufacturing showed minor advances. The coal production index declined from 109·6 to 91·3; creamery butter production decreased from 114·9 to 112·8 while factory cheese production increased from 135·8 to 151·5; adjusted tobacco releases were slightly higher; and the primary iron and steel industry was considerably more active in October than in the preceding month.

For the first ten months of 1944 the index of the physical volume of business averaged 1·8 per cent higher than for the similar period in 1943. In the same comparison, the index of industrial production averaged 0·7 per cent lower and the index of industrial employment 0·2 per cent lower; mineral production was 3·8 per cent lower and employment in mining 2·3 per cent lower; manufacturing production 0·9 per cent higher and manufacturing employment 0·04 per cent higher; construction contracts awarded and building permits issued were 44·7 and 58·7 per cent higher, respectively, and construction employment 20·2 per cent lower. Also in the same comparison, export trade increased 20·6 per cent, import trade 3·5 per cent, carloadings 6·8 per cent, wholesale prices 3·1 per cent, cost of living 0·6 per cent, wholesale sales 11·2 per cent and retail sales were 7·7 per cent higher. Bank debits expanded 13·7 per cent, and the circulating media averaged 21 per cent higher in the first ten months of 1944 compared with the same period of last year.

Brochure on status of closed shop in Canada and United States

A brochure of 84 pages entitled "The Closed Shop" was published recently by the Department of Industrial Relations of Queen's University. It is based on a study of the methods used by trades unions in the United States and Canada in their efforts to ensure the employment security of their members.

The brochure provides a fairly complete analysis of the legal status of trades unions operating as "voluntary associations" in the two countries, and their character and functions as bargaining agencies.

The status of the closed shop proper as distinguished from the union shop proper and the preferential union shop as well as maintenance of union membership clauses in collective agreements are examined in some detail, especially as they are defined in the United States. The work of the American National Defence Mediation Board and its successor, the National War Labour Board with respect to closed shops and union membership is discussed and the conclusion reached that "in the United States the closed shop is

clearly an institution in the making" and that "it has come into a society where neither law nor public opinion accord it full sanction."

With respect to Canada the author points out that the issue of the closed shop "is becoming increasingly important". He asserts that "the legality of the closed shop in this country has not been disputed as it has in the United States. Controversy has centred around its desirability from the point of view of employer and employee rather than around its status in the eyes of the law."

Deductions are made from the findings derived from sample surveys of collective agreements in force in Canada and the inference drawn that "it is probably quite correct to conclude from it (the sample of agreements) that about one-third of the collective agreements now in effect in this country contain closed shop, union shop or maintenance of membership clauses".

After making a number of quotations from and comments on Federal Orders in Council and Dominion and Provincial legislation, the author concludes: "It is evident, then, from an examination of existing statutes and orders that Canadian law, on the whole, permits union and closed shop agreements".

Abstracts and quotations of reports of boards of conciliation and investigation on industrial disputes for the years 1941-1944, inclusive, as published monthly in the LABOUR GAZETTE, are made use of to indicate the trend of the movement for union security in Canada. The concluding chapters sum up and analyse critically the arguments for and against the closed shop and the social implications involved.

Commission to inquire into taxation of co-operatives

The Minister of Finance, Hon. J. L. Ilsley, has announced the appointment of a commission to examine the tax position of co-operative enterprises.

The commission will be under the chairmanship of Mr. Justice Errol McDougall, Montreal. It will inquire into the matter of the application to co-operatives of the Income War Tax Act and the Excess Profits Tax Act.

It also will investigate the organization and business methods and operations of the co-operatives and the comparative position in relation to taxation under the Acts of persons engaged in any line of business in direct competition with co-operatives.

The commission then will report to the Governor General in Council with a view to establishing a "just, fair and equitable" basis for the application of taxation to co-operatives and their competitors.

Employment, wages, and output in coal industry

A comprehensive report entitled *Coal Statistics for Canada* has been issued by the Dominion Bureau of Statistics covering the year 1942. In addition to figures on output, distribution, prices, costs and other statistics of a general character, the report gives details of employment, salaries and wages in Canada and in the provinces.

The report shows that between 1938 and 1942 the number of wage-earners employed in the coal mining industry declined from 25,767 to 24,763. On the other hand, the average number of days worked per man per year increased considerably during the same period, from 208 days in 1938 to 272 in 1942; and as a result the total number of days worked per year increased from 5,350,000 days to 6,750,000.

Total wages during the period rose from $26,000,000 to $39,000,000. Salaried employers numbered 1,223 men and 208 women in 1942, and were paid a total of slightly over $3,000,000.

Of the 24,763 wage-earners employed in 1942, 19,227 worked underground and 5,536 were surface workers.

Average output per man-day was 2·739 tons in 1941, and 2·795 tons in 1942.

Total production of coal rose from 14,294,718 tons in 1938 to 18,865,030 tons in 1942. Monthly comparisons, indicating an output in October of 1,503,608 tons in 1938 and 1,574,871 in 1942, may be compared with the more recent figures shown in the table on page 1450 of this issue, which indicate a production of 1,559,007 tons in October, 1943, and 1,532,295 tons in October, 1944.

Centenary of Co-operatives

In December, 1844, a group of fewer than 30 workingmen opened for two evenings each week a small co-operative store on Toad Lane in the town of Rochdale, England. From that beginning, "the co-operative idea has spread throughout the civilized world." The International Co-operative Alliance, founded some 50 years after the store at Rochdale was opened, had in membership at the outbreak of the present war 141 National Unions and Federations drawn from 35 countries and having a total individual membership of over 72,000,000.

It is estimated that these co-operatives do about twenty billion dollars worth of business annually. Outside of England and Scotland, where there are over eight million members, the movement is strongest in the Scandinavian countries—particularly Finland, Sweden and Denmark.

In the United States the co-operative movement is young as compared with similar movements in some European countries, notably Britain, Sweden, Finland and Denmark. But it is vigorous and growing rapidly. So far, in the United States, the agricultural sections have developed co-operatives faster than have the urban sections. However, much has been done in the cities. For example, in New York City a consumer can live in a co-operative apartment house, eat in a co-operative cafeteria, buy his groceries in a co-operative food store, his books from a co-operative bookstore, his haberdashery, etc., from a co-operative mail order house, listen to a co-operative radio, smoke co-operative cigarettes, insure his house, his life, his automobile, obtain his recreation, medical and hospital needs co-operatively etc.[1]

At the end of 1941 there were 2,500,000 consumer members buying 700 million dollars worth of goods and services through co-operatives in the United States. In addition approximately 3,500,000 farmers, in over 10,000 co-operative organizations, handle roughly one-third of all the agricultural business in the country.

In Canada, co-operatives have made substantial progress in most of the provinces. The membership in 1942 exceeded 500,000 and the total business done was in excess of 250 million dollars. Wholesale co-operative societies are operating in most of the provinces and such organizations as the United Farmers of Ontario and the Co-opérative Féderée de Québec combine the functions of sales agency and wholesale buying agency for their affiliated local associations. As in the United States, early expansion in Canada took place in the marketing of farm products and this business has continued to show a marked and steady increase. A western farmer, for example, may deliver his grain to a co-operative elevator, livestock to a co-operative shipping association and milk to a co-operative dairy. He may also purchase a large proportion of his farm supplies and household necessities from a co-operative store and his tractor fuel and gasoline from his nearest co-operative oil station.

The Credit Union has become an important part of the co-operative movement in the United States and Canada. There are 10,000 of these in the two countries. More than 1,400 of them are chartered in Canada and each of the nine provinces has provided legislation governing their establishment and operation.[2]

Royal Commission on equal pay in Great Britain

On October 12 it was announced in the British House of Commons that a Royal Commission on Equal Pay had been appointed.

The Commission has been authorized "to examine the existing relationship between the remuneration of men and women in the public services, in industry and in other fields of employment; to consider the social, economic and financial implications of the claim of equal pay for equal work; and to report."

Labour convention ratified by Great Britain

Great Britain has become the first country to ratify the Sickness Insurance (Sea) Convention adopted by the International Labour Conference in 1936, the International Labour Office announced recently.

Governments ratifying the convention undertake to establish a system of compulsory sickness insurance to cover masters and members of the crews of ships registered in the ratifying country.

The fact that the convention has not been ratified by any other country is attributed by the Office to war conditions. The convention will come into force one year after a second nation ratifies it.

Great Britain's action brings to 888 the total number of ratifications of the 67 conventions which have been adopted by the International Labour Conference since 1919.

Recognition of 65-cent minimum wage standard considered in U.S.A.

A subcommittee of the United States Senate has been conducting hearings on a resolution that 65 cents an hour be defined legally as the minimum below which the U.S. National War Labour Board shall consider a straight-time hourly wage to be substandard. The resolution was introduced by Senator Claude Pepper of Florida.

At present the Board recognizes wages below 50 cents an hour to be substandard, in that it permits employers to raise wages which are below this level without obtaining the Board's approval. (The proviso is made, however, that such wage increases may not be used as a basis for increasing price ceilings of the commodity or service involved, or to resist otherwise justifiable reductions in ceiling prices.)

Under the resolution employers would be free to increase rates to 65 cents without the Board's approval, and in a dispute case where an employer refused a 65 cent demand the Board would be authorized to order it.

Representatives of various labour organizations have appeared before the subcommittee, favouring the adoption by Congress of the resolution, and submitting evidence as to the cost of living, family budgets, and other matters. The National Association of Manufacturers is opposing the change.

Closed shop banned in Florida and Arkansas

In the recent United States elections three states voted on constitutional amendments to prohibit the closed shop in collective bargaining agreements. The proposed measure was defeated in California, but adopted in Florida and Arkansas.

The Florida amendment specifies that "the right of persons to work shall not be denied or abridged on account of membership or non-membership in any labour union or labour organization." Containing a similar clause, the Arkansas measure also makes it unlawful for employers to enter into either oral or written contracts under which workers may be discharged for refusing to join, or for resigning from, unions. The Arkansas amendment further requires that the consent of individual employees to the check-off of their union dues must be obtained in all cases.

Committee reports on cost of living in U.S.A.

A committee appointed by the President of the United States to inquire into the wartime rise in the cost of living has submitted its findings. The committee contained representatives of the C.I.O., the A.F. of L., and industry, and was under the chairmanship of William H. Davis, public member of the U.S. National War Labour Board.

The official index compiled by the Bureau of Labour Statistics shows a rise in the cost-of-living index from 100 on January 15, 1941, to 123·4 on December 15, 1943. Reporting in advance of the rest of the committee the labour members came to the conclusion that the figure for December 15, 1943, should have been 144·4. They contended that the data used in the official index did not take into account certain wartime factors, such as quality deterioration experienced in wartime goods, disappearance from merchants' shelves of cheaper consumption items, a decline in special sales usually conducted by retailers, and an increase in under-reporting of prices actually charged.

Because of the wide difference in the two estimates, the American Statistical Association was thereupon asked by Mr. Davis to appoint a special group of experts to analyze the official index and the arguments of the labour representatives. This group concluded that the official figures were accurate for what they were intended to measure (i.e. "price changes for goods customarily purchased by families of wage-earners and lower-salaried workers living in large cities"), but that a "hidden increase" of 3 to 4·5 points caused by the wartime conditions mentioned by the labour members should be allowed for. Its findings were accepted by the majority of the President's committee, comprising the public and industry members.

The chairman, Mr. Davis, reported that since the Bureau of Labour Statistics index on September 15, 1944, was 125·5, a true picture of the cost of living at that date could be obtained by the addition of 4·5 points to represent wartime factors. He placed the true cost of living for September at 130 against 100 in January, 1941. Mr. Davis pointed out, however, that this addition failed to reflect the increased living costs of families in the lowest income groups, since a large proportion of their incomes is spent for food and clothing, the items that have had the highest rise, 40 per cent, in the period under discussion.

The labour members declared that the term, "cost-of-living index" was misleading, since the index measured prices only, and prices constituted only one factor in the cost of living. They suggested that the name be changed.

Increase in trade union membership in India

Membership in registered trade unions in British India has shown a steady growth in recent years, according to the *Indian Labour Gazette*. In 1942 returns were received from 455 of the 747 unions registered under the Indian Trade Unions Act, showing a membership of 573,520. In 1939 the total was just under 400,000. The number of women who were members of registered unions in 1942 was 17,094, as compared with 10,945 in 1939.

International committees for various industries favoured by I.L.O.

Among the matters to be discussed at the forthcoming meeting of the Governing Body of the International Labour Office are plans for the formation of international committees in various industries to seek agreement among the nations on labour standards.

The establishment of international industrial committees was authorized by the Philadelphia Conference of the I.L.O. last spring. At that time, however, no detailed decisions were

made on the subject, and the Governing Body was asked to elaborate regulations governing the activities of such committees.

The functions of the committees would include the formulation of proposals concerning the regulation of wages, conditions of employment and welfare arrangements in the industry concerned. It is contemplated that effect might be given to such proposals by the adoption of International Labour Conventions, or through the negotiation between employers and workers of collective agreements of an international character.

A problem to be worked out is whether the committees should be bi-partite (workers and employers only) or tri-partite (including government representatives).

The industries for which it has been suggested committees be established, according to a press statement by Mr. E. J. Phelan, Acting Director of the I.L.O., are the following: European inland transport; European coal mining; iron and steel production; engineering trades, including shipbuilding and aircraft and automobile manufacture and allied trades; and textiles, including cotton and rayon, and wool.

Meeting of Governing Body of the I.L.O.

A meeting of the Governing Body of the International Labour Office is scheduled to be held in London, England, on January 25. The meeting will be the first since the session which took place immediately following the International Labour Conference in Philadelphia, last May.

Among the matters to be dealt with, according to a press statement by Edward J. Phelan, Acting Director of the I.L.O., are the establishment of international committees for various industries as part of the I.L.O. structure; constitutional questions; employment policy; the regional activities of the I.L.O.; and the date, place and agenda of the next session of the International Labour Organization.

The forthcoming session of the Governing Body will be its 94th since the I.L.O. was established in 1919.

It will be preceded by meetings of two Governing Body Committees: the Committee on Constitutional Questions and the Committee on Employment. The former group which was set up at the Governing Body's last session in response to a proposal made by the Canadian Government delegation at the International Labour Conference, will make recommendations for the future constitutional development of the I.L.O.

The Governing Body is composed of representatives of the governments of 16 countries, 8 labour members, and 8 employers. Canada is represented by Mr. Arthur MacNamara, Deputy Minister of Labour, Government representative, and Mr. Percy Bengough, labour member; while Mr. Hugh W. Macdonnell, Toronto, is a deputy member of the employers' group.

I. L. O. Study on International Co-operation for Full Employment

Independent and uncoordinated decisions on commercial policy by national governments are likely to make difficult the realization of the objectives of full employment and economic development in the post-war period, according to an International Labour Office study published recently.

The authors of the study—J. B. Condliffe and Alexander Stevenson—declare that increased world trade is essential to the achievement of the social objectives demanded by the people of the United Nations. But any enlargement of the volume of international investment and the exchange of goods, they add, is dependent upon the international integration and co-ordination of national economic and financial policies.

Entitled *The Common Interest in International Economic Organization,* the study is designed, according to the International Labour Office, to provide "a simple statement of the benefits to be derived from international trade in the conditions of the modern world and of the ways in which these benefits might be secured without endangering the economic development and full employment on which social security and higher living standards must be based."

In the past, the study points out, policies aimed at increasing employment have frequently clashed with policies designed to encourage international trade and investment. Such a conflict is not inevitable, it says, provided there are international arrangements through which national policies can be co-ordinated and cleared. The success of international co-ordination, however, will depend on the attitude of national governments, the authors declare.

If, in attacking their domestic problems of economic demobilization and adaptation to the changing needs of the world market, the governments of the Great Powers will take account of the international repercussions of their domestic policies, "the way will be open for the establishment of a stable framework of international economic relations," the study says.

"If, on the other hand," it adds, "they follow the narrowly nationalistic, beggar-my-neighbor policies which brought chaos to international monetary and commercial relations in the period between the wars they will set the stage of a third world conflict."

Manpower

Changes in Lay-off Procedure

National Selective Service Civilian Regulations Amended

SEVERAL changes have been made in the National Selective Service Civilian Regulations in regard to the laying off of war workers. The changes are made by Order in Council P.C. 8726, the text of which is appended to this article.

War Plants Completing their Contracts

The first of the changes is intended to speed up lay-off procedure in the case of war plants which have completed their war contracts, and to help employees in these plants to take over other important work without undue loss of time. It gives the Director of National Selective Service authority to withdraw the classification "designated establishment" from any such plant or industry. Such action would mean that workers in the plant would cease to be "frozen" in their jobs, and likewise that the employer would be enabled to dismiss them without having to obtain written permission from a Selective Service Officer for the release of each individual employee. The employer would, however, still be required to given seven days' notice in writing or six day's pay in lieu thereof.

The Department of Labour has announced that where such lay-offs occur, occasioned by changes in war production needs, Selective Service Officers will as usual be on hand to help place employees in other jobs for which they are suited.

The new ruling amends the employment "freeze" section of the Regulations,[1] which was originally introduced in September, 1943; and was intended as a deterrent to labour turnover in plants doing essential work.

Under the "freeze" order firms having an "A" or "B" labour priority were classified as "designated establishments". Their employees were thereupon "frozen" to their jobs and could not quit or be discharged without the written permission of a Selective Service Officer.

The employment "freeze" will continue in effect for all firms of high essentiality, in order to maintain labour supply for war production needs, and will only be withdrawn in specific cases where war developments or the cancellation of war contracts make it necessary for the employer to lay off a number of employees.

Temporary Lay-offs

A further change in the Regulations has to do with situations in which a brief temporary lay-off is necessary.

An employer may now lay off an employee for one or more periods not exceeding in the aggregate 14 days within a six-month period without giving notice of separation. In such a case he must, within 48 hours of the commencement of the lay-off period, give the local office a notice in writing specifying the name of the employee concerned and the probable duration of the lay-off.

If within the six months an employee is laid off for an additional period beyond 14 days, without notice of separation being given, he will be entitled to claim wages at his normal full-time rate.

The six-month period, as specified in the Regulations, must begin on January 1 or July 1.

Cases Where 7 Days' Notice Not Required

In certain cases an employer is not required to give seven days' notice or six days' wages in lieu thereof before laying off an employee. This applies in the case of an employee if:

- (*a*) he is employed on building construction work;
- (*b*) he has been in the employment for a period of less than one month;
- (*c*) by reason of weather conditions or by reason of fire, explosion or other calamity, his services cannot be utilized; or
- (*d*) he has refused to accept a transfer under a collective labour agreement or practice in the industry in accordance with which employees have agreed or are accustomed to transfer from their usual employment to alternative employment with the same employer at a lower rate of remuneration.

However these exceptions do not apply where the employee has been directed to the employment under any of the compulsory

[1] L.G., Oct., 1943, p. 1333

features of the Regulations. If such compulsory direction has been given to the employee, then the employer is required to comply with the provisions of the Regulations relating to seven days' notice or six days' wages in lieu thereof.

Penalty for Non-compliance

A further change in the Regulations provides a special penalty in the case of an employer failing to give seven days' notice or payment in lieu thereof where so required. If an employer is convicted, the court may require him to pay the employee wages for a period up to but not exceeding six days. Additional penalties, in the form of fines and court costs, may also be imposed.

Victory Holiday

The term "Victory Holiday" is defined under the amendments as a day "proclaimed or declared a holiday by the Government of Canada or a province of Canada or by a municipality to mark or celebrate the cessation of hostilities in any theatre of war." A victory holiday may also be declared by any employer to celebrate an armistice. In any case, a victory holiday may not be counted among the seven days required for written notice or the six days required for payment of wages at the termination of employment.

The amendment also provides that an employer may pay wages or salary in respect of a victory holiday where an employee would not otherwise be entitled to receive them, "not withstanding the Wartime Wages Control Order, 1943."

Text of P.C. 8726

Whereas the Minister of Labour reports that changes in the military situation from time to time result in changes or reductions in the requirements of the armed forces with consequential effects on employment in the manufacture of munitions and supply in Canada; and

That it is therefore necessary by reason of the war, for the security, defence, peace, order and welfare of Canada, to make further provisions for the orderly control of employment and to provide financial assistance to those persons who may be, from time to time, out of employment as the result of changing employment conditions;

Therefore, His Excellency the Governor General in Council, on the recommendation of the Minister of Labour, and under the authority of the War Measures Act and the National Resources Mobilization Act, 1940, is pleased to amend the National Selective Service Civilian Regulations, as amended, and they are hereby further amended as follows:

1. Section 2 is amended by adding thereto the following paragraph:

"(x) victory holiday means a day proclaimed or declared a holiday by the Government of Canada or a province of Canada or by a municipality to mark or celebrate the cessation of hostilities in any theatre of war and, with reference to any establishment, includes a holiday declared by the employer to mark or celebrate the cessation of hostilities in any theatre of war."

2. Section 202 is revoked and the following is substituted therefor:

"202. (1) Except in cases to which subsection two of this section applies, an employer shall, before he lays off or terminates the employment of an employee,

(*a*) give the employee in prescribed form, in duplicate, seven days' notice of separation exclusive of the day on which the notice is given; or

(*b*) give the employee in prescribed form notice of separation and pay him in lieu of notice six days' wages or salary at the normal full time rate at which he was being paid immediately before the termination of the employment.

(2) Where an employee is not in employment to which he has been directed under this part and

(*a*) he is employed on building construction work;

(*b*) he has been in the employment for a period of less than one month;

(*c*) by reason of weather conditions or by reason of fire, explosion or other calamity, his services cannot be utilized; or

(*d*) he has refused to accept a transfer under a collective labour agreement or practice in the industry in accordance with which employees have agreed or are accustomed to transfer from their usual employment to alternative employment with the same employer at a lower rate of remuneration,

the employer shall give him notice of separation in prescribed form, in duplicate, before laying him off or terminating his employment.

(3) An employer may, in any period of six months commencing on the first day of a month of January or July, lay off any employee for one or more periods not exceeding in the aggregate fourteen days without complying with subsection one or two of this section.

(4) Where an employer lays off an employee under subsection three of this section, he shall, within forty-eight hours of the commencement of the lay-off period, give the local office a notice in writing specifying the name of the employee laid off and the probable duration of the lay-off period.

(5) After an employee has been laid off under subsection three of this section for the maximum time thereby permitted in a six months' period, he shall be deemed for all purposes of the contract of employment, to have been employed normal full time in the employment during any additional period in the six months' period during which he is laid off without having been given notice in accordance with subsection one of this section, and, without limiting the generality of the foregoing, he shall be entitled to recover wages or salary in

respect of the period during which he is hereby deemed to have been employed at the normal full time rate at which he was being paid immediately before the beginning of the lay-off period in any court of competent jurisdiction.

(6) Except when he is terminating his employment to undergo alternative service under the National Selective Service Mobilization Regulations or to enter service in His Majesty's Canadian armed forces, an employee shall, before terminating his employment, give to his employer in prescribed form, in triplicate
(a) seven days' notice of separation exclusive of the day on which such notice is given; or
(b) such shorter notice as the Selective Service Officer allows,
unless he is employed on building construction work or has been in the employment for a period of less than one month, in which event he shall give his employer notice of separation in prescribed form, in triplicate, before terminating his employment.

(7) Where an employer gives an employee notice of separation under this part the employee shall forthwith acknowledge receipt thereof by signing one copy in the prescribed place and return such copy to the employer.

(8) Where an employee gives an employer notice of separation under this part, the employer shall forthwith acknowledge receipt thereof by signing one copy in the prescribed place and return such copy to the employee.

(9) Every employer who gives or receives a notice of separation under this part shall retain one copy thereof and shall, within forty-eight hours of giving or receiving such notice deliver a copy thereof to the local office.

(10) The provisions of this part with respect to the giving of notice of separation shall not supersede any law, statutory or otherwise, requiring a longer notice.

(11) No employer or employee shall be bound by this section insofar as it is inconsistent with any right or privilege of the employer or employee, as the case may be, under an existing collective labour agreement which was entered into prior to the first day of September, nineteen hundred and forty-two.

(12) Notwithstanding the Wartime Wages Control Order, 1943, where an employee would not otherwise be entitled to wages or salary in respect of a victory holiday, the employer may pay wages or salary in respect of that day but is not, by reason only of this subsection, obliged to make such a payment.

(13) No notice of separation under this part shall be given on a victory holiday and no victory holiday shall be reckoned in the computation of the period specified in a notice of separation given under this part.

(14) Where a notice of separation has been given under this part, the employer shall employ the employee, and the employee shall work, normal full time in the employment during the period specified in the notice.

(15) Where an employer lays off or terminates the employment of an employee without complying with subsection one of this section, the employee may recover in any court of competent jurisdiction the amount the employer is by this section required to pay him in lieu of notice."

3. Section 202A is amended by revoking subsection four thereof and substituting the following therefor:

"202A. (4) (a) Subject to the provisions of section 203 of these regulations, an employer whose establishment has been classified as a 'designated establishment' shall not terminate the employment of an employee or lay him off without the permission in writing of a Selective Service Officer.

(b) An employee whose employer's establishment has been classified as a 'designated establishment' shall not terminate his employment or cease to perform his duties in his employment, without the permission in writing of a Selective Service Officer.

(c) Where an employee applies for permission to terminate his employment in order to take similar employment in the same industry the Selective Service Officer shall, in accordance with directions and instructions issued by the Director, grant such permission unless special circumstances exist.

(d) Application by an employer for permission to terminate the employment of an employee or lay him off, or an application by an employee to terminate his employment shall be made in such form and in such manner as the Director may prescribe.

(5) The Selective Service Officer may, in accordance with principles and directions set out in instructions given by the director, by a notice delivered to the employer, withdraw an "A" or "B" labour priority rating given to an establishment and the establishment shall thereupon cease to be a 'designated establishment.'

(6) An employer to whom a notice has been given under subsection five of this section, or any of his employees, may, notwithstanding this section, give notice of separation under section 202 without the permission of a Selective Service Officer.

(7) An employer to whom a notice has been given under subsection five of this section shall forthwith post three copies thereof in the establishment in conspicuous places where the employees affected are employed."

4. The following section is inserted after section 607 thereof:

"608. Where an employer is convicted of failing to comply with subsection one of section 202 before laying off or terminating the employment of an employee, the Justice or Justices of the Peace, Magistrate, Judge or Court by whom he is so convicted shall, in addition to imposing a penalty under section 605, order the employer to pay to the employee the amount that he is, by section 202, required to pay him in lieu of notice unless the payment has been made before the employer is convicted and an order made under this section shall be enforced as an order made under Part XV of the Criminal Code."

Payment of Soldiers Detailed for Duty in Civilian Employment

AN Order in Council of December 5 (P.C. 9148) specifies the amount of pay that may be received by members of the military forces of Canada who have been detailed for duty in civilian employment. Such men shall in future receive only their military pay and such allowances as they may be entitled to. Employers, however, will be required to reimburse the Department of National Defence at prevailing rates of pay for the work undertaken.

The order states that:

"(1) A member of the military forces of Canada who otherwise than being seconded therefor is performing service or duty in civilian employment or on a project or undertaking deemed to be in the national interest pursuant to Order in Council shall, notwithstanding that a larger amount is being paid in respect of the services of such a member of the forces in consequence of his having been detailed as aforesaid that member shall for the period he is performing such service or duty receive only his military pay and allowances including Dependents' Allowance to which he may be entitled, or an amount equal thereto.

"(2) The Minister of Labour and the Minister of National Defence are hereby authorized to make such arrangements as they deem necessary or advisable for the proper accounting of monies payable to the Crown by employers in respect of service or duty performed by members of the military forces of Canada as aforesaid. Such monies will be deposited to army funds during the current year as a credit to army appropriation for pay and allowances. When such monies are applicable to a previous fiscal year, they will be deposited as a credit to the Consolidated Revenue Fund."

The Order is in effect as from the first day of December, 1944.

Coal Labour Survey

AS a result of a continuing decrease in coal production and an unbalanced distribution of labour as between datal workers and those working at the face in Nova Scotia coal fields, it was decided at a meeting of officials of the Department of Labour and Munitions and Supply, held in Ottawa on September 25, to conduct a Coal Labour Survey.

The survey covers all mine employees, excepting those working at the face, administrative, or office personnel. Its purpose is to determine, by direct approach to the workers themselves, the reasons why a greater number of those men who are qualified to work at the face are not producing coal.

Before the survey was started, the Nova Scotia Government, the mine operators, and the executive of the United Mine Workers of America were advised, and their co-operation requested.

The survey proper consisted of two forms, one a questionnaire which was mailed to the home of the worker, and returned by mail to one of three points where special office accommodation and staffs were set up by National Selective Service. The second form, or questionnaire was completed by the operators and returned to the offices.

The information was then reviewed by a specially selected staff of National Selective Service Officers and arrangements made to personally interview certain of the workers for the purpose of gaining still further factual information.

The questionnaires were designed to obtain, to as great an extent as possible, factual information regarding the worker and his work; to extend to him an opportunity to freely express, in his own way, the reasons why he was not working at the face in the production of coal. Through the press, by radio, by the use of special posters, and advertising supplemented by local meetings, the workers were made aware of the intent and purpose of the survey, and although the results of the survey are not yet known, the return of approximately 75 per cent of the questionnaires sent out is the direct result of the splendid co-operation of the executive of the United Mine Workers of America, and the workers themselves, and clearly indicates a keen interest in not only the present, but also the future of the coal mining industry in Nova Scotia.

Dominion-Provincial Farm Labour Program, 1944

Review of Activities in Supplying Manpower to Meet Increased Food Production Requirements

CANADIAN farmers, 400,000 fewer than in 1939, have been asked to meet larger production objectives in each successive year of the war. In 1944 their fields were sown to provide more grains, forage crops and vegetables; their herds and flocks were increased to produce more milk, eggs and meat. This fall their abundant harvests were reaped, with the help of tens of thousands of civilians and servicemen. Their year-round tasks on dairy and livestock farms were eased through placements made by Employment and Selective Service Offices, Provincial Agricultural Fieldmen and Local Agricultural Production Committees. Increased application of farm machinery and labour saving devices, and greater efficiency in the use of labour, have contributed to meeting both seasonal and year round labour requirements.

The framework in which the varied sources of help made their contribution has again been the Dominion-Provincial Farm Labour Agreements, made between every province and the federal Department of Labour.[1] These Agreements during the current fiscal year provide for a Dominion expenditure of $600,000 to assist the provinces on a 50-50 basis in organizing farm labour supply. Additional Dominion items of $75,000 and $300,000 provide for publicity and interprovincial transportation of farm labour respectively.

This joint federal-provincial program has proven to be an effective means of dealing with the farm labour situation. It has made possible a close working arrangement between National Selective Service, which has over-all responsibility for manpower under the War Measures Act, and the provincial authorities directly interested in promoting agricultural production. Moreover, through the provincial agricultural fieldmen, with their special training and knowledge of local conditions and needs, co-operating with the federal Employment and Selective Service Offices, duplication of effort has been avoided. The "partnership" has also permitted flexibility in the program to meet varying conditions across the Dominion and has made possible large scale movements of labour between provinces to meet urgent farm labour requirements.

1 See Order in Council P.C. 3492; *L. G.*, May 1943, p. 568; *L. G.*, November 1943, p. 1477.

Year-round Farm Labour

Securing experienced workers for year-round employment on dairy and livestock farms continued to be one of the most difficult problems during 1944.

The continuing policy of granting postponement of military service to men engaged in essential agriculture was of material assistance. This policy has resulted in a better distribution of farm workers through many men being granted postponement on the condition that they move from their own farms, where they are not considered essential, to those farms where they are needed.

Men who receive postponement of military training as conscientious objectors may be directed by N.S.S. Alternative Service Officers to farms or other essential industry. There are 9,465 postponed conscientious objectors, of whom approximately 80 per cent are engaged in agriculture.

During 1943 the passing of an Order in Council[1] provided authority for the compulsory direction to employment of men called up under the National Resources Mobilization Act, but rejected on medical grounds. Plans were developed and put into operation through the joint farm labour organizations across Canada for checking the essentiality on their own farms of men rejected from military service. Those not needed at home, and physically able, are being used on other farms where they are badly needed.

Assistance for dairy and livestock farmers urgently needing help has also been provided through sons being granted compassionate farm leave from the army to return home.

In the Ottawa Valley and the Brooks and Strathmore districts of Alberta considerable relief for dairy farmers has been secured by placing prisoners of war on individual farms for the year round.

Seasonal Farm Labour

Seasonal requirements of farm workers are also handled under the Dominion-Provincial Agreements. Special measures have been taken to meet farmers' peak needs in the seeding, haying and harvesting seasons.

1 Order-in-Council P.C. 7260, September 16, 1943.

Inter-Provincial Movements

One of the most important means of meeting the seasonal labour requirements is by increasing the mobility of farm labour through inter-provincial movements.

During peak harvesting seasons, several excursions were arranged, whereby persons from one part of the country went to work in another region. These were facilitated by special transportation arrangements with the Canadian National Railways and the Canadian Pacific Railway. Round trip transportation was provided at the single fare rate. Each harvester paid a small amount towards his return ticket.

During June arrangements were made with the provinces and the railways for the recruitment of approximately 300 women workers from Alberta and Saskatchewan to help on fruit and vegetable farms in British Columbia. This movement began about the middle of June and continued through part of July.

Another movement began about June 19, when experienced farm workers were recruited from the Prairie Provinces to help with haying and early harvesting on Ontario farms. Some 855 men came from the West into Ontario; 55 from Manitoba; 700 from Saskatchewan; and 100 from Alberta. During August these men returned to the Prairies when their own harvest was ready.

The main excursion, namely from Eastern Canada to the Prairies, was repeated this year.[1] More than 6,000 persons went into the West for harvest operations.

The outgoing movement began on August 12 from Ottawa and Cornwall, August 15 from the rest of Ontario, and about August 20 from Western Quebec. During 1943 no workers were sent to the West from Quebec, but this year the excursion was open to points west of Quebec City, excluding the counties of Frontenac, Beauce, Dorchester, Bellechasse, Montmorency, Lake St. Jean, and all others to the East. Workers in some of these excluded areas were later recruited for potato picking in the State of Maine.

This year women who had experience in agriculture were permitted to take advantage of the excursion to work on designated Western farms, usually their home farm. Approximately 500 went to the Prairies under this arrangement. The following table shows the numbers of harvesters recruited:—

HARVEST EXCURSION TO PRAIRIES, 1944

	Ontario	Quebec	Total
Men from Farms..	4,227	742	4,969
Men from Industry.	737	251	988
Women	498	29	527
Total	5,462	1,022	6,484

Assistance of Service Personnel

A second important source of farm labour was provided by the Armed Services. Various plans were put into effect, most of which were designed to assist hard-pressed farmers during the peak seeding and harvesting seasons.

The Army and the Air Force both provided spring and harvest leaves. These enabled men with farming experience to go to farms where their services were needed for a period of from one to two months. The Army also put into effect again the Farm Duty Plan developed during 1943, under which men were sent to the farms under military direction at the request of the Provincial Directors of the Dominion-Provincial Farm Labour Program.[2] A third kind of leave, Compassionate Farm Leave enabled men to return to their own or their parents' farms to meet urgent situations. By special arrangements made with the Department of National Defence, the Department of Labour paid for the transportation and a pair of overalls for service men who assisted with harvesting. Where the transportation was wholly within a province, the expenses were shared equally by the Department of Labour and that province.

From the Army, approximately 11,000 men were out on special harvest or compassionate farm leave, compared with around 6,500 who were out on spring leave or compassionate farm leave at the end of May. Another 3,300 soldiers were detailed under the Farm Duty Plan to assist with harvesting. As a result of special spring and harvest leaves granted by the Air Force, 2,300 airmen returned to their own farms to help put in the crops and 3,100 obtained harvest leave.

The Department of Labour negotiated a special arrangement with the Department of National Defence (Navy), whereby approximately 600 men were made available to help with harvesting in Ontario and the Prairie Provinces.

[1] Arrangements were made with the railways late in the summer for a fourth excursion from eastern Quebec to the Maritime Provinces for late grain harvesting and potato and apple picking. When arrangements for the movement were completed, sufficient labour had become available within the Maritimes to meet the crisis. As a result only three workers were moved under this excursion.

[2] Canadian Army Routine Order 3456.

Local Community Activities

In addition to the sources of labour already noted, it is estimated that well over 150,000 men, women, boys and girls from towns and cities throughout the Dominion helped farmers during their holidays, over week-ends and "after hours". These people rallied to the call for harvest help through the unremitting efforts of local committees co-ordinating the activities of government, trade and service organizations.

These local activities were organized by the Dominion-Provincial Farm Labour Agency in each province. These workers were encouraged to go out to farms through the payment of transportation expenses, and through intensive advertising over the radio, in films and newspapers and on posters, undertaken by local, provincial and federal authorities. Hay, grain crops, fruit and vegetables would have been lost, had it not been for the generous and timely assistance of these seasonal volunteer workers throughout Canada.

Special Projects

More extensive use was made of prisoners of war in farming operations. A prisoner of war camp was established in the Chatham area of western Ontario, from which 300 prisoners worked from May until late October on nearby farms. Two hostels, each housing 100 prisoners, were opened in eastern Saskatchewan; these men assisted farmers with stooking and threshing. Some 800 prisoners worked on farms in the Lethbridge area of Alberta. Four hundred came from the main camp at Lethbridge, and four hostels were set up in the vicinity to house 100 prisoners each. At the end of August more than 1,400 prisoners of war were working on farms.

Because of special problems arising in the tobacco areas of Ontario, National Selective Service introduced measures to provide an orderly control of the labour required for harvesting the crop. All male tobacco workers, outside of operators, required National Selective Service permits and distribution of the labour was effected through the establishment of eleven temporary offices.[1]

With the assistance of a special N.S.S. Tobacco Advisory Committee of growers, an active campaign was carried out to recruit all available labour for harvesting the large crop. Some 700 soldiers, from an operational unit located in the Maritimes, were detailed on Farm Duty to assist in meeting the harvest emergency in the tobacco area. Some 1,500 expert tobacco curers were brought into Ontario from the tobacco growing areas of the southern United States.

Indians recruited in Manitoba, Saskatchewan and British Columbia provided another special source of help. From reserves in northern Manitoba, approximately 700 Indians were transported by boat down Lake Winnipeg and distributed to farms in the province during the harvest season. The Superintendent of Indian Agencies for Saskatchewan estimates that 2,500 Indians assisted in harvesting. In British Columbia, Indians rendered valuable service in haying in the interior and in picking fruit in the Fraser, Okanagan and Kootenay Valleys.

Of the other special sources of seasonal farm help, reference should be made to the excellent contribution made by Canadian-Japanese on farms and in canneries, in British Columbia, Alberta, Manitoba and Ontario.

International Movements of Farm Labour

In addition to the help recruited within the provinces, and the movements of labour between them, the farm labour program had an international aspect.

Early in the summer, Canada and the United States arranged for the interchange of harvesting equipment between the Prairies and the mid-western States, on a basis similar to 1943. The agreement came into operation early in July when a number of Canadian combine units entered the United States. These units remained in the United States until they were needed for Canadian harvesting. When the grain crops were harvested, American units were permitted to enter Canada and remain to assist in harvest operations until the end of the year. This agreement is to continue until the end of the war.

Mention has already been made of the tobacco workers who came into Canada from the Southern States. Canadians crossed the border in September to help harvest potatoes. Into Maine went 1,490 men and women from the province of Quebec and Madawaska County of New Brunswick; 469 of these workers were women. In the west, some 200 women and youths from the Morden area of Manitoba went into North Dakota to pick potatoes. Indians from British Columbia went into the State of Washington to pick small fruits.

Winter Work in Other Essential Industries

In the fall, when harvesting operations were completed, an appeal over the radio, through the press and in the movies, went out to

[1] Order-in-Council, P.C. 5819, August 6, 1943.

farmers to go into the woods, into food processing plants, onto railway track maintenance, and into other essential industries, when they could be spared from farming operations during the winter.

It is the responsibility of Employment and Selective Service Offices to issue temporary permits to these farm workers only if their absence from the farm will not interfere with agricultural production. This also protects the present farm labour force by ensuring that these men return to their farms in time for spring operations.

At the end of November, authorization had been granted to 54,712 farmers to leave their farms temporarily for other essential work. Farmers who take other essential work during the fall and winter do not lose their postponement from military training.

This movement of men who can be spared from their farms during the winter months into other essential industries, gears into the overall manpower policy. The goal is to have every physically able man doing a job all the year round which will contribute to the winning of the war.

Dumbarton Oaks Proposals

THE text of the Dumbarton Oaks Proposals, relating to the establishment of a general international organization to maintain peace and security, has been published in pamphlet form by the Wartime Information Board, Ottawa, and copies are available upon application.

The Proposals were agreed upon by representatives of the United Kingdom, the United States, the U.S.S.R. and China at Dumbarton Oaks, Washington, U.S.A., in October, 1944.

They look to the establishment of an international organization, under the title of *The United Nations,* whose purposes should be:

> 1. To maintain international peace and security; and to that end to take effective collective measures for the prevention and removal of threats to the peace and to bring about by peaceful means adjustment or settlement of international disputes which may lead to a breach of the peace;
> 2. To develop friendly relations among nations and to take other appropriate measures to strengthen universal peace;
> 3. To achieve international co-operation in the solution of international economic, social and other humanitarian problems; and
> 4. To afford a centre for harmonizing the actions of nations in the achievement of these common ends.

As its principal organs, it is proposed that the Organization should have:

(*a*) a General Assembly (on which all the member nations would be represented);
(*b*) a Security Council (consisting of one representative each from the United Kingdom, the U.S.A., the U.S.S.R., China, and France, as permanent members, and one representative each from six states elected for a two-year period by the General Assembly);
(*c*) an international court of justice; and
(*d*) a Secretariat.

Provision is also made for an Economic and Social Council, which would deal with international economic, social and other humanitarian matters, subject to the authority of the General Assembly. It is suggested in the Proposals that the Council would co-ordinate the activities of various specialized economic, social and other organizations and agencies.

In commenting on the Proposals the Prime Minister of Canada, the Rt. Hon. W. L. Mackenzie King, said that the Canadian Government welcomed the very large measure of agreement which had been reached between the representatives of the Governments of the United Kingdom, United States, Soviet Union and China at the talks at Dumbarton Oaks.

He pointed out that the Governments themselves were not themselves committed to the acceptance of the plan, and that further meetings were anticipated.

The Proposals are, he declared, "but the first stage in the development of a draft Charter for consideration by all the United Nations. They have still to be accepted and supplemented by the initiating Governments before they are submitted to other countries for their consideration. When they are so submitted the intention is that a full United Nations Conference should be convened at which it is hoped that final proposals will be developed. Before the draft Charter takes its final form, there will be full opportunity for its revision in the light of the views expressed by other countries...

"It is scarcely necessary for me to say that, before any final commitment is entered into with respect to the participation of Canada in a general international organization, there will be the fullest opportunity for discussion in the Parliament of Canada."

Labour-Management Production Committees

Labour-Management Production Committees in Post-war Period

Statement of Government Policy—Increase in Committees—Results of Questionnaire

THE Honourable C. D. Howe, Minister of Munitions and Supply, and Reconstruction, and the Honourable Humphrey Mitchell, Minister of Labour, in a joint statement have announced the Government's intention to continue to encourage and promote the formation of joint production committees in the reconstruction and post-war periods. The statement reads:

"The experience of war industries has justified our experiment in joint labour-management production committees. These committees have promoted industrial co-operation by creating a better understanding and mutual confidence between management and labour. Their work has served to increase the output of war goods, to lower costs, and to improve efficiency.

"Since maximum production and harmonious relations between labour and management will be essential to the successful solution of the problems which we shall have to face, we hope that these joint production committees will continue to function in the reconstruction and post-war periods. Where no Committees have as yet been set up, we hope that advantage will be taken of every opportunity to do so. Government, labour and management will look to these Committees for advice on many problems.

"In so far as possible, it is the intention of the government to continue to encourage and promote the formation of Joint Production Committees representing labour and management, to assist us in meeting both the continuing problems of war and the problems of reconversion."

Increase in Committees

The number of labour-management production committees on record with the Industrial Production Co-operation Board at September 30 was approximately 250, an increase of about 50 since June 30. The Board has its headquarters in Ottawa, and is assisted by an Advisory Board containing representatives of labour and management. The work of increasing the number of committees is continuing also through the Board's field representatives, who are stationed across the country and are assisting in the setting-up of committees in specific plants and industries.

Survey of Twenty-eight Labour-Management Production Committees

A survey of 28 Canadian labour-management production committees was conducted in the spring and summer of 1944 through the medium of a questionnaire sent to the management of the plants concerned by W. R. Dymond, Department of Political Economy, University of Toronto. The survey includes 14 committees in the aircraft industry and 14 in other industries as varied as steel fabrication, brass products, business machines, meat packing, brewing, baking, rubber products, coal mining, engineering, ordnance and others.

The oldest Committee was set up in March, 1941, 11 were established in 1942, 13 in 1943, and 3 in 1944. The plants covered employ approximately 75,000 workers—50,000 in the aircraft industry and 25,000 in other industries. They range in size from one employing over 10,000 workers to one employing 150 workers. Twenty-three of the plants have collective bargaining relations with trade unions, of which 21 are affiliated with international bodies and 2 are independent. Of the other 5 plants, 3 have no employee organizations and 2 have an employee representation plan.

The size of the joint committees varied from 24 to 8 members. The most common type consisted of 10 members made up of 5 management and 5 labour representatives. The committees did not always have equal representation from management and labour, for in at least 4 cases the labour representatives outnumbered the management representatives.

Several different methods of chairing committee meetings were used, Prof. Dymond states. Fourteen committees had a management representative as chairman, 3 had a labour representative, 3 had co-chairmen for each meeting, and 6 had chairmen alternating

between management and labour members at successive meetings. A number of aircraft plants favoured having the personnel director of the plant as permanent chairmen of the joint committee.

Answers to a questionnaire provide an evaluation by management of the success and operation of the committees covered according to Professor Dymond.

An overwhelming majority of those replying found that the committees had been of benefit to the production program and had been so used by labour. None reported any attempt by labour to encroach on management's functions. An improvement in labour-management relations was noticed by 85 per cent. Only 4 per cent had encountered much hostility to the committees and their recommendations by foremen and minor plant officials. In reply to the question "Does the presence of a union in your plant make for the more successful operation of a Production Committee?" answers from firms having unions were "yes" 48 per cent; "no" 13 per cent; and "don't know" 39 per cent.

Application of Workers' Suggestions

To Combine:
1. Parts.
2. Operations.
3. Tooling (dies, forms, blocks, jigs).

To Improve:
1. Layout of machines, equipment or working areas in shop and office.
2. Design of parts to simplify fabrication or improve uniformity.
3. Moving of material to production lines or at machines.

To Change:
1. From a difficult to a more simple operation.
2. From a hand operation to a machine or foot pedal.
3. The sequence of operations to eliminate set-ups.
4. To use fast acting clamps, pins, guides or stops for positioning devices.

2. To Improve:
   1. Storage, packing or shipping.
   2. Factory trucks, tote boxes, racks and bins.
3. Protection and better maintenance of electrical motors, lines or equipment.
   Better maintenance of steam and water pipes.
   Cleanliness of washrooms.
   Maintenance of buildings, sheds, garages, power houses.

4. Generally:
   1. To eliminate unnecessary travel by persons or parts.
   2. To eliminate waiting for materials, or parts.
   3. To eliminate paper work, forms or retyping.
   4. To improve office procedure, filing methods, etc.
   5. To eliminate waste of light, heat and power.

5. To make work easier.
   To reduce fatigue.
   To improve ventilation, elimination of dust or bad odours.
   To improve lighting conditions.
   To better plant cleanliness.
6. Fire precautions—to eliminate hazards.
7. Safety precautions—to eliminate hazards and accidents.
8. Protection of products, plant and people from sabotage.

For guidance to labour-management production committees in making the most efficient use of employees' suggestion systems, the Industrial Production Co-operation Board, Ottawa, has issued the following list of possible applications of workers' ideas.

Suggestions may apply

1. To any method to increase rate of production.

To Eliminate:
1. A part or parts in the product.
2. An operation or excess finish.
3. Excess material or excess weight.
4. Tooling that is expensive or unnecessary.
5. An unnecessary moving part on a machine.

Guaranteed Employment Plans in United States and Great Britain

Annual Incomes for Workers as Factor in Stabilizing Employment

IN recent years there has been a steadily growing interest shown by sections of organized labour in guaranteed annual incomes for workers in the United States and Great Britain. The plan is promoted under a variety of titles, as for example: "annual wage system"; "income security for industrial workers"; "1,500-hour work-year"; "straight time"; etc.

This development had its origin in the efforts of certain industries in the United States, more or less seasonal in character, to stabilize employment in their own plants. At first, according to reports, the workers were apathetic and in some instances suspicious of the plan, viewing it as a possible scheme to reduce wages. But as it evolved and the advantages became more apparent, the workers in the plants concerned gave it their approval and support.

That the United States Government recognized its potential value is evidenced in the provisions of the Social Security Act of 1935 and the Fair Labour Standards Act of 1938, which offered inducements to companies to regularize employment. The Social Security Act stipulated that States might incorporate in their unemployment compensation laws a provision allowing tax credits to companies which guaranteed to all their employees 30 hours of wages for each of 40 calendar weeks, with one weekly hour of wages deducted for each additional week guaranteed in the year. The Fair Labour Standards Act also granted a partial exemption from the overtime pay provisions to those companies which sign a union agreement guaranteeing 2,000 hours of wages per year to their employees.[1]

Development of the annual-wage idea was slow and "only a fraction of one per cent of the 7,000 union agreements on file with the Bureau of Labour Statistics (Washington, 1940) contain annual wage or guaranteed employment provisions." The reason for this infrequency is reported to have been that, as a rule, the only companies that felt they could guarantee full-time employment, or an annual wage in advance were those who had already largely solved the problem of regularizing employment. Further, in a number of the agreements designed to guarantee permanent employment in varying degrees, escape clauses to some extent invalidated their purpose. However, it is noteworthy that at least some of the industries who pioneered in guaranteed employment plans were markedly seasonal in their operations. The *Survey-Graphic* in a recent issue records the experience of the Proctor and Gamble Co., soap manufacturers and of George A. Hormel and Co., meat packers. Both of these industries were seasonal, the former because of the fixed buying habits of wholesalers and the latter because farm animals are marketed mainly in the spring and autumn.

To circumvent buyers' prejudices the Proctor and Gamble Co. established a system of selling directly to retailers, and thus creating an all-year-round market for their products. It was a costly expedient at first, but the company felt it was justified if it succeeded in overcoming constant labour turnover and the alternate rush and shutdown of an earlier period. These adverse factors were in this way practically eliminated from Proctor and Gamble plants, and made possible the success of the guaranteed employment plan that was subsequently applied in the Company's establishments in the United States and Canada.

The Hormel Company approached the problem from a different angle. After careful analysis it decided, in 1931, to put the workers in one department on an annual wage, as an experiment. This was gradually extended to other departments until at present 98 per cent of their employees, irrespective of alternate rush and slow periods, get the same pay every week in the year. By developing production sidelines the company was able to stabilize the plan still further.

During the present year, the Congress of Industrial Organizations has made a guaranteed minimum annual wage for industrial workers one of the principal points under negotiation with employers in two of the large steel industries and their subsidiaries. The clause which the C.I.O. proposed to have included in collective bargaining contracts stipulated that the annual wage shall be based upon the straight time average hourly earnings for a forty-hour week during the life of the contract and that for each week in the

[1] *Monthly Labour Review*, United States Department of Labour, August, 1940.

life of the contract in which "the employee, for reasons beyond his control does not receive a sum equal to the minimum, the company shall make up the difference."[1]

This clause was contested by the Steel companies mainly on the ground that there were frequent and wide fluctuations in the demand for their products, both in the home and export markets.

While admitting that the principle involved is desirable, "how", the Companies asked, "can you guarantee full annual employment in an industry whose monthly production rose 50 per cent in 1929 over previous levels; fell in 1932 to one-quarter of the 1929 output; rose irregularly until in 1937 it again touched the 1929 level; within one year decreased by two-thirds; then climbed by 1943 to a position eight times greater than the low year, 1932."[2]

The National War Labour Board decision in the dispute involving 86 basic steel companies and approximately 400,000 employees, represented by the United Steel Workers of America (C.I.O.) was completed on November 25. While the issue was somewhat confused by other factors in the dispute, such as a demand for increase in wages to offset the effects of the "little steel formula", the Board stated that "in the present state of the country's information on the subject (of guaranteed annual wages) the Board is not prepared in this case, or in any other dispute cases, to impose such guarantees by order" although such plans worked out by collective bargaining would be approved.

In a separate report to President Roosevelt the Board unanimously recommended that "the whole question of guaranteed wage plans and the possibility of their future development in American industries as an aid to stabilization of employment and the regularization of production should now be studied on a national scale." The Board further recommended that "such study should be conducted by a specially appointed commission . . . . that such a body would be best able to perform its nationally important tasks if created independently of the National War Labour Board by the President . . . ."[3]

Guaranteed Employment in Great Britain

The "guaranteed week" for "essential" workers in Britain was introduced in April, 1941, by Government Orders, after consultation with management and labour. By May, 1943, these "Essential Work Orders" covered approximately 8,000,000 British workers. On the basis of population this would be equivalent to about 23,000,000 in the United States.[4]

Before a plant is scheduled as "essential", the Minister of Labour has to satisfy himself that the work is essential for the conduct of the war, that satisfactory provision for the welfare of the workers exists or is being made, and that wages and working conditions are "not less favourable than the recognized terms and conditions" in that industry in that district. All of which means that employers have to "come up to the standards achieved by collective bargaining."

On the other hand, the worker must be "capable of and available for work" during "normal working hours." If work is not available at his usual job, he must be willing to do any other jobs which he can be "reasonably" asked to do.

After a plant has been "scheduled", all the workers (or all the workers doing certain jobs) are "frozen" to their jobs. A worker cannot quit and his employer cannot dismiss him, except for serious misconduct, without the written permission of the representative of the Minister of Labour. However, if either party is dissatisfied with a specific arrangement an appeal can be made to the Local Appeal Board, which is composed of representatives of labour and management.

Labour Organization in Canada

THE thirty-third Annual Report on Labour Organization in Canada, for the year ending December 31, 1943, has just been published. It may be obtained for 25 cents from the Department of Labour.

Trade union membership in Canada increased substantially during 1943, although less than during 1941 and 1942. There were 664,533 members at the end of 1943, an increase of about 15 per cent above the 578,380 in 1942 and more than 85 per cent above the 358,967 in 1941. Somewhat more than one-fifth of the non-agricultural wage and salary workers are members of trade unions in Canada.

Union membership in the metal industries continued to increase during 1943, although

less rapidly than during the previous year. This is much the largest group of industries, having 30 per cent of the total union membership in Canada in 1943. The 23·2 per cent expansion of membership in the group during the year may be attributed to the continued diversion of labour from civilian to war production and allied industries, to greater organizing efforts put forth by the larger industrial unions, and to the development of machinery for collective bargaining. The second largest group is "steam railway transportation" which has 16·4 per cent of the total union membership for 1943.

The accompanying tables show the distribution of membership by industrial groups in 1942 and 1943, the percentage increase (or decrease) in membership in each group during the year, and the 1943 membership classified according to affiliation.

The trend of increasing concentration of trade union membership in the industrialized provinces which have experienced the greatest expansion of factory employment continued during 1943. About 64 per cent of the total membership as reported by the local unions in 1942 and about 65 per cent in 1943 was concentrated in Ontario and Quebec. Of the 3,735 locals known to be in existence, ?,204 were in these two provinces.

Likewise, unions throughout Canada showed a tendency toward concentration in the larger urban centres, paralleling the expansion of factory production and employment. Three leading centres of industry and population, Montreal, Toronto, and Vancouver, together had 17·3 per cent of all local unions in Canada and 38·5 per cent of the members of local unions which reported in 1943.

The Report contains a brief historical statement and shows the membership, the names of the officers and the affiliated unions of the Trades and Labour Congress of Canada, the Canadian Congress of Labour and the Canadian and Catholic Confederation of Labour.

For each national and international union are shown the membership, the number and location of their branches and the name and address of the secretary. In the case of an international union, the names and addresses of the Canadian officers are given.

In addition, there are included lists of provincial federations, local labour councils, federations of unions in allied trades or industries, district union councils, and railroad brotherhood committees, with the names and addresses of their presidents and secretaries. Some notes are included concerning the nature, functions, and interrelationships of the constituent parts of the framework of labour organizations.

Also, the Report gives information concerning female memberships; benefits paid by headquarters of national and international unions and by local branches on behalf of Canadian members; teachers' associations; and organizations of other public employees, including those employed by the Dominion, provincial and municipal governments.

The accompanying chart shows the growth of trade union membership in Canada since 1911.

DISTRIBUTION OF TRADE UNION MEMBERSHIP BY MAIN INDUSTRIAL GROUPS 1942 AND 1943 AND THE PERCENTAGE INCREASE IN 1943 OVER 1942

Industry	1942(1)		1943		Percentage increase 1943 over 1942
	Membership	Percent of total	Membership	Percent of total	
Mining and Quarrying	34,915	6·0	36,825	5·5	5·4
Metals	161,797	28·0	199,487	30·0	23·2
Construction	50,223	8·7	60,084	9·0	19·6
Light, Heat and Power	6,545	1·1	7,918	1·2	20·9
Wood and Wood Products	33,986	5·9	38,689	5·8	13·8
Printing and Publishing	11,738	2·0	10,579	1·6	(2)9·9
Steam Railway Transportation	105,377	18·2	108,128	16·4	2·6
Other Transportation	40,700	7·1	40,823	6·1	·3
Public and Personal Service, Amusement	46,556	8·1	57,484	8·7	23·4
Clothing, Footwear	34,057	5·9	37,563	5·6	10·2
Textiles	10,436	1·8	18,084	2·7	73·2
Foods	14,512	2·5	19,183	2·9	32·1
All other Industries	27,538	4·7	29,686	4·5	7·8
Totals	578,380	100·0	664,533	100·0	14·8

(1) The figures for 1942 in this table differ somewhat from those in the Thirty-Second Annual Report for 1942 (p. 16), because changes have been made in the classification and several unions which were included under "All Other Industries" have been placed in their appropriate groups.

(2) Decrease.

UNION MEMBERSHIP AND LOCAL UNIONS IN CANADA CLASSIFIED BY AFFILIATION, 1943

Affiliation	No. of Locals	Membership
Trades and Labour Congress of Canada	2,041	249,450
American Federation of Labour (1)	33	11,459
Canadian Congress of Labour	710	245,812
Congress of Industrial Organizations (2)	14	3,877
Canadian and Catholic Confederation of Labour	268	68,576
International Railway Brotherhoods (independent)	364	34,590
Canadian Federation of Labour (3)	.....	3,880
Unaffiliated National and International Unions	247	37,603
Unaffiliated Local Unions	58	9,286
Total	3,735	664,533

(1) These comprise international unions affiliated with the A.F. of L. in the United States, the Canadian branches of which are not affiliated with the Trades and Labour Congress of Canada. The 33 local or federal unions with 3,814 members which received their charters directly from the A.F. of L., have been included under the Trades and Labour Congress in the table as they are affiliated with that body.

(2) These comprise international unions affiliated with the C.I.O. in the United States, the Canadian branches of which are not affiliated with the Canadian Congress of Labour.

(3) The membership shown in the table is for two affiliated regional unions with membership at large.

Australian Bulletin on Benzol Poisoning

A bulletin entitled "Benzol Poisoning" was recently issued by the Industrial Welfare Division of the Australian Department of Labour and National Service.

The Bulletin states benzol, used chiefly in the motor fuel industry, the rubber, artificial leather, dyeing and cleaning, sanitary food can, paint and varnish, and aviation industries, is very volatile and highly inflammable. The non-irritating and pleasant odour forms an explosive mixture with air, and may collect at floor level.

Poisoning may be acute or chronic, according to the amount in which the benzol is inhaled. Chronic poisoning may develop to a critical stage without the worker being aware of his condition. Signs of weakness, headache, nausea or a tendency to bleeding of the nose and gums, the bulletin points out, should be reported to a physician immediately. Unlike chronic poisoning, recovery from acute benzol poisoning is usually complete, having no lasting effects.

Where spray-painting is being done, the bulletin goes on, the New South Wales Factories Act provides that the material used must not contain more than 1 per cent benzol; if a room booth is used, the air must be changed by natural or other means of ventilation at least 20 times per hour; any other type of booth must have a uniform air movement of not less than 100 linear feet per minute; and when benzol is used in a confined space where there are no air changes, a positive pressure helmet must be provided for all workers.

Adequate general, in addition to local, ventilation, the bulletin continues, is essential for the health of the worker, and the work-room air should be tested routinely to ensure the adequacy of the ventilating equipment. American standards advocate 100 parts per million of air as the maximum allowable concentration, while 75 parts per million is suggested as a maximum safe standard for eight hours' exposure. The maximum safe standard for toluol is 200 parts per million for the same exposure.

Special clothing, approved respirators and safety belts are suggested as further protective measures.

A monthly medical examination for all benzol workers, the bulletin concludes, is an essential protective measure, while for toluol and zylol tests every four or six months are sufficient. Pre-employment tests are also suggested as part of the protective program.

Decisions of National War Labour Board

DURING the month of November, the National War Labour Board issued decisions in the following cases:—

Discount and Loan Corporation of Canada (now Personal Finance Company of Canada).

Canadian International Paper Company.

Robinson, Little and Company, Limited (Winnipeg, Man.).

Canadian Corps of Commissionaires, Inc. (Edmonton, Alta.).

Canadian Construction Association (Saint John, N.B.) and Bricklayers', Masons' and Plasterers' International Union of America, Local No. 1, N.B.

Regent Knitting Mills Limited.

A. H. Williams (Calgary, Alta.).

The Goodyear Tire and Rubber Company of Canada, Limited (Bowmanville, Ont.) and United Rubber Workers of America, Local 189.

General Motors of Canada, Limited (Aircraft Division, Oshawa, Ont.) and United Automobile Workers of America, Local 222.

Research Enterprises Limited (Leaside, Ont.) and United Steelworkers of America, Local 1039.

Cockshutt Plow Company, Limited (Brantford, Ont.) and United Automobile, Aircraft and Agricultural Implement Workers of America, Local 458.

Massey-Harris Company, Limited, and United Automobile, Aircraft and Agricultural Implement Workers of America, Local 439.

International Harvester Company of Canada, Limited (Hamilton, Ont.) and United Steelworkers of America, Local 2868.

Lynn MacLeod Metallurgy Limited, and Le Syndicat Catholique des Employés de Fonderie de Thetford Mines, Inc.

Brompton Pulp and Paper Company, Limited, and La Federation Nationale des Travailleurs de la Pulpe et du Papier.

The Canada Starch Company, Limited (Cardinal, Ont.), and National Union of Food Processors, Local No. 1.

Re: Discount and Loan Corporation of Canada (now Personal Finance Company of Canada)

Reasons for Decision

This is an appeal from a decision of the Regional War Labour Board for Ontario dated April 25, 1944, refusing to authorize an increase in the maximum of the salary range for the occupational classification of "loan manager" above $250 per month. The application was for an increase from $230 to $300 per month.

We find no reason to interfere with the discretion exercised by the Regional Board and the appeal must be dismissed.

November 6, 1944.

Re: Canadian International Paper Company

Reasons for Decision

An appeal from a decision of the Regional War Labour Board for Ontario dated May 19, 1944. The application was for permission to increase all salaried personnel, of or below the rank of foreman, employed in the company's Hawkesbury mill and by its subsidiary International Fibre Board, Limited, by an amount not to exceed $10 per month. The reason for the request was to extend to salaried personnel the benefit of a 5-cent increase awarded to hourly-rated employees. The Regional Board authorized the increase to the monthly-rated employees except those receiving $300 or more. The appeal is with respect to the restriction placed upon the authorization.

We are of opinion that the Regional Board's decision must be sustained. It is in keeping with the principle contained in section 21 of P.C. 9384 and there is also the presumption arising under the proviso to section 15 (1) that the employees excluded are governed by the Wartime Salaries Order, P.C. 1549. The presumption applies in fact in the case of all employees paid at a rate of $250 or more per month.

The appeal is dismissed.

November 6, 1944.

Re: Robinson, Little and Company, Limited (Winnipeg, Man.)

Reasons for Decision

An appeal from a decision of the Regional War Labour Board for Manitoba dated June 14, 1944, in respect of an application to obtain approval of the payment of certain annual commissions and bonuses paid to retail store managers, salesmen and members of the merchandising, warehouse, shipping room and general office staffs, in addition to their regular salaries. The Regional Board granted the application in so far as it related to retail store managers on the ground that their bonus having been calculated on a determined percentage basis, payment at the percentage rate established in the basic period could be continued. As to the other classifications, however, approval was limited to the amount actually paid in the year ending November 15, 1941. The Regional Board granted the company leave to appeal.

The representations to this Board indicate that since 1939 the amount of the bonus to the individual members of the staffs mentioned has been determined by the Company's general manager, who, in arriving at each amount takes into consideration a number of factors. This method of determining bonuses has apparently been approved by the employees.

On the basis of the information submitted to the Regional Board, its decision seems to be the only one it could reasonably make. At the hearing, we requested additional data, and in the light of this further information we have come to the conclusion that the amounts paid to the staff for the years 1941 and 1942 and the amount appropriated for the year 1943 can be authorized, except as to the merchandise manager, who, by both the amount of his earnings and description of his duties, is above the rank of foreman.

We do not think we should give approval for the future, and payments based on 1944 and subsequent operations will have to be submitted to the Regional Board in due course.

November 8, 1944.

Re: Canadian Corps of Commissionaires, Inc. (Edmonton, Alta.)

Reasons for Decision

This is an appeal from the Regional War Labour Board for Alberta who by decision dated May 6, 1944, directed the appellant to pay the cost-of-living bonus made mandatory under the provisions of the Wartime Wages Control Order, P.C. 5963.

The appellant claims exemption from the Order under the terms of section 11 (1) (v) excluding from the definition of employer

> any person, firm or corporation operating any hospital or any religious, charitable or educational institution or association, if such hospital or such institution or association is not carried on for purposes of gain.

Alternatively, it pleads inability to pay and refers to sections 43 and 46 of the Order.

The appellant is a corporation without share capital incorporated under the Dominion Companies' Act and is not an association carried on for purposes of gain. However, the more pertinent question is whether it is a "religious, charitable or educational association". For present purposes the main objects of the Corps set out in its Letters Patent are to provide employment for ex-service men and to better their present positions. The Corps contracts with various employers for the services rendered by its members as guards, janitors, etc. and it pays them out of the contract moneys, retaining a certain amount to cover operating and administration expenses. We are of opinion that under the circumstances the appellant is an employer and cannot be considered as being excluded from the Order. We shall therefore confirm the decision of the Regional Board.

On the question of ability to pay, our view is that section 46 is not applicable, but that under section 43 the appellant should have some relief. The bonus will be payable from February 15, 1944, when it became merged into basic rates.

November 9, 1944.

Re: Canadian Construction Association (Saint John, N.B.) *and* Bricklayers', Masons' and Plasterers' International Union of America Local No. 1, N.B.

Reasons for Decision

This is a joint application for leave to appeal from a decision of the Regional Board for New Brunswick dated July 26, 1944, increasing hourly rates for bricklayers and masons to $1.10 with corresponding adjustments for certain other classifications. The request had been for a rate of $1.15 for a 48-hour week and $1.16 for a 44-hour week.

There does not appear to be any ground upon which this Board could alter the Regional Board's decision and the application must be denied.

November 20, 1944.

Re: Regent Knitting Mills Limited

Reasons for Decision

An appeal from a decision of the Regional Board for Quebec dated July 13, 1944, refusing to authorize a reduction in the rate of commission paid to two salesmen, from 7½ per cent to 6 per cent. The salesmen concerned have given their written consent to the change.

The material indicates that the rate generally paid to salesmen by the appellant is 6 per cent and that the higher rate was paid to these particular men prior to wage control because of special circumstances which no longer exist. It would seem that the lower rate is within the range established and that the reduction is one which can be made under the provisions of section 25 (*a*) of P.C. 9384.

The appeal is allowed.

November 20, 1944.

Re: A. H. Williams (Calgary, Alta.)

Reasons for Decision

An appeal from a decision of the Regional Board for Alberta dated October 11, 1944, refusing an application founded on the steam railways decision of this Board (L.G., August, 1944, p. 960) for a 6-cent hourly increase in wage rates to coal handlers.

These rates have been increased a total of 24 cents since August, 1939, while the railway decision assumed that the employees concerned had received since the beginning of the war only the full cost-of-living bonus, or an hourly increase amounting to 10 cents. It appears further from the material that the present rate of 59 cents paid by the appellant compares favourably with the prevailing rate for common labour in Calgary.

In the circumstances, the appeal must be dismissed.

November 20, 1944.

Re: The Goodyear Tire and Rubber Company of Canada, Limited, (Bowmanville, Ont.) *and* United Rubber Workers of America, Local 189

Reasons for Decision

An appeal by the Company and a cross-appeal by the Union from a decision of the Regional War Labour Board for Ontario dated June 1, 1944 ordering that the wage rate in the plating room be increased 7½ cents and refusing to authorize or direct payment of an off-shift premium.

The employees in the Plating Department at the present time total 4 and they work only a day shift of 9 hours. In order to make certain plant additions and changes during the period from December 1, 1942, to the end of February, 1943, these employees worked a day shift of 8 hours. During that time the wages received by them equalled the wages received by them previously on a 9-hour shift. In other words, for this three-month period the employees received 77½ cents an hour for the 8-hour shift. Since the end of February, 1943, they have been working a 9-hour shift receiving only 70 cents an hour. The Company alleges that this adjustment was agreed to by the men for the short three-month period in order to facilitate the adjustments that were being made in the plant and that they also agreed to return to the lower hourly rate as soon as the adjustments and additions were completed. This the men denied, and, as both the Manager of the Company at the time this arrangement was made and the President of the Union at that time no longer occupy these positions, it is impossible to verify the statement of either party. It is clear to us, however, that in so far as the employer is concerned it thought that the men agreed to the arrangement, and that the men did not intend to give that impression, although there is some significance in the fact that the 9-hour rate came into effect on or about March 1, 1943, and no protest was made respecting it by the employees until late in December, 1943. It does not seem to us, however, that under the circumstances much depends upon whether or not this agreement was in effect although I think this Board would be critical indeed of any conduct by either party which indicated a repudiation of an agreement such as the one alleged in this case. However, it is apparent to this Board that the Regional War Labour Board made a full and proper inquiry into the skill required by these four employees, also into the working conditions, and satisfied itself that the increase of 7½ cents was justified under the circumstances. On the representations made before us we are not disposed to interfere with the decision of the Regional War Labour Board in this regard.

As to the portion of the decision appealed by the employees, it is evident to this Board

that this is a "continuous process" industry in so far as it affects a large number of the employees concerned in this appeal. The total number of employees at the Company's Bowmanville plant is 504, of whom 173 work only on a day shift and the remaining 331 work on rotating shifts, either three 8-hour shifts a day or two 9-hour shifts a day. It is apparent that the practice of requiring three rotating 8-hour shifts as to a portion of the employees and of two rotating 9-hour shifts as to the remaining employees has existed for upwards of twenty years, and that the wage structure of the Company has been adapted to these processing requirements. We, therefore, feel that the Regional War Labour Board quite correctly denied the ordering of an off-shift differential in the circumstances.

Both the appeal and the cross-appeal are, therefore, dismissed.

November 22, 1944.

Re: General Motors of Canada, Lmited (Aircraft Division, Oshawa, Ont.) *and* United Automobile Workers of America, Local 222

Reasons for Decision

The Company appeals from a decision of the Regional Board for Ontario dated June 23, 1944, supplemented by a further decision dated July 31, 1944, which had the effect of increasing the wage rate of "female sanders" by 4 cents in the case of most of the employees in the classification who had been receiving the maximum rate of 62 cents (increased to 66 cents) and by 5 cents in the case of the few, if any, who were receiving less than the maximum of the range. The new range ordered was 55 to 66 cents; the former range was 51 to 62 cents.

The main ground for the appeal is that the nature of the work done by this particular classification of employees does not justify the increase and that the differential created by the Regional Board's decision will disturb wage rates paid to other female classifications.

The Regional Board based its decision upon an investigation of the work actually done by "female sanders". Although since on or about July 26, 1944, the sanding of the bottom seam of the fuselage is done by men and the work of the women has been made less arduous, we have come to the conclusion that we should not disturb the decision of the Regional Board. But we wish to make clear that the new rate is not to be set up as a reason for increasing any other female rate in the plant.

The appeal is dismissed.

November 23, 1944.

Re: Research Enterprises Limited (Leaside, Ont.) *and* United Steelworkers of America, Local 1039

Reasons for Decision

This is an application by the Company for approval of a job evaluation plan submitted as being necessary to rectify gross inequalities in wages now being paid in the radio production department. The approval of the Company's plan is opposed by the Union who submitted an alternative plan.

Both parties are in agreement that some evaluation of the present operations should take place. They appear to have agreed on the job description, but could not agree on the allocation of the job classifications to the various wage brackets. The real point of difference, of course, arises, as we see it, with respect to the end result in wage rates. There are approximately 700 employees involved.

Under the Company's plan there are 11 wage brackets, and if adopted they would involve an immediate increase of $3.80 per hour covering 93 employees in order to bring their base rate up to the minimum of the proposed bracket, and would involve an ultimate decrease of $11.32 per hour covering 167 employees in order to bring their top rate down to the top rate of the proposed bracket.

The Union plan involves an immediate increase of $27.17 per hour covering 339 employees in order to bring their base rate up to the minimum of the proposed bracket, and an ultimate decrease of $1.35½ per hour covering 23 employees in order to bring their top rate down to the top rate of their proposed bracket. They submitted 7 wage brackets as compared with 11 suggested by the Company.

We do not feel that we can properly approve of either plan in preference to the other at this time. However, having in mind that both parties have spent a very considerable amount of time in joint discussion and have reached agreement on some features, we are of the view that due to the wide difference in the proposed plans some middle ground upon which these differences might be composed can be found by the parties resuming discussions.

The parties should bear in mind that any rates submitted should be related so far as possible to the rates generally prevailing for the same or substantially similar type of employment in the community in general and in the electrical and radio manufacturing industry in particular.

November 23, 1944.

Re: Cockshutt Plow Company, Limited (Brantford, Ont.) *and* United Automobile, Aircraft and Agricultural Implement Workers of America, Local 458

Reasons for Decision

An appeal by the Company from the direction of the Regional War Labour Board for Ontario dated August 10, 1944, requiring the Company to pay to its hourly rated employees working on off-shifts a premium of five (5c) per hour, effective for the pay period commencing May 1, 1944. The Company has no employees permanently engaged on off-shifts, but when more than one shift is operated it is on a rotating basis. The Company is engaged, in the main, in the production of farm implements and is not substantially engaged on war contracts.

Applications for such off-shift premiums were made by the unions representing the employees of the International Harvester Company, the Massey-Harris Company, as well as the Cockshutt Plow Company, and in all cases were allowed by the Regional Board. All are now before this Board for consideration. The Massey-Harris Company did not appeal from the decision in so far as its Weston Plant was concerned—that plant being engaged entirely on war work.

The Company objects to the payment of the premium on several grounds—that such premiums have never been paid in the industry; that they do not obtain generally in the district or in Ontario, or in factories not engaged chiefly in war production; that the prices of farm implements have been frozen since October 1941; that the rates now being paid are reasonable and fair; etc.

The Union rests its case chiefly on the decision of the Board in the Ford Motor Company case and subsequent decisions.

In the Ford Motor Company Case (L.G., May, 1943, p. 585) the Board said:

> The present application should not be taken as any precedent except as to the cases of employers engaged in the production of munitions and supplies.
>
> While each application, of course, must be dealt with on its individual merits, the National Board considers that what we are dealing with primarily are industries engaged in war production.

We are of the opinion that each application of this sort must be dealt with on its individual merits and having regard to the nature of the business carried on by this Company, the principles laid down in the Ford Motor Company case and the provisions of section 14 (*b*), P.C. 9384, have decided that there is no justification under the powers granted to the Board by section 20 for approving the off-shift premiums requested in the original application.

In the result the appeal will be allowed and the order of the Regional Board set aside and Finding and Direction issued accordingly.

November 27, 1944.

Re: Massey-Harris Company, Limited, *and* United Automobile, Aircraft and Agricultural Implement Workers of America, Local 439

Reasons for Decision

An appeal by the Company from the direction of the Regional War Labour Board for Ontario dated August 10, 1944, requiring the Company to pay to its hourly rated employees in its plants at Toronto and Brantford working on off-shifts a premium of five (5c) cents per hour, effective for the pay period commencing May 1, 1944. The Company has employees working on rotating shifts and also on permanent shifts. The Company is engaged, in the main, in the production of farm implements and is not substantially engaged on war contracts.

Applications for such off-shift premiums were made by the unions representing the employees of the International Harvester Company, the Cockshutt Plow Company as well as the Massey-Harris Company, and in all cases were allowed by the Regional Board. All are now before this Board for consideration. The Massey-Harris Company did not appeal from the decision in so far as its Weston plant was concerned—that plant being engaged entirely on war work.

The Company objects to the payment of the premium on several grounds—that such premiums have never been paid in the industry; that they do not obtain generally in the district or in Ontario, or in factories not engaged chiefly in war production; that the prices of farm implements have been frozen since October 1941; that the rates now being paid are reasonable and fair; etc.

The Union rests its case chiefly on the decision of the Board in the Ford Motor Company case and subsequent decisions.

In the Ford Motor Company case (L.G., May, 1943, p. 585) the Board said:

> The present application should not be taken as any precedent except as to the cases of employers engaged in the production of munitions and supplies.

While each application, of course, must be dealt with on its individual merits, the National Board considers that what we are dealing with primarily are industries engaged in war production.

We are of the opinion that each application of this sort must be dealt with on its individual merits and having regard to the nature of the business carried on by this Company, the principles laid down in the Ford Motor Company case and the provisions of section 14 (*b*), P.C. 9384, we have decided that there is no justification under the powers granted to the Board by section 20 for approving the off-shift premiums requested in the original application.

In the result the appeal will be allowed and the order of the Regional Board set aside and Finding and Direction issued accordingly.

November 27, 1944.

Re: International Harvester Company of Canada, Limited (Hamilton, Ont.) *and* United Steelworkers of America, Local 2868

Reasons for Decision

An appeal by the Company from the direction of the Regional War Labour Board for Ontario dated August 10, 1944, requiring the Company to pay to its hourly rated employees working on off-shifts a premium of five (5¢) cents per hour, effective for the pay period Commencing May 1, 1944. Very few of the Company's employees would be affected at the present time. The Company is engaged, in the main, in the production of farm implements.

Applications for such off-shift premiums were made by the unions representing the employees of the Cockshutt Plow Company, the Massey-Harris Company as well as the International Harvester Company, and in all cases were allowed by the Regional Board. All are now before this Board for consideration. The Massey-Harris Company did not appeal from the decision in so far as its Weston plant was concerned—that plant being engaged entirely on war work.

The Company objects to the payment of the premium on several grounds—that such premiums have never been paid in the industry; that they do not obtain generally in the district or in Ontario, or in factories not engaged chiefly in war production; that the prices of farm implements have been frozen since October, 1941; that the rates now being paid are reasonable and fair, etc.

The Union refers in its brief to the decision of the Board in the Ford Motor Company case.

In the Ford Motor Company case (L.G., May, 1943, p. 585), the Board said:

> The present application should not be taken as any precedent except as to the cases of employers engaged in the production of munitions and supplies.
>
> While each application, of course, must be dealt with on its individual merits, the National Board considers that what we are dealing with primarily are industries engaged in war production.

We are of the opinion that each application of this sort must be dealt with on its individual merits and having regard to the nature of the business carried on by this Company, the principles laid down in the Ford Motor Company case and the provisions of section 14 (*b*), P.C. 9384, we have decided that there is no justification under the powers granted to the Board by section 20 for approving the off-shift premiums requested in the original application.

In the result the appeal will be allowed and the order of the Regional Board set aside and Finding and Direction issued accordingly.

November 27, 1944.

Re: Lynn MacLeod Metallurgy Limited *and* Le Syndicat Catholique des Employés de Fonderie de Thetford Mines, Inc.

Reasons for Decision

An appeal by the employer from a decision of the Regional War Labour Board for Quebec dated July 18, 1944, ordering a general 5-cent hourly increase in wage rates and fixing a minimum starting rate for inexperienced employees with automatic increases every six months until they qualify for one of the regular occupational classifications. The common labour rate established by the Regional Board's decision is 47 cents.

Before this Board the appeal rests upon a plea of financial inability to pay, but the Company did not avail itself of the opportunity given to it to develop this ground before the Regional Board.

We have examined the material filed on this appeal and have come to the conclusion that the employer has not clearly demonstrated that it will be unable to absorb the increased cost resulting from this wage increase.

The appeal must be dismissed.

November 27, 1944.

Re: Brompton Pulp and Paper Company, Limited, *and* La Fédération Nationale des Travailleurs de la Pulpe et du Papier

Reasons for Decision

The Company appeals from a decision of the Regional War Labour Board for Quebec dated December 22, 1943, and made under the provisions of P.C. 5963, directing a basic common labour rate (exclusive of cost-of-living bonus) of 47½ cents per hour in its plants located at Bromptonville and East Angus. Just prior to this decision, the rate had been increased with the Company's consent from 40 to 46 cents.

The decision under appeal was one of a large number made concerning the pulp and paper industry in Quebec. The whole matter of comparative wage rates and differentials was considered by the Regional Board and generally a basic common labour rate (exclusive of bonus) of 50 cents was fixed for newsprint mills and a rate of 47½ cents for specialty mills (see E. B. Eddy Company Ltd., and J. R. Booth Limited, L.G., July, 1944, p. 837). The mills involved in this case are specialty mills.

The company argued that the increased rate was more than it could pay in view of certain adverse factors affecting its mills (obsolescence, etc.), and also that the rate at Bromptonville and East Angus should not be as high as that paid at Hull or Trois-Rivières.

Representations were made to the Regional Board on these matters and we have no doubt the arguments with respect to them were present in the minds of the members of the Quebec Board. Consequently, we have decided to leave the Regional Board's decision undisturbed.

November 27, 1944.

Re: The Canada Starch Company, Limited (Cardinal, Ont.) *and* National Union of Food Processors, Local No. 1

Reasons for Decision

This is an appeal by the Company from a decision of the Regional Board for Ontario dated June 23, 1944, ordering (as corrected on July 25, 1944), a base labour rate of 54 cents for men and 42 cents for women. This meant in all of the Company's nine wage categories an increase of 5 cents per hour in the rates for men and 5½ cents per hour in the rates for women. The appellant is willing to put into effect from the date mentioned in the Regional Board's finding and direction (March 16, 1944) a wage increase of 3 cents per hour for both men and women.

The Wages Control Order ,P.C. 9384 now in effect has as its first objective the stabilization of the wage structure in Canada at the level obtained on February 15, 1944, by incorporating the cost-of-living bonus into what were known under the former order (P.C. 5963) as "basic rates". (See section 14 (*a*)).

The Boards are given the power to authorize or direct increases of wage rates thus established, but only to the extent necessary to rectify "a gross injustice or gross inequality", i.e., a glaring or flagrant injustice or inequality. (Section 20 (1) (*a*)).

There is provision under section 20 (1) (*b*) when this severe condition need not be met, but the situation contemplated in that paragraph does not prevail in the present instance.

To say that the purpose of an order is to stabilize the wage structure, as we understand the term, is to say that wage rates must remain stable and unchanged, unless an applicant can establish that his case meets the strict test laid down.

The Regional Board here appears to have proceeded upon the basis of what it thought to be fair and reasonable rates. But we must say that war labour boards under the governing order in council are not fair wage boards or minimum wage boards; they are wage stabilization boards set up to administer a set of specific rules. We therefore feel that we should view this case as if it came to us for decision in the first instance.

Having in mind the nature of the employer's operations and their location, we find that these rates, when the 3 cents the company is prepared to pay is added to them, compare very favourably with rates paid by industries similarly located.

We shall give effect to the 3 cent hourly increase which the appellant is prepared to pay. In other respects the Regional Board's decision remains unaltered.

On the matter of the wage increase, therefore, the appeal will be allowed to the extent indicated.

November 28, 1944.

Industrial Disputes and Conciliation

Introduction

THE *Industrial Disputes and Conciliation* section contains monthly articles dealing with proceedings under the National Wartime Labour Relations Regulations, Conciliation Work of the Department of Labour, and Strikes and Lockouts in Canada, Great Britain and other countries.

Recent Proceedings under the Wartime Labour Relations Regulations.—Under the Wartime Labour Relations Regulations, P.C. 1003, the Government has extended its jurisdiction over employer-employee relations which are normally exclusively within the provincial field to the extent considered necessary to cover adequately employers and employees in industries "essential to the efficient prosecution of the war", but without attempting to include other industry which has not a direct bearing on war production. In so far as these latter industries are concerned, each province can make its own decision as to whether or not they shall be brought under the Regulations.

Agreements have been made under the Regulations between the Dominion and every province except Alberta and Prince Edward Island providing for the setting up of provincial agencies for the administration of the Regulations.

The work of the Wartime Labour Relations Board (National) is here described in two separate articles. The first deals with applications made by unions for certification and their disposition by the Board; the second describes conciliation proceedings under the Regulations and includes the reports of Boards of Conciliation.

Conciliation Work of the Industrial Relations Branch.—Conciliation proceedings are carried on by the Industrial Relations Branch of the Department of Labour under the provisions of the Conciliation and Labour Act which empowers the Minister to inquire into the causes and circumstances of a dispute, to take such steps as seem expedient for the purpose of bringing the parties together, and to appoint a conciliator or an arbitrator when requested by the parties concerned.

Strikes and Lockouts.—The latest information concerning strikes and lockouts in Canada is published monthly in tabular form, with a summary appearing once a year. The summary of strikes and lockouts in Canada and other countries during 1943 appeared in the LABOUR GAZETTE for March, 1944.

The latest available information as to strikes and lockouts in Great Britain and other countries appears from month to month.

Amendment to Wartime Labour Relations Board (National) Regulations

THE Wartime Labour Relations Board (National) has announced a further amendment to its Board Regulations of June 7 (L.G., June, 1944, pp. 737-739) as amended on July 19 (L.G., Aug., 1944, p. 969).

The amendment had to do with union representation votes. In a case where an appeal is lodged with the National Board against an order of a Provincial Board directing a vote, the amendment provides a procedure for a postponement of the vote.

It gives a Provincial Board, or the National Board, or the Chairman of the Provincial Board, or the Chairman of the National Board, power to order a stay of the vote.

The amendment was approved by the Minister of Labour on December 9. It adds three new sub-sections to the section of the Regulations dealing with appeals.

This section (including the new sub-sections numbered 4, 5 and 6) now reads as follows:

APPEALS

(1) Any person directly affected by any decision or order of a Provincial Board may appeal to the National Board, if

(*a*) The Provincial Board making such decision or order grants leave so to appeal and the request for such leave to appeal has been made within thirty days of the announcement of the decision or order of such Provincial Board; or

(*b*) The National Board grants leave so to appeal and the request for such leave to appeal has been made within sixty days of such announcement.

(2) Within thirty days after the granting of such leave to appeal the appellant shall appear before the National Board and present the said appeal provided, however, that the National Board may for good cause adjourn the hearing of the said appeal from time to time.

(3) On any such appeal, the decision or order of the National Board shall constitute the decision or order of the Provincial Board as if originally made by it.

(4) Except as otherwise provided in this section, an appeal shall not operate as a stay of proceedings from the decision appealed from.

(5) Where a Provincial Board has directed that a vote of employees be taken under the Regulations and an appeal has been taken from such decision, the Board appealed from or the National Board may order a stay of such proceedings.

(6) The Chairman of the Board appealed from and/or the Chairman of the National Board may act for and on behalf of his Board to dispose of any application for a stay of proceedings or to grant a stay of proceedings and any decision or order made by him pursuant hereto shall be and be deemed to be the decision or order of his Board.

Applications for Certification under the Wartime Labour Relations Regulations

THE Wartime Labour Relations Board (National) met for six days during the month of November. During this period the Board received 9 applications, held 10 hearings, issued 17 certificates designating bargaining representatives, rejected 2 applications for certification, ordered 4 representation votes and gave decisions in 2 appeal cases.

Certificates Issued

(1) *International Union of Mine, Mill and Smelter Workers, Local 800 and Dominion Bridge Company Limited and Riverside Iron Works Limited, Calgary, Alta.* (L.G. Aug. 1944, P. 968). Following a representation vote of the employees of each Company conducted by direction of the Board, the Union and Messrs. John Munro, W. Erenko, H. Hewitt, W. Wusyk, James Whittit and Ray Lee were certified as bargaining representatives for the employees of both Companies except journeymen moulders, coremakers, foremen and all others having the right to hire and discharge.

(2) *International Association of Machinists, Aircraft Lodge No. 1749, and Canadian Pacific Airlines, Limited, Sea Island and New Westminster, B.C.* (L.G. Sept. 1944, p. 1109). The Union and Mrs. Ora Percy and Messrs. J. McMillan, A. J. Wyshrew, H. Wilkinson, William Pilling, Mel Guy, Roy Bell and Ted Evans were certified as bargaining representatives for the hourly-rated employees of the production and auxiliary departments of the Canadian Pacific Air Lines Ltd. (Repair Plants), Sea Island and New Westminster, B.C., except monthly salaried matrons and nurses, supervisors from the rank of assistant foreman and up, firemen, security officers, office employees in the pay, time, personnel, stores, maintenance inspection, I.B.M., general and transit control offices and technical employees on a salaried basis. Certification followed an investigation of the application by an officer of the Board.

(3) *Brotherhood of Maintenance-of-Way Employees and Canadian National Railways, Western Lines* (L.G. Oct. 1944, p. 1220). Following an examination of the Union's membership records by an officer of the Board and a public hearing, the Union and Mr. George Clifford were certified as bargaining representatives for the supervisors, mechanics and mechanics' helpers employed by the Canadian National Railways in its shops for the maintenance and repair of track motor cars at Fort Rouge, Manitoba; Saskatoon, Saskatchewan; Edmonton, Alberta; and Kamloops Junction, B.C.

(4) *The Canadian Seamen's Union and Foote Transit Company Limited (Unlicensed personnel, S.S. "F. V. Massey")* (L.G. Oct. 1944, p. 1221). The Union and Messrs. J. A. Sullivan, D. Ferguson and C. E. Lenton were certified as bargaining representatives for the unlicensed personnel of the Foote Transit Company Limited, Toronto, Ontario, engaged on the Company's Vessel "F. V. Massey". Certification of bargaining representatives followed an examination of the Union's membership records by an officer of the Board, and the taking of a representative vote.

A public hearing on the application was also held by the Board.

(5) *International Union of Operating Engineers, Local 882, and Vancouver Hotel Company Limited, Vancouver B.C.* (L.G. Oct. 1944, p. 1221). Following an investigation of the application for certification of bargaining representatives by an officer of the Board, the Local Union and Messrs. J. Henderson, E. W.

King, W. F. Flesher were certified as bargaining representatives for the engineers and firemen employed in the heating and power plant of the Vancouver Hotel Company Limited, Vancouver, B.C. The position of Chief Engineer was excluded from the bargaining unit.

(6) *The Canadian Seamen's Union (Superior-Winnipeg Branch) and the United Towing and Salvage Company Limited, Port Arthur, Ont.* (L.G. Oct. 1944, p. 1221) The Union and Messrs. D. Ferguson, C. E. Lenton, A. Penhale, L. B. Rogers and P. Zobolotny were certified as bargaining representatives for the unlicensed personnel of the United Towing and Salvage Company Limited, Port Arthur, Ontario, employed on its vessels, the "Great Western", "James Whalen", "Guardian", "Strathmore", and "Jean Fraser". Certification of bargaining representatives followed an examination of the Union's membership records by an officer of the Board and public hearing on the application was also held.

(7) *The Canadian Seamen's Union and Sarnia Steamships Limited and its subsidiary, Colonial Steamships Limited, Port Colborne, Ont.* (L.G. Nov. 1944, p. 1337). Following an investigation of the Union's membership records and a public hearing, the Union and Messrs. Dewar Ferguson, J. A. Sullivan and C. E. Lenton were certified as bargaining representatives for the unlicensed personnel employed on the vessels of the Sarnia Steamships Limited and its subsidiary, Colonial Steamships Limited, Port Colborne, Ont.

(8) *The Brotherhood of Railway and Steamship Clerks, Freight Handlers, Express and Station Employees and the Canadian Pacific Railway Company (Grain Elevator), Port McNicol, Ont.* (L.G. Nov. 1944, p. 1337). The Union and Messrs. F. H. Hall and W. A. Rowe were certified as bargaining representatives for the employees of the Canadian Pacific Railway Company in its grain elevator at Port McNicol, Ontario. The superintendent and grain shipper were excluded from the bargaining unit. Certification of bargaining representatives followed an examination of the Union's membership records by an officer of the Board.

(9) *The Brotherhood of Railway and Steamship Clerks, Freight Handlers, Express and Station Employees and Aberdeen Elevator Company Limited, Midland, Ont.* (L.G. Nov. 1944, p. 1337). Following an examination of the Union's membership records by an officer of the Board, the union and Messrs. F. H. Hall and H. F. Mead were certified as bargaining representatives for the plant employees of the Aberdeen Elevator Company Limited, Midland, Ontario, the superintendent, foreman and office clerk being excluded from the bargaining unit.

(10) *The Brotherhood of Railway and Steamship Clerks, Freight Handlers, Express and Station Employees and the Midland Simcoe Elevator Company, Midland, Ont.* (L.G. Nov. 1944, p. 1338). The Union and Messrs. F. H. Hall and H. F. Mead were certified as bargaining representatives for the plant employees of Midland Grain Elevator Company Limited, Midland, Ontario, except general manager, office staff and superintendent. Certification of bargaining representatives followed an examination of the Union's membership records by an officer of the Board.

(11) *The Brotherhood of Railway and Steamship Clerks, Freight Handlers, Express and Station Employees and the Midland Grain Elevator Company Limited, Midland, Ontario* (L.G. Nov. 1944, p. 1338). Following an investigation of the Union's membership records by an officer of the Board, the Union and Messrs. F. H. Hall and H. F. Mead were certified as bargaining representatives for the plant employees of Midland Grain Elevator Company Limited, Midland, Ontario, except the superintendent, office clerk, foreman and weighmaster.

(12) *The International Longshoremen's Association, Locals 375 and 1552, and the Shipping Federation of Canada Inc., on behalf of certain shipping companies, Montreal, P.Q.* (L.G. Aug. 1944, p. 968). Local 375, International Longshoremen's Association and Messrs. Karl Trolsaas, Donat Bilbeault and J. M. Shannon were certified as bargaining representatives for the gang foremen and longshoremen; while Local 1552, International Longshoremen's Association and Messrs. F. A. Robillard, J. R. Arcand and E. Germaine were certified as bargaining representatives for the shipliners and gang foremen, employed by the Shipping Federation of Canada on behalf of Furness Withy & Co, Ltd.; Canadian National Steamships, Ltd.; Canadian Pacific Steamships, Ltd.; McLean Kennedy, Ltd.; County Line, Ltd.; Montreal Australian New Zealand Line; New Zealand Shipping Co., Ltd; Elder Dempster Lines, Ltd.; International Mercantile Marine Co. (Can.), Ltd.; Montreal Shipping Co., Ltd.; Alcoa Steamship Co., Inc.; Joseph Constantine Steamship Line; Shipping, Ltd.; St. Lawrence Freighting Corp., Ltd.; March Shipping Agency, Ltd.; and The Robert Reford Co., Ltd., on behalf of Cunard White Star, Limited, Donaldson Atlantic Line, Donaldson Bros., Ltd., Blue Funnel Line, acting through the Shipping Federation of Canada, Inc., Montreal, P.Q., presently represented by the Shipping Federation of Canada, Inc., Montreal, P.Q.

Certification of bargaining representatives in each case followed an examination of the Union's membership records by an Officer of the Board. A public hearing on the application was also held by the Board.

(13) *International Longshoremen's Association, Local 38-162 and Canadian Stevedoring Company Limited, Vancouver, B.C., and the Empire Stevedoring Company Limited, Victoria, B.C.* (L.G. Nov. 1944, p. 1338). The Union and Messrs. James Lackie, W. N. Scott, E. Gilroy, Henry Schacht, Jack Rainey, Clifford Richards and John Quinn were certified as bargaining representatives for longshoremen employed by the Canadian Stevedoring Company Limited, Vancouver, B.C., and the Empire Stevedoring Company Limited, Victoria, B.C., except foremen employed by the Companies in the Victoria district, including James Island and Cowichan Bay, B.C.

Certification of bargaining representatives followed an examination of the Union's membership records in each case by an Officer of the Board.

(14) *International Moulders and Foundry Workers' Union of North America, Local 360, and Northwestern Brass Limited, Calgary, Alta.* (L.G. Nov. 1944, p. 1338). Following an examination of the Union's membership records by an Officer of the Board, the Union and Messrs. G. Samphire, A. Colledge, W. Bailey, P. Duchak and D. M. Lewis were certified as bargaining representatives for the maintenance and production workers of Northwestern Brass Company Limited, Calgary, Alta. Executives, foremen, office employees and others having the right to hire and discharge were excluded from the bargaining unit.

(15) *Rolling Mill Employees' Union, Local 23180 (A.F. of L.) and Dominion Bridge Company Limited (Rolling Mill Department), Calgary, Alta.* (L.G. Nov. 1944, p. 1338). The Union and Messrs. Robert Scott, James Curr, Percy Howard and Herbert Dear were certified as bargaining representatives for all roughers, stranners, catchers, finishers, edgers, hotbed men, billet boys, heaters, spell heaters, rundowns, stockers, cindermen, yard stockers, shearmen, melters, furnace helpers, pitmen, ladlemen, cranemen and all other labour in the plant except timekeepers, assistant timekeepers, weighmen, laboratory assistants, unloaders, assistant rollers, pullover men, inspectors, shipping clerks, yard office clerk, shipping foremen, mechanics' helpers, blacksmith and blacksmith's helper, carpenter, storekeeper, watchmen, machinist, bricklayer's helper, power room operators, electrician and pipefitter's helper of the Dominion Bridge Co. Ltd. (Rolling Mill Department), Calgary, Alta.

Applications for Certification Rejected

(1) *United Steelworkers of America and the National Harbours Board, Montreal, P.Q.* (L.G. August 1944, p. 968). Following an investigation of the application, the Board rejected the application for certification of bargaining representatives for constables and guards of the National Harbours Board, Montreal, P.Q., which was submitted by the United Steelworkers of America. The application was rejected because the Board considered that constables and guards were employed in a confidential capacity.

(2) *International Longshoremen's Association, Local 38-162 and Victoria and Vancouver Stevedoring Companies Limited.* (L.G. Nov. 1944, p. 1338). Following an examination of the application by an Officer of the Board, the Board rejected the application for certification of bargaining representatives for employees of the Victoria and Vancouver Stevedoring Company Limited, Vancouver, B.C., which was submitted by the International Longshoremen's Association, Local 38-162. The Company had no employees engaged at Victoria.

Representation Votes Ordered

At the end of November representation votes had been ordered by the Board on the following applications:

(1) *Brotherhood of Railway and Steamship Clerks, Freight Handlers, Express and Station Employees and Sarnia Elevator Company, Ltd., Sarnia, Ont.* (L.G. Nov. 1944, p. 1338). Representatives of the applicants and Company appeared before the Board. The eligible voters are the employees in the elevator, exclusive of superintendents, assistant superintendents, foremen, executive personnel, security guards and office clerical staff.

(2) *Brotherhood of Railway and Steamship Clerks, Freight Handlers, Express and Station Employees and Canadian Pacific Railway Company (B.C. Lake and River Service), Nelson, B.C.* (L.G. Oct. 1944, p. 1221). Following an investigation of the application by an Officer of the Board, the Board ordered that a separate vote be conducted of the employees in the Company's service on each of the three lakes, namely, Kootenay, Slocan and Arrow. The eligible employees are the unlicensed personnel in the following classes: deckhands, firemen, coal passers, waiters, waitresses, cooks and mess boy. Freight clerks, now covered by an agreement between the Company and the applicant Union, and pursers are excluded in the vote.

(3) *British Columbia Firemen's Union and Union Oil Company of Canada Limited (M.V. "Unacana")* (L.G. Oct. 1944, p. 1221). The

eligible voters are the unlicensed personnel in the deck, engine room and steward's departments.

(4) *Canadian Brotherhood of Railway Employees and Other Transport Workers, Division 271, and the Canadian Pacific Railway Company (Royal Alexandra Hotel), Winnipeg, Man.* The eligible voters are the employees of the hotel, exclusive of the manager, assistant manager, manager's stenographer, chief steward, inspectors, head waiter, housekeeper, laundry superintendent, assistant laundry superintendent, accountant, assistant accountant, accountant's stenographer, chief clerk, head bellman, house officers, night watchmen, chef, associate chef, head porter, printer, tavern manager, chief telephone operator, night auditor, assistant head waiter and head waitress, accountant's clerks, timekeepers, stenographer, timekeeper, kitchen and coffee shop checkers, relief checker and waitress.

Application for Certification under Investigation

(1) The Canadian Brotherhood of Railway Employees and Other Transport Workers, Division No. 272, on behalf of certain employees of the Fort Garry Hotel, Canadian National Railways, Winnipeg, Man.

(2) The Brotherhood of Railway and Steamship Clerks, Freight Handlers, Express and Station Employees on behalf of clerks in the superintendent's office, freight office, stores department, yard office, mechanics' office, ticket clerks and agents, truck drivers and night watchmen of the Niagara, St. Catharines and Toronto Railway employed at St. Catharines, Ont., Niagara Falls, Ont., Welland, Ont., Port Dalhousie, Ont., Foothills, Ont., and Thorold, Ont.

(3) The Plant Employees' Association of the Bell Telephone Company of Canada on behalf of certain plant employees of the Bell Telephone Company of Canada, Montreal, P.Q.

(4) The Canadian Brotherhood of Railway Employees and Other Transport Workers on behalf of certain employees of the Prince Arthur Hotel, Canadian National Railways, Port Arthur, Ont.

(5) International Longshoremen and Warehousemen's Union, Local 501, on behalf of Deep Sea Longshoremen in the Port of Vancouver, employees of the Shipping Federation of British Columbia, Vancouver, B.C.

(6) The Hotel and Restaurant Employees' Union, Local 884, on behalf of waitresses, dining-room and counter girls, employees of the Whitehorse Inn, Whitehorse, Yukon Territory.

(7) The Hotel and Restaurant Employees' Union, Local 884, on behalf of waitresses and counter girls in the dining-room and counter department of the Whitehorse Grill, Whitehorse, Yukon Territory.

(8) The Hotel and Restaurant Employees' Union, Local 884, on behalf of waitresses employed in the dining-room and counter department of the S.N.A. Club Cafe, Whitehorse, Yukon Territory.

(9) The International Brotherhood of Blacksmiths, Drop Forgers and Helpers on behalf of the employees in the Maintenance Department of the Canadian Pacific Railway Company (B.C. Coast Steamship Service), Victoria, B.C.

Decisions of Board in Appeal Cases

The following appeal from a decision of the Ontario Labour Relations Board and application for leave to appeal therefrom were considered by the Wartime Labour Relations Board (National) and judgment given.

1. The Wartime Labour Relations Board (National) granted the application for leave to appeal but dismissed the appeal of Dome Mines Limited, Timmins, Ontario, and various other gold mining companies in the Timmins district from an order of the Ontario Labour Relations Board directing that votes be taken of the employees of each company without providing an opportunity of voting to those members of His Majesty's forces who were employees and who are either on leave of absence or entitled to be reinstated as employees on the completion of their military service.

The Ontario Board had declined to include in the voting unit in each case employees who are members of His Majesty's forces on the ground that their rights could not be detrimentally affected by any collective agreement which might be negotiated between the parties, pointing out that even a closed shop provision in such a collective agreement could not bar the re-employment of persons who come within the Reinstatement in Civil Employment Act, 1942, Canada, and the Rights of Labour Act, 1944, Ontario, and also that under the Wartime Labour Relations Regulations employees may avail themselves of the right to change their bargaining representatives at fairly frequent intervals so that any alteration in the views of the working force of an enterprise will soon be reflected in application for the certification of new bargaining representatives.

The National Board in its Reasons for Judgment stated that the real issue in this appeal was whether a unit of employees is appropriate for collective bargaining as provided by Section 7 of the Wartime Labour Relations Regulations if it includes employees who are now on military service. The employees properly included in the unit are those who require a collective agreement as defined by Section 2(1)(c) of the Regulations—namely, an agreement containing provisions with reference to rates of pay, hours of work or other working conditions. They are the persons who will carry out the terms of any agreement when made, who will decide whether they will abide by the terms of the agreement when made, or strike in breach of the terms of the agreement and the Regulations. Section 5(2) contemplates that the majority of the employees affected may be members of one trade union and that the members of the union may elect or appoint bargaining representatives. It provides that employees who request the trade union in writing to elect or appoint bargaining representatives on their behalf shall be deemed to be members of the trade union for the purpose of the section. Section 7 provides the Board must be satisfied that the trade union acted with the authority of the majority of the employees affected as prescribed by subsection two of section 5.

The Board then considered how the employees now on military service come within these requirements as members of an appropriate bargaining unit, and decided that it would hardly be feasible to approach those overseas to sign a document requesting the trade union to elect or appoint bargaining representatives on their behalf; that it would be absurd for the Board to send ballots to soldiers overseas and to ask them to say whether the trade union acted with their authority in electing or appointing bargaining representatives when everyone knows that they could not possibly have had any knowledge of the election or appointment of the bargaining representatives.

For the reasons above indicated the National Board, although recognizing the tremendous obligation to those who have enlisted, reluctantly came to the conclusion that members of His Majesty's forces who were employees and who are either on leave of absence or entitled to be reinstated as employees on the completion of their military service could not properly be included in the bargaining unit.

Dealing with the contention of the appellants that the appointment of bargaining representatives was not regularly and properly made, the Board was of the opinion that this did not constitute grounds for setting aside the decision of the Ontario Board in ordering the election. On this point the National Board said in part: "If the majority of the employees authorized the election of the bargaining representatives, they will vote accordingly and thereby ratify any irregularity in the previous proceedings. On the other hand, if they did not authorize the election of the bargaining representatives, they will vote against them and the Ontario Board will refuse to certify them."

The Board granted the application of the appellants for leave to appeal but dismissed the appeal.

The appellants were represented by Messrs. C. C. Calvin, K.C., J. H. Stovel, P. C. Findlay, E. L. Longmore and J. J. Robinette, and the respondent union by Messrs. W. F. Kennedy and R. H. Carlin, M.P.P.

2. The Wartime Labour Relations Board (National) denied the appeal of the Chromium Mining and Smelting Corporation, Sault Ste. Marie, Ontario, and the Employees Collective Bargaining Committee from a directive of the Ontario Labour Relations Board, naming and appointing Local 2451, United Steelworkers of America and certain officers of that Union as bargaining representatives of certain employees of the employing Company.

Under direction of the Ontario Labour Relations Board an examination of the Union's membership records was conducted by an officer of that Board which showed that approximately ninety per cent (90%) of the eligible employees of the Company were members of the Union. On this result, the Ontario Board certified the Union without taking a vote.

The Company contended that there was a group of employees of the Company opposed to the Union and that there was a contract outstanding which at least the Company regarded as a collective bargaining contract and in view of this, the Ontario board should have ordered a vote to satisfy all parties as to the wishes of the employees.

The Wartime Labour Relations Board (National) denied the appeal holding that the appellant had not established that the Ontario Board was wrong in certifying the bargaining representatives.

The appellants were represented by Mr. Norman Bryne, Hamilton, Ontario, and the respondent Union by Mr. F. A. Brewin, Toronto, Ontario.

Dispute in Meat Packing Industry

Report of Commissioner *re* the United Packinghouse Workers of America and Canada Packers Ltd., Swift Canadian Co., and Burns and Co. Ltd.

THE Minister of Labour received a report, dated November 3, by the Hon. Mr. Justice S. E. Richards who was appointed an Industrial Disputes Inquiry Commissioner under the Provisions of Order in Council P.C. 4020 to enquire into a dispute between the United Packinghouse Workers of America and three packinghouse companies, namely, the Canada Packers Limited, Swift Canadian Company Limited, and Burns and Company Limited.

The matter arose from a demand of the Union for a master agreement to cover each of the three companies. As negotiations to that end were not making any progress there was every evidence of a nation-wide strike in the packinghouse industry. With a view to preventing such a strike the Minister of Labour appointed Mr. Justice Richards as Commissioner.

The text of his report follows:

Report of Commission

Toronto, November, 3, 1944.

To: The United Packinghouse Workers of America;
Canada Packers, Limited;
Swift Canadian Company, Limited;
Burns and Company, Limited.

Sirs:

All matters in dispute between the United Packinghouse Workers of America, Canada Packers, Limited, Swift Canadian Company, Limited and Burns and Company, Limited, having been discussed at length and all reasons and arguements put forward having been weighed most carefully, and the parties in a sincere endeavour to compromise having come very close to an agreement on all points, I recommend the following, namely:—

I. That all the parties concerned accept and subscribe to the following statement of policy:

"The Companies and the Union jointly recognize the continuing need for maintaining efficient production in the packinghouse industry in both wartime and peacetime, and pledge full co-operation to that end. The companies and the union are agreed that the war effort calls for a high standard of production without interruption or curtailment of any kind.

"It is agreed by all who have participated in this conference that full co-operation between the union and the companies can be a major factor in promoting efficient production. All are therefore agreed, individually and collectively, to do everything in their power to bring about full co-operation between employers and employees as a mutual responsibility, in negotiating agreements, in the application of such agreements, in efforts to improve production and in all other matters affecting the relations between the companies and the workers in the packinghouse industry.

"The representatives of the union declare it to be the policy of their Union to promote co-operation and to maintain production, to settle all differences by negotiation, conciliation, or the established grievance procedure, whichever may be appropriate. The representatives believe that the membership will accept the policy of the Union in this respect without reservation upon being informed by their representatives of the assurances which have been given by the companies that they are bargaining in good faith with the Union, that negotiations and conciliation actually do bring results and that a basis for goodwill and co-operation has been established. The representatives further believe that the understanding reached during this conference will enable the officers of the Union to persuade the membership that negotiation and not any curtailment of production is the proper method of obtaining settlement, both now and in the future, and that any difficulties that may arise will be overcome by practical co-operation. On the basis of the understandings reached at this conference the representatives undertake to do everything in their power to make such co-operation a reality in all plants.

"On their part the companies assure the Union of their desire to implement the understandings reached at this conference and to do everything in their power to make co-operation a reality in all plants. The companies affirm that their policy is one of full recognition of the Union as bargaining agency for the employees represented at this conference. It is not the policy of any of the companies to prepare an escape from relations with the Union, and it is their clear and settled policy to continue dealing with the Union by agreement and by negotiation. The companies believe the understandings reached at this conference will enable the parties to institute a working relationship in which any differences that may arise will be overcome by practical co-operation, with benefit to all parties as well as to the war effort."

II. That the parties agree that any collective agreement made with a local of this Union at any plant, shall contain the following standard clauses:

"1. *Check-off provisions.*

(*a*) The Company agrees that upon receipt of written authorization in form prescribed in clause (*b*) of this article it will, so long as such authorization remains in force, deduct from the employee's pay on the first payday in each calendar month during the term of this agreement the amount of the union dues so authorized to be deducted and will transmit the total sum of the amounts so deducted to the designated official of the Local Union on or before the 1st day of the following calendar month.

(*b*) The following form of authorization is mutually agreed upon as "the prescribed form" referred to in the next preceding clause of this article:—

"I, ..., being an employee of (name of Company) at its plant at (location of plant) and a member of Local ..... of the United Packinghouse Workers of America, hereby authorize and direct (name of Company) to deduct monthly on the first payday of each calendar month from any earnings accumulated to my credit the sum of $....., this being the amount of my monthly dues to Local ..... of the United Packinghouse Workers of America.

"I further authorize (name of Company) to pay the amounts so deducted to the (designated official of the Local Union), whose receipt therefor shall constitute a good and sufficient discharge to (name of Company) for the amount so deducted from my earnings.

"I reserve the right to cancel this authorization at any time on 15 days' notice to (name of Company) and agree that if it is so cancelled it may not again be renewed until after the expiration of a further 15-day period.

Name .....
Address .....
Number .....,
Witness ....."

2. *Maintenance of Membership provisions.*

(*a*) The Company agrees that, subject to compliance with the procedure hereinafter set out, it shall be a condition of employment that any enployee who at the date of this agreement was a member of the Union in good standing, or who becomes a member after that date, shall maintain such membership during the term of this agreement.

(*b*) Any employee to whom clause (*a*) of this article applies may resign from membership in the Union within the 15 days immediately following the expiry date of this agreement and his employment shall not thereby be affected.

(*c*) The procedure whereby clause (*a*) of this article becomes effective in respect to the employees affected by it shall be as follows:—

(i) The Union will at the earliest convenient date following the date of this agreement furnish the Company with a list of those employees who are members of the Union in good standing, such list to be certified by a local official of the Dominion Department of Labour as being in accord with the signed and accepted applications of the individuals named in said list.

(ii) The Company will cause this list or extracts from it to be posted upon a notice board or boards conveniently accessible to all employees named upon the list or portion of it so posted.

(iii) Concurrently with the posting of the list the Company will post upon the board or boards upon which it has been posted, a notice in the form set out in the next following clause of this article and may deliver to any employee named on such list a copy of such notice, such delivery to be made to the employee openly and upon the premises of the Company's plant.

(iv) Form of notice:—

To all employees

The collective agreement now in force between this Company and your bargaining representative, Local ..... of the United Packinghouse Workers of America contains the following provisions, (quote (*a*) and (*b*) above).

A list of those employees who are members in good standing of the above named local union has been furnished to the Company and is now posted upon the notice board or boards upon which notices of interest to employees are usually placed.

By arrangement with the Union the provisions of the collective agreement above quoted will apply to all employees whose names appear in the list of Union members unless the Company receives notice from any employee within 15 days from the date of this notice that such employee has resigned his membership in the Union, in which event the provisions above quoted shall not apply to such employee.

(*c*) No employee shall be subjected to any penalties against his application for membership or for reinstatement as a member in the Union except as may be provided in the Constitution and By-laws of the Union; and no coercion or intimidation of any kind shall be practised to compel or influence an employee to join the Union nor shall any discrimination of any kind whatever be practised or permitted with respect to employees who are or who become members of the Union.

(*d*) If any employee asserts that he has been unfairly deprived of good standing in the Union such assertion shall constitute a grievance and shall be dealt with according to the grievance procedure established by this agreement.

3. *Slow-downs and Interruptions of Production.*

It is agreed that the Union and its members individually and collectively will not, during the term of this agreement, cause, permit or take part in any slow-down or other curtailment or restriction of production or interference with work in or about the Company's plants or premises. The Company reserves the right to discipline any employee taking part in any violation of this provision of this agreement.

4. *Strikes and Lockouts.*

It is agreed that there shall be no strike by or lockout of employees affected by this agreement until *all* the procedure provided herein for the settlement of disputes or grievances has been exhausted.

III. That in the negotiation of every collective agreement the following principles be adopted and followed:—

"All parties recognize the desirability of a satisfactory grievance procedure. It is agreed that it should be standardized as closely as may be practicable in the plants of each company. At the same time it should be so designed that as many grievances as possible will be settled expeditiously and on the spot. It is the intention of both the Companies and the Union that in practice consultation between the appropriate persons at any stop in the grievance procedure will take place quietly and speedily so that any possible cause of friction will be minimized.

IV. That the following statement made at the conclusion of our conference by Mr. Forsyth, on behalf of the Companies named above, with respect to the procedure upon the negotiation of agreements and concurred in by Mr. Jolliffe, counsel for the Union, be accepted as fixing the procedure to be followed:—

"That statement is easy to make. You have the memorandum drafted by Mr. Jolliffe and myself. From then on we say each company will agree as a maximum that with respect to Canada Packers and Swifts, they will divide their plants into two zones. The dividing line will be Winnipeg (with Winnipeg in the Western zone). The Burns Company will divide its plants into two zones, Manitoba-Saskatchewan and Alberta-British Columbia. We will agree that each company will have one expiry date for agreements with its plants in each zone and that expiry date will fall between the 15th of July and the 15th of November. The companies will commit themselves to an understanding with the union that it is desirable that negotiations in respect of any one of these agreements be undertaken and concluded between the 15th of July and the 30th of September, if it is possible to do that. But each agreement of each company in a zone will be negotiated at the plant where the agreement is effective, always on the understanding that the company undertakes that when negotiations for any contract are going on there will be someone there authorized to represent the company and conclude the contract, on condition that the union agrees that their representatives at the negotiations have authority to conclude the contract in form, subject to ratification in accordance with the union constitution, to be obtained at a meeting called, if possible, within 48 hours. Negotiations for each plant to be completed as soon as may be done conveniently by meetings between the parties on dates which the parties shall endeavour to agree upon, but if there is a dispute as to the dates upon which the negotiations should proceed for each plant, said dates shall be decided by Mr. Justice Richards and Messrs. Forsyth and Jolliffe."

V. That if any difference arises between any of the companies and the Union with respect to the interpretation of this settlement, or the negotiation of agreements pursuant to this settlement, or the interpretation thereof, or with respect to any other matter affecting their relations, any of the parties may have recourse in an informal way to Mr. Justice Richards and Messrs. Forsyth and Jolliffe, who shall become, if the difference be not sooner settled, a board of arbitration, and the decision of the majority of the said board shall be final and binding on both parties.

Since I have already had expressions of opinion which leave no doubt in my mind but that the foregoing recommendations will be accepted by all concerned, I think that I should take this occasion to express my appreciation of the spirit which has characterized these conferences and to compliment all parties upon their businesslike approach to the solution of their problems. I look forward with confidence to a relationship between the parties which will promote prosperity and security in the industry.

Yours very truly,

(*Sgd.*) S. E. RICHARDS,
Industrial Disputes Inquiry Commissioner.

November 7th, 1944.

Conciliation Proceedings under the Wartime Labour Relations Regulations

THE Wartime Labour Relations Regulations provide for conciliation machinery to attempt settlements of disputes where negotiations for an agreement have been unsuccessfully continued for thirty days following certification of bargaining representatives. Disputes of this nature are referred to the Minister of Labour by the Wartime Labour Relations Board (National) or by the Provincial Boards. A conciliation officer is then appointed to confer with the parties and endeavour to effect an agreement. If the conciliation officer is unable to bring about settlement of the matters in dispute and reports that in his view an agreement might be facilitated by the appointment of a Board of Conciliation, a Board is established by the Minister of Labour forthwith. The duty of such a Board is to endeavour to effect an agreement between the parties on the matters in dispute and to report its findings and recommendations to the Minister.

Board Reports Received

During November reports were received from four Boards of Conciliation:

Concerning Blair Iron Works, New Westminster, B.C., and Local 3254, United Steelworkers of America.

Concerning Sun Publishing Company, Sun Directories, Limited, Vancouver Engravers, Limited, and Vancouver Newspaper Guild, Local No. 1.

Concerning John Inglis Company, Limited, Toronto, Ont., and Local 2900, United Steelworkers of America.

Concerning Breithaupt Leather Company, Penetang, Ont., and the National Union of Shoe and Leather Workers, Local No. 24.

Boards Established

During November seven Boards of Conciliation were established, but not fully constituted.

Joseph Stokes Rubber Company, Welland, Ont.—On November 6 the Minister of Labour established a Board of Conciliation to deal with a dispute between Joseph Stokes Rubber Company, Limited, Welland, Ont., and Local 523, United Electrical, Radio and Machine Workers of America. Mr. Harold Perkins, Industrial Relations Officer, Toronto, investigated the case as Conciliation Officer. On November 2 Mr. Perkins' report was received, recommending the establishment of a Board. Appointed to the Board were Mr. Murton A. Seymour, K.C., St. Catharines, Ont., on the nomination of the employing company, and the Rev. Dr. H. G. Forster, Welland, Ont., on the nomination of the employees concerned. At the end of the month a nomination for chairman and third member of the Board was awaited from Mr. Seymour and Dr. Forster.

Upper Canada Mines, Limited, Dobie, Ont.—On November 6 a Board of Conciliation was established to deal with a dispute between the Upper Canada Mines, Limited, Dobie, Ont., and Local 240, Kirkland Lake Mine and Mill Workers Union. Mr. F. J. Ainsborough, Industrial Relations Officer, Toronto, had been appointed as Conciliation Officer to confer with the parties and attempt to effect an agreement. On November 2 Mr. Ainsborough's report was received, recommending the establishment of a Board.

Appointed to the Board were the Honourable Senator J. J. Bench, St. Catharines, Ont., and Mr. Drummond Wren, Toronto, Ont., appointed on the nomination of the employer and employees respectively. At the end of the month a nomination for chairman and third member of the Board was awaited from Senator Bench and Mr. Wren.

Ingersoll Machine and Tool Company, Limited, Ingersoll, Ont.—On November 7 a Board of Conciliation was established to deal with a dispute between the Ingersoll Machine and Tool Company, Limited, Ingersoll, Ont., and Local 2918, United Steelworkers of America. Mr. James Hutcheon, Industrial Relations Officer, Toronto, had been appointed Conciliation Officer to confer with the parties and attempt to effect an agreement. Mr. Hutcheon's report was received on November 5 recommending the establishment of a Board. Appointed to the Board were Mr. J. J. Robinette, Toronto, Ont., and Mr. Oliver Hodges, London, Ont., appointed on the nomination of the employer and employees respectively. At the end of the month a nomination was awaited from Mr. Robinette and Mr. Hodges concerning the third member and chairman of the Board.

International Harvester Company, Chatham, Ont.—On November 27 the Minister of Labour established a Board of Conciliation to deal with a dispute between the International Harvester Company, Chatham, Ont., and the International Union, United Automobile, Aircraft and Agricultural Implement Workers of America (UAW-CIO). Mr. F. J. Ainsborough, Industrial Relations Officer, Toronto, had investigated the case as Conciliation Officer and on November 27 his report was received

recommending a Board of Conciliation. The parties concerned were requested to make nominations for membership on the Board.

Steel Company of Canada (Canada Works) Hamilton, Ont.—On November 16 the Minister of Labour established a Board of Conciliation to deal with a dispute between the Steel Company of Canada (Canada Works) Hamilton, Ont., and Local 3250, United Steelworkers of America. Mr. J. P. Nicol, Industrial Relations Officer, Toronto, who had investigated the dispute as Conciliation Officer, reported to the Minister on November 15 and recommended the establishment of a Board. Appointed to the Board were Mr. J. A. McNevin, Chatham, the nominee of the employing company, and Mr. Drummond Wren of Toronto, the nominee of the employees concerned. Mr. Wren and Mr. McNevin were requested to confer on the nomination of the chairman and third member of the Board.

Ontario Steel Products, Limited, Chatham, Ont.—On November 7 a Board of Conciliation was established by the Minister of Labour to deal with a dispute between the Ontario Steel Products, Limited, Chatham, Ont., and the International Union, United Automobile, Aircraft and Agricultural Implement Workers of America (UAW-CIO). Mr. James Hutcheon, Industrial Relations Officer, Toronto, had investigated the case as Conciliation Officer, and on November 5 his report was received recommending the establishment of a Board. Appointed to the Board were Mr. J. J. Robinette, Toronto, the nominee of the company and Mr. Bora Laskin, also of Toronto, the nominee of the employees concerned. Mr. Robinette and Mr. Laskin were requested to confer on the nomination of a chairman and third member of the Board.

Defence Industries, Limited, Ajax, Ont.—On November 22 the Minister of Labour established a Board of Conciliation to deal with a dispute between Defence Industries, Limited, Ajax, Ont., and Local 521, United Electrical, Radio and Machine Workers of America. Mr. J. P. Nicol, who had investigated the case as Conciliation Officer, reported on November 21 and recommended the establishment of a Board. At the end of the month nominations were awaited for membership on the Board.

Agreements Facilitated by Conciliation Officers

Barrymore Cloth Company, Limited, Toronto, Ont.—On September 28 Mr. F. J. Ainsborough, Industrial Relations Officer, Toronto, had been appointed Conciliation Officer to confer with the Barrymore Cloth Company, Limited, Toronto, Ont., and the National Union of Textile Workers, to attempt to effect an agreement between them.

On November 7 a report was received from Mr. Ainsborough, indicating the successful conclusion of the negotiations and the signing of an agreement.

C. Richardson and Company, St. Mary's, Ont.—On October 24, Mr. Harold Perkins, Industrial Relations Officer, Toronto, was appointed a Conciliation Officer to confer with C. Richardson and Co., St. Mary's, Ont., and the Dairy Utensil Workers' Union in an attempt to effect an agreement between them.

On November 7 a report was received from Mr. Perkins, indicating the successful conclusion of the negotiations and the signing of an agreement.

Fairchild Aircraft, Limited (Restaurant Division) Longueuil, P.Q.—On October 20, Mr. Raoul Trepanier, Industrial Relations Officer, Montreal, had been appointed Conciliation Officer to confer with the Fairchild Aircraft (Restaurant Division) Longueuil, P.Q., and Local 382, Hotel and Restaurant Employees' Union in an attempt to effect an agreement between them.

On November 16 a report was received from Mr. Trepanier indicating the successful conclusion of the negotiations and the signing of an agreement.

Regina Sash and Door Company, Regina, Sask.—On September 27 Mr. H. S. Johnstone, Industrial Relations Officer, Winnipeg, was appointed Conciliation Officer to confer with the Regina Sash and Door Company, Regina, Sask., and the United Woodworkers Union in an attempt to effect an agreement.

On October 27 a report was received from Mr. Johnstone indicating the successful conclusion of the negotiations and the signing of an agreement.

Assignment of Conciliation Officers

Motor Products Corporation, Limited, Windsor, Ont.—Subsequent to previous appeal proceedings in this case (LABOUR GAZETTE, September 1944, page 1110 and page 1116) the Minister of Labour, on November 16, was advised by the Ontario Labour Relations Board that negotiations had been proceeding for thirty days and that there was no indication of the completion of an agreement between the Motor Products Corporation, Windsor, Ont., and Local 195, International Union of United Automobile, Aircraft and Agricultural Implement Workers of America (UAW-CIO).

On November 17 Mr. F. J. Ainsborough, Industrial Relations Officer, Toronto, was

appointed as Concilation Officer to confer with the parties and attempt to effect an agreement.

Northern Cartage and Contracting Company, Prince Albert, Sask.—On November 13 the Minister of Labour was advised by the Saskatchewan Wartime Labour Relations Board that negotiations had been continuing for 30 days between the Northern Cartage and Contracting Company, Prince Albert, Sask., and the Canadian Brotherhood of Railway Employees and Other Transport Workers, and that there was no indication of the successful completion of an agreement.

On November 14, Mr. H. S. Johnstone, Industrial Relations Officer, Winnipeg, was appointed Conciliation Officer to confer with the parties in an attempt to effect an agreement.

Fowler's Canadian Company, Limited, Hamilton, Ont.—On November 13 the Minister of Labour was advised by the Ontario Labour Relations Board that negotiations had been continuing for thirty days between the Fowler's Canadian Company, Limited, Hamilton, Ont., and the United Packinghouse Workers of America and that there was no indication of the successful completion of an agreement. On November 14 Mr. F. J. Ainsborough, Industrial Relations Officer, Toronto, was appointed Conciliation Officer to confer with the parties in an attempt to effect an agreement.

General Dry Batteries, Limited, Toronto, Ont.—On November 13 the Minister of Labour was advised by the Ontario Labour Relations Board that negotiations had been continuing for thirty days between the General Dry Batteries, Limited, Toronto, Ont., and the United Electrical, Radio and Machine Workers of America, Local 512.

On November 14 Mr. Harold Perkins, Industrial Relations Officer, Toronto, was appointed Conciliation Officer to confer with the parties and attempt to effect an agreement.

De Havilland Aircraft Company of Canada, Limited, Toronto, Ont.—On November 17 the Minister of Labour was advised by the Ontario Labour Relations Board that negotiations had been continuing for thirty days between the De Havilland Aircraft Company of Canada, Limited, Toronto, and the International Union of United Automobile, Aircraft and Agricultural Implement Workers of America (UAW-CIO) Local 112.

On November 20 Mr. F. J. Ainsborough, Industrial Relations Officer, Toronto, was appointed a Conciliation Officer to confer with the parties in an attempt to effect an agreement.

Miramichi Lumber Company, Limited, Minto, N.B.—On December 1 the Minister of Labour was advised by the New Brunswick Wartime Labour Relations Board that negotiations had been continuing for thirty days between the Miramichi Lumber Company, Limited, Minto, and Local 7409, United Mine Workers of America.

On December 2 Mr. H. R. Pettigrove, Industrial Relations Officer, Fredericton, N.B., was appointed a Conciliation Officer to confer with the parties and attempt to effect an agreement.

Willard Storage Battery Company of Canada, Ltd., Toronto, Ont.—On November 20 the Minister of Labour was advised by the Ontario Wartime Labour Relations Board that negotiations had been continuing for thirty days between the Willard Storage Battery Company of Canada, Limited, Toronto, and Local 512, United Electrical, Radio and Machine Workers of America.

On November 21 Mr. William Dunn, Industrial Relations Officer, Toronto, was appointed a Conciliation Officer to confer with the parties and attempt to effect an agreement.

Charlevoix-Saguenay Telephone Company, La Malbaie, P.Q.—On November 29 the Minister of Labour was advised by the Quebec Wartime Labour Relations Board that negotiations had been continuing for thirty days between the Charlevoix-Saguenay Telephone Company, La Malbaie, P.Q., and the National Catholic Syndicate of Charlevoix-East.

On December 1, Mr. Liguori Pepin, Industrial Relations Officer, Montreal, was appointed a Conciliation Officer to confer with the parties and attempt to effect an agreement.

Canadian Car & Foundry, Limited, Brantford, Ont.—On November 17 the Minister of Labour was advised by the Ontario Labour Relations Board that negotiations had been continuing for thirty days between the Canadian Car and Foundry, Limited, Brantford, and International Union of United Automobile, Aircraft and Agricultural Implement workers of America (UAW-CIO) Local 397.

On November 20 Mr. F. J. Ainsborough, Industrial Relations Officer, Toronto, was appointed a Conciliation Officer to confer with the parties and attempt to effect an agreement.

Andrews Wire Works of Canada, Limited, Watford, Ont.—On November 27 the Minister of Labour was advised by the Ontario Labour Relations Board that negotiations had been continuing for thirty days between the Andrews Wire Works of Canada, Limited,

Watford, Ont., and Federation of Industrial Workers Union, Local No. 2.

On November 30 Mr. F. J. Ainsborough, Industrial Relations Officer, Toronto, was appointed a Conciliation Officer to confer with the parties and attempt to effect an agreement.

Genelco, Limited, Peterborough, Ont.—On November 27 the Minister of Labour was advised by the Ontario Labour Relations Board that negotiations had been continuing for thirty days between Genelco, Limited, Peterborough, and Local 524 of the United Electrical, Radio and Machine Workers of America.

On November 30 Mr. J. P. Nicol, Industrial Relations Officer, Toronto, was appointed a Conciliation Officer to confer with the parties and attempt to effect an agreement.

Report of Board in Dispute between Blair Iron Works, New Westminster, B.C., and Local 3254, United Steelworkers of America

On November 6 the Minister of Labour received the unanimous Report of the Board of Conciliation which dealt with a dispute between the Blair Iron Works, New Westminster, B.C., and Local 3254, United Steelworkers of America.

The Board was under the chairmanship of Mr. F. M. Clement, Victoria, B.C., appointed by the Minister of Labour in the absence of a joint recommendation from the other two members; and Messrs. R. L. Norman and Herbert Gargrave, both of Vancouver, appointed on the nomination of the employer and employees respectively.

The text of the Board's report follows:

Report of Board

In the Matter of the "Wartime Labour Relations Regulations Act," Order in Council, P.C. 1003, and in the matter of a dispute between Blair Iron Works, New Westminster, and certain of their employees, members of the United Steelworkers of America, Local No. 3254.

To: the Honourable Humphrey Mitchell,
Minister of Labour,
Ottawa, Canada.

The Board of Conciliation appointed pursuant to the said Wartime Labour Relations Regulations on the thirty-first day of August, nineteen hundred and forty-four, respectfully reports as follows:

1. The life of the Board was extended from time to time by mutual agreement of the opposing parties.

2. The Board followed the principle of collaborating with the opposing parties in their discussions with the hope, and at one time the expectancy, that they would arrive at a mutual understanding. We regret to advise that they were unable to do so.

3. The first points that were emphasized by both parties were that at the present time there is no union agreement or contract and that the idea of a contract was foreign to the thinking of the employer, who had carried on for many years in a small business in which employer and employee had been very closely associated.

4. The United Steelworkers of America had been certified as the bargaining agency on May thirtieth and authorized to proceed with the negotiation of an agreement.

5. The employer promptly accepted the idea of a contract and then the question was one of the nature of the contract.

6. There is no dispute with regard to wages.

7. The representatives of the opposing parties mutually agreed on all items of the proposed Agreement except for Sections 2 and 3 of Article I, namely Union maintenance and check-off.

The Board is now recommending the completion of the following Agreement:

Article I—Bargaining Agency and Recognition

Section 1. The Company recognizes the Union as the sole collective bargaining agency for its employees and agrees to negotiate with the Committee selected by the Union, looking toward a peaceful and amicable settlement of any differences that may arise between the Company and the Union.

Section 2. Upon receipt by the Company of an order in writing signed by an hourly-rated employee of the Company in said plant requiring the Company to deduct from the wages of such employee an amount not exceeding One Dollar ($1.00) per month and to pay same to the Union, the Company agrees to observe such order until same is revoked by notice in writing to the Company by the employee.

Section 3. There shall be no discrimination against any employee because of his membership in any union.

Section 4. The Company shall grant the Union the right to place bulletin boards in agreed upon places in the plant for the purposes of posting Union notices, copies of this Agreement, and official papers. All such material must be posted only upon the authority of officially designated representatives of the Union. It is further agreed that these bulletin boards will not be used for disseminating political or advertising matter of any kind, not pertaining to the Union.

ARTICLE II—HOURS OF WORK

Section 1. The Company and the Union agree that the standard work day shall consist of eight (8) hours and the standard work week shall consist of forty-four (44) hours, Monday to Saturday on the First Shift.

Section 2. Forty (40) hours shall constitute a week's work on the Second and Third Shifts.

Section 3. Hours of work on the First Shift shall be from 8.00 a.m. to 12.00 noon, with thirty (30) minutes for lunch; 12.30 p.m. to 4.30 p.m.; Saturday from 8.00 a.m. to 12.00 noon.

Second Shift shall be from 4.30 p.m. to 12.30 a.m., with thirty (30) minutes for lunch, for which nine (9) hours' pay will be allowed.

Third Shift shall be from 12.30 a.m. to 8.00 a.m., with thirty (30) minutes for lunch for which nine (9) hours' pay will be allowed.

If the men work during lunch hour, equivalent time off is to be arranged with their foreman.

Section 4. Overtime rates will be paid for as follows: Time and one-half for the first four hours after regular shift, and double time thereafter.

Section 5. Employees called in to work and receiving less than four (4) hours' work shall be paid for four (4) hours.

Section 6. It is mutually agreed that double time shall be paid for all work performed on Sundays and on the following holidays: New Year's Day, Good Friday, Dominion Day, Labour Day, Thanksgiving Day, Christmas Day, and Armistice Day, Empire Day and Boxing Day, when proclaimed by federal or provincial governments.

Section 7. Any employee being discharged, laid off, or leaving of his or her own accord, shall be paid all wages due him or her as promptly as possible, or in any event, within twenty-four (24) hours, or the expiration of the next working day.

ARTICLE III—GRIEVANCE PROCEDURE

Section 1. In case a grievance arises in the plant, an honest effort shall be made to settle the differences in the following manner:

Section 2. There shall be a Grievance Committee, consisting of three employees designated by the Union, who are actually then in the employ of the Company, and who will be afforded such time off as may be required to attend meetings held at the request of the Management or the Grievance Committee. Minutes of meetings shall be kept, signed by both parties, one copy to be retained by the Company, one by the Union and a copy to be posted on the notice board.

Section 3. The Union agreed to advise the Company of the names of members of the Grievance Committee in writing, and also of any changes from time to time.

Section 4. The steps to be taken in the handling of any grievance shall be:

First: The aggrieved employee shall notify his Grievance Committeeman, who shall immediately request time off from his foreman in order to take up the matter. The Grievance Committeeman, with or without the aggrieved person, shall then take up the matter with the foreman. Failing a satisfactory settlement, the grievance shall be put in writing on the grievance forms supplied by the Union, and shall be signed by the aggrieved and the foreman, after which the second step shall be invoked. The foreman shall give his answer within twenty-four (24) hours.

Second: The Grievance report shall be submitted to the Superintendent by the Grievance Committeeman, who shall place his answer in writing on the form provided and return same to the Grievance Committeeman within forty-eight (48) hours.

Third: The Grievance Committee of the Union and representative of the Company shall deal with the matter at the regular monthly meeting, at a time mutually arranged. If, in the opinion of the Grievance Committee, the grievance is of an urgent nature, a special meeting may be arranged in order to deal with the matter. Failing settlement, the fourth step shall be invoked.

Fourth: The Grievance Committee, along with a representative or representatives of the International Union, and representatives of the Company along with the General Manager, shall attempt to reach a satisfactory settlement. Failing to do so within three days, step five may be invoked.

Fifth: The grievance shall be submitted to arbitration. The Union shall nominate one

arbitrator and the Company shall nominate one arbitrator. Nominations shall be made within forty-eight (48) hours of this step being invoked. Should the arbitrators not reach agreement within one week, step six may be invoked.

Sixth: The arbitrators shall then attempt to nominate an impartial arbitrator who shall act as chairman of the arbitration committee. Failing to agree upon such impartial arbitrator within a further 24-hour period, the Federal Department of Labour shall be requested to appoint such impartial arbitrator. Following the decision of the arbitrators, either party may have recourse to proceedings under Wartime Labour Relations Regulations P.C. 1003.

Section 5. In the case of a grievance involving the dismissal of an employee, the first step in this grievance procedure may be omitted. If, upon settlement, it is decided that the employee was wrongfully dismissed, he or she shall be reinstated with full compensation for time lost.

Section 6. It is mutually agreed that during the life of this Agreement, should any differences arise as to the meaning or application of this Agreement, or should any dispute arise in the plant, there shall be no stoppage of work or strikes, on the part of the Union; nor shall there be any lockouts on the part of the Company, until the grievance procedure outlined herein has been complied with. All decisions with regard to interpretations of this Agreement shall be made in writing and signed by both parties.

Article IV—Safety and Health

Section 1. The Company agrees to make reasonable provisions for the safety and health of its employees at the plant during the hours of their employment.

Section 2. It is mutually agreed that the Grievance Committee shall act as the Safety Committee, who along with management representative or representatives, shall meet not less than once each month. Minutes of such meetings shall be posted on the bulletin board.

Article V—Seniority

Section 1. All conditions of employment shall be based on seniority, ability and efficiency. In the event of lay-offs or in re-hiring, the Company shall observe the principle of seniority in accordance with the preceding sentence. Failure to agree shall constitute a grievance to be taken up under Article III of this Agreement. Seniority rights as established by mutual agreement between the Company and the Union shall be respected at all times.

Section 2. The Company shall make available to the Grievance Committee of the Union a list of starting dates of all employees.

Article VI—Wages

The following basic minimum rates shall be paid to members of the Union:

Lay-out men	$1 00 per hour
Electric Welders	1 00 " "
Leading Blacksmith	1 10 " "
Blacksmiths	1 00 " "
Blacksmith Helpers	80 " "
Punch and Shear Operators	90 " "
Drill Press Operators	85 " "
Improver Lathe Hands	85 " "
Helpers	77 " "
Improvers in any branch	25% less for 3 months, then full wages or revert to as before.

Employees on a dual classification shall receive the highest rate of pay applicable to the work performed, providing that at least two (2) hours' work shall be performed on the higher-paid classification. Employees transferred to other work receiving a higher scale, either temporarily or permanently shall receive the higher scale, providing that at least two (2) hours' work is performed on the higher-paid classification.

Article VII—Vacations

All employees covered by this Agreement shall receive, after one year's service, one week's holiday with pay.

Article VIII

Any rights and privileges of employees now in effect but not specifically mentioned in this Agreement, shall be continued and no changes shall be put into effect until mutually agreed upon by the Company and the Union.

Article IX—Duration of Agreement

This Agreement shall be for one year and either party hereto may, on ten days' notice, require the other party hereto to enter into negotiations for the renewal, modification or enlargement, such as the consideration of a maintenance clause in this Agreement within the period of two months prior to the expiry date and both parties shall thereto enter into such negotiations in good faith and make every reasonable effort to secure such a reconsideration and renewal.

It is mutually agreed that if legislation covering matters of Union security shall be enacted during the term of this Agreement,

a supplementary clause shall be added in conformity with such legislation.

BLAIR IRON WORKS

THE UNITED STEELWORKERS OF AMERICA

.....

.....

The Board of Conciliation begs further to report as follows:

1. During the hearings in connection with this dispute, the argument was presented that a Conciliation Board, under P.C. 1003, has not the authority or power to include in its report any recommendation to the effect, or to advise or suggest, that maintenance of membership or check-off clauses be included in any Agreement between an employer and a union, or other employees' organization.

2. This argument was based on Section 19 (1) and paragraph (*c*) of subsection (2) of Section 19, and Section 20. It was argued that the Sections referred to very definitely prohibit any form of coercion, and that maintenance of membership and check-off clauses are in the opinion of the employer the essence of coercion.

(This argument has been encountered in other Conciliation proceedings in British Columbia in which members of this Board have participated. It is noted that the same question is being raised in Conciliation hearings in various parts of Canada with increasing frequency.)

3. Uncertainty has developed in the minds of members of this Board out of and because of this situation, and in view of the further fact that members of this Board are not aware of any pronouncement on the point involved by appropriate authorities, this Board is hesitant to make any recommendation in relation to union maintenance or check-off clauses in its report and would urge that a definite ruling be obtained on the points raised.

Chairman.

Report of Board in Dispute between the Sun Publishing Company, Limited, Sun Directories, Limited, and Vancouver Engravers, Limited, and Vancouver Newspaper Guild Local No. 1

On November 11 the Minister of Labour received a report of the Board of Conciliation which dealt with a dispute between the Sun Publishing Company, Limited, Sun Directories, Limited, and Vancouver Engravers, Limited, Vancouver, B.C., and Vancouver Newspaper Guild, Local No. 1. A minority report was submitted by Mr. W. S. Owen.

The Board was under the chairmanship of Mr. J. H. Harman, appointed by the Minister of Labour on the nomination of the other two members of the Board, Messrs. W. S. Owen and H. W. Herridge, the nominees of the company and the union respectively.

The text of the Board's report and of the minority report follows:

Report of Board

Re: In the matter of the Wartime Labour Relations Regulations Act and in the Matter of Failure to Negotiate a Collective Agreement Between the Sun Publishing Co. Ltd., Sun Directories Ltd., and Vancouver Engravers Ltd., and Certain of their Employees, Members of The Vancouver Newspaper Guild, Local No. 1.

The Honourable, The Minister of Labour,
Ottawa, Canada.

The undersigned Chairman and H. W. Herridge, M.L.A., (nominee of the employees) being the majority of the above indicated Board of Conciliation appointed under the provisions of P.C. 1003 by Order in Council bearing date the 8th day of August, 1944, hereby tender the following report of the Board. Mr. W. S. Owen (appointee of the employers) finds himself unable to agree with this majority report, and will submit a minority report.

REPORT

The issue in dispute was whether or not the employer should enter into a contract with its employees whereby each and every employee should be and remain a member of the Vancouver Newspaper Guild Local No. 1.

The Vancouver Newspaper Guild Local No. 1 was originally an association of the employees of the Sun Publishing Company Limited, publishers of the Vancouver Daily Sun, and has since it formation been granted a charter by the Canadian Congress of Labour.

At the date of hearing, some 82 per cent of the employees concerned were members of this Guild.

The Board recommends that an agreement based on the following recommendations be entered into for a period of one year from the date of execution thereof.

The Board found it necessary to divide the employees concerned into four groups, namely:—

Group 1: Those employees of the Sun Publishing Company Limited and Associated Companies covered by the agreement whose duties do *not* include the gathering, editing compiling or writing of news stories and articles.

Group 2: The employees of Sun Directories Limited.

Group 3: Those employees of the Sun Publishing Company Limited and Associated Companies whose duties consist of collecting, editing, compiling and writing of news stories and articles.

Group 4: Those employees at present absent on service in the Armed Forces.

Re Group 1:

The Board recommends that those persons in this group with the exception of certain managerial staff, confidential secretaries and other employees listed in the schedule hereto shall become and remain members of the Guild during the term of the proposed contract, unless their employment shall be sooner terminated.

Those employees in this group who are not now members shall become members within sixty (60) days.

New employees in this group shall become members within thirty (30) days, and shall thereafter keep their membership in good standing.

The Board felt this provision to be proper in view of the fact that the employer is a party to "closed shop" contracts with some ten other Unions, the members of which are engaged in somewhat analogous occupations with the persons included in this group.

The evidence adduced by the parties did not indicate that there was any serious objection to the existence of such "closed shop" agreements on the part of the employer, and that such agreements were working with satisfaction to all concerned. No evidence was adduced to show that a Guild shop arrangement would not work equally well with these employees.

In this group the existing membership in the Guild is in excess of 90 per cent.

The Board further recommends that any employees within this group who were, and at the date of hearing, members of any other Union in good standing, should not be required to give up their existing membership or to become members of the Guild.

In the event, however, of any such person failing to keep their existing membership in good standing, they would be required to become and remain Guild members.

Re Group 2—Sun Directories Limited:

In this group the percentage of membership in the Guild is not sufficient to justify a Guild shop provision.

The Board recommends that each employee in this group be given fifteen (15) days in which to indicate to the management whether or not he or she desires to become or remain a Guild member.

At the expiration of fifteen (15) days all those persons who have indicated their desire to become or remain Guild members shall be required to become Guild members and keep their membership in good standing during the term of the contract, unless their employment shall be sooner terminated.

All new employees shall become Guild members within thirty (30) days of employment and shall remain members in good standing during the term of the proposed contract, unless their employment shall be sooner terminated.

Re Group 3:

Those employees whose duties include the collecting, writing, compilation and/or editing of news stories and articles.

The Board recommends that all present employees in this group be given a fifteen (15) day period in which to indicate to the management whether or not he or she desires to become or remain a Guild member in good standing.

All employees who elect to become or remain members in good standing shall do so for the term of the contract, unless their employment shall have been sooner terminated.

Fifty per cent of all new employees shall become members of the Guild within thirty (30) days of their employment, and shall remain members of the Guild in good standing during the balance of the term of the proposed contract, unless their employment shall be sooner terminated.

The material before the Board indicated that existing membership in this group was between 70 per cent and 80 per cent. In spite of this large proportion of members, the Board does not recommend anything more than this modified form of a Guild shop for a number of reasons, the chief of which are indicated below.

There is no evidence that any large majority of reporters and persons engaged in like occupations in the United States or Canada are now members of any Local of the Newspaper Guild or similar Association. Consequently the imposition of a Guild shop might seriously handicap the employer in its search for suitable employees, or even in extreme

cases, lead to some form of "double censorship" of news.

While future developments may justify changes, under the present circumstances the Board feels that a clause of this nature is sufficiently elastic to afford protection to the public interest and to the employees, and to enable the employer to be successful in its search for suitable talented staff.

The Board also recommends that a clause be included in the agreement protecting all members in this group from discipline by the Guild by reason of anything a member may write, or for any political or religious belief, or any expression thereof.

Re Group 4:

Employees now on Active Service with the Armed Forces: The evidence indicated that there were 40-odd persons in this group, and that over 30 were Guild members at the date of enlistment, and are still automatically Guild members in good standing.

This group has had no opportunity of expressing themselves on the question of a Guild shop agreement, and in view of this fact, and more particularly in view of the provisions of the "Civil Re-establishment Act", the Board recommends that in the event of such persons returning to employment with this employer that he or she be given thirty (30) days in which to elect whether or not they will become or remain members in good standing.

Each person electing to become or remain a Guild member shall be required to keep such membership in good standing during the term of the contract, unless their employment shall be sooner terminated.

The legal position of employees in this category in regard to collective agreements negotiated in their absence as yet has not been the subject of specific legislation. The Board is of the opinion that the recommended provision will cause no hardship.

The Board and the public generally will watch with interest the working of any agreement based on the foregoing, as it would appear that the subject of the dispute in this case represented a new phase of labour relationships in Canada. The issues involved have been extensively dealt with in the United States of America. In arriving at its recommendations the Board considered carefully the practice in that country, existing agreements between employees and newspapers there, the findings of similar Labour Relations Boards working under the aegis of the National War Labour Board of the United States of America, and the briefs and information presented to such Boards.

This Board would be remiss if it failed to comment on the excellent relationships at present existing between the employer and its employees. It became evident during the hearings that this fine relationship was due to the high calibre of management and control of the employer Companies and the employees' organization.

All members of the Board found the evidence adduced by the representatives of the parties and the briefs filed by those representatives of great assistance and value.

The schedule to this report contains suggested clauses for inclusion in Article 1 of the proposed agreement, providing for the carrying into effect of the above recommendations.

We are,

Yours respectfully,

(*Sgd.*) HERBERT W. HERRIDGE,
Member

(*Sgd.*) J. H. HARMAN,
Chairman.

Schedule

ARTICLE I—SCOPE OF AGREEMENT

Paragraph (a)—(Persons dealt with in Report under heading Group I)

The Publisher shall require as a condition of employment of any employee (except those listed below) that he shall be and remain a member of the Guild in good standing during the term of this contract unless his or her employment shall be sooner terminated. If any employee be not a Guild member at the time of signing of this agreement, or at the time of his or her acceptance of employment, he or she shall become a member within thirty (30) days after the signing of this agreement or his becoming an employee of the Publisher.

Exceptions:

Publisher,
General Manager,
Business Manager,
Advertising Director,
Comptroller,
Editorial Director,
Managing Editor,
Associate Editor,
National Advertising Manager,
Local Advertising Manager,
Classified Advertising Manager,
Circulation Manager,
Manager of Printing Department,
Manager of Sun Directories, Limited,
Business Office Manager,
Confidential Secretary to the Publisher,
Confidential Secretary to the Comptroller,
Confidential Secretary to the Business Manager,
One Payroll Clerk.

It is understood and agreed that the employees listed above shall be wholly exempt from Guild shop requirements and that the Publisher shall be entitled to require that any or all of such employees shall not be or become members of the Guild.

All employees of Sun Directories Limited who shall be governed by and subject to the provisions of Paragraph (*b*) of this Article, All employees whose duties consist in whole or in part of gathering, compiling, writing, and/or editing news stories and articles who shall be governed by and subject to the provisions of Paragraph (*c*) of this Article.

Paragraph (b)—(Persons dealt with in Report under heading Group II)

Every employee, subject to the provisions of this paragraph, shall indicate to the Publisher whether he or she desires to be and remain a Guild member in good standing as a condition of his or her employment during the term of this agreement, unless his or her employment shall be sooner terminated. Such indication to be made by delivering to the Publisher within fifteen (15) days of the execution of this agreement, a statement signed by the employee concerned, and reading as follows:—

"I desire to be and remain a member of Vancouver Newspaper Guild Local No. 1 in good standing as a condition of my employment with the Sun Directories Limited. I understand that in the event of my being expelled from membership in the Guild for any reason during the period of one year from the date hereof, that I will be automatically discharged from employment without any dismissal pay."

Forthwith upon delivery of such notice to the Publisher the employee signing such notice shall be required to be and remain a member of the Guild in good standing as a condition of his or her employment. The Publisher shall require all new employees of Sun Directories Limited to become members of the Guild within thirty (30) days from the date of hiring, and to remain members in good standing during the term of this agreement as a condition of their continued employment.

Paragraph (c)—(Persons dealt with in Report under heading Group III)

Every employee, subject to the provisions of this clause, shall within fifteen (15) days, indicate to the Publisher whether he or she desires to be and remain a Guild member in good standing as a condition of his or her employment during the term of this agreement. Such indication shall be given by each such employee in like manner as provided in Paragraph (*b*) of this Article.

Forthwith upon the Publisher receiving such notice he shall require the employee signing such notice to be and remain a Guild member in good standing as a condition of his or her continued employment.

The Publisher shall require one-half of all new employees hired during the term of this agreement, and subject to the provisions of this paragraph, to become and remain members of the Guild in good standing within thirty (30) days of date of hiring as a condition of their continued employment.

Paragraph (d)

If any employee required by any terms of this agreement to be and remain a Guild member in good standing shall lose good standing by falling three (3) months in arrears in Guild dues or assessments, the Publisher shall upon formal notice from the Guild, discharge said employee.

Paragraph (e)

If any employee required by the terms of this agreement to be and remain a member of the Guild in good standing shall fail to keep such membership in good standing for any reason other than non-payment of financial obligations as outlined in paragraph (*d*) above, he or she shall upon expulsion from the Guild be subject to immediate discharge upon formal notice from the Guild: PROVIDED, however, and it is hereby covenanted and agreed between the parties, that no member of the Guild shall be disciplined or expelled by the Guild by reason of race, sex, creed, or for anything a member may write, or for any political belief or expression thereof.

Paragraph (f)

Any employee who is discharged under the provisions of this Article shall receive no dismissal pay.

Paragraph (g)

Discharge made under Paragraph (*e*) of this Article shall not be subject to review by the Joint Agreement Committee except for the purpose of enquiry or determination as to whether or not such expulsion does or does not constitute a breach of the proviso contained in Paragraph (*e*) of this Article.

Minority Report

744 West Hastings Street,
Vancouver, B.C.,
November 6, 1944.

In the Matter of The Wartime Labour Relations Regulations Act and In the Matter of Failure to Negotiate a Collective Agreement Between The Sun Publishing Co., Ltd., Sun Directories Ltd. and Vancouver Engravers Ltd. and Certain of Their Employees, Members of The Vancouver Newspaper Guild, Local No. 1.

The Honourable The Minister of Labour,
Ottawa,
Canada.

DEAR SIR.—The undersigned, Walter S. Owen (Appointee of the employers) finding himself unable to agree with the majority report, herewith submits his minority report.

REPORT

In simple terms this dispute may be described as an attempt by the union to secure the exclusive right over all employees in the categories affected, to determine whether or not each such employee shall continue in his employment, to discipline each such employee in the discretion of those in control of the union, and to exact from each such employee as a condition of his continued employment a portion of each such employee's

monthly salary for the support of the union. This is the effect of the Guild shop provisions which were the only items in dispute before this Board.

Having in mind the business of this employer, such conditions are not in the interest of the employer, the employees, or the public, for the reasons now referred to, and in my opinion are not within the jurisdiction of a Board of Conciliation established pursuant to the provisions of P.C. 1003 to decide.

From the employer's standpoint, a newspaper is a vehicle for the publishing of news without fear or favour from any political or social group in the community. If, in order to continue in his employment, an employee is subject to the discipline of an organization apart from that of his employer, he is called upon to serve two masters, and if the employer is forced to employ only those who are members of that organization, he has by this fact ceded to that organization the ordinary right of discipline usually vested in him. This is particularly obnoxious in a field such as this where those in the editorial department are expected to gather the news and report it impartially and to reflect in their editorial writings the policy of the publisher, which in many cases, may run contra to that of any organization of employers or employees. Then, too, such clauses as are asked for here will limit the employer in its field of prospective employees by the very fact that this union has agreements with only two other newspapers in Canada, one a local morning newspaper, and the other a small socially owned newspaper being published in a small town in Nova Scotia. There is no evidence before the Board to establish that in any newspaper in Canada there is an agreement in effect such as is asked for here. Nor is the situation much better in the United States. The union itself produced evidence establishing that only 7 per cent of the newspapers of the same general classification in that country have agreements with the Guild and only 3½ per cent have a clause similar to that asked for here.

Why the union should, under these circumstances, ask for this power is hard to understand particularly since the employer has at all times been prepared to continue the same agreement under which the employer and employees have operated for more than three years under excellent conditions.

In support of the harmonious relations existing in this establishment we could quote the evidence of several witnesses, but the testimony of the union president, Mr. Widden, under examination by his own counsel, at pages 38 and 39 of the transcript should suffice.

"Q. Before you continue on that, will you tell the Chairman and members of the Board so as to get this clear at the outset, what are the relations that exist between yourself and the management presently, and since the inception of the contract?—A. I think the relations are very fine. There has never been any dispute so far with the possible exception of this one that we have not been able to settle by amicable means."

Under these circumstances should the publisher be deprived of the services of men like Bruce Hutchison, whose statement on this question was filed as Exhibit 24, and others who feel the same way?

Nor should the employer be forced in such manner by this provision to lend support to an organization which is tied to a political party and pledged to a political philosophy, which it does not otherwise subscribe to or support. In this connection one should give close study to the affiliation of the Guild with the Canadian Congress of Labour which has sponsored the Political Action Committee, and which Congress is largely made up of unions which are pledged to set up a new social order to supplant what is loosely termed the capitalistic system.

The employees who do not support this union have a vital interest in this matter also. How can they, against their considered judgment, fairly be asked to take an oath of allegiance to a union with political ties which are at variance with their own, and write feature stories and report news which tend to discredit such a union, even if they are prepared to run the risk of being assessed a prohibitive fine for that or some other reason and, because of refusal or inability to meet such assessment or for some trumped up charge against union rules, be dismissed from membership and thereby lose their right to continue in employment. That is absolutely foreign to our democratic processes.

Nor should they be deprived of all right to assess the stability and integrity of the union and its leaders and the honesty and intent of the policies they adopt before being required to join such a union and pay tribute to it financially in order to continue their life's work.

I believe the words of the Honourable Humphrey Mitchell, Minister of Labour, when speaking to the question of the check-off in Parliament on August 8, 1944, are most applicable. He said in part:

"Let me say frankly to the House that I am a trade unionist by heritage and conviction. My father was a trade unionist and my views on compulsion I got with my mother's milk when I was a boy in the Old Country. I do not believe in compulsion. I do not believe in compulsory co-operation. That is fundamental and I cannot change my ground on that.

"A degree of conciliation is necessary. I do not think you can shake an employer by the throat and call him a scoundrel and expect to make an agreement with him. Neither do I believe that an employer can try to destroy the men's organization and yet maintain industrial harmony. That is elementary and fundamental. I hope I shall never live to see the day in this country when the Government says to either employer or employee 'This is what you have got to do or else.'"

The public, too, must be given consideration in deciding an issue which so vitally affects them. The newspaper is conceded by all to be a greater force than almost any other agency in the moulding of public opinion. That large section of the public of this Province which supports the *Vancouver Sun* rightfully expects to get the news and views gathered by men and women of the highest degree of efficiency and integrity available in this field, and should not be expected to support any newspaper which is limited for the selection of its staff to one class of persons supporting and owing allegiance to a union which has declared itself as supporting one political party and which is in large measure dedicated to supplanting our present social system with some other.

After all, the publisher of a newspaper is in the peculiar and unusual position that the whole of his heavy investment stands or falls over a period of time, by the appeal which the calibre of the staff makes to the reading public. A publisher having to take sole responsibility in this direction should surely be untrammelled in the selection of those persons who develop his determined policy.

I am cognizant of the stand taken by the union, namely that the Guild shop provisions make certain that the benefits secured by the union at some expense are paid for by all who benefit therefrom. In this case, however, the evidence conclusively supports the view that no benefits have been secured for the employees other than those granted voluntarily by the present management, and I am unable to bring myself to believe that men like Bruce Hutchison, Elmore Philpott and others of such calibre are depending upon anyone or any agency other than their own native ability, capacity and hard work for their continued employment.

On the other hand I can readily visualize the possibility of such men being shorn of the independence characterized by their writings should they be regimented in the manner suggested. The union also stresses the need for security, but the evidence of Mr. Whidden quoted above coupled with the fact that the membership of this union has grown steadily, prove that any fear as to the possible successful interference with its function, which is to represent those who wish union representation, is highly illusory.

Finally, there remains what seems to me to be a very serious question, as to the Board's jurisdiction in the premises. P.C. 1003 is designed to guard against compulsion or undue influence of any kind and those words or their derivatives may be found throughout the whole of that Order in Council. Section 19 (2) (*c*) prohibits an employer or anyone acting in his behalf from seeking "by intimidation, by dismissal or threat of dismissal, by any other kind of threat, by the imposition of a pecuniary or other penalty or by any other means whatsoever to compel an employee to abstain from becoming or continuing to be a member or officer or representative of a trade union or an employees' organization, or from exercising his lawful rights", while Section 20 (1) reads as follows:—

"No person shall, with a view to compelling or influencing a person to join a trade union or employees' organization, use coercion or intimidation of any kind, but this subsection shall not be construed to prohibit the inclusion of any provision in a collective agreement."

Had Section 20 (1) ended with the word "kind", there would seem to be no doubt but that any provision in a collective agreement calling for maintenance of membership, Guild shop, closed shop or anything of that sort would be illegal as being contrary to the Code. It remains then to consider the exception to Section 20 (1).

That exception permits the inclusion of such a provision in a collective agreement, and the Board's jurisdiction is limited to intervening "with a view to the completion of an agreement" by the provisions of Section 11. "Collective agreement" is defined in the interpretation section 2 (*d*) as meaning "an agreement in writing between an employer or an employers' organization on the one hand and a trade union or an employees' organization on the other hand containing provisions with reference to rates of pay, hours of work or other working conditions."

Thus, if the Board fails by its intervention to bring about the completion of an agreement, i.e. an agreement between the parties freely and voluntarily entered into, then its task is ended. If it, by assuming the right nowhere granted to it by the regulations, should make a finding on the question, this would in effect be exercising compulsion or coercion upon the employer and, through him, upon the employees. This would be accomplished by lending moral strength or influence to the contention of the union and be sufficient support for the union to gain its end by threatening a strike. It could not be said to

be the result of a provision in a "collective agreement".

Further, it should be noted that in the definition of "collective agreement" it is defined as an agreement in writing . . . "with reference to rates of pay, hours of work or other working conditions."

Thus it will be seen that a collective agreement is one which contains provisions as to rates of pay and hours of work. The words "or other working conditions" are general words following an enumeration of a particular case, and by all rules of construction such general words are held to apply only to cases of the same kind as those which are expressly mentioned. Since Guild shop or other kindred provisions concern employment rather than working conditions such as rates of pay, hours of work, etc., I am of the opinion that no collective agreement can, by the terms of the Code, contain a provision calling for a Guild shop and the like.

In further support of this position, a reference to any number of agreements executed within recent years will establish that the words "working conditions" have a very definite meaning in labour relations, accepted by employers and unions alike without question. Under this heading collective agreements provide inter alia for minimum pay for short periods of work, regulation of the starting time of employees, premium pay for dirty work, time allowance for travelling in order to pick up tools, etc. when working away from the company's plant, and lunch rooms. Nowhere, so far as I know, have the words "working conditions" been interpreted so as to include the questions in dispute in these proceedings.

For these reasons it follows that on the facts I find against the request of the union for the inclusion in its agreement with the employer of Guild shop provisions. Even if there were some evidence to support the contention of the union, which, with respect to contrary opinion, I say there is not, I am convinced that the Board has no jurisdiction to make a finding on such a question in the light of the existing provisions of P.C. 1003.

All of which is respectfully submitted.

(Sgd.) W. S. Owen,
Member.

Report of Board in Dispute between John Inglis Company, Limited, Toronto, Ont., and United Steelworkers of America

On November 16 the Minister of Labour received the Report of the Board of Conciliation which dealt with a dispute between John Inglis Company, Limited, Toronto. A minority report was submitted by Mr. J. S. D. Tory.

The Board was under the chairmanship of His Honour Judge J. J. Coughlin, Sandwich, Ont., appointed by the Minister of Labour in the absence of a joint recommendation from the other two members; and Messrs. J. S. D. Tory, K.C., and Bora Laskin, also of Toronto, appointed on the nomination of the employer and employees respectively.

The text of the Board's report and of the minority report follows:

Report of Board

In the matter of the Wartime Labour Relations, Regulations P.C. 1003, and of a dispute between John Inglis Company Limited, Toronto, Ont. (Employer), and The United Steelworkers of America (Employees).

To:

The Honourable Humphrey Mitchell,
Minister of Labour,
Ottawa.

The Board appointed by you to effect a conciliation of the above dispute commenced its sittings at Toronto on October 28 and continued its sessions in that city throughout the following week.

Throughout the hearing the John Inglis Company, hereinafter referred to as the Company was represented by Mr. J. C. Adams, Counsel, and Mr. W. H. Dickie, Industrial Relations Manager, while the United Steelworkers of America, hereinafter referred to as the Union, was represented by Mr. John Mitchell, District Director, William Sefton, Field Representative and the following officers of Local No. 2900 of the Union, viz.: John Brodie, President, Homer McMullen, Financial Secretary, and Robert Fisher, Chairman of Shop Committee. Among the facts established before us were the following: The Company has, under its present management, operated a large industry in Toronto since 1937. That industry is separated into two divisions, ordnance and commercial, the former having a very large and fluctuating number of employees ranging from as high as 15,000 to as low as around 5,500, and the latter a much smaller but more constant strength of about 800. It is with regard to a bargaining agreement for the commercial division that the Board is called upon to act.

In November, 1942, the first collective bargaining agreement to be adopted in either division was made with respect to the commercial division only. It was a joint

agreement between the Company and two organizations, other than the Union, to wit: The International Association of Machinists and the International Brotherhood of Boilermakers, Welders and Helpers of America Local 637. One of its terms was that it should remain operative throughout the duration of the war.

This agreement applied only to such of the hourly rated employees as belonged to categories from which their organizations drew their membership and consequently many hourly rated employees in the commercial division were left outside the operation of this contract.

While this condition of partial collective bargaining operated in the commercial division there was no collective bargaining agreement reached in the ordnance division until August of 1943. During this period the Union had, through organizational effort, obtained sufficient support among the employees in the ordnance division to become the bargaining agent of the employees, other than certain numerically small units. As such agent it entered into an agreement with the Company dated August 19, 1943. It had also made similar progress in the commercial division so that by February of 1944 on a vote ordered by the Ontario Labour Court it polled 72 per cent of the total ballots counted which was, approximately, 53 per cent of all eligible employees. It is, as a result of its being certified to be the bargaining agent of the voting units of the commercial division covered by that vote that the Union now comes to be negotiating with the Company with respect to a collective bargain on behalf of such units. Various causes have interrupted and protracted the negotiations. However, by the time the matter came to this Board what could at least be called a tentative agreement had been reached on all but three points, each of which is regarded by the parties as of very considerable importance. These three are the questions of:—

1. The union shop.
2. Maintenance of membership.
3. Check-off of membership dues.

These three expressions are used in the conventional and well known sense obtaining in labour-management negotiations. It is well known that the co-existence of these three elements is the objective sought to be obtained by labour unions in the negotiations of collective bargaining contracts in so far as the interests of the Union as an entity is concerned.

The acquisition of these powers we are satisfied can much increase the power for doing good by the right kind of Union, while it correspondingly increases the power for evil of the wrong kind of union.

It is by reason of this fact that an employer may, in some cases, be justified in flatly refusing to grant any one of these three points, in other cases, in yielding guardedly to some of them; and in still others in yielding freely to all of them.

Each case should, in our opinion, depend on its own circumstances.

A convenient way of approaching a decision would be to consider how close to the ideal in the performance of union functions the organization in question has reached and how well its conduct has been established and maintained.

A rough definition of an ideal union might be something like this:—

> A union vigilant in protecting its members from injustice, sincerely concerned in advancing the interests of the industry which affords employment to its members, and at least not unmindful of the welfare of the consuming public on whom the industry depends.

In adopting such a method of approach to the consideration of the dispute which we are to attempt to solve certain relevant facts should now be stated.

This Union has been operating in the ordnance division as bargaining agent since the bargaining contract of August 1943. During that time it has handled a very large number of employee grievances. Most of them were settled on the very early steps of the ladder of appeal, the top step of which is reference to an impartial umpire. Only 52 out of an approximate 2,000 reached the second last step where the procedure is still that of direct negotiation between representatives of the parties. In not one case was it found necessary to go to the final step of arbitration.

It is conceded that the relations between the officers of the Company and the officers of the Union have been on a friendly footing of which fact the above record with respect to settlement of grievances seems to us to be conclusive proof.

The Company has no complaint to make concerning the Union's carrying out of the terms of the contract in the ordnance division.

The Union has no complaint to make with respect to the Company's carrying out of the same contract.

The Union has found much difficulty in the collection of dues from its members, due at least, in part, to the frequent transferring of workmen from one to another section of the

plant, and, probably, in part, to procrastination among its members.

The Company has granted facilities to Union officers to collect dues by affording these officers space and time off for such work.

There are a certain number of employees in the commercial division who remain members of the Machinists' Union and Boilermakers' Union above referred to. There are very many employees for whom the Union acts as bargaining agent who are not members of the Union.

Taking into account the comparative shortness of the period that has elapsed since the entry of the Union into the plant of the Company and taking all these other things into consideration the Board is of opinion that this is not a case for either the granting or the rejection in toto by the Company of the proposals in issue. We further are of opinion that good may come of trying out the operation of at least part of the union plan as an experiment during the life of the proposed contract. The experimental method has led to great advances in science and we see no good reason why it should not be used in the field of labour relations.

The Board as an agency of conciliation desires to go no further in recommending innovations in the form of contract heretofore operating in part of the Company's plant than what appears to it abundantly justified. We are of opinion that for the present the Company should withdraw its opposition to the voluntary check-off of Union members' dues and that the other proposals of the Union should remain in abeyance during the lifetime of the contract.

We, therefore, recommend that the agreement tentatively reached should be amended by adding thereto immediately following section 3, thereof, the following:—

> 3A. The Company undertakes to honour upon presentation by the Union, individual authorizations from its employees, members of the Union, irrevocable for the duration of this agreement, for the deduction of one dollar per month from their individual earnings for union dues, and to transmit to the Financial Secretary of the Union, monthly the sum represented by the total number of authorizations so placed in its hands.

Dated at Toronto, 4th day of November, 1944.

(Sgd.) J. J. COUGHLIN,
Chairman.

(Sgd.) BORA LASKIN,
Member.

Minority Report

The Wartime Labour Relations Regulations, P.C. 1003 and re dispute between John Inglis Co., Limited (Commercial Division), Toronto, Ontario, and United Steelworkers of America, Local 2900.

To:

The Honourable HUMPHREY MITCHELL,
Minister of Labour,
Ottawa, Canada.

Finding myself unable to agree entirely with the recommendations of the majority of this Board, I submit herewith a separate report. I have not had the advantage of reading the majority report in its final form, but have heard read a preliminary draft prepared by the Chairman.

Sittings of this Board were held in Toronto on October 28 and 30, and on the 1st, 2nd, 3rd, 4th and 5th days of November, 1944. The Company was represented by J. C. Adams, K.C., as Counsel, and by W. H. Dickie, Industrial Relations Manager. The Union was represented by John Mitchell, District Director, William Sefton, Field Representative, John Brodie, President of Local 2900, Homer McMullen, Financial Secretary of the Local, and Robert Fisher, Chairman of the Shop Committee, commercial division. All of these gentlemen appeared before us on three occasions and filed written briefs summarizing the facts and setting forth their position with respect to the issue in dispute. Mr. C. H. Millard, National Director of the Union, also appeared before us on November 4 to add to the representations made by the other Union members.

The issue in dispute is the claim of the Union to have included in the first collective bargaining agreement being negotiated with the Company in its commercial division, clauses providing for a union shop, maintenance of membership and a voluntary check-off of union dues. There are some minor points of disagreement which the parties have assured us would be settled without difficulty if this main issue were disposed of.

The facts, so far as they are material to an understanding of this dispute, are as follows: The Company is an old, established concern which has been under its present management since 1937. Its operations are divided at the present time into two divisions. One is the ordnance division, which is entirely engaged on a management fee basis in buildings and with plant supplied and owned by the Dominion Government, in the manufacture of various types of small arms. The number of employees in the ordnance division has been

as high as 15,000 and, at the present time, is approximately 5,500. The other is the commercial division, in which the present dispute arises. This division represents the normal peacetime business of the Company and consists of the manufacture of marine engines and boilers, special naval equipment, compasses and other products of a general engineering nature. During the war practically the entire output of this division is also devoted to war work of high priority. Approximately 800 men are employed in the commercial division at the present time.

The Company's policy in relation to labour relations is setd forth in a printed statement of policy distributed to all employees and reads in part as follows:—

> Employees are free to join any union of their choice, if they feel it is to their advantage, without question of discrimination by the Company. The Company will not permit any organization to employ threats or pressure tactics on employees for the purpose of procuring membership. Neither will it permit activities connected with such organizations on its premises during working hours.
>
> The Company cannot recognize any union as a sole bargaining agency unless its membership represents a substantial majority among the total employees involved.

In accordance with such policy, the Company, on November 7, 1942, entered into a joint collective agreement with respect to its commercial division with the International Association of Machinists, Lodge 35, and the International Brotherhood of Boiler Makers, Welders and Helpers of America, Local 637. This agreement was expressed to be for the duration of the war and, in subsequent proceedings in the Ontario Labour Court hereinafter mentioned, it was found as a fact that at the time of negotiating such agreement those Unions represented a majority of their respective crafts. There were, however, some employees who apparently were not represented by either of such Unions.

Subsequently to the entering into of this joint collective agreement with the Machinists' and Boiler Makers' Unions, with respect to employees in the commercial division, the Steelworkers' Union organized the employees in the ordnance division in competition with the International Association of Machinists. Early in 1943 a vote was taken, with the consent of the Company, under the auspices of the Dominion Department of Labour to determine which of these two Unions represented the employees in the ordnance division. The vote was won by the Steelworkers and the Company thereupon entered into negotiations with Local 2900 of that Union and, on August 19, 1943, a collective agreement was signed with respect to employees in the ordnance division. Recognition of the Steelworkers' Union was voluntary on the part of the Company and in accordance with its published statement of policy.

The agreement in the ordnance division expired on August 19, 1944, and negotiations have taken place with a view to its renewal. No agreement has yet been concluded, there being the same dispute with respect to union security and check-off of dues as exists in the present case.

It would appear, however, from a letter written to the Company on October 25, 1944, by Mr. Brodie, President of Local 2900, that the Union has decided to withdraw its claim for the inclusion in the renewal agreement relating to the ordnance division of a provision covering union shop, maintenance of membership and check-off of dues, and to remain content with a covenant by the Company to incorporate in the renewal agreement such provision for union security as should be enacted by legislation in Parliament or passed by Order in Council under the War Measures Act. The Union contends that this letter was written under pressure or what they thought was duress because they were afraid that the Company might withdraw certain concessions which had been tentatively agreed upon by the Company on condition that the claim of the Union in respect of union security and check-off be withdrawn.

I cannot agree with the Union's contention, advanced at the hearing, that a company should be unconditionally bound in negotiations to make every concession which it is willing to make and then proceed to conciliation proceedings in respect of the remaining points upon which it refuses to agree. After all, a collective bargaining agreement is a single document and the negotiations looking towards its completion must be regarded as a whole. If the expression "bargain" has any ordinary meaning it is that there shall be give and take on both sides. It cannot mean that one party must be expected to make all the concessions which he is prepared to make to reach a complete agreement and then, through conciliation machinery, be expected to make additional concessions with respect to the balance of the points, on which he does not agree. It is significant in this connection that in its Brief the Union concedes that no question arises before this Board with respect to collective bargaining.

The Company has opposed, at this stage, the granting of any form of union shop, maintenance of membership or check-off, although it has recognized the problem of the Union in the ordnance division so far as collecting dues is concerned and, as will be mentioned later in this report, has given the Union a very great deal of assistance in that connec-

tion. I can see no objection, nor anything improper, in the Company taking the position that such concessions as it is prepared to make in the course of negotiations are conditional upon the Union withdrawing a claim for concessions which the Company is not prepared to grant. Therefore, I think Mr. Brodie's letter must be taken at its face value and treated as a withdrawal in the ordnance division of the Union's claim for union security in the renewal agreement now being negotiated with respect to that division.

That alone should be sufficient to dispose of the Union's claim in this case because it can hardly be contended that the Company should deal differently with the same Local in two divisions of its business, located in the same place, in the same city and under the same management.

To return now to the facts with respect to the organizational activities of the Steelworkers in the commercial division, it appears that notwithstanding the existence of the joint agreement of November 7, 1942, between the Company and the machinists and boiler makers in the commercial division, as mentioned above, the Union commenced an organizational campaign in that division. In October, 1943, they issued a Writ in the Ontario Labour Court claiming certification as the exclusive collective bargaining agency for all the employees in that division, with the exception of office workers, electricians and pattern makers. This action was defended by the Machinists' Union, the Boiler Makers' Union and by the Company, which took the position that the agreement of November 7, 1942, was a bar to certification on the ground that the Machinists' and Boiler Makers' Union represented a majority of their respective crafts at the time the agreement was entered into.

Mr. Justice D. P. J. Kelly held that the existence of this agreement, which was for an indefinite period which might be longer than a year, should not be a bar to certification and directed that a vote be taken. For the purposes of this vote in the commercial division the employees were divided into two groups. In the first group were all those employees who would ordinarily come under and be included in the craft of the International Association of Machinists. Such employees were asked whether they preferred to be represented by the Steelworkers or by the Machinists. In the second group were all those employees who would ordinarily come under and be included in the craft of the International Boiler Makers, Welders and Helpers of America. They were asked whether they preferred to be represented by the Steelworkers or by the Boiler Makers. In the third group were included the balance of the employees in the commercial division who were asked whether they wished to be represented by any Union and, if a majority wished to be represented by a Union, whether they would prefer the Steelworkers or the Machinists.

The vote was held on Febrnary 23, 1944, the Steelworkers being successful in obtaining a total of 461 votes against 103 for the Machinists and 60 for the Boiler Makers. Twelve employees wished to be represented by no Union. The vote in favour of the Steelworkers represented 72 per cent of all votes cast and approximately 53 per cent of the total eligible employees in the commercial division. Accordingly, Mr. Justice Kelly made an Order on March 23, 1944, certifying the Steelworkers as the exclusive bargaining agency for the employees in the commercial division. The parties have been in negotiation ever since for the purpose of concluding their first collective agreement with respect to the commercial division.

For present purposes the significant facts appear to be that this is the first agreement between the parties in the commercial division; that the Steelworkers ousted and supplanted the machinists and boiler makers who had a joint agreement with the Company in respect of the commercial division since November 7, 1942; and that at the date of the certification of the Steelworkers a considerable number of the employees in the commercial division were active members in good standing of the Machinists' Union and the Boiler Makers' Union. It is agreed that this is a condition which still continues today. Having regard to the foregoing facts, all the members of this Board were unanimous that the Union should withdraw its claim for the inclusion in the agreement of a provision for a union shop and for maintenance of membership.

In these circumstances, it is not necessary to press the fact that the previous joint agreement of November 7, 1942, with the Machinists' and Boiler Makers' Unions had not contained any such provision or any provision for check-off of union dues. Having regard to this fact, it might very well be said that where there are admittedly a considerable number of members of those Unions among the employees concerned, the granting of union security provisions, including check-off, to the Steelworkers might be regarded as an indication by the Company to its employees that it preferred the latter to the former.

The majority of this Board have apparently felt that "something" should be conceded to the Union by way of union security and feel that a voluntary check-off, irrevocable for

the duration of the agreement, with the entire machinery and presentation of the employees' requests to be under the control of the Union, should be included in the agreement. With all respect and deference to my colleagues on this Board, I cannot agree that the Union has made out at the hearings of this Board any case for a check-off of union dues in any form; certainly not in a form which might be of assistance in organizational activities. While much has been said as to the difficulty of dues collection in the ordnance division, having regard to the number of transfers of employees from one department to another in that division and the changing personnel of the employees' groups, no such allegation has been made with respect to the commercial division where these conditions are not claimed to exist. Nor has there been any evidence whatever as to the number of employees who are voluntarily paying dues to this Union.

The fact that I have recommended the inclusion of some form of check-off in other cases where I have been a member of conciliation boards is some evidence that I have no unalterable opposition to this form of union security; but this is the first case in which, to my knowledge, a Board of Conciliation has been asked to recommend a check-off simply because the Union wanted it, without any proof of a dues-collecting problem, and with its case supported by nothing more than theoretical arguments as to why a provision for check-off was not objectionable in principle. I cannot help but feel that the failure of the Union to bring forward any evidence of the degree of support which it enjoys in the commercial division, whether by way of dues-paying membership or otherwise, is of some significance in reaching a conclusion that the Union is not entitled in all the circumstances of this case to ask for any form of union security, including a provision for the check-off of union dues. In having organized the commercial division at a time when there was an agreement in effect with other Unions which still have a considerable number of members in good standing among the employees concerned, it seems to me that the Steelworkers must be taken to have assumed greater risks of insecurity and non-support than if there had been no other Unions in the field.

I cannot leave this matter without recording the fact that the parties have been unanimous in stating that their relations have been amicable and harmonious in both the ordnance and commercial divisions, and that there has been a high degree of co-operation between them. Recognizing that due to special circumstances existing in the ordnance division, there was in that division some problem of dues collection, the Company voluntarily assisted the Union by providing its officers with an office next to the pay office so that they could conveniently contact employees who had just been paid, and by permitting Union stewards to check out early on pay days for the same purpose. Facilities were also provided for the safekeeping of dues so collected. Having regard to this assistance, it could hardly be said that the Company has been unmindful of the welfare of the Union, nor indifferent to its problems. The Company has gone so far as to invite the Union to submit to the Company all facts in connection with any problem of dues collection, and to indicate the actual difficulty which the Union was encountering. The Union has refused to give any information to the Company on this problem on the ground that the Company has given the Union no assurance that if the Union supplies such information the Company will agree to some measure of union security by way of check-off of Union dues.

The probable difficulty about the whole matter is that the Union makes no secret of the fact that its ultimate object is a full measure of union security, including union shop, maintenance of membership and involuntary check-off of union dues. Since the time has by no means arrived to consider the questions of union shop and maintenance of membership, I cannot see that the Company should, as a matter of "conciliation", and in the absence of proof of any particular problem in the commercial division, be asked to accept the first step in a progressive program of union security which will simply be used as a stepping stone to the next higher stage of union security when this first agreement which is now under negotiation comes up for renewal a year hence. It may very well be that when parties are opposed in principle it is not a question of "conciliation"; certainly not a case for a "saw-off" as there may be no middle ground in such circumstances.

For all of the above reasons I agree with the majority of the members of this Board that the Union's claim for the inclusion in the first agreement, now in course of negotiation, in the commercial division of a provision for a union shop and maintenance of membership should be withdrawn. I go further than this, however, and recommend that the Union's claim for the inclusion in the agreement of a provision for check-off of union dues should also, in the circumstances of this case, be withdrawn, and I respectfully report and recommend accordingly.

In view of the above recommendations, I find it unnecessary to deal with the legal

problems arising out of the provisions of the National Selective Service Regulations, the Re-establishment in Civil Employment Act, the Rights of Labour Act or the question of the legality of any form of union security, including the check-off, under the provisions of P.C. 1003.

Dated at Toronto this fourth day of November, 1944. *(Sgd.)* J. S. D. Tory,
Member.

Report of Board in Dispute between Breithaupt Leather Company, Ltd., Penetang, Ont., and the National Union of Shoe and Leather Workers', Local 24

On November 27 the Minister of Labour received the unanimous report of the Board of Conciliation which dealt with a dispute between Breithaupt Leather Company, Limited, Penetang, Ont., and the National Union Shoe and Leather Workers', Local 24.

The Board was under the chairmanship of Dr. Alexander Brady, Toronto, Ont., appointed by the Minister of Labour on the nomination of the other two members of the Board, Messrs. Norman Mathews and F. A. Brewin, also of Toronto, the nominees of the company and the union respectively.

The text of the Board's report follows:

Report of Board

In the matter of the Wartime Labour Relations Regulations, P.C. 1003, and re Breithaupt Company, Ltd., Penetang, Ontario, and Local No. 24, National Union of Shoe and Leather Workers.

To: The Honourable Humphrey Mitchell,
Minister of Labour,
Ottawa.

The Board of Conciliation appointed by you in this matter begs to submit its report.

The dispute was between the Breithaupt Company and its employees, members of the National Union of Shoe and Leather Workers, in the Company's branch plant at Penetang. The Board visited Penetang, met representatives of the parties, and heard evidence on the matters in dispute. The National Union of Shoe and Leather Workers, Local No. 24, was recognized as the bargaining agency for the employees, and an agreement was signed on April 29, 1943, which was to continue until April 30, 1944, renewable from year to year subject to amendment. A basic cause of the dispute this year was the failure of the parties to agree upon amendments which both sought in the collective agreement. Two particular points upon which agreement was not reached were:

(i) The Union wished to change the content of article VI from a maintenance of union membership clause to a union shop clause with the check-off. The Company on the other hand rejected this suggested change and sought a sole-bargaining-agency clause instead of maintenance of membership.

(ii) The Union sought a shorter work week than the 54-hour week required under the agreement of 1943, but the parties could not agree upon the number of hours.

Other important points arose in the negotiations, especially the issue of wages. The Union wished to enlist the support of the Company in a joint application to the Regional War Labour Board for certain adjustments in the wage schedules, but the Company would not agree to the suggested changes. Moreover the Company complained that absenteeism among the employees was rife, that labour costs had risen in the plant above those in the other plants of the Company, and that the Union seemed incapable of exercising adequate discipline.

The Board, after discussions with the parties, urged them to resume negotiations upon fresh lines recommended by the Board. This they duly did, and on November 8 reached and signed a new agreement.

In conclusion the Board wish to pay tribute to the responsible spirit in which both parties resumed negotiations and attained an agreement.

All of which is respectfully submitted.

Dated at Toronto this twenty-third day of November, 1944.

(sgd.) Alexander Brady,
Chairman.
Norman L. Mathews,
F. A. Brewin.

Proceedings Under the Industrial Disputes Investigation Act, 1907-1944

WITH the bringing into effect of the Wartime Labour Relations Regulations, P.C. 1003, on March 20, 1944, the Industrial Disputes Investigation Act, except as to matters pending was declared to be of no effect while the Regulations are in force.

The Industrial Disputes Investigation Act was enacted in 1907 and became effective on March 22 of that year. The Act was designed to aid in the prevention and settlement of strikes and lockouts and forbade any such stoppage of work until all matters in dispute

* The Act became law on March 22, 1907, so that the proceedings cover nine months only.

had been dealt with by a Board of Conciliation and Investigation. The Act normally applied to disputes in mines and certain public utility industries; however with the beginning of the present war its scope was extended by Order in Council to cover disputes between employers and employees engaged in work on munitions, war supplies and defence projects. The provisions of the Act were also available to parties by mutual consent in the settlement of disputes outside its scope.

During the thirty-seven years the Industrial Disputes Investigation Act was in operation, a total of 1,448 applications were dealt with, 774 Boards of Conciliation and Investigation were established and there were only 80 cases dealt with under the Act in which strikes were not averted or ended, which underlines the effectiveness of the Act as an "aid in the prevention and settlement of strikes and lockouts. . . . . ."

The two tables accompanying this article give figures for the operation of the Act on a fiscal and calendar year basis. More detailed statistics concerning the operation of the Act up to the close of the fiscal year 1943-44 (March 31) will be givn in the Annual Report of the Department of Labour which will be published shortly.

Conciliation Work of the Industrial Relations Branch Under the Conciliation and Labour Act During November, 1944

DURING the month of November, officers of the Industrial Relations Branch were called upon to handle 30 industrial disputes or controversial situations involving 17,608 workpeople employed in 41 different establishments. Of these 20 were new disputes which originated during the month, while 10 were situations which had been unterminated as of October 31 and received further attention in November. They were dealt with under the provisions of the Conciliation and Labour Act, being distinct from and in addition to Conciliation proceedings under the Wartime Labour Relations Regulations described on previous pages.

Industrial Relations officers of the Department of Labour are stationed at Vancouver, Winnipeg, Toronto, Ottawa, Montreal, Fredericton, N.B., and Glace Bay, N.S. The territory of the two officers resident in Vancouver comprises British Columbia and Alberta; two officers stationed in Winnipeg cover the provinces of Saskatchewan and Manitoba and Northwestern Ontario; four officers resident in Toronto confine their activities to Ontario and work in close collaboration with the Provincial Conciliation service; two officers in Montreal are assigned to the Province of Quebec and two officers resident in Fredericton, N.B. and Glace Bay, N.S., represent the Department in the Maritime Provinces. The headquarters of the Industrial Relations Branch and the Director of Industrial Relations and staff are situated in Ottawa.

Classified by industries, the disputes occurred as follows:—

MINING AND SMELTING ETC.	
Coal Mining	3
Metal Mining	3
MANUFACTURING	
Animal Foods	2
Vegetable Foods	2
Metal Products	7

Investigation Only	2
Technical services	1
Settlement Pending	10

Brief summaries of a few of the cases of chief interest are given below:

Metal Miners, Noranda, P.Q.—In the October issue of the LABOUR GAZETTE (p. 1239) reference was made to the appointment of District Magistrate Honoré Achim, of Hull, P.Q., as an Industrial Disputes Inquiry Commission to investigate a charge that Waite Amulet Mines Limited, of Noranda, P.Q., had dismissed an employee because of union activity on behalf of Local No. 688 of the International Union of Mine, Mill and Smelter Workers. Evidence in the case was heard at two sittings of the Commission at Rouyn, P.Q., in October and November. The report of the Commissioner indicated that the charge laid by the Union was not substantiated.

Metal Workers, Hamilton, Ont.—It was reported in November issue of the LABOUR GAZETTE that His Honour Judge W. T. Robb, of Orangeville, Ont., had been appointed as an Industrial Disputes Inquiry Commission to investigate a complaint that an employee of the International Silver Company of Canada, Limited, of Hamilton, Ont., who was a member of the United Electrical, Radio and Machine Workers of America, had been dismissed because of his union activity and membership. During November the Commissioner reported that on all the evidence he found that the employee in question was dismissed by the Company for the reason that he was a member of and working on behalf of the Union. On the basis of the Commissioner's recommendations, the Minister of Labour ordered the Company to reinstate the employee in his former position and to reimburse him for lost wages.

Wood Factory Workers, Meaford, Ont.—Early in November a complaint was received that four employees of the Knight Manufacturing and Lumber Company of Meaford, Ont., had been dismissed for the reason that they were members of and working on behalf of the Woodworkers' Local Union No. 8 of the Canadian Congress of Labour. Following a preliminary investigation by Mr. F. J. Ainsborough, Industrial Relations Officer, Toronto, the Minister of Labour appointed His Honour Judge J. G. Harvie, of Barrie, Ont., as an Industrial Disputes Inquiry Commission to make a formal investigation of the charges against the Company. At the end of the month the report of the Commissioner had not been received.

Shipyard Workers, Toronto, Ont.—On November 9 the Minister of Labour received a complaint from a representative of the International Association of Machinists that certain members of that organization had been dismissed by the Redfern Construction Co. Ltd., (Shipbuilding Division), Toronto, Ont., without regard to the seniority provisions of the Collective Agreement between the Company and the Union. The complaint was subsequently endorsed by the Metal Trades Council of Toronto. Mr. F. J. Ainsborough, Industrial Relations Officer, Toronto, investigated the situation and endeavoured to settle the matter, but made little progress in securing a mutually satisfactory interpretation of certain clauses of the Agreement. An application was then made by the Union for arbitration, and the Minister of Labour appointed Mr. Bernard Rose, K.C., of Montreal, P.Q., to act as arbitrator on his behalf and bring down a decision which would be final and binding on the parties under the terms of their Agreement. The Arbitrator decided that employees who were laid off, and on whose behalf the complaint was lodged, should have their cases reviewed if and when a request for review was submitted by the Union. It was also decided in future lay-offs affecting employees who were members of the Union in good standing, the principle of seniority should apply as set out in the Agreement, subject to the ability of the employees to perform the work required. When further reductions of staff were proposed, the Union was directed to submit to the management a list of its members in good standing. In the case of one individual it was decided that he should revert to a lesser position and be reinstated with back pay for such position from the time he was laid off.

Glass Factory Employees, London, Ont.—In the latter part of November the Department received a complaint from a representative of the International Chemical Workers' Union (A.F. of L.) to the effect that Hobbs Glass, Limited, of London, Ont., had dismissed one of its employees because of Union activity. An investigation was conducted by Mr. H. Perkins, Industrial Relations Officer, Toronto, at the conclusion of which the Company agreed to pay the employee a week's wages in lieu of notice. It was reported that representatives of the Union agreed to withdraw the charge of discrimination.

Electrical Apparatus Workers, St. Catharines, Ont.—On November 8 the Department was asked to investigate a complaint that the Packard Electric Co., Ltd., of St. Catharines, Ont. had dismissed two of its employees for the reason that they were members of and working on behalf of the United Electrical, Radio and Machine Workers of America. An investigation of the situation was made by Mr. J. Hutcheon, of the Ontario Conciliation Service, who recommended the appointment of an Industrial Disputes Inquiry Commission under the provisions of Order in Council P.C. 4020. On November 22 the Minister of Labour appointed His Honour J. J. Coughlin, of Windsor, Ont., as a Commissioner to make a formal investigation of the charges of the Union. The report of the Commissioner had not been received at the end of the month.

Grain Elevator Employees, Port Arthur, Ont.—During November the Department was called upon to investigate charges that the Reliance Grain Co., Ltd., Port Arthur, Ont., had dismissed two of its employees, allegedly on account of union activity. The employees in question were members of the Brotherhood of Railway and Steamship Clerks, Freight Handlers, Express and Station Employees, through which organization the complaints were made. Following a preliminary investigation by Mr. H. S. Johnstone, Industrial Relations Officer, Winnipeg, Man., the Minister of Labour appointed His Honour Judge W. J. Lindal, of Winnipeg, Man., as an Industrial Disputes Inquiry Commission to hear evidence in the case. At the end of the period under review the report of the Commissioner had not been received.

Union Representation Vote

Cheese Factory Workers, Ottawa, Ont.—By joint request of the parties a union representation vote was conducted on November 28, among employees of the Chateau Cheese Co., Ltd., Ottawa, Ont., under the supervision of Mr. Frank P. MacKinnon, Industrial Relations Officer, Ottawa. The vote was conducted in order to determine whether the employees desired to be represented for the purpose of collective bargaining with their employer by the National Union of Dairy Workers, Local No. 6 (C.C.L.), or the Employee-Management Co-Operative Plan. There were 72 persons eligible to vote, of whom 70 cast their ballots. A total of 62 voted in favour of the National Union of Dairy Workers and 8 cast ballots for the Employee-Management Co-operative Plan.

Strikes and Lockouts in Canada During November, 1944

THERE was little strike activity in Canada during the month of November. The number of strikes, the number of workers involved and the time loss in man-working days declined somewhat as compared with the previous month and showed sharp decreases as compared with November, 1943. Preliminary figures for November, 1944, show 10 strikes in progress during the month, with 1,456 workers involved and a time loss of 4,357 man-working days, as compared with 12 strikes in October involving 4,157 workers with a time loss of 6,935 days. In November, 1943, there were 28 strikes with 18,172 workers involved and a time loss of 103,566 days.

Preliminary figures for the first 11 months of 1944 show a total of 180 strikes, involving 75,565 workers, with a time loss of 490,281 days. Comparative figures for the same period last year show 382 strikes with 183,355 workers involved and a time loss of 988,848 days.

Two strikes, involving 282 workers, were carried over from October and eight commenced during November. Of these ten strikes, three resulted in favour of the employers, one was a compromise settlement and four were indefinite in result, work being resumed pending final settlement. At the end of the month two strikes were recorded as

unterminated, namely, wood factory workers at Meaford, Ontario, and foundry workers at L'Islet Station, P.Q.

The record does not include minor strikes such as are defined in another paragraph nor does it include strikes as to which information has been received indicating that employment conditions are no longer affected but which the unions concerned have not declared terminated.

* Preliminary.

† Strikes unterminated at the end of the previous year are included in these totals.

The record of the Department includes lockouts as well as strikes, but a lockout, or an industrial condition which is undoubtedly a lockout, is seldom encountered. In the statistical table, therefore, strikes and lockouts are recorded together. A strike or lockout included as such in the records of the Department is a cessation of work involving six or more employees and lasting at least one working day. Strikes of less than one day's duration and strikes involving less than six employees are not included in the published record unless ten days or more time loss is caused, but a separate record of such strikes is maintained in the Department and the figures are given in the annual review. The records include all strikes and lockouts which come to the knowledge of the Department and the methods taken to obtain information preclude the probability of omissions of strikes of importance. Information as to a strike involving a small number of employees or for a short period of time is frequently not received until some time after its commencement.

STRIKES AND LOCKOUTS IN CANADA DURING NOVEMBER, 1944*

Industry, occupation, and locality	Number involved		Time loss in man-working days	Particulars†
	Establishments	Workers		
Strikes and Lockouts in Progress Prior to November, 1944				
MINING—				
Coal miners, Midlandvale, Alta.	1	200	400	Commenced October 20; interpretation of clause in agreement *re* payment for loading bone in entries and narrow places; terminated November 2; conciliation, federal, and reference to impartial chairman; indefinite.
Coal miners, Midlandvale, Alta.	1	82	164	Commenced October 25; *re* number of miners from whom drivers to haul coal and for lunch period for surface workers on company time; terminated November 2; conciliation, federal, and return of workers pending settlement; indefinite.
Strikes and Lockouts Commencing During November, 1944				
MINING—				
Coal miners, Glace Bay, N.S.	1	(a) 111	138	Commenced November 9; *re* working conditions (building chocks and shovelling coal from behind chocks); terminated November 10; return of workers; in favour of employer.
MANUFACTURING—				
Textiles, Clothing, etc.—				
Textile factory workers, Lachute Mills, P.Q.	1	325	740	Commenced November 1; for revision of efficiency bonus to maintain earnings following installation of automatic piece-work counters; terminated November 4; conciliation, federal and provincial, and reference to RWLB‡; indefinite.
Felt hat factory workers, Montreal East, P.Q.	1	170	935	Commenced November 20; for union shop and check-off clauses in new agreement as recommended by Provincial Conciliation Board; terminated November 25; conciliation, provincial; compromise, check-off clause agreed to.
Pulp, Paper and Paper Products—				
Paper mill workers, Strathcona, Ont.	1	30	275	Commenced November 10; for reduced hours and increased wages; terminated November 21; conciliation, provincial; in favour of employer.
Miscellaneous Wood Products—				
Wood factory workers, Meaford, Ont.	1	15	295	Commenced November 8; alleged discrimination against union members in lay-off of workers; unterminated.
Metal Products—				
Foundry workers, L'Islet Station, P.Q.	1	125	1,250	Commenced November 18; in protest against change in management; unterminated.
Shipbuilding—				
Machinists and plumbers, North Vancouver, B.C.	1	300	40	Commenced November 7; jurisdictional dispute over installation of certain equipment; terminated November 7; return of workers pending settlement; indefinite.
Non-Metallic Minerals, Chemicals, etc.—				
Lime-kiln workers, Joliette, P.Q.	1	98	120	Commenced November 10; for dismissal of a foreman; terminated November 11; conciliation, provincial; in favour of employer.

* Preliminary data based where possible on direct reports from parties involved, in some cases incomplete; subject to revision for the annual report.

† In this table the date of commencement is that on which time loss first occurred, and the date of termination is the last day on which time was lost to an appreciable extent.

‡ RWLB—Regional War Labour Board.

(a) 360 indirectly affected.

Strikes and Lockouts in Great Britain and Other Countries

THE latest available information as to strikes and lockouts in various countries is given in the LABOUR GAZETTE from month to month, bringing down to date that given in the March, 1944, issue in the review of "Strikes and Lockouts in Canada and Other Countries". The latter included a table summarizing the principal statistics as to strikes and lockouts since 1919 in the various countries for which such figures are available. Statistics given in the annual review and in this article are taken, as far as possible, from the government publications of the various countries concerned.

Great Britain and Northern Ireland

The British *Ministry of Labour Gazette* publishes statistics dealing with disputes involving stoppages of work and gives some details of the more important ones.

The number of work stoppages beginning in September, 1944, was 188 and eleven were still in progress from the previous month, making a total of 199 during the month, in which 50,000 workers were involved and a time loss of 186,000 working days was caused.

Of the 188 work stoppages commencing in September, 22 arose out of demands for increased wages, four over proposed reductions in wages, 63 over other wage questions, nine on questions as to working hours, 23 over questions respecting the employment of particular classes of persons, 57 over other questions respecting working arrangements, seven over questions of trade union principle and three were in support of workers involved in other stoppages.

United States

Preliminary figures for October, 1944, show 440 strikes beginning in the month, in which 220,000 workers were involved. The time loss for all disputes in progress during the month was 690,000 working days. Corresponding figures for September are 390 strikes, involving 185,000 workers, with a time loss of 660,000 working days.

Food Facilities in Industrial Plants in United States

It is reported in the *Monthly Labour Review* for October that "about 5,000,000 workers in approximately half of the manufacturing plants in the United States engaged in war work can now obtain mid-shift meals on the job." This statement is based on a recent survey by the War Food Administration at Washington, covering 2,056 plants.

It is asserted further, that "81 per cent of the workers employed in the manufacture of war supplies were in plants having some type of food service facilities." The most extensive development of industrial feeding arrangements was shown in large plants. The survey indicated that 91 per cent of the plants having more than 2,500 workers, and 80 per cent of the plants employing from 1,000 to 2,499 workers have made provision for some type of in-plant feeding. Of the smaller companies, only 28 per cent have food services in their plants.

It is pointed out too, that the larger plants were more active than the smaller ones in providing for new installations and expansions of cafeterias, etc. Of the enterprises employing more than 2,500 workers, 41 per cent reported that they were planning to enlarge their equipment, the majority being cafeterias. Other kinds of food facilities include lunch counters, lunch stands, and stationary or mobile canteens.

In addition to the reports from manufacturers, returns were received by the War Food Administration from large shipbuilding, aircraft, and other wartime enterprises which indicated that much has been done to provide in-plant feeding facilities. However, it is asserted that less than half of such plants are equipped adequately to meet actual requirements.

Collective Agreements and Wage Schedules

Recent Collective Agreements

COLLECTIVE agreements received in the Department are outlined in the LABOUR GAZETTE from month to month. It is not possible because of limitation of space to include all agreements received. The agreements are in most cases signed by representatives of the employers and workers, but schedules of rates of wages, hours of labour and other conditions of employment drawn up and verbally agreed to by representatives of the employers and workers are also included.

Agreements made obligatory under the Collective Agreements Act in Quebec and a schedule under the Industrial Standards Act of Alberta are summarized in a separate article following this.

Manufacturing: Metal Products

LONG BRANCH (TORONTO), ONTARIO:—SMALL ARMS LTD. AND UNITED ELECTRICAL, RADIO AND MACHINE WORKERS OF AMERICA, LOCAL 519.

Agreement to be in effect from February 5, 1944, to February 5, 1945, and thereafter from year to year subject to notice. The agreement is similar to the one previously in effect (L.G., March, 1943, p. 338) with these exceptions:

Electricians who are members of the International Brotherhood of Electrical Workers are not eligible for membership in the above union. The standard work week of 48 hours is still in effect with arrangment for actual working hours being changed from time to time. The hours in effect when the new agreement was made were not specified. Time and one half for all work on Sunday. Vacation: one week with pay each year to employees with one year's service.

Construction: Buildings and Structure

HAMILTON, ONTARIO:—HAMILTON CONSTRUCTION ASSOCIATION AND BUILDERS' EXCHANGE AND THE BRICKLAYERS', MASONS' AND PLASTERERS' INTERNATIONAL UNION, LOCAL NO. 1.

Agreement to be in effect from May 1, 1944, to April 30, 1945, and thereafter from year to year, subject to notice. Only union members to be employed.

Hours: 8 per day, Monday to Friday, a 40-hour week. For night shifts, 8 hours' pay for 7 hours' work. Overtime on Mondays to Thursdays at time and one half; all work between 5 p.m. on Friday and 8 a.m. on Monday and on four specified holidays is payable at double time.

Hourly wage rate for bricklayers and stonemasons: $1.16½.

Provision is made for the settlement of disputes.

VANCOUVER, B.C.:—CERTAIN CONTRACTORS AND THE UNITED ASSOCIATION OF PLUMBERS AND STEAMFITTERS, LOCAL 170.

Agreement to be in effect from July 6, 1944, to July 5, 1945, and thereafter from year to year, subject to notice.

Hours: 8 per day, Monday to Friday, a 40-hour week. Night shifts, 8 hours' pay for 7 hours' work. Overtime, including Saturday, is payable at time and one half for the first four hours and double time thereafter; all work on Sundays and nine specified holidays, at double time.

Minimum hourly wage rates: journeymen plumbers and steamfitters: $1.19, helpers 69 cents. For work out town, transportation, board and travelling time to be paid by the employer.

Apprenticeship regulations are included and provision is made for a joint conference board for the settlement of disputes.

Transportation and Public Utilities: Electric Railways

HAMILTON, ONTARIO:—THE HAMILTON STREET RAILWAY COMPANY AND THE AMALGAMATED ASSOCIATION OF STREET AND ELECTRIC RAILWAY AND MOTOR COACH EMPLOYEES OF AMERICA, DIVISION NO. 107.

Agreement to be in effect from October 1, 1944, to September 30, 1945, and thereafter subject to 60 days' notice. The Company will treat with its employees who are members of the union through the representatives of the union.

Hours: 48 per week to be arranged as suitable for the service, but the Company agrees to make as many straight runs as possible, straight runs to be divided as far as possible between day and night men. Whenever possible scheduled runs will be completed within 12 hours. For car house and shop men, power house operators, inspection barn men, trackmen, a 48-hour week.

Overtime: Time and one half for all schedule time over 8½ hours daily or 48 hours weekly, for spare men overtime after 48 hours weekly. Time and one half for six statutory holidays.

Hourly wage rates: For car and bus and one-man operators, 67 cents during first six months' service, 72 cents during second six months and 77 cents thereafter; operators on snow-ploughs or sweepers, 5 cents per hour extra; operators training students 5 cents per hour extra; blacksmiths 80 cents, blacksmiths' helpers 70 cents, painters 75 cents, repair and inspection mechanics 70 cents first year and

75 cents thereafter, car placers 64 cents first year and 69 cents thereafter, car cleaners 61 cents first year and 64 cents thereafter, store clerk and storekeeper 74 cents, controllermen 70 cents first year and 75 cents thereafter, engineers 75 cents, firemen 72 cents, carpenters 80 cents, electricians 75 cents to 80 cents, air brake mechanics 75 cents, machinists 72 and 80 cents, drill hands and helpers 70 cents, armature winders 76 and 80 cents, field winders 74 cents, linemen 85 cents, power house operators 75 cents, trackmen 66 cents, track welders 75 cents, interlocker and switch repairman 70 cents, interlocker operators 54 cents, switchmen 63 cents, janitors 64 cents; ticket clerks $152.50 per month.

Extra operators required to report on Sunday mornings or public holidays as well as all rush-hour extra work on week days, a minimum of two hours.

Choice of runs is based on seniority. Car operators may qualify as bus operators according to seniority and competence. Uniforms: for operators after one year's service, company will pay half the cost of a uniform and after two years' service will supply one uniform a year and one overcoat every three years, free.

Vacation: one week with pay to employees with one year's service, 8 days after second year's service and 9 days thereafter. Only employees who have worked a minimum of 1,800 hours in the previous calendar year are eligible. Provision is made for appeal from suspension or discharge.

Service: Public Administration

TORONTO, ONTARIO:—THE CITY OF TORONTO AND THE TORONTO MUNICIPAL EMPLOYEES' ASSOCIATION, LOCAL No. 79.

Agreement to be in effect from April 1, 1944, to April 1, 1945, and thereafter from year to year, subject to notice. This applies to all clerical and all female employees of the city, and foremen, superintendents or higher rank except police and fire department employees. All the rights, benefits and privileges the employees enjoy as to salary or wages, promotions, hours, holidays, vacation, sick leave, leave of absence, overtime work, meal allowances, bonuses or superannuation, etc., governed by by-laws are to be continued. The association may appear before the Board of Control or City Council to make representations affecting these conditions.

Collective Agreement Act, Quebec

Recent Proceedings Under the Act

IN Quebec, the Collective Agreement Act provides that where a collective agreement has been entered into by an organization of employees and one or more employers or associations of employers, either side may apply to the provincial Minister of Labour to have the terms of the agreement which concern wages, hours of labour, apprenticeship and certain other conditions made binding throughout the province or within a certain district on all employers and employees in the trade or industry covered by the agreement. Notice of such application is published and thirty days allowed for the filing of objections, after which an Order in Council may be passed granting the application, with or without changes as considered advisable by the Minister. The Order in Council may be amended or evoked in the same manner. Each agreement is administered and enforced by a joint committee of the parties. Further information concerning this legislation is given in the LABOUR GAZETTE, January, 1943, page 86. Proceedings under this Act and earlier legislation have been noted in the LABOUR GAZETTE monthly since June, 1934.

Recent proceedings under the act include the extension of one new agreement, and the amendment of four others, all of which are noted below. Requests for the amendment of the building trades agreement at St. Jerome, and for the amendment of the barbers and hairdressers agreement at St. Hyacinthe were gazetted November 4. A request for a new agreement for the sash and door industry at Quebec and a request for the addition of new parties to the building trades agreement at Hull were published in the *Quebec Official Gazette*, November 10. Requests for the amendment of the barbers and hairdressers agreement at Joliette, garages and service stations agreement at Montreal, and building trades agreement at Chicoutimi were gazetted November 18. Requests for the amendment of the barbers and hairdressers agreement in Missisquoi County and Valleyfield, and printing trades at Montreal were published November 25.

Manufacturing Textiles and Clothing

EMBROIDERY INDUSTRY, MONTREAL.

An Order in Council, dated November 14, and gazetted November 18, makes obligatory the terms of a new agreement between The Pleating and Embroidery Manufacturers' Association, Inc., and The International Ladies' Garment Workers Union, and The Embroidery Pleaters, Stitchers and Buttonmakers Union, local 315 of International Ladies Garment Workers' Union. Agreement to be in effect from November 18, 1944 to July 31, 1945 and year to year thereafter, subject to notice. The territorial jurisdiction comprises the Island of Montreal and within a radius of ten miles.

Hours: 44-hour week. Overtime is payable at time and one-half and not more than 8 hours

overtime is permitted in any one week. Weekly wage rates: Bonnaz operators $38.45, pleaters and pattern-makers $22.84, crochet beaders $15.57, stampers, special machine operators $16.61, hand-embroidery workers, floor help, pleater's assistant, covered button and buckle makers $12.98. No home work is permitted except hand embrodiery work and crochet-beading, which is on a piece work basis approved by the parity committee.

Manufacturing: Printing and Publishing

PRINTING TRADES, QUEBEC.

An Order in Council, dated November 16, and published November 25, amends the previous Orders in Council for this industry (L.G., Nov. 1943, p. 1530; April, 1944, p. 495.) All female employees with three years' experience and one year's continuous service to receive one week's vacation with pay; three days' vacation in certain of the smaller shops.

Manufacturing: Metal Products

CLOCKMAKING INDUSTRY, MONTREAL.

An Order in Council, dated November 16, and gazetted November 25, amends the previous Orders in Council for this industry (L.G., November, 1943, p. 1530; August, 1944, p. 1007), The amendment provides for a minimum rate of $30 per week for senior clockmakers and $20 for junior clockmakers.

Construction: Buildings and Structures

BUILDING TRADES, MONTREAL.

An Order in Council, dated November 14, and gazetted November 25, amends the previous Orders in Council, for this industry, (L.G., March, 1944, p. 359, July, p. 868, November, p. 1369) by deleting the clause pertaining to wage rates being reduced by 25 per cent for repairs of $500 or less on residences not exceeding $15,000 in value.

Service: Business and Personal

BARBERS AND HAIRDRESSERS, ST. HYACINTHE.

An Order in Council, dated November 14, and gazetted November 18, amends the previous Orders in Council for this industry (L.G. Oct., 1941, p. 1426; Sept., 1942, p. 1098; April, 1943, p. 490, May, p. 639, Sept., p. 1253; Feb., 1944, p. 199, July, p. 868). Minimum weekly wage rates for barbers and hairdressers (men) $20 in zones I and II plus 50 per cent on all gross receipts over $25; $19 in zone III, plus 50 per cent on all gross receipts over $25; $15 in zone IV plus 50 per cent on all gross receipts over $22; $12 in zones V, VI, VII and VIII.

Industrial Standards Acts, Etc.

Schedules of Wages and Hours Recently Approved by Provincial Orders in Council in Alberta

IN six provinces—Ontario, Alberta, Nova Scotia, Saskatchewan, New Brunswick and Manitoba—legislation provides that, following a petition from representatives of employers or employees in any (or specified) industries, the provincial Minister charged with the administration of the Act may himself, or through a government official delegated by him, call a conference of representatives of employers and employees. This conference is for the purpose of investigating and considering the conditions of labour in the industry and of negotiating minimum rates of wages and maximum hours of work. A schedule of wages and hours of labour drawn up at such a conference, if the Minister considers that it has been agreed to by a proper and sufficient representation of employers and employees, may on his recommendation be made binding by Order in Council in all the zones designated by the Minister. The Minister may also establish an advisory committee for every zone to which a schedule applies to assist in carrying out the provisions of the Act and the regulations. References to the summaries of these Acts and to amendments to them are given in the LABOUR GAZETTE, October, 1940, page 1077. Schedules of wages and hours recently made binding by Orders in Council under these acts are summarized below.

Manufacturing: Metal Products

GARAGES AND SERVICE STATIONS, CALGARY

An Order in Council, dated October 11, and gazetted October 14, makes binding the terms of a new schedule for the automotive repair and gasoline service station industry in Calgary, to be in effect from October 25, 1944, to October 24, 1945, or thereafter "during pleasure".

Hours: 49-hour week of 5½ days. Overtime is payable at time and one-half. Time and one-half for work on Sundays and statutory holidays except Christmas and New Year's Day, which are at double time. (This does not apply to front end men, floor service men, gas service men, etc., working on their regular shifts.)

Minimum wage rates including cost-of-living bonus; mechanics from 67 to 92 cents per hour and $16.50 per week for non-mechanical service employees, washmen and greasemen 50 cents, apprentices from $15.65 per week during first 6 months to $27.90 after sixth 6 months.

Vacation: one week with pay after one year's continuous service.

Provision is made for seniority and apprenticeship regulations are set forth.

Trade

GARAGES AND SERVICE STATIONS, CALGARY

See above under "Manufacturing: Metal Products".

Canadian Vocational Training

AT the request of the Department of Veterans' Affairs, the Vocational Training Branch has assumed the responsibility of providing instruction on a secondary school level for ex-service men and women who lack the academic standing (matriculation) necessary to enter university or certain occupations such as Accountancy and Nursing. This, of course, could only be done with the approval of the provinces. The Minister of Labour has subsequently obtained the approval of eight provinces in this undertaking. Procedure has been worked out and accommodation is available to provide this training. Instruction will be given in those subjects necessary to provide pre-matriculation standing with admissions to the schools arranged at short intervals and examinations set as each group graduates. Qualified students will then be recognized as having the equivalent of matriculation standing so that they will not need to wait till June to try the regular departmental examinations. Careful selection of students will be made and it is indicated that all provinces and universities will be generous in making concessions to these students. The quick response to this request by the provinces is further indicative of the growing need and desire to provide equal educational facilities to all worthy young people.

In connection with the Supervisory and Foremanship Training Program, Master Institutes have been conducted simultaneously in Montreal and Calgary to qualify Conference Leaders in a new course known as Job Safety Training. This takes the same pattern as the other courses of the Program, using the Conference technique and actually is a continuation of the highly successful Job Instruction Training course, applied to the important subject of industrial safety.

A follow-up program to Job Safety Training, also using the Conference technique but with the addition of sound slide films, has been obtained from the National Safety Council of Chicago. The follow-up program is divided into 10 important subjects as follows:

1. *Follow the Leader* — management and supervisors joint responsibility.
2. *Cause and Cure*—methods of discovering and correcting accident causes.
3. *Guard Duty*—principles of safeguarding against mechanical hazards.
4. *Safety is in Order*—importance of providing safe working conditions.
5. *Brain Beats Brawn*—correct supervision in handling materials of all kinds.
6. *Right Dress*—need for proper clothing and personal protective equipment.
7. *Doctor's Orders*—provisions for care of industrial injuries through First Aid.
8. *Principles and Interest*—maintaining employee interest in the safety program.
9. *Stop, Look and Listen*—a plant safety inspection committee is pictured at work.
10. *Production with Safety* — controlling workers' acts through training and supervision.

This complete program is available through the Regional Directors of Canadian Vocational Training in each province and where arrangements may be made, as well as through the head office at Ottawa, for conducting these courses free of charge in industry. Arrangements may also be made through the same offices to qualify chosen representatives of industry as Conference Leaders to conduct this program in their respective plants.

Appointments to Vocational Training Advisory Council

Dr. Fletcher Peacock, Director of Educational Services, Fredericton, New Brunswick, has been appointed to the Vocational Training Advisory Council for a three year term commencing December 1, it was announced recently by Mr. A. MacNamara, Director of National Selective Service.

Dr. Peacock will replace Dr. W. V. Longley, Director of Extension, Nova Scotia Agricultural College, Truro, N.S., who will resign on December 1.

Five other members of the Advisory Council have been reappointed for three year terms which will also commence on December 1. Reappointed members include E. R. Complin, Canadian Industries Limited, Montreal; N. S. Dowd, Canadian Congress of Labour, Ottawa; Dr. F. H. Sexton, Director of Technical Education, Halifax; Miss B. Oxner, Director of Women's Work, University of Saskatchewan, and J. C. Herwig, Secretary, Caandian Legion, Ottawa.

The Advisory Council of Canadian Vocational Training, under the Chairmanship of Dr. G. F. McNally, Deputy Minister of Education for Alberta, has sixteen members representing employers, employees, war veterans, agriculture, women's groups and provincial government technical education services. The group meets regularly in Ottawa to advise the Minister of Labour regarding vocational training.

Activities of Unemployment Insurance Commission

Analysis of Benefit Statistics—Registration of Employers and Insured Persons—Employment Committees Meet in Regina

DURING October, 6,222 persons submitted claims for Unemployment Insurance benefit in local offices of the Unemployment Insurance Commission. This represents an increase over September when 3,715 claims were filed and a considerable increase over October of last year when claims totalled 1,475. A seasonal rise in the number of claims filed is expected during the winter and October is usually the month during which this upswing first becomes apparent.

Each claimant and beneficiary must sign the live unemployment register once a week when he reports on his unemployment during the preceding week. In the last week of October 8,009 persons (5,207 males and 2,802 females) signed the register compared with 5,746 persons (3,938 males and 1,808 females) who signed during the last week of September.

Of the 4,910 claims adjudicated at insurance offices during October 3,950 were considered entitled to benefit and 960 not entitled to benefit. The chief reasons for non-entitlement to benefit were "voluntarily left employment without just cause" (571 cases); "insufficient contributions and not in insurable employment" (239 cases); and "discharged for misconduct" (65 cases).

A total of 5,735 persons, 2,458 of whom commenced a series of benefit payments during the month, received one or more benefit cheques during October. These 5,735 persons were paid a total of $132,467 as compensation for 70,552 unemployed days. This compares with 4,625 persons who received $117,008 for 61,917 days in September and 1,025 persons paid $24,308 for 13,782 days last October.

During October of this year, then, the average number of days paid per beneficiary was 12·3 compared with 13·4 in September and 13·4 in October of last year. The average amount of benefit paid per beneficiary was $23.10 in October as against $25.30 in September and $23.72 last October. The average amount paid per compensated day of unemployment was $1.88 during October, $1.89 in September and $1.76 in October 1943.

Insurance Registrations

Reports received from Local Offices of the Unemployment Insurance Commission showed that as at November 30, 1944, 2,896,831 employees had paid contributions to the fund since April 1, 1944, an increase of 73,163 since October 31, 1944, and 691,075 since the commencement of the current fiscal year.

As at November 30, 1944, 141,572 employers were registered as having insurable employees, an increase of 1,307 from October 31, 1944.

Registration, as at November 30, 1944, by regions, follows:

Average Amount Paid per Compensated Day of Unemployment	$1·88

Contributions for Discharged Veterans

The gross revenue of the Unemployment Insurance Commission for the month of October, 1944, amounting to $6,931,806.61, exceeded benefit payments by $6,800,099.70.

It is interesting to note the increasing trend of contributions to the Fund in respect of persons discharged from the armed forces. The amount of such contributions for October, 1944, was $39,903.89. Order in Council P.C. 7633, revised by P.C. 5210, provides that persons discharged from the armed services and who have completed 15 weeks in insurable employment are deemed to have been engaged in insurable employment while in the armed services and contributions are claimed on their behalf from the Department of Veterans' Affairs.

For the month of October, 1·9 cents was paid out for every dollar of interest and contributions deposited in the Fund.

National and Regional Employment Committees Convene in Regina

With a view to developing a better understanding between Committees, the National Employment Committee, a statutory body advisory to the Unemployment Insurance Commission, has decided to meet in joint session with each Regional Employment Committee throughout Canada. There are five Regional Employment Committees and forty-eight Local Employment Committees now functioning under the general direction of the National Employment Committee.

The first of these joint meetings was held in Regina, Sask., on December 1 and 2, 1944. The National Employment Committee, under the Chairmanship of Mr. R. J. Tallon, met in association with the Prairie Regional Employment Committee, the Chairman of which is Judge W. J. Lindal, of Winnipeg. The Committees discussed continuation of National Selective Service controls after the war, questions connected with rehabilitation of returned men, and activities of the Special Placements Division of the Commission. The discussion in the first instance followed an address by T. R. Walsh, Chief Enforcement Officer, of the Commission; while Brigadier J. E. Lyon, Veterans' Placement Adviser, spoke on rehabilitation of returned men. H. C. Hudson, Supervisor of Special Placements, spoke on the placing of handicapped men and other activities of his Division.

The evening meeting of the joint Committees on December 1, took the form of a discussion on Labour-Management Production Committees, following an address by R. W. Crumb, of Toronto, representative of the Industrial Production Co-operation Board.

Employment and Unemployment

Summary

REPORTS received in the Department of Labour during the past month give the following information concerning employment and unemployment across Canada.

The employment situation at the beginning of October as reported by employers.—Industrial activity showed a further upward movement at October 1 as reported to the Dominion Bureau of Statistics by employers. The employment index rose slightly from that of the previous month, but was slightly below that of August, 1943.

The index number of employment (based on the 1926 average as 100) was 183·3 as compared with 185·5 at September 1, 1944, and 185·5 at October 1, 1943.

The average weekly wage per employee was $32.36, 69 cents higher than at the beginning of September, and 83 cents higher than at October 1, 1943.

The Bureau's reports come from firms employing fifteen or more employees, representing practically all industries except agriculture, fishing, hunting and highly specialized business operations. Reports for October were received from 14,921 establishments with staffs aggregating 1,861,599 men and women.

Unemployment as reported by the Unemployment Insurance Commission.—Claims for unemployment insurance benefit increased substantially. During October 6,222 claims were filed as compared with 3,715 during September. These figures are well above the total of 1,475 claims filed during October, 1943, but considerably below last February's maximum of 12,284.

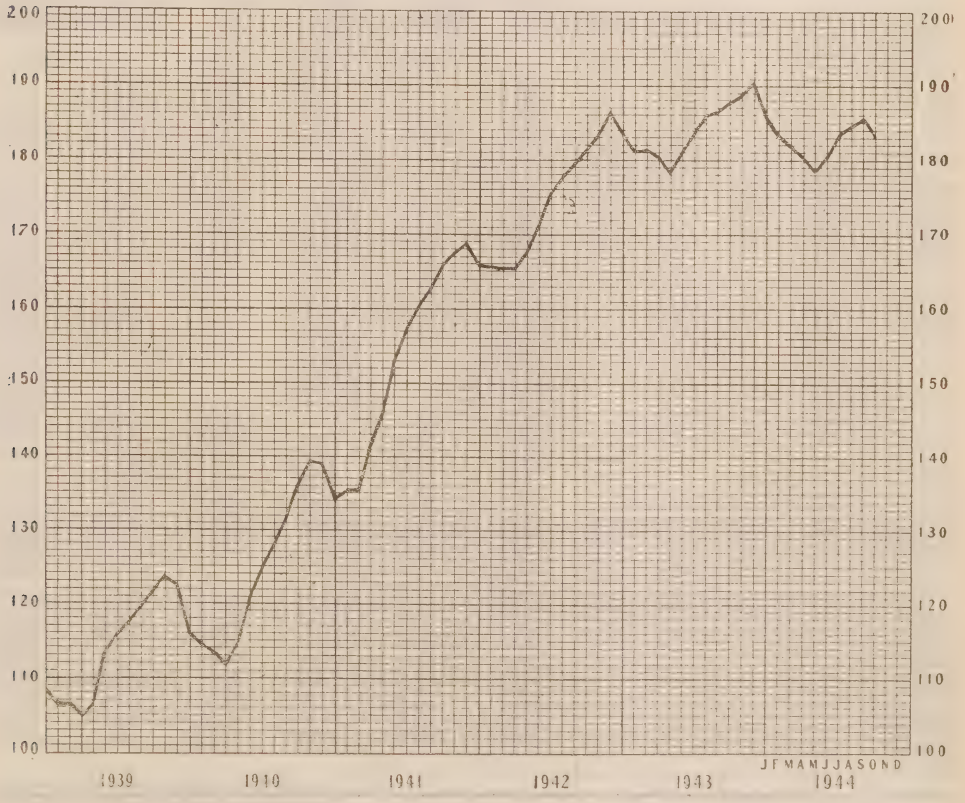
Applications for Employment; vacancies and placements; October, 1944.—From the Employment and Selective Service Offices of the Unemployment Insurance Commission come reports showing the number of positions reported as vacant across the Dominion, together with the number of applications for employment and the number of placements effected.

Reports received from the Employment and Selective Service Offices during the five weeks September 29 to November 2, 1944, showed little change in the daily average of placements recorded both when compared with the previous four weeks and with the four-week period October 1 to October 28, 1943. Under the first comparison, mining showed a slight increase and forestry and logging an outstanding gain which offset the declines in all other industrial divisions. In comparison with the four weeks ending October 28, last year, the decrease in total placements was negligible though a pronounced gain in forestry and logging and a marked loss in manufacturing was recorded. Vacancies during the five weeks September 29 to November 2, 1944, numbered 271,350, applications 254,937 and placements in regular and casual employment 179,860.

Unemployment in trade unions.—At the beginning of October the percentage of unemployment among trade unions was 0·3. This figure was identical with that shown both at the beginning of July, at which date the percentage was indicated as for the June quarter, and at the beginning of October, 1943. The October figure was based on returns received from 2,377 labour organizations having a total membership of 416,664 persons.

Total employment in Canada.—An estimate of Canada's total manpower distribution at June 1, 1944, has been made by the Research and Statistics Branch of the Department of Labour. At that date it is estimated that 4,232,000 persons, 14 years of age and over, were gainfully occupied, of whom 3,232,000 were in non-agricultural industry, including 975,000 in war industry. In addition, there were 784,000 persons in the Armed Forces.

The Employment Situation at the Beginning of October, 1944, as Reported by Employers



INDUSTRIAL activity showed considerable curtailment at the beginning of October, the first time since the autumn of 1931 that the trend at that date has been downward. A combined working force of 1,861,599 persons was employed by the 14,921 establishments furnishing returns to the Dominion Bureau of Statistics, whose staffs at September 1 had aggregated 1,884,176. This loss of 22,577 employees amounted to 1·2 per cent.

Based on the 1926 average as 100, the unadjusted index number of employment in the eight leading industries fell from 185·5 at September 1 to 183·3 at the beginning of October, when it was 2·2 per cent lower than at the same date of last year. Since the contraction at the date under review was contra-seasonal, the seasonally-corrected index was also lowered, declining from 178·3 at September 1 to 174·4 at the beginning of October.

The general shrinkage in industrial employment at the beginning of October, 1944, took place largely in manufacturing and construction, from which 12,963 and 21,132 persons were released, respectively. The decline in the former was contra-seasonal, while that in the latter was seasonal in character, although it was greater than the loss usually indicated at October 1. Most of the reduction was in highway work in Quebec. In the manufacturing division, the greatest falling-off was in iron and steel, nearly 9,500 persons being laid off in this group. There was also a loss of over 3,500 in lumber mills, in which the decline exceeded the average at October 1. Vegetable food factories, on the other hand, added almost 5,700 persons to their working forces. Textiles

EMPLOYMENT IN CANADA AS REPORTED BY EMPLOYERS

NOTE.—The curve is based on the number of employees at work on the first day of the month as indicated by the firms reporting, in comparison with the average number of employees they reported during the calendar year 1926 as 100.

also afforded more employment, but the gains were not equal to those ordinarily recorded at October 1.

Among the non-manufacturing industries, highway construction, as already stated, showed substantial curtailment, and there were smaller losses in mining, communications and services. On the other hand, logging reported important seasonal expansion, while improvement, though on a smaller scale, was noted in transportation and trade.

Payrolls

The salaries and wages disbursed by the co-operating employers at October 1 aggregated $60,250,107, as compared with $59,714,662 at September 1. The increase was 0·9 per cent. The average weekly earnings per employee showed a further gain, rising from $31.69 at the beginning of September to $32.36 at the date under review, as compared with $31.53 at October 1, 1943, $29.51 at October 1, 1942, and $26.37 at October 1, 1941. In the 12 months' comparison, there has been a small fractional increase in the index of payrolls, but that of employment has fallen by 2·2 per cent. The per capita earnings have risen by over two per cent. The gain in the latter is particularly interesting in view of the fact, already stated, that there has been a reduction of 3·3 per cent in the number of male workers, accompanied by a gain of 0·9 per cent in female employees during the 12 months.

The rise in the average earnings from September 1 to October 1 is partly seasonal in character, but is also due in part to the payment of wages to railroad workers at the higher rates authorized some weeks ago by the

National War Labour Board. The increased rates were made retroactive to September, 1943; adjustment cannot be made in these figures of payrolls for such retroactive payments.

If the statistics for the finance group be added to those given above for the eight leading industries, the latest survey shows a total of 1,928,111 in recorded employment at the beginning of October, as compared with 1,949,480 at the beginning of September. The latest aggregate weekly payroll was $62,405,800, exceeding by 0·9 per cent that of $61,839,127 reported at September 1. The per capita earnings in the nine leading industries advanced from $31.72 at that date to $32.37 at October 1, as compared with $31.52 at October 1, 1943,

TABLE II—EMPLOYMENT AND EARNINGS

Number of persons employed at October 1, 1944, by the Co-operating Establishments and Aggregate Per Capita Weekly Earnings of Such Employees, Together with Index Numbers of Employment and Payrolls as at October 1 and September 1, 1944, with Comparative Figures for October 1, 1943 where available, based on June 1, 1941 as 100 p.c.

(The latest figures are subject to revision)

[1]This classification comprises the following:—iron and steel, non-ferrous metals, electrical apparatus, lumber, musical instruments and clay, glass and stone products.

$29.55 at October 1, 1942, and $26.46 at October 1, 1941.

Table II summarizes the latest statistics of employment and payrolls for the leading industrial groups, the provinces and economic areas, and the twenty leading industrial cities, and gives comparisons as at September 1, 1944, and October 1, 1943, where these are available.

Table I indicates that in the period for which data are available, the number of persons in recorded employment in the eight leading industrial groups has shown an increase of 20 per cent, while the aggregate weekly payrolls of those workers are higher by 51 per cent. Including finance, the gain in employment from June 1, 1941 to October 1, 1944, amounted to 19·7 per cent, and that in payrolls, to 49·9 per cent. The explanation given previously for the much greater rise in the salaries and wages than in the numbers employed may again be stated: (1) the concentration of workers in the heavy manufacturing industries, where rates of pay are above the average and, in addition, there has been a considerable amount of overtime work, (2) the payment of cost-of-living bonuses to the majority of workers; the rates at which these allowances were calculated were increased on more than one occasion before their incorporation in the basic wage-rates from February 15, 1944; (3) the progressive upgrading of employees as they gain experience in their work and (4) the granting of higher wage-rates in numerous cases.

As a result of wartime demands on industry, there have been especially important gains in employment and payrolls in factories, in which the rate of expansion in the period of observation has been decidedly greater than in the non-manufacturing industries; the index of employment in the former has risen by 33·2 per cent from June 1, 1941 to October 1, 1944, and that of payrolls has advanced by 69·2 per cent, proportions decidedly exceeding those elsewhere given for the eight leading industries. The factors stated above as influencing the general trends have had an even greater effect in the case of manufacturing.

In regard to the marked variations in the average earnings of workers in the different

TABLE IV—INDEX NUMBERS OF EMPLOYMENT BY INDUSTRIES (AVERAGE 1926=100)

(The latest figures are subject to revision)

Industries	[1]Relative Weight	Oct. 1 1944	Sept. 1 1944	Oct. 1 1943	Oct. 1 1939
Manufacturing	**63·0**	**223·7**	**226·2**	**231·4**	**119·7**
Animal products—edible	2·5	229·1	234·9	197·2	151·2
Fur and products	·2	126·9	125·3	123·0	110·3
Leather and products	1·5	135·6	136·1	136·3	119·5
Boots and shoes	·9	124·5	125·2	123·5	120·3
Lumber and products	3·7	126·1	132·6	124·1	91·1
Rough and dressed lumber	2·0	104·4	112·1	105·2	83·0
Furniture	·6	124·9	129·2	107·7	86·0
Other lumber products	1·1	209·1	213·0	210·6	121·7
Musical instruments	·04	28·5	29·3	50·1	58·2
Plant products—edible	3·8	214·1	196·7	185·6	160·3
Pulp and paper products	4·6	137·7	139·7	134·2	111·8
Pulp and paper	2·0	125·3	128·6	124·0	101·5
Paper products	·9	209·4	212·5	201·2	138·3
Printing and publishing	1·7	130·3	130·3	124·3	116·0
Rubber products	1·2	171·2	170·7	131·8	114·7
Textile products	7·2	154·9	153·4	156·8	126·5
Thread, yarn and cloth	2·6	154·9	155·3	156·2	135·0
Cotton yarn and cloth	1·2	108·1	108·7	112·6	102·7
Woollen yarn and cloth	·6	165·7	167·0	169·9	147·3
Artificial silk and silk goods	·6	598·8	591·5	556·3	443·5
Hosiery and knit goods	1·1	143·6	143·3	143·3	127·5
Garments and personal furnishings	2·6	155·7	152·6	159·5	121·0
Other textile products	·9	170·4	167·1	170·7	115·8
Tobacco	·5	124·5	120·9	126·8	99·1
Beverages	·8	263·4	261·7	243·6	186·9
Chemicals and allied products	4·2	611·7	614·4	627·6	170·5
Clay, glass and stone products	·8	130·9	134·4	137·7	97·8
Electric light and power	1·0	147·3	150·6	146·2	141·7
Electrical apparatus	2·5	323·1	327·8	323·4	136·1
Iron and steel products	23·4	318·9	325·8	351·1	101·5
Crude, rolled and forged products	1·8	245·5	246·4	265·4	145·3
Machinery (other than vehicles)	1·3	218·2	222·0	239·5	119·9
Agricultural implements	·6	128·1	127·8	128·0	51·2
Land vehicles and aircraft	10·1	296·4	301·1	300·2	88·4
Automobiles and parts	2·3	291·0	293·1	301·9	114·7
Steel shipbuilding and repairing	3·5	1,471·0	1,513·1	1,667·0	74·7
Heating appliances	·3	173·2	173·6	168·2	139·5
Iron and steel fabrication (n.e.s.)	1·2	313·4	325·5	316·8	120·8
Foundry and machine shop products	·5	234·0	234·0	274·3	114·6
Other iron and steel products	4·1	361·8	377·1	431·5	113·7
Non-ferrous metal products	3·1	411·9	427·2	501·1	164·9
Non-metallic mineral products	·9	212·1	216·3	213·4	163·6

[1] The relative weight shows the proportion of employees reported in the indicated industry to the total number of employees reported in Canada by the firms making returns at the date under review.

industrial classes, it must again be pointed out that the sex distribution of such persons is an important factor, frequently associated with variations in the age groups. In general, the female workers tend to belong to the younger age classes, in which the earnings are naturally lower than among those of greater experience. The matter of short-time or overtime may also considerably influence the reported aggregates and averages, which likewise reflect variations in the extent to which casual labour is used; the degree of skill generally required of workers in the industry is of course also an extremely important factor.

Sex Distribution of the Persons in Recorded Employment at October 1, 1944

Of the persons in recorded employment in the eight leading industries at the beginning of October, 486,125, or 261 per thousand, were females, and 1,375,474, or 739 per thousand, were males. The former proportion showed no change as compared with April 1, 1944, but was higher than that of 253 females per thousand employees at October 1, 1943. There was thus a gain of 3·2 per cent in this ratio in the 12 months' comparison, which eliminates the seasonal factor; the increase in the number of females in recorded employment, however, amounted only to about 4,300, or 0·9 per cent. On the other hand, the number of males showed a decline of 3·3 per cent; the general reduction in the number in recorded employment, as stated above, was 2·2 per cent. Including those employed in financial institutions, the number of females reported by the co-operating establishments at October 1 was 521,979, or 271 per thousand, as compared with 270 per thousand at April 1, 1944, and 262 at the beginning of October in 1943.

Report on Employment Conditions, November, 1944

The following report on the employment situation for the past month has been prepared by the Research and Statistics Branch, Department of Labour, in co-operation with the Employment Service, Unemployment Insurance Commission. The first section of the report covers the Canadian labour market by industry groups, while the second section gives a more detailed analysis of employment conditions by region.

TOTAL net labour demand[1] in Canada at November 23 amounted to 131,020, comprised of a need for 97,804 male and 33,216 female workers. Requirements for male workers at November 23 represented a drop of 25,789 from that of four weeks previously and of 28,073 from the corresponding date in the previous year. The decline in demand for women workers during the month was only 1,056.

A and B Priority Industries

Although all A and B priority industry groups showed marked reductions in net labour demand between October 26 and November 23, 74 per cent of the total net labour demand at the latter date was in high priority industries. The following table shows, for selected high priority industries, a comparison of net labour demand at these dates.

Net Labour Demand in Selected A & B Priority Industry Groups

	Oct. 26	Nov. 23	Decrease
Logging	36,116	32,762	3,354
Mining and Smelting	9,278	7,008	2,270
Manufacturing	41,015	31,474	9,541
Construction	6,011	4,041	1,970
Transportation	11,225	7,626	3,599
Trade, Finance and Service	13,695	10,885	2,810

Logging.—Forty-two per cent of the demand for male labour in A and B priority industries as at November 23 was in the logging industry. Of the 32,696 men required, 19,905 were for pulpwood logging, 10,866 for lumber logging and 1,925 for other types. Almost four-fifths of the shortage in pulpwood logging was in the Quebec and Prairie Regions, with respective requirements of 10,281 and 5,453. In lumber logging 3,050 men were needed in the Maritime Region, and demand was also high in the Prairies (2,871) and Ontario (2,583). Net labour demand in logging appears to have passed the seasonal peak, largely as a result of an intensive program of recruitment on the part of the Dominion Employment Service. It is reported that 10,000 more men are at work in pulpwood logging this year than in the fall of 1943. However, more men are still called for and are in prospect for woods work after the New Year.

Manufacturing.—High priority manufacturing industries continued to be hard pressed for help, with a demand for 20,841 men and 10,633 women at November 23. Four weeks previously there were 28,707 men and 12,308 women needed. Seventy-five per cent of the total decline in net labour demand in essential

[1] *Net Labour Demand* is calculated by deducting unconfirmed referrals from unfilled vacancies. *Unfilled vacancies* are the number of unfilled jobs on file in employment offices as at the date indicated. A vacancy is considered unfilled until it is cancelled or until the employer notifies the employment office that it has been filled by the placement of a referred applicant. *Unconfirmed Referrals* are applicants who have been referred to a specific job by an employment office and notification has not been received from the employer as to whether the person has been placed or rejected.

manufacturing during the month was in the following industries: Food processing, shipbuilding, wood products, aircraft and parts, mechanical transport and armoured fighting vehicles, and guns and ammunition.

There were 2,750 workers (1,791 men and 959 women) needed in high priority food processing at November 23, a reduction of 2,212 from the labour requirements one month previously. This easing of the labour situation was due in large measure to agricultural workers taking winter jobs in packing plants and feed mills. In the Prairie Region alone, demand for male workers in the meat products industry dropped from 1,162 at October 26 to only 69 at November 23, in spite of an exceptionally large run of live stock in the packing houses. There was also a Dominion-wide reduction of 449 in demand in the canning and preserving industry, from 1,323 at October 26 to 874 at November 23. In the Pacific Region demand in this industry dropped by 241 to only 62 at the latter date.

Shipbuilding.—Large layoffs have taken place in shipbuilding due to cancellation of contracts, and in consequence net labour demand in this industry fell from 3,497 to 2,089 during the month ended November 23. Although demand was lower in all regions, labour requirements in East and West Coast shipyards were still high at November 23, as may be observed in the table which follows:

	Oct. 26	Nov. 23	Decrease
Canada	3,497	2,089	1,408
Maritimes	1,602	978	624
Quebec	371	98	273
Ontario	477	226	251
Prairies	51	33	18
Pacific	996	754	242

Net labour demand in the wood products industry, which includes saw-mills, stood at 2,980 at November 23, a decrease of 1,174 from labour requirements at October 26 one month earlier. Four-fifths of the total labour shortage in the wood products industry at November 23 was attributed to a need for male workers in sawmills. In the Pacific Region demand for males fell by 548 to 267 during the month while in the Prairies it was reduced from 646 to 395. The Ontario and Maritime Regions both showed decreases, but in Quebec the need for male workers rose from 903 to 1,185 during the four weeks.

Re-adjustments of production programs in the aircraft industry have recently been announced. In future only four types of aircraft will be produced in Canada. Curtailment of production was reflected in a shrinkage in demand for labour in this industry from 2,281 at October 26 to 1,245 at November 23. Aircraft plants in the Ontario Region were asking for 582 fewer men and 198 fewer women than four weeks previously, although 838 workers (779 males and 59 females) were still needed. In Quebec the total decrease in demand was 152, with November 23 requirements totalling 248.

Net labour demand in the manufacture of mechanical transport and armoured fighting vehicles (802) at November 23 was less by 729 than that reported four weeks previously. In the Ontario Region, male requirements in the manufacture of motor vehicles, bodies, parts and accessories dropped from 1,277 to 612, thus accounting for almost the entire decrease between October 26 and November 23.

Further progress has been made in relieving the labour deficiency in some of the tire plants and it is expected that labour conditions will continue to improve satisfactorily over the next few months.

Demand for workers in the guns and ammunition industry showed a decline of 555 between October 26 and November 23 to stand at 3,212 at the latter date. Success has attended efforts to obtain both male and female workers for manufacturers of heavy ammunition to enable them to maintain increased production schedules, and on the whole, the labour needs of these plants have been met. In the Ontario Region, net labour demand in the manufacture of heavy ammunition at November 23 (1,009) represents a decrease of 984, male demand having eased by 415 and female demand by 569. However, Quebec plants were asking for 457 more men and 179 more women at November 23 than one month earlier, and the total demand reported by manufacturers of heavy ammunition at the November date was 1,660.

There were 1,815 persons (793 males and 1,022 females) required for the manufacture of industrial chemicals at November 23. Virtually all of this demand was in the Ontario Region. Recent reductions in some chemical contracts have been followed by re-adjustments in staff. Workers released have been absorbed, largely in other essential industries.

Trade, Finance and Service.—As at November 23, there were 10,855 persons (4,667 men and 6,188 women) needed in high priority trade, finance and service. This was fewer by 2,810 than the labour requirements of four weeks earlier, and all regions shared in the decrease.

Thirty-six per cent of the total demand in this group as at November 23 was in public and professional service. There were 438 fewer persons needed in public service (Dominion, provincial and municipal); demand for males in this type of service declined by 391, to 1,388 at November 23. The shortage of workers in hospitals at this date amounted to 1,053

(255 males and 798 females). Demand in hospitals showed a decline in all regions except the Maritimes where a slight increase was evident.

Demand in trade, finance and service (other than public and professional) stood at 6,904, smaller by 2,079 than at October 26. There were 2,286 women required for jobs in hotels and restaurants in spite of a falling off in demand of 894 from four weeks earlier. The need for female workers in hotels and restaurants across Canada at November 23 was distributed as follows: Maritimes 358, Quebec 321, Ontario 873, Prairies 676 and Pacific 58. Mass layoffs in aircraft and allied industries have made more women available for this type of service. Net labour demand in wholesale trade amounted to 1,145 (778 men and 367 women), a decrease of 537 from October 26. More than 70 per cent of the November 23 demand in wholesale trade was in the Ontario and Quebec Regions in which shortages amounted to 525 and 289 respectively. There were 947 persons (919 of them males) required in high priority custom and repair at November 23. This is only a slightly smaller demand than that of four weeks previously when 1,063 persons were needed.

Transportation.—Eighty-four per cent of the total demand for labour in high priority public utilities at November 23 was in transportation, in which 7,395 men and 231 women were required.

The reduction of 3,471 in male demand from October 26 was largely due to the use of soldiers and the returning harvest labour. In the Prairie Region demand for males in railway transportation alone fell from 3,443 to 2,211 during the four weeks ended November 23. The table which follows shows, by region, the decrease in net labour demand in railway transportation (including express service) during the four-week period ended November 23.

	Oct. 26	Nov. 23	Decrease
Canada	7,733	4,872	2,861
Maritimes	595	354	241
Quebec	596	190	406
Ontario	2,040	1,497	543
Prairies	3,443	2,211	1,232
Pacific	1,059	620	439

Male net labour demand in water transportation at November 23 stood at 899, little changed from October 26. One-half the male demand in this industry was in the Maritime Region (449), while the Ontario and Pacific Regions were asking for 167 and 143 men respectively. Labour requirements at the Lakehead Grain Elevators continued to be acute until the closing of navigation.

Mining and Primary Smelting.—While the base metal mines have been fairly well taken care of by off-season 'harvest' and agricultural labour, in coal mining there is a continuing need of certificated miners. Total net labour demand in high priority mining and smelting at November 23 stood at 7,008, less by 2,270 than that reported on October 26. The male labour shortage in coal mining (1,836) represented a decline of 286 during the four weeks. In the Prairies demand fell from 1,201 to 834, while in the Maritimes there was a rise in demand of 108 to a total of 801. In the blast furnaces, steel works and rolling mills of Ontario, 1,004 men were required at November 23. Although this was 204 less than the demand four weeks previously, it represented 84 per cent of the Dominion labour shortage in the iron and steel mining industry.

The need for workers in Ontario's nickel mines decreased by 344 during the month under review to amount to 1,956 at November 23. Workers are still being referred to jobs in the nickel mines from neighbouring regions in an effort to relieve the shortage.

Construction.—Demand for labour in construction fell off in all regions across Canada during the month ended November 23, reducing the total demand from 6,011 to 4,041. Net labour demand for the construction of aerodromes and highways dropped from 965 to 523 during the four-week period, with most of the decline being in the three inland regions. There was also a decrease of 367 in net labour demand for residential construction (including Wartime Housing); 576 workers were needed at November 23 compared with 943 four weeks earlier. In the Ontario Region demand fell by 170 to 241 at the November date.

Employment of Women

There has been a general decline in the employment demands for women over the past three months. The decrease (1,056) in female net labour demand during the month under review was relatively slight compared with the drop of over 14,000 during September and October.

Lay-offs from various war industries have placed a considerable number of women workers at the disposal of the long understaffed services and requirements can now be met in most areas. While many of those laid off are unwilling to accept work at lower rates of pay than were obtainable in aircraft and shipbuilding plants, on the whole it is noticeable that hotels and restaurants, hospitals and sanatoria are benefiting to some extent by the cessation of other employment. Surveys made at the time of lay-offs indicate that the large group of single women under thirty intend to remain in industry after the war.

Regional Analysis

The regional analysis which follows is based on semi-monthly reports received from Local Employment and Selective Service Offices across Canada. The report covers employment conditions during the month ended November 22, 1944.

Maritime Region

Agriculture—With the conclusion of harvesting, the only present demands upon the labour force are for year-round farm helpers, who are difficult to supply. Services of the Armed Forces were utilized in assisting with the potato crop. A general exodus of agricultural workers from the land to logging camps and other essential industries is now taking place, and some hundreds of men from Prince Edward Island are accepting employment on the mainland.

Logging—Extremely mild, wet weather has retarded logging operations in many sections. Hundreds of bushmen are still needed, but it is generally agreed that a greater number are available than last year. Men from Prince Edward Island are relieving the shortage in the Liverpool area, and one company in the Bridgewater district has brought in a number of Newfoundlanders. Several hundred orders are on file in the Moncton office and employers are conducting a direct canvass for bushmen in that vicinity, and also in the neighbourhood of Campbellton, where approximately 500 more loggers are needed, and cannot be procured locally.

Coal Mining—Experienced coal miners are needed in every colliery throughout the region and New Glasgow alone reports that current vacancies total 87 certificated miners and 45 labourers.

Manufacturing—Lay-offs in varying degrees are occurring in the Maritimes. At Bridgewater, the Foundation Maritime has ceased operations and so far 465 men and 30 women have been laid off, with 40 men remaining until the end of the month on cleaning-up work. Barge building operations at Fredericton are almost completed and the majority of the employees have been released, with many of the skilled workmen absorbed into other companies and the unskilled labourers going to woods work.

H.M.C. Dockyard at Halifax requires an additional 150 labourers, and a local stevedoring company is calling for another 130, but the immediate needs of the shipyards have been relieved somewhat by the recent transfer of about 50 skilled workmen from Ontario and Quebec. Liverpool has not been as fortunate in satisfying a pressing need for skilled workers, who are not available locally.

At Saint John, there is a continuing demand for heavy labour in foundries and machine shops. However, a lay-off is taking place at one war plant, but no difficulty is being encountered in transferring those affected to other industries in the neighbourhood.

Textile factories and kindred establishments have not lessened their efforts to procure additional workers. The woollen mills at Truro are calling for skilled tradesmen and a large number of women; also 100 female workers are needed for the cotton mill at St. Stephen.

Construction—In all parts of the region activity is slowing down. For the most part, projects are almost completed, and only repair work is going forward. The single exception is noted at Sydney, where two new warehouses are being erected at the naval base. It is expected that this work will continue throughout the winter, engaging the services of approximately 100 construction tradesmen.

Quebec Region

Agriculture—Except for a few orders for year-round farm assistants, which can be filled locally, agricultural activity is at an end. Many farmers are busy cutting their own winter firewood. In all sections applications for temporary permits are being made in steadily increasing numbers.

Logging—On the whole, logging operations are being conducted on a greater scale this year than last and the majority of local offices report that they are satisfying the manpower demands of the companies in their areas moderately well. The addition of farm labour to the ranks of bushworkers has somewhat relieved a still heavy over-all demand, and the closing of the United States border to loggers on November 15 has helped companies operating south of the St. Lawrence.

Matane, with same 3,000 unfilled vacancies, does not expect to be able to fill these orders, while at Three Rivers one large paper company requires an additional 1,200 men. The Rouyn office reports that another 2,350 pulpwood cutters are needed in that area, and approximately 2,000 loggers are required in the Lake St. John districts, while at Dolbeau, although employers are fairly well satisfied, hundreds more loggers could be utilized. La Malbaie, too, reports that labour demands on the North Shore are mounting steadily.

Mining—There is no noticeable change in the labour situation of the Quebec mines. The

Rouyn office states that while only 15 men are needed for the local gold mines, about 800 miners could be utilized in the base metal operations of the area. At Val d'Or, conversely, the base metal mines have all the labour necessary for the time being, but all gold workings are in great need of workers.

Manufacturing—Lay-offs of considerable magnitude have taken place in the province during the past month. At Chicoutimi, the Aluminum Company of Canada has issued notices of immediate separation to more than 1,500 men. All the men affected are being interviewed at the plant and offered work either in the bush or on clearance orders. The company is also reducing its staff in other districts.

In Montreal, the Fairchild and Noorduyn aircraft plants are proceeding with a gradual lay-off, and staff reductions at the local D.I.L. plants are proceeding according to plan. Lay-offs from the Quebec arsenal have satisfied the labour needs of the textile and tobacco plants in that city, and labour releases are going forward at the Anglo-Canadian Shipbuilding yards. Marine Industries of Sorel have also begun their anticipated staff reduction of 500 employees.

In other parts of the province, munitions factories are increasing their activities, and two large Three Rivers plants are urgent in their demand for a large number of men and women. The D.I.L. plant at Cherrier is still calling for male and female staff and factories engaged in the manufacture of military uniforms are in continuing want of experienced women workers.

Little or no relief from labour shortage has been received by the understaffed textile trades and kindred industries throughout the region. The sawmills, too, have been making heavy demands on the provincial labour force.

Construction—Although building activities are decreasing, there are still many calls for construction labour. Private housing projects in Montreal are suffering from a dearth of bricklayers, and in the Sherbrooke district there is no indication of an easing of the great shortage of carpenters, painters and bricklayers. However, the labour needs of the military hospital construction program in the region are being well met.

Transportation—The call for transportation labour is diminishing, especially insofar as the railway maintenance gangs are concerned. The railways are beginning to release their extra track crews, and at Levis there were 171 separations from the Canadian National Railways during the early part of the month.

Ontario Region

Agriculture—The demand for farm labour has lessened steadily as the season advanced, and only market gardeners, greenhouse assistants and experienced year-round agricultural workers are now needed. Fall ploughing has been completed in all but the St. Catharines area. The sugar beet crop has been gathered in the vicinity of Chatham, and in the neighbourhood of Leamington the tobacco harvesting is at an end, except for stripping operations. The movement of farmers into other essential industries has become widespread, and has resulted in a great easing of the general labour situation.

Logging—A shortage of bushworkers prevails in most lumbering districts throughout the region. The Peterborough offiice reports that almost any number of skilled and unskilled loggers could be absorbed into the surrounding camps, and Pembroke is calling for an additional 700 bushmen. One large company at South River is in extreme labour difficulties, as some 17,000 logs are lying cut but still unskidded, owing to the lack of manpower. The local office at Bracebridge has met with some success in contacting farmers to fill the camps in that vicinity, which could utilize another 400 or 500 loggers, and operators in the Kirkland Lake area are calling for a further 300.

In the neighbourhood of Kapuskasing approximately 5,000 men are in the bush and it is anticipated that operations will be the most extensive in years. All camps in that district will soon be well supplied with labour, as farmers are arriving from Quebec in large numbers. There is also a considerable movement from the adjoining province into the Sault Ste. Marie area, where the demand for bushmen still far exceeds the supply.

Mining—There has been no noticeable reduction of the manpower shortage prevailing in Ontario's mines. Mining operations at Sault Ste. Marie and Timmins are very short of labour, and at Kirkland Lake 200 experienced men and another 200 beginners are needed for the gold mines.

Manufacturing—There has been a marked improvement in manpower resources since the beginning of the month. Although the foundries are still hard pressed for heavy labour (experienced moulders in particular), there has been a definite decrease in the demand for skilled workers. Oshawa reduced its shortage of heavy labourers through the assistance of men from the Armed Forces, and Peterborough has benefited by the placing of some 300 farmers in its local industries during the past month. In other districts, agricultural workers

are similarly relieving the situation, but Brockville and St. Catharines, Kingston and Hamilton continue to call for large numbers of foundry helpers.

At the present time a recruiting campaign is under way in the Prairie region, with a view to obtaining men released at the end of the harvesting season, for employment in Ontario foundries. This campaign is meeting with a considerable degree of success and it is believed that the results will satisfy the present demands of eastern establishments hard-pressed for heavy labour.

In the Chatham area there is an urgent call for munitions workers, and both regional representatives and members of the staff of the local office at Wallaceburg are helping in a campaign which so far has been moderately successful.

There have been no encouraging developments in the labour situation of the textile trade and kindred industries, and the over-all manpower needs in such establishments remain far from satisfied.

With the completion of the harvesting, tobacco factories are preparing for their seasonal activities. The demand of one large plant at Chatham for 50 men and 80 women is being met by the placing of farmers from the district, and five factories opening in the Leamington section will absorb most of the surplus labour in that locality. Processing operations now opening at Delhi call for the services of a staff of 800.

Lay-offs in some parts of the region have increased during the past two weeks. In Hamilton, the Carter Hals Shipbuilding Company has recently released some 320 men, but most of these were skilled shipbuilding tradesmen, who were quickly absorbed elsewhere. The Midland Shipyards have tendered separation notices to 104 workers, who will be difficult to place locally. In London, where the general employment situation is improving, the Central Aircraft plant has dispensed with the services of some 80 skilled and semi-skilled male workers, all of whom have been referred to other local industries where their skills are urgently required, and most of the 25 girls released by the company, as well as 15 others from Sparton of Canada, have been referred and placed elsewhere.

The Toronto office reports that lay-offs have made little or no difference to the over-all manpower situation in that city. While orders for skilled and semi-skilled workers have declined during the past several weeks, calls for heavy labour have increased. The only staff reduction of any extent has been that taking place in the boatbuilding division of the Redfern Construction Company, which has affected about 500 skilled and semi-skilled workmen.

Construction—Contractors in all parts of the region are proceeding as rapidly as possible, to complete construction projects while fine weather continues, and as a result, painters, bricklayers and well-trained carpenters are in great demand. Most of the damage done by the earthquake in the Cornwall area has been repaired, but at Stratford labourers and semi-skilled artisans are needed to rebuild a feed mill, and coal and grain houses recently damaged by fire.

The province's military hospital building program is proceeding smoothly, with a plentiful supply of labour. Highway construction and repairs in most sections have either been completed or closed down for the winter.

Transportation—Although extra railway maintenance labourers are still needed, the number required is diminishing as the season advances. The Toronto office estimates that the tying up of some of the lake boats will shortly release several hundred men to fill unskilled vacancies. Port Colborne, too, reports that boats are beginning to tie up in that port and men who can remain in the locality will be asked to accept work with the boat repair companies for the winter months.

Prairie Region

Agriculture—Threshing was completed in all sections of the prairie provinces early in the month, and the only call for agricultural labour at this season is for year-round farm workers.

The number of farm workers going into other occupations for the winter months is increasing steadily throughout the prairie provinces. The Calgary office, in reporting a heavy influx of such applicants, states that every effort is being made to persuade the men to enter the logging camps, mines, railway maintenance gangs, etc.

Logging—Labour is being referred continuously to the lumbering camps. This movement is augmented this season owing to the fact that war and other essential industries are no longer open to experienced bushmen. Although none of the region's operators has a full staff, most of them are reasonably well satisfied with their labour supply.

Logging camps in the Lakehead section have not been as fortunate in procuring bush workers as operations farther west. The Port Arthur office advises that the shortage in that area is increasing, with some 2,480 existing vacancies, but it is expected that the Farm Help Service will supply a considerable number of men. Placements in the Fort Frances

area show a 15 per cent gain over those of a year ago, but outstanding orders call for a further 800 loggers. One pulp company in that locality has brought in 100 prisoners of war, and men leaving the local paper and sawmills for essential woods work have been transferred to the bush by the companies with whom they are employed. Farther west, Edmonton has current orders for 500 bushworkers, but the local office states that these will be procurable.

Coal Mining—There has been little change in the manpower situation of the region's collieries. On the whole, the supply of unskilled labour is sufficient, but there is a continuing shortage of certificated miners and experienced underground workers.

Base Metal Mining—There has been no notable development insofar as the labour position of the base metal mines is concerned. At Flin Flon, the agricultural influx has reduced requirements to a minimum, but few farm workers are available for the understaffed gold mines in the neighbourhood of Kenora. In some areas the mines will remain inactive during the winter months.

Manufacturing—The conclusion of the western harvest has benefited the industry, and for the most part, packing plants and flour mills have had their needs filled by farm labour. The Edmonton office reports that 151 agricultural workers from Saskatchewan have been sent to the packinghouses, and Moose Jaw has referred 40 odd workmen to the nickel plant at Sudbury and the smelter at Trail.

The shell plant at Fort William is still calling for another 100 experienced machine operators, but in the company's airplant factory only a very few skilled assembly workers are being taken on.

Lay-offs have occurred in many parts of the region. Staff reductions are now going forward at Winnipeg aircraft factories, with both men and women affected. It is noted by the Winnipeg office that the lack of opportunity in other lines is resulting in more young women considering employment in the needle trades, and many textile plants are taking them on as part-time workers.

A change in production schedule in the aircraft department of the shipyards at Port Arthur has resulted in the lay-off of another 41 women, for whom little other employment is obtainable locally. Of the 140 workers released from No. 6 Elementary Flying Training School at Prince Albert, the majority have been placed in other essential industry. Some 130 are still on the payroll of the M. and C. Aviation Company's Prince Albert plant, out of a staff of 575 when reduction of staff began two months ago. The Aircraft Repair Company's plant in Edmonton has also been closed down, but orders from the American Government for experienced aircraft workers will absorb many of the skilled tradesmen affected.

Construction—Fog, rain, and in some areas real winter conditions, have caused a general cessation of outdoor activities. In consequence, quite a number of carpenters are idle, with no immediate prospect of other employment. At Port Arthur, the company building the new C.N.R. ore dock is calling for riggers, carpenters and timbermen.

The progress of military hospital construction has been fairly satisfactory. Most of the outside work has been completed and the need for interior tradesmen is being met as required. In some areas there is a shortage of qualified bricklayers for this work, and clearance orders for these artisans have brought indifferent results.

Transportation—While the placement of men from the farms has brought about an easing of labour demands, the railways are still calling for many maintenance workers. In the Port Arthur area the orders of the Canadian National and Canadian Pacific are confined to crews for winter maintenance. Another 100 labourers would cover Edmonton's outstanding requirements, and the C.P.R. is shipping men from the Estevan area to British Columbia for winter work, in that province.

Pacific Region

Agriculture—Although the weather continues favourable for agricultural activity, the season is practically ended and little work will be done in the orchards until after Christmas. Farm labourers with dairying experience are being retained on dairy farms, and as a result there are, on the whole, sufficient helpers available for this type of work. Other agricultural workers in fair numbers are entering essential industry for the winter months.

Logging—The influx of eastern harvesters and men from the prairies is relieving the earlier shortage of loggers, and with a greater number of experienced bushmen now available, the industry's general labour situation is much improved. An exception to the easement in manpower needs is the Prince George area. The local office there reports that while farmers from the East and from northern Alberta have come in on clearance, the present supply of logging labour is completely inadequate, and there are still clearance orders for 363. Unless these requirements are met very soon there will be a great shortage of logs next season.

Sawmills—The labour needs of the mills on the lower mainland have been considerably lessened by the curtailment of war industries

in the region, making available a number of men with previous sawmilling experience. A persistent shortage in the southern interior is now being met by workers from the land. The closing down of a Kelowna box factory has resulted in the majority of the staff being transferred to the local sawmill, which intends to run an additional shift.

In the Vancouver area, common labour for the mills is plentiful, but graders and markers are in general demand, and lack of accommodation is hampering the placing of out-of-town orders. Victoria also reports a call for skilled sawmill workers, but the New Westminster office states that the orders of its local mills have been reduced to a minimum. A few skilled occupations remain unfilled, owing to the difficulty in obtaining experienced men, but the need for heavy labour has been met by prairie farmers.

Coal Mining—Manpower conditions in the coal mines are generally satisfactory. More men are being taken on mine payrolls as they appear, and as always, certified miners and underground labourers are readily absorbed. Only one mine in the vicinity of Fernie is seriously handicapped by lack of workers, and there is no indication that this colliery's position is likely to be improved in the near future.

Base Metal Mining—The influx of agricultural workers from the prairies and the enrolment of British Columbia farmers have enabled the base metal mines to increase their production. The gold mines of the province are still understaffed, however, and there are few applicants to meet their demands.

Manufacturing—The industry's call on the provincial labour force shows a marked decrease. Aircraft lay-offs, which have been going on during the past month, are practically completed, although several minor staff reductions are still scheduled to take place. Efforts are being made to place the workers affected as speedily as possible, but numbers of the women (many of them married) and some of the men are difficult to transfer to any other than light labour. The Boeing plants at Chilliwack and Nelson have closed down, with a resultant increase in the number of unemployment insurance benefit claims. In New Westminster the Western Iron Works have laid off 15 employees from their fabrication department, and Canadian Pacific Air Lines are continuing their gradual staff reduction, with the present payroll totalling only about 50 workers and 100 clerks. These lay-offs have created a large surplus of semi-skilled and unskilled workers, and have resulted in increasing claims for unemployment insurance benefit.

As a result of the transfers-in of prairie farmers, all orders for general labour for the Trail smelter have been cancelled.

The Vancouver office reports that orders for unskilled workers are negligible, although it is still hard to meet the demands of the foundries for moulders, chippers and machinists. The recent aircraft lay-offs have resulted in a slight general surplus of manufacturing in other fields to take up the slack and applicants are being advised to take these.

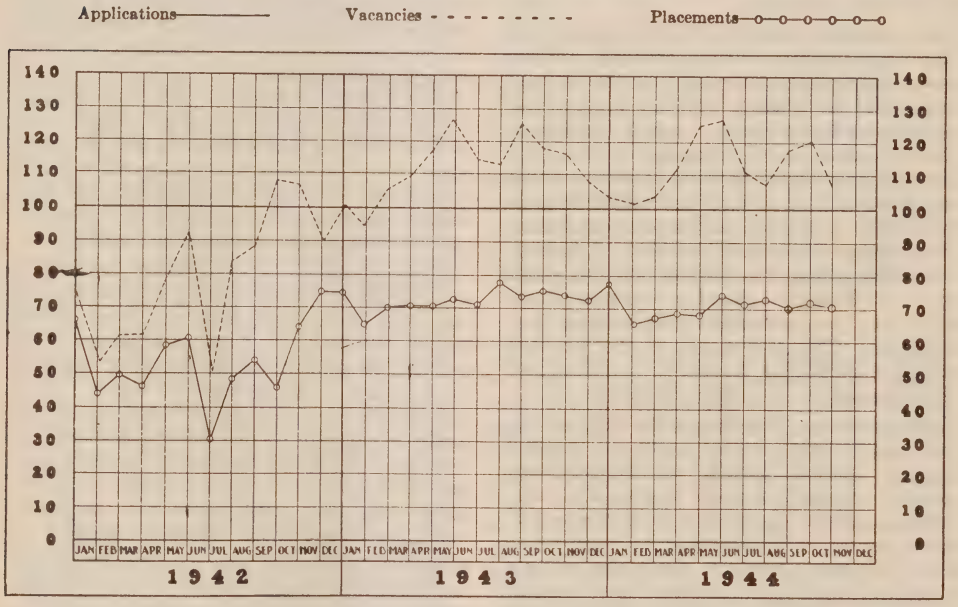
The Victoria shipyards are still making heavy demands for rivetting crews, ironworkers' helpers and labourers, and there are a few vacancies in practically every shipbuilding occupation. The dearth of riveters has been relieved by the loan of crews from Vancouver, and production has increased accordingly.

Construction—Activity is chiefly confined to small projects, home building and alterations, but even these operations are being slowed up by the lack of skilled tradesmen. The shortage of general labour has been eased by employment of servicemen on leave. There has been a slow but steady increase in carpenter applicants on the lower mainland, and a seasonal rise in the number of painters seeking work. Many of the latter are willing to accept temporary employment of another kind.

Transportation—The greatest dearth of labour still exists on the railways, which call continually for maintenance gang and section hands. Street railways in several localities are similarly short staffed. Bus companies and steamship lines are well supplied with workers at present.

Applications for Employment; Vacancies and Placements, October, 1944

DURING the five-week period September 29 to November 2, 1944, reports received from Employment and Selective Service Offices of the Unemployment Insurance Commission showed a slight decline in the average daily placements when compared with the previous four weeks September 1 to September 28, and a negligible decrease in comparison with the four-week period October 1 to October 28, 1943. Under the first comparison, a gain in forestry and logging offset the losses in all industrial groups except mining which recorded a slight increase. In comparison with the four weeks October 1 to October 28, last year, the most noteworthy changes were an outstanding gain in forestry and logging, a pronounced loss



in manufacturing and a moderate decrease in construction.

The accompanying chart shows the trend of employment since January, 1942, as represented by the ratios of vacancies notified and of placements effected for each 100 applications for work registered at Employment and Selective Service Offices throughout Canada. It will be seen from the graph that the curves of vacancies and placements in relation to applications followed downward courses, the ratio of vacancies to each 100 applications being 106·4 during the five weeks ending November 2, in contrast with 120·3 during the previous four weeks and 115·9 during the four weeks in October, 1943. The ratio of placements to each 100 applications during the period under review was 70·5 compared with 72 for the preceding four weeks and 73·7 during the four weeks October 1 to October 28, 1943.

The average number of vacancies reported daily by employers to the offices throughout Canada during the five weeks September 29 to November 2, 1944, was 9,357 compared with 10,283 during the preceding four weeks and with 9,798 in the four weeks ending October 28, 1943. The average number of applications for employment received daily by the offices during the five weeks ending November 2, was 8,791, in comparison with 8,547 during the preceding four weeks ending September 28, and with 8,448 during the four-week period October 1 to October 28, last year. The average number of placements made daily by the offices during the five weeks September 29 to November 2, 1944, was 6,202 of which 6,052 were in regular employment and 150 in work of one week's duration or less, as compared with a total daily average of 6,158 during the previous four weeks. Placements during the four weeks October 1 to October 28, a year ago, averaged 6,227 daily, consisting of 6,083 in regular and 144 in casual employment.

During the five weeks ending November 2, 1944, the offices referred 248,734 persons to employment and effected a total of 179,860 placements; of these, the placements in regular employment were 175,522 of which 111,006 were of males and 64,516 of females, while placements in casual work totalled 4,338. The number of vacancies reported by employers was 182,104 for males and 89,246 for females, a total of 271,350, while applications for work numbered 254,937, of which 160,751 were from males and 94,186 from females. Reports for the four-week period September 1 to September 28, 1944, showed 236,504 vacancies notified, 196,572 applications made and 141,641 placements effected, while during the four weeks October 1 to October 28, 1943, there were recorded 225,354 vacancies, 194,306 applications for work and 143,230 placements in regular and casual employment.

POSITIONS OFFERED AND PLACEMENTS EFFECTED FOR EACH ONE HUNDRED APPLICATIONS FOR EMPLOYMENT

The following table gives the placements effected by the offices, each year, from January, 1934, to date—

Year	Placements		
	Regular	Casual	Totals
1934	223,564	182,527	406,091
1935	226,345	127,457	353,802
1936	217,931	113,519	331,450
1937	275,300	114,236	389,536
1938	256,134	126,161	382,295
1939	242,962	141,920	384,882
1940	320,090	155,016	475,106
1941	316,168	191,595	507,763
1942	809,983	85,638	895,621
1943	1,890,408	53,618	1,944,026
1944 (44 weeks)	1,436,854	39,709	1,476,563

Nova Scotia and Prince Edward Island

Positions offered through Employment and Selective Service Offices in Nova Scotia and Prince Edward Island during the five weeks ending November 2, 1944, averaged 297 daily compared with 389 in the preceding period and 391 during the four weeks ending October 28, 1943. There was a daily average of 219 placements in comparison with 216 during the period ending September 28, 1944, and 255 in the four weeks terminating October 28 last year. With the exception of a moderate gain in agriculture and a nominal increase in forestry and logging, all industrial groups recorded decreases in the daily average of placements from the period ending October 28, a year ago. The largest reductions were reported in manufacturing, construction, services and mining. Placements by industrial divisions numbered: manufacturing 2,100; services 1,327; trade 1,140; construction 694; public utilities operation 631; agriculture 188 and mining 187. There were 3,729 men and 2,466 women placed in regular employment.

New Brunswick

Orders listed at Employment Offices in New Brunswick during the period under review, called for a daily average of 337 workers compared with 320 in the previous four weeks and 334 during the period ending October 28, a year ago. The average number of placements effected daily was 175 during the five weeks ending November 2, in contrast with 181 in the preceding period and 155 during the four weeks ending October 28, 1943. Moderate gains in manufacturing, services and agriculture were the only changes of importance in placements over the period ending October 28, last year. Industrial divisions in which most of the placements were effected were: manufacturing 1,499; services 911; trade 835; forestry and logging 557; public utilities operation 549; construction 403; agriculture 145 and mining 143. Placements in regular employment numbered 3,123 of men and 1,871 of women.

Quebec

Opportunities for employment at Employment Offices in the Province of Quebec during the five weeks September 29 to November 2, 1944, numbered 2,809 daily in comparison with 3,186 in the previous period and 2,759 during the four weeks ending October 28, 1943. Placements showed a higher average during the period under review, being 1,846 daily in contrast with 1,751 in the preceding four weeks and 1,691 during the period terminating October 28, a year ago. The increase in the daily average of placements over the four weeks October 1 to October 28, last year, was mainly due to a substantial gain in forestry and logging, although trade was somewhat higher. This improvement was partly offset, however, by a fairly substantial reduction in manufacturing supplemented by moderate losses in construction and mining. Placements by industries included: manufacturing 20,876; forestry and logging 12,945; services 6,245; construction 4,507; trade 4,458; public utilities operation 2,905 and mining 817. Regular placements numbered 38,196 of men and 15,193 of women.

Ontario

There was a decrease in the average number of positions available daily at Employment Offices in Ontario during the period ending November 2, 1944, there being 3,703 in contrast with 4,142 in the previous four weeks and 4,112 during the period ending October 28 last year. Placements recorded a daily average of 2,515, in comparison with 2,536 in the preceding four weeks, but remained unchanged when compared with the period October 1 to October 28, 1943. A large gain in placements in forestry and logging augmented by advances of smaller proportions in services and trade accounted for the increase over the four weeks ending October 28, a year ago. This advancement was somewhat modified by an appreciable decrease in manufacturing and moderate losses in agriculture and mining. Placements by industrial groups included: manufacturing 33,707; services 12,292; trade 9,469; forestry and logging 6,183; public utilities operation 4,749; construction 4,260; finance and insurance 1,080, and mining 929. Placements in regular employment numbered 42,344 of men and 29,536 of women.

Manitoba

The demand for workers on a daily average as indicated by orders listed at Employment

Offices in Manitoba during the five weeks ending November 2, 1944, was 458 as compared with 473 in the preceding period and 382 during the four weeks October 1 to October 28, 1943. Placements decreased under both comparisons, the daily average being 274 during the period under review, in contrast with 286 in the previous four weeks and 342 during the period terminating October 28 last year. Except for a slight gain in construction, all industrial groups showed reductions in the daily average of placements when compared with the four weeks ending October 28, a year ago, the largest decrease being in manufacturing followed by smaller losses in services, public utilities operation and trade. Industrial divisions in which the majority of placements were effected were: manufacturing 2,476; services 2,074; trade 1,767; public utilities operation 849; construction 353 and mining 169. There were 3,247 men and 3,503 women placed in regular employment.

Saskatchewan

Employment opportunities, as indicated by orders received at Employment Offices in Saskatchewan during the period under review, showed a daily average of 296, in comparison with 252 in the previous four weeks and 266 during the period ending October 28, a year ago. The average number of placements registered daily was 179 during the five weeks ending November 2, in contrast with 161 in the preceding period and 193 during the four weeks terminating October 28, 1943. When comparing placements by industrial groups with the period ending October 28 last year, none of the changes was large. The most significant being moderate declines in agriculture, services, public utilities operation and manufacturing, and an increase in trade. Industries in which employment was found for over 100 workers included: services 1,567; trade 1,339; manufacturing 1,044; public utilities operation 450; agriculture 338; construction 229 and mining 104. Regular placements numbered 2,677 of men and 2,154 of women.

Alberta

Orders received at Employment Offices in Alberta during the five weeks ending November 2, 1944, called for an average of 461 workers daily in comparison with 484 in the preceding period and 620 during the four weeks ending October 28, 1943. There was a daily average of 307 placements in contrast with 293 in the previous four weeks and 383 during the period terminating October 28, last year. The reduction in the daily average of placements from the four weeks ending October 28, a year ago, was greatest in construction with losses much smaller in volume being shown in manufacturing, mining, trade, public utilities operation and services. A moderate gain in agriculture and a small increase in forestry and logging were the only advances reported. Industrial groups in which the largest number of placements were effected included: services 2,280; trade 1,647; manufacturing 1,565; agriculture 1,237; public utilities operation 809; construction 591 and mining 472. Placements in regular employment numbered 4,972 of men and 3,389 of women.

British Columbia

During the period ending November 2, 1944, the daily average of positions offered through Employment Offices in British Columbia was 997, compared with 1,037 during the four weeks ending September 28, and 936 in the period terminating October 28, 1943. Placements were fewer under both comparisons, the daily average being 687 during the five weeks under review, as compared with 734 in the preceding period and 692 during the four weeks ending October 28 last year. The gain in the daily average of placements over the period ending October 28, a year ago, although small, showed appreciable increases in forestry and logging, public utilities operation, trade and services, and were partly offset by a fairly large decline in manufacturing and moderate losses in construction and mining. Placements by industrial divisions included: manufacturing 5,917; services 4,238; trade 2,891; forestry and logging 2,381; public utilities operation 2,199; construction 1,707 and mining 274. There were 12,718 men and 6,404 women placed in regular employment.

Labour Law

Labour Legislation in Saskatchewan, Nova Scotia, New Brunswick, Prince Edward Island and Yukon Territory, in 1944

Saskatchewan

THE second session of the Saskatchewan Legislature to be held during the year opened on October 19 and closed on November 10, 1944. New laws were passed setting up Departments of Labour, Social Welfare, and Co-operatives and Co-operative Development, and providing for collective bargaining, annual holidays with pay and extension of health services. Laws dealing with old age pensions and mothers' allowances were amended.

Collective Bargaining

The Trade Union Act, 1944, which will come into force on Proclamation, repeals the Industrial Disputes Investigation Act and the Freedom of Trade Union Association Act. It also repeals The Labour Relations Act, which was passed at the first session of 1944 and which applied The Dominion Wartime Labour Relations Regulations (P.C. 1003, Feb. 17, 1944) to employer-employee relations which are ordinarily within the exclusive legislative jurisdiction of the Province (L.G. July, 1944, p. 912). The new Act, enables the Government of Saskatchewan to enter into an agreement with the Dominion Minister of Labour for the administration of the Dominion Regulations within the Province.

The Act applies to every employer having three or more employees and to every employer having less than three, if one of his employees is a member of a trade union which includes employees of one or more employers among its membership. "Employer" includes the Crown in the right of the Province but does not include an employer whose relations with his employees are within the exclusive legislative jurisdiction of the Parliament of Canada or one whose industry is defined by the Wartime Labour Relations Regulations (P.C. 1003) as essential to the prosecution of the war.

The Act declares the right of employees to organize, join and assist trade unions and to bargain collectively through representatives of their own choosing. "Trade union" means a labour organization which is not company-dominated.

Provision is made for a Labour Relations Board of seven members, appointed by the Lieutenant-Governor in Council and equally representative of employers and employees and, if the Lieutenant-Governor in Council considers it desirable, of the general public. The Board may make orders determining whether the unit of employees appropriate for collective bargaining is an employer unit, craft unit, plant unit or a subdivision of it, or some other unit, and what trade union, if any, represents a majority of employees in an appropriate unit. Orders of the Board may also require an employer to bargain collectively, to disestablish a company union, and to reinstate an employee discharged contrary to the Act and compensate him for his monetary loss, and may require any person to refrain from violation of the Act or from any unfair labour practice.

Where there is doubt as to which trade union represents the majority of the employees, the Board may direct a vote to be taken by secret ballot of all employees eligible to vote, and must do so on application of any trade union which 25 per cent or more of the employees in any appropriate unit have, within six months preceding the application, indicated as their choice as bargaining representative, either by membership in such union or by written authority. In any such vote a majority of the employees eligible to vote constitutes a quorum and if a majority of those eligible to vote actually vote, the majority of those voting determines the trade union which represents the majority of employees for bargaining. "Employee", as defined for purposes of the Act, excludes any person having authority to employ or discharge employees or regularly acting on behalf of the management in a confidential capacity, but includes any person who is on strike or locked out in a current labour dispute and who has not secured permanent employment elsewhere.

A certified copy of any order or decision of the Board must be filed within one week with the Registrar of The Court of King's Bench

and thereupon becomes enforceable as a judgment or order of the Court. The Board may, however, rescind or vary such order. Where any person fails to comply with such an Order, the Court may refer to the Board any question as to the compliance or non-compliance of such person. Application to enforce an Order of the Board may be made to the Court by, and in the name of, any trade union affected.

In addition to other penalties imposed, the Lieutenant-Governor in Council, upon application of the Board and upon being satisfied that any employer has wilfully disregarded or disobeyed an Order filed by the Board, may appoint a controller to take possession of the employer's business, plant and premises and operate it on behalf of the Crown until the Lieutenant-Governor in Council is satisfied that, upon the return of the business or premises to the employer, the Board's Order will be obeyed.

The Board has the powers of a Commissioner appointed under the Inquiries Act and may take any evidence it sees fit, under oath or otherwise, whether admissible as evidence in a court of law or not. The Board, with the approval of the Lieutenant-Governor in Council, may make regulations for carrying out the Act.

The Minister of Labour may establish a Board of Conciliation to investigate, conciliate and report upon any industrial dispute and may make regulations regarding the appointment of such boards, their procedure, remuneration, and the nomination of chairmen by the parties to the dispute or by himself. A trade union representing the majority of employees in any unit may enter into an agreement with an employer to refer a dispute or disputes or a class of disputes to the Labour Relations Board and the Board must hear and determine any dispute referred to it by either party under such agreement. The findings of the Board are final and conclusive and binding upon the parties and are enforceable as an Order of the Board.

The Act contains provisions relating to trade unions, which are similar to sections of the Ontario Rights of Labour Act, 1944. These provide that a trade union and its acts are not to be deemed unlawful by reason only that one or more of its objects are in restraint of trade; that an act done by two or more members of a trade union, if done in contemplation or furtherance of a trade dispute, shall not be actionable, unless such act would be actionable if done without any agreement or combination; and that a trade union may not be made a party to an action in any court nor a collective agreement be made the subject of such an action unless this can be done irrespective of the provisions of the Act.

On the written authority of any employee and on request of a trade union representing the majority of employees in any bargaining unit of his employees, an employer must deduct union dues from the wages of the employee until the latter has made written withdrawal of the authority. The employer must furnish the trade union with the names of employees who give or withdraw such authority.

Every collective agreement entered into between an employer and a trade union representing the majority of employees in an appropriate bargaining unit, after the Act comes into force, must contain, and every such agreement made before that date is to be deemed to contain, a provision that the agreement is to remain in force for one year and thereafter until either of the parties, or a trade union claiming to represent the employees in any appropriate unit, has given one month's notice to terminate or revise the agreement. Upon giving or receiving such notice the employer must bargain with the trade union representing the majority of employees in an appropriate bargaining unit, with a view to a renewal or revision of the agreement or the conclusion of a new agreement.

A maintenance of membership clause must also be included in a collective agreement made after the coming into force of the Act and be deemed to be included in an agreement made before that date, at the request of a trade union representing the majority of employees in any appropriate bargaining unit. The clause is to provide that, during the term of the agreement, as a condition of employment, the members of such trade union shall maintain their membership in the union and that all new employees shall apply for membership within 30 days of entering employment, and maintain it during the term of agreement. The Lieutenant-Governor in Council may, on such terms and for such period as he may prescribe, exclude from the operation of any maintenance of membership clause any or all persons who are or have been members of His Majesty's Forces or of the Allied Forces during the present war or who have served or are serving in any capacity with these Forces.

Failure to enter into a written agreement, including a maintenance of membership provision, if requested by a trade union representing the majority of the employees of a bargaining unit or to carry out the terms of the agreement, subject to any law or regulations passed by authority of the Parliament

of Canada, is an unfair labour practice. It is also an unfair labour practice for an employer or his agent:—(a) to interfere with or coerce an employee in the exercise of any right conferred by the Act; (b) to interfere with the formation or administration of any labour organization or contribute financial or other support to it; provided however that the employer may allow the bargaining unit representing the majority of his employees to confer with him for bargaining or union business without deductions from wages or loss of time, or permit use of his premises and notice boards for purposes of the union; (c) to fail or refuse to bargain with representatives (not necessarily being the employees of the employer) of a trade union representing the majority of the employees in an appropriate unit; (d) to refuse to negotiate during working hours with a representative of a trade union with which he has a collective agreement, with a view to settling disputes and grievances of employees covered by the agreement, or to make deductions from the wages of such union representatives for time spent in such negotiations; (e) to discriminate in regard to hiring or tenure of employment or any term or condition of employment or to use coercion or intimidation, in order to encourage or discourage membership or activity in or for a labour organization or participation in any proceeding under the Act; provided that nothing in the Act is to prevent an employer from making an agreement with a trade union requiring membership and maintenance of membership in such trade union as a condition of employment, or the selection of employees by the advice of the union, or any other condition with regard to employment, if such union has been selected by a majority of employees in any such unit as their bargaining representative; (f) to require as a condition of employment that any person shall abstain from joining or assisting a trade union or exercising any right provided by the Act; (g) to interfere in the selection of a trade union as representative of employees for bargaining; (h) to maintain a system of industrial espionage or to employ or direct any person to spy upon a member, or upon proceedings or offices, of a labour organization, or upon the exercise by any employee of any right under the Act; (i) to threaten to shut down or move a plant, or part of it, in the course of a labour dispute; (j) to declare or cause a lock-out or to make or threaten any change in wages, hours, conditions of employment, benefits or privileges while any application is pending before a board of conciliation appointed under the Act.

It is an unfair labour practice for an employee or any person acting on behalf of a labour organization: (a) to use coercion or intimidation to encourage or discourage membership in or activity in or for a labour organization; provided that nothing in the Act is to prevent a person who is acting on behalf of a trade union from attempting to persuade an employer to make an agreement with that union to require as a condition of employment membership, or maintenance of membership, in that union or the selection of employees on the advice of a trade union or any other condition of employment, if such union has been selected by a majority of employees in such unit as their bargaining agency; (b) to take part in, or persuade or attempt to persuade any employee to take part in, a strike, while an application is pending before the Board or any matter is pending before a board of conciliation appointed under the Act.

Any person who takes part in, aids, abets, counsels or procures any unfair labour practice is guilty of an offence and, in addition to any other penalty imposed by the Act, is liable, on summary conviction, for a first offence to a fine of $25-$200, if an individual, and $200-$5,000 if a corporation, and for a subsequent offence to such fine and to imprisonment for a term not exceeding one year. No prosecution may be instituted under this provision without the consent of the Board.

Holidays With Pay

The Annual Holidays Act which, except for one section, is to come into force on Proclamation, provides that all employees, except those employed at a farm, ranch, market garden or similar place or in undertakings where only members of the employer's family are employed, shall be entitled after each year of employment with any employer to an annual holiday of two weeks. The employee must be permitted to take his holiday in one period of two weeks or two periods of one week and to take the entire holiday within ten months of becoming entitled to it. The employee is to be paid for the holiday at the rate of one twenty-sixth of his total wage for the year immediately preceding the date on which he becomes entitled to the holiday. This payment is to be made not later than the day immediately preceding the commencement of the holiday or, if it is taken in two periods, one half of the amount is to be paid the day preceding the commencement of each period.

A section, which is to come into effect at the end of the war unless proclaimed in force at an earlier date, provides that if, on com-

plaint of the employer, it is proved to the satisfaction of a magistrate or justice of the peace that an employee has engaged in paid work during his holiday, the magistrate or justice shall order the employee to refund the amount paid him by his employer or authorize the employer to deduct it from the employee's wages.

If a special holiday falls within the period of the annual holiday, the latter is to be increased by one working day and the employee paid, in addition to payment for his annual holiday, the wages to which he is entitled for the special holiday.

If employment is terminated more than thirty days after its commencement, the employer must pay the employee, in addition to any other amounts due him, one-twenty-sixth of his total wage for his period of employment, unless the employee has had an annual holiday under any Act, custom or agreement or under his contract of service, in which case the additional payment is only to cover the period between the date on which he became entitled to his last annual holiday and the termination of his employment.

The Act is not to affect provisions as to paid holidays contained in any agreement or contract of service, if they are more favourable to employees, but it is to supersede any which are less favourable. Agreements to deprive employees of the benefits of the Act are void. An employer is forbidden to require an employee to return to him, or to accept, the whole or any part of the amount paid in respect of the annual holiday or to discharge or threaten to discharge an employee who gives evidence in any proceeding under the Act or gives information to the Minister of Labour or his representatives regarding any employee's holiday or payment made for it.

Employers having three or more employees to whom the Act applies must keep any prescribed abstract of the Act or regulations posted on their premises. An employer having one or more employees covered by the Act must keep a holiday book showing, in the case of each employee, the dates of commencement and termination of employment, date on which he becomes entitled to each annual holiday and dates on which it is taken, the employee's total wage, holiday wage and all deductions from the latter, the amount paid the employee in respect of each annual holiday, the amount paid upon termination of employment, and date of payment, and any other particulars that may be prescribed by the regulations. The holiday book may be incorporated with any other holiday or wages book required by any other Act of the Legislature. The Minister or any person authorized by him may inspect the book and require the employer to verify entries on oath and supply further information.

Money paid an employee in respect of his annual holiday is deemed to be salary or wages and subject to all statutory deductions which the employer is required to make.

For purposes of the Act the employment of any employee with the person by whom he is employed when this provision comes into force is to be deemed to have commenced on the latest of the following dates: (*a*) one year immediately preceding the date on which this provision comes into force; (*b*) the actual date of entering employment with that employer; or (*c*) the date on which the employee becomes entitled to any annual holiday under any Act, custom or agreement or under his contract of service.

A provision, which will cease to have effect at the end of the war or on an earlier date proclaimed by the Lieutenant-Governor in Council, enables an employee, by written agreement with his employer, filed with the Deputy Minister of Labour, to forego his annual holiday, in which case the employer must within ten months after the date when the employee became entitled to the holiday, pay him his holiday wage for the year preceding that date.

The Lieutenant-Governor in Council may make regulations for carrying out the Act. Penalties are provided for violation of the Act or regulations.

Department of Labour

The Statute was repealed which was enacted during the first session of 1944, setting up the Department of Reconstruction, Labour and Public Welfare and provision was made for three new Departments.

The Department of Labour Act provides for the establishment of a separate Department of Labour with power to collect and publish statistical information relating to labour conditions; to inquire into and report on labour legislation in force outside the Province and recommend any changes considered advisable in the labour law of Saskatchewan; and to consider and report upon any petition or recommendation for a change in Provincial labour laws which may be presented by any trade union, employers' organization, or other organization or person.

The Department may also provide facilities for finding employment and for making avail-

able throughout the Province information relating to opportunities for employment and availability of labour. The Department is to administer the laws relating to labour administered by the Department of Reconstruction, Labour and Social Welfare and, in addition, the Elevator and Hoist Act, the Female Employment Act, the Masters and Servants Act, the Steam Boilers Act, the Theatres and Cinematographs Act, the Trade Union Act, and the Annual Holidays Act.

Health and Welfare

The Department of Social Welfare Act provides for such a Department with duties relating to social welfare similar to those assigned to the Department of Reconstruction, Labour and Public Welfare (L.G. 1944, p. 912).

The Health Services Act authorizes the appointment of a Health Services Planning Commission, whose duties include determining the cost of, and means of financing, health services; outlining the boundaries of health regions and assessing their needs; planning a scheme of compulsory health insurance for one or more urban centres; and recommending medical graduates and registered nurses for post-graduate training.

The Public Health Act was amended to make provision for a scheme of full-time health services in any health region established under the Health Services Act.

Miscellaneous

Amendments in the Old Age and Blind Persons Pensions Act ratify a supplementary agreement with the Dominion Government under Order in Council, P.C. 3377, May 29, 1944.

An amendment in the Child Welfare Act enables the Minister of Social Welfare to register a notice of the granting of an allowance in the appropriate Land Titles Office, if the child or its parents have an interest in any land.

The Reconstruction and Rehabilitation Fund Act provides that the Lieutenant-Governor in Council may authorize the Provincial Treasurer to raise money by loan for such a fund, not exceeding in the aggregate $5,000,000.

The Department of Reconstruction Act provides for a separate Department of that title to deal with those matters relating to reconstruction which were assigned to the Department of Reconstruction, Labour and Public Welfare (L.G. July 1944, p. 912).

The Department of Co-operation and Co-operative Development Act provides for such a Department with power to encourage and assist co-operative enterprise, provide for inspection of the affairs of co-operative associations, collect and disseminate information and statistics relating to co-operative development, and establish a research service to investigate problems relating to co-operative organization and development.

Nova Scotia

During the session of the Nova Scotia Legislature, which began on March 1 and ended on April 6, 1944, statutes were enacted to authorize the application of the Dominion Wartime Labour Relations Regulations to employer-employee relations which are within the jurisdiction of the Province and to provide for regulating steam boilers and pressure plants and for workmen's compensation to blind workmen. Laws relating to apprenticeship, workmen's compensation, coal mines and old age pensions were amended.

Collective Bargaining

The Wartime Labour Relations (Nova Scotia) Act, which came into force on Proclamation June 21, 1944, provides that the Dominion Wartime Labour Relations Regulations (P.C. 1003, Feb. 17, 1944) and, if the Lieutenant-Governor in Council so orders, any amendment to such Regulations shall apply to employers and employees whose relations with one another are ordinarily within the exclusive legislative jurisdiction of the Province and to organizations of such employers and employees.

Apprenticeship

Amendments in the Apprenticeship Act provide for the appointment of a full time Director of Apprenticeship. Formerly the Deputy Minister of Labour was, ex officio, Director. Local apprenticeship committees of not more than five members are also to be appointed to advise the Provincial Apprenticeship Committee on questions arising in any designated trade or group of trades in a single industry or area. Members of these committees are to serve without remuneration but may be reimbursed for necessary expenses.

The Act is made applicable to female as well as to male apprentices and provision is made for amending the Schedule of designated trades. The section forbidding employment of a minor in a designated trade for more than three months, except under a contract of apprenticeship under the Act, was amended

to enable the Minister of Labour, on the recommendation of the Provincial Apprenticeship Committee, to make an exception in cases where the minor is confined to specialized or repetitive work. All contracts must provide for a period of not less than 2,000 hours of productive labour in the trade, instead of one year, as formerly.

The provisions were repealed which enabled the Lieutenant-Governor in Council to make regulations prescribing the rates at which bonuses might be paid to employers of apprentices and authorized the Minister to direct the payment of such bonuses. A new section empowers the Provincial Apprenticeship Committee, with the approval of the Minister, to assess and collect from employers and employees in each designated trade or group of trades such amounts as may be fixed by the Regulations to assist in defraying the cost of maintaining a system of apprenticeship and instruction in such trade or group.

Workmen's Compensation

The Blind Workmen's Compensation Act authorizes the Provincial Treasurer to pay to the Workmen's Compensation Board the full cost of compensation in excess of $50 payable in respect of an injury to any blind workman employed in an industry under Part I of the Workmen's Compensation Act, provided such employment was approved by the Canadian National Institute for the Blind or other organization designated for the purpose by the Lieutenant-Governor in Council. The Institute or organization has exclusive jurisdiction as to the nature of the work a blind workman may do and as to his proper placement. It also has right of access at all reasonable times to a blind workman's place of employment, provided the person in charge consents. Where an employer employs a blind workman or changes his employment without the Institute's approval, he is deemed to have waived his rights under the Act. The Board may fix the assessment to be levied on the employer of a blind workman at such amount as may be deemed fair, having regard to the provisions of the Workmen's Compensation Act.

The Workmen's Compensation Act was amended to provide that any person now receiving compensation at the rate of 55 per cent or 60 per cent of average earnings shall be entitled to compensation at the rate of 66⅔ per cent of such earnings from May 1, 1944. Minimum compensation in disability cases was raised from $8 per week or average earnings to $10 per week or average earnings, in respect of accidents happening after April 6, 1944. Procedure is laid down under which any person entitled to do so may lodge an objection to a claim for compensation filed with the Board. Such person may notify the Board in writing, within ten days of the date on which the claim has been reported to him, stating the nature of the objection and the reasons for it. A copy of the notice must be given or mailed to the workman. As formerly, the Board must hold an inquiry into the matter within forty-five days of the lodging of the objection.

The section providing for medical aid was revised, with a number of changes. The Board is authorized to provide such medical aid as it may consider necessary and the workman is entitled to artificial members and appliances and dental appliances and to have them replaced or repaired at the direction of the Board, and to spectacles and their renewal. Formerly, medical aid was given for 30 days only unless the Board extended this period on the ground that further treatment would benefit the workman and conserve the Accident Fund. Artificial members and apparatus were formerly kept in repair for one year and dental appliances were not provided although the services of a dentist were included. Application for payment of accounts for medical aid must now be made within three months after the aid has been rendered, instead of one year as heretofore. The clause dealing with care of the workman at the time of the accident was amended to make it clear that the employer must, at his own expense, obtain the necessary medical aid or convey the workman to a place where he can receive it.

Dermatitis venenata, due to employment in any industrial process involving the handling of irritants was added to the list of industrial diseases for which compensation is payable.

Coal Mines

Amendments in the Coal Mines Regulation Act provide for the issuing of certificates to mine surveyors. Applicants for such certificates must be at least 20 years of age, have completed a course in elementary surveying approved by the Minister of Mines and have had 12 months experience as assistant in surveying underground mine workings. Any person who at the coming into force of the amendment (April 6, 1944) has had three months normal employment at work requiring a mine surveyor's certificate is entitled to a certificate under the Act without further examination.

A new section requires that, once in each quarter, on a date specified in a notice posted for seven days previously in a conspicuous

place at the mine, the manager or underground manager shall be available to exhibit a plan of the mine to workmen wishing to examine it and shall point out the ventilation courses, travelling roads and alternative routes. "Plan" is defined as a plan made from the original signed notes of a surveyor holding a certificate under the Act. New and more stringent rules are laid down governing abandonment of mines.

The section granting exemption in certain cases from the provisions of the Act relating to stationary engineers was revised. Such provisions are not to apply to persons operating engines of 200 h.p. or less underground when the engine is furnished with power by compressed air, or when it is furnished with power by electricity and the operator holds an electrical machine operator's certificate under the Act.

Stationary Engineers

The Engine Operators Act, which came into force on July 1, 1944, applies to compressor plants, including machinery and equipment for compressing or storing air or other gas under pressure when the brake rating of the motive power exceeds 25 h.p. except when the motive power is steam, in which case machinery and equipment are to form part of a steam plant; hoisting plants exceeding 25 h.p. used for raising or lowering materials; internal combustion engine plants; portable traction and stationary steam plants; and steam boilers exceeding 2 h.p. where the pressure exceeds 15 pounds per square inch.

The Act does not apply to any plant or to any operator or fireman governed by the Mines Act or the Coal Mines Regulation Act or to railways or to vessels subject to Part VII of the Canada Shipping Act. Neither does it apply to workmen acting under the personal supervision of an engine operator who is in charge of a compressor plant, a portable tractor or stationary steam plant, or an internal combustion engine power plant or to workmen engaged in installing or testing such plant. These exceptions are not to permit the operation of hoisting plants by any person other than an engine operator.

The Act provides for the appointment of a Board of Examiners of not less than three nor more than five persons, to examine candidates for engine operators' and firemen's certificates. The Minister of Labour, with the approval of the Lieutenant-Governor in Council, may make Regulations prescribing qualifications of members of the Board; establishing different classifications of engine operators and firemen and defining the duties of each class; prescribing evidence of training, experience and character to be furnished by applicants for certificates; fixing fees; and generally, providing for the carrying out of the Act. An applicant for a certificate as engine operator or fireman must be a British subject and must also have passed the examination required by the Board or hold an equivalent certificate from another province in Canada, or, at the coming into force of the Act, have had, in the opinion of the Board, sufficient service and experience as engine operator or fireman.

Every owner of a plant to which the Act applies must send to the Minister information as to the horsepower of the plant and the pressure at which safety valves on boilers and tanks are set to relieve pressure. On receipt of such information and payment of the fee the Minister may issue a certificate of registration. Any change in the plant thereafter must be reported to the Minister within fifteen days. The certificate of registration and the operator's certificate must be displayed in the engine room. Provision is made for inspection of plant.

No person may perform or be employed or permitted to perform the duties of an engine operator or fireman unless he has the required certificate, but if the operator or fireman is absent from duty without having given seven days' notice, his duties may be performed by any person, under competent supervision, for not more than seven days.

Chauffeurs

An amendment in the Motor Carrier Act requires every motor carrier to notify the Registrar of Motor Vehicles within three days of his dismissal or suspension of any licensed operator or licensed chauffeur.

Employment of Non-residents

The Nova Scotia Labour Act, which is to remain in force until May 1, 1945, is a re-enactment of a statute first passed in 1933 and renewed annually. The Act forbids any person or corporation employing 25 or more workers to hire any person who has not been a resident of Nova Scotia for at least a year unless the person hired produces a certificate from the Government Employment Agent or Municipal Clerk in the place where he is to be employed stating that there are no unemployed persons resident in such place capable of doing and willing to do the work.

Old Age Pensions

An amendment in the Nova Scotia Old Age Pensions Act, which is retroactive to September 6, 1933, when the Act came into force, enables

the Lieutenant-Governor in Council to make and carry out agreements with the Governor General in Council for a scheme of old age pensions in the Province and for payments by the Dominion to the Province for the provision of pensions and to provide for payment of pensions under such agreement and in accordance with any Act of the Dominion or the Province or any Order in Council made under such Act. Formerly, agreements and payment of pensions were only authorized in accordance with the Dominion Old Age Pensions Act and Regulations. The Provision is repealed, which was enacted in 1943, enabling the Pension Authority to alter, suspend or discontinue any pension or supplemental allowance.

Miscellaneous

An Act of 1920, which enabled the Council of the City of Sydney to pass by-laws for the early closing of shops, was amended by the repeal of a section exempting from penalty any pharmaceutical chemist or druggist or any proprietor or employee of any shop who supplied medicines, drugs or medical appliances after the closing hour fixed by a by-law.

An amendment in the Halifax Charter authorizes the City Council, to provide for the establishment of a Committee, upon which the Council and employees are to be represented, to hear and consider all matters concerning the relationship between the city and its employees and to define the matters with which the Committee is to deal.

New Brunswick

The New Brunswick Legislature, which met on February 22 and was prorogued on April 6, enacted laws to make the Dominion Wartime Labour Relations Regulations applicable to employments within the jurisdiction of the Province, and to provide for a system of apprenticeship. The Mothers' Allowances Act was revised and amendments were made in the Industrial Standards Act and in statutes dealing with workmen's compensation and regulation of mines and factories.

Collective Bargaining

The Wartime Labour Relations Act, which came into force on Proclamation on May 1, 1944, provides that the Dominion Wartime Labour Relations Regulations (P.C. 1003, February 17, 1944) shall apply to employers and employees whose relations with one another are normally within the exclusive legislative jurisdiction of the Province and to organizations of such employers and employees. The Minister of Health and Labour, or other Minister designated for the purpose, may, with the approval of the Lieutenant-Governor in Council, make agreements with the Dominion Minister of Labour for the administration of the Dominion Regulations in the Province. The Lieutenant-Governor in Council may, by Proclamation, make any amendment to the Dominion Regulations applicable within the Province.

Apprenticeship

The Apprenticeship Act, which came into force on Proclamation on July 15, 1944, enables the Minister who is designated to carry out the Act, with the approval of the Lieutenant-Governor in Council, to make agreements with the Dominion Government, municipalities and other parties. The Act is generally similar to laws passed in Ontario in 1928, in British Columbia in 1935, in Nova Scotia in 1937 and in Alberta, Saskatchewan, Manitoba and Prince Edward Island during the present year.

The New Brunswick Act provides for the appointment of a Director of Apprenticeship who, under the Minister, is to have charge of carrying out the Act, supervising plans of apprenticeship training and inspecting all training conducted under the Act. Provision is also made for a Provincial Apprenticeship Committee consisting of an equal number of representatives of employers and employees together with one representative each of the Department of Labour and the Department of Education and an independent person as chairman.

The Act applies to skilled trades appropriate for contracts of apprenticeship and the Committee is to determine what trades are in this category. The Committee must also register apprentices and keep a record of contracts; decide the nature and duration of related technical courses to be given to apprentices; and determine all disputes arising out of an apprenticeship contract or plan. The Committee may certify apprenticeship contracts as binding upon the parties; approve assignments of contracts and plans of training; terminate any contract for cause; grant credits for experience in the trade, as a workman or a member of the Armed Forces, and for training in a vocational school or in the Forces; provide for periodic tests and final examinations and for the granting of improver's or journeyman's status; issue certificates; and appoint local advisory committees, equally representative of employers and employees, for any trade or group of trades.

An apprentice must be at least 16 years of age and he and the employer must satisfy the

Apprenticeship Committee that they are suitable persons to enter into an apprenticeship contract. A contract must provide for an agreed scale of wages, which must not be less than those fixed for apprentices in the trade by collective agreement or, failing an agreement, those established under the Labour and Industrial Relations Act; for increases in wages at fixed intervals; for a period of apprenticeship of at least 4000 hours, with time credits for previous experience in the trade and in the Armed Forces; for the maximum hours per day and days per week to be spent in employment and the number of hours to be spent in technical instruction; for a probationary period of at least three months; and for the transfer of the apprentice to another employer or the cancellation of the agreement for cause. No contract is binding unless certified by the Committee.

Either party may suspend a contract for gross misconduct on the part of the other party, with the consent of the Director or of a local Advisory Committee. In such cases the Director must make an immediate inquiry into the circumstances and report to the Apprenticeship Committee which must then, and within three weeks of the suspension, and after any further inquiry it may consider necessary, cancel the contract or make an order terminating the suspension and fixing the wages payable to the apprentice for the period of suspension. At any time before cancellation the parties may themselves terminate the suspension of the contract.

A plan for training apprentices agreed upon in writing by one or more employers and one or more trade unions may be put into effect if approved by the Committee. Such plan may provide for the form and requirements of the contract to be made, which must comply with the Act, and for the ratio of apprentices to journeymen permitted to each employer, the age and number of apprentices, and any other matters considered advisable.

The Lieutenant-Governor in Council, upon the joint written petition of one or more employers and one or more trade unions and if satisfied that a sufficient proportion of the employers and employees in the trade in the area desire it, may order a plan of apprenticeship training which has been approved by the Apprenticeship Committee to apply in respect of the entire trade designated, in the area or areas specified in the Order. Where any training plan has been so declared to apply, no person may be apprenticed in such trade in the area except in accordance with the plan.

The Director, on written complaint of any interested person or of his own motion, may investigate any alleged violation of a contract or plan of apprenticeship and report to the Committee. The Committee may make further inquiries before rendering its decision which is final and binding upon the parties. A decision that there has been a violation of a contract renders such contract voidable at the option of the aggrieved party.

The Lieutenant-Governor in Council may, upon recommendation of the Apprenticeship Committee, make regulations fixing compensation to be paid to an apprentice while pursuing a course of related technical training, and generally for the carrying out of the Act.

No apprentice may be required to do any work in a plant where work has stopped because of a labour dispute.

The Province is to provide such facilities for conducting the courses of related technical instruction as the Lieutenant-Governor in Council deems adequate and meet the cost of such courses.

For violation of the Act or regulations or of an Order of the Committee concerning suspension of a contract a fine of $100 may be imposed.

The Minors and Apprentices Act was repealed by a separate statute.

Fair Wages

Several amendments were made in Part 5 of the Labour and Industrial Relations Act, 1938, which provides for a Fair Wage Officer to investigate complaints and a Fair Wage Board to determine minimum rates of wages and maximum working hours. A new section authorizes the appointment of one or more Wage Investigators who are to have all the powers of the Fair Wage Officer in inquiring into wages, hours of labour and working conditions.

The Fair Wage Board is to have three members, instead of five, but, as formerly, employers and employees are to have equal representation, with a disinterested person as chairman. Other changes enable the Board to fix rates which employers may charge for board and lodging; provide that Orders of the Board may be general in their application or may establish different rates of wages for different classes of employees and may apply to the whole Province or to any part or parts of it; and require employers to keep accurate records which are to be open for inspection by the Fair Wage Officer or a Wage Investigator.

Workmen's Compensation

Amendments in the Workmen's Compensation Act increase the maximum amount of earnings on which compensation is based from $1,500 to $2,000 and raise the scale of compensation.

In cases of permanent total disability compensation equal to the average earnings of the workman is payable, with a maximum of 66⅔ per cent of $2,000 a year. For temporary total disability compensation is 66⅔ per cent of average earnings, with the same maximum as in permanent cases and a minimum of $8 per week or the amount of average earnings, if these are less than $8. Formerly, in all total incapacity cases compensation was 60 per cent of average earnings with a maximum of 60 per cent of $125 a month and a minimum of $8 per week, or average earnings if less.

Compensation for temporary partial incapacity has been raised from 60 per cent of diminution of average earnings, calculated on a basis of not more than $125 a month, to 66⅔ per cent calculated on a basis of not more than $2,000 a year.

The Board is now authorized to keep artificial members or apparatus in repair and to replace them when necessary.

Compensation to a widow is increased from $30 to $40 per month and total aggregate compensation to dependents from 60 per cent of $125 a month to 66⅔ per cent of $2,000 a year. An amount not exceeding $125 for extra burial expenses may be paid in cases where the body of the workman has to be transferred for a considerable distance.

Mines

The section of the Mining Act requiring a mine operator to appoint a man to inspect working levels and timbering, was amended to provide that more than one such inspector may be appointed. A new provision requires every place in a mine where men are at work to be inspected by a foreman or official of the company at least twice a week.

A change was made in the section forbidding any miner except those working with machines under the long wall system to work at the face, except when a foreman and the surface crew are on duty. This section now forbids any miner to work underground at the coal face except when a foreman is on duty and forbids any, except those working with machines under the long-wall or short-wall system or those engaged in drilling and blasting in preparation for mining or driving main levels, to work at the face unless the regular surface crew is on duty.

A new section requires suitable scales for weighing coal to be provided at the bank head of every mine brought into operation after the passing of the Act and employing forty men or more.

Department of Labour

An amendment in the Executive Council Act provides for the appointment of a Minister of Labour and also of a Minister of Health and Social Services. Formerly the Departments of Health and Labour were joined under one Minister. The amendment came into force, on Proclamation, on July 1, 1944, and a Minister of Labour was appointed on that date. Consequential amendments were made in a number of Statutes including the Factories Act, the Industrial Standards Act, and the Steam Boiler and Pressure Vessel Act.

Steam Boilers

The Act respecting Stationary Engineers, Steam Boilers and Pressure Vessels was amended to give it the short title of "Steam Boiler and Pressure Vessel Act" and to provide that the Board of Examiners appointed under it may have more than three members.

Mothers' Allowances

The Mothers' Allowances Act, 1944, is a revision, with amendments, of the Statute which was passed in 1930 but which was not put into force until 1943 and is now repealed. The new Act, which came into effect on Proclamation on May 1, 1944, provides for the payment of an allowance to any mother who has in her care one or more children under 16 years of age and who is a widow or the wife of a man who is totally and permanently disabled or is a patient in a sanitarium for the treatment of tuberculosis or has deserted her at least two years prior to her application for an allowance. An allowance may also be paid to a foster mother caring for one or more children if both parents are dead or disabled.

Application for an allowance is to be made to the Director who administers the Act and who must be satisfied that the applicant is a suitable person to have charge of the child; that there is not sufficient means available for its support; that the child is a resident of the Province and has been so for three years, or since birth; that the child is a British subject, or that its mother is a British subject or, if dead, was a British subject at the time of her death or before her marriage; and that the applicant is not an Indian to whom the Indian Act applies.

The maximum allowance is $60 a month, the actual scale of allowances being fixed by Regulations which the Lieutenant-Governor in Council is authorized to make. Such Regulations may also deal with other matters, including property and income qualifications of applicants.

If a child reaches the age of 16 during the school year the Director may continue the allowance until the end of such year. No

allowance is payable in respect of a child who is not attending school as required by the School Attendance Act.

Old Age Pensions

An amendment in the Old Age Pensions Act, which is, retroactive to the commencement of the Principal Act, enables the Lieutenant-Governor in Council to make supplementary agreements with the Governor General of Canada in Council.

Time to Vote

In the revision of the New Brunswick Elections Act a section was added requiring every employer to allow each elector in his employ one hour, in addition to the noon hour, for voting without making any deduction from his pay or exacting any other penalty.

Housing and Public Works

An amendment in the New Brunswick Housing Commission Act enables the Housing Commission of the City of St. John to borrow money for the purposes of the Act up to $10 per capita of the population, instead of $5, as formerly.

The St. John Housing Development Act authorizes the City Council to expropriate lands and premises for housing development and slum clearance.

An Act to authorize Municipalities to establish Reserve Funds empowers the Council of any municipality to provide by resolution for a reserve fund for construction and improvement of public works.

Prince Edward Island

In Prince Edward Island the legislative session began on February 15th and ended on March 17, 1944.

Apprenticeship

The Apprenticeship Act, which will come into effect on Proclamation, is generally similar to statutes enacted in recent years in other provinces, as noted above in the summary of the New Brunswick Apprenticeship Act.

The Prince Edward Island Act provides for the appointment of a Director of Apprenticeship whose duty it is to promote interest in apprenticeship, assist in establishing a permanent system of apprentice training and supervise it and collaborate with educational authorities in training apprentices. Provision is also made for the appointment of a Provincial Apprenticeship Committee of five members.

The Act applies to the building trades, set out in the Schedule, namely, bricklayer, mason, carpenter, painter and decorator, plasterer, plumber and electrician. The Lieutenant-Governor in Council, on recommendation of the Minister, may add trades to the Schedule or withdraw them from it. The Minister may also recommend the designation of a trade on petition of a representative number of employers or members of a trade union or on receipt of a written agreement between a representative association of employers and a representative group of a union of employees in that trade.

No person may enter into a contract of apprenticeship in a designated trade except in accordance with the Act and no employer may, without the consent of the Apprenticeship Committee, employ a minor in a designated trade for more than three months except under contract of apprenticeship, unless such minor has already completed the customary apprenticeship or is confined to specialized or repetitive work. In the latter case the Minister, on recommendation of the Committee may grant exemption for the period that the minor is engaged on such work.

Contracts of apprenticeship must be in prescribed form and be signed by the employer and the person to be apprenticed and if the latter is a minor by his parent, or guardian. The minimum age for entering into apprenticeship is 16 years. No contract is valid until registered by the Director, but such registration is not a guarantee that all provisions of the contract are valid. An apprentice may be transferred or a contract terminated by consent of all parties if such action is recommended by the Committee and registered by the Director. The Committee may cancel a contract for cause. Contracts of apprenticeship in a designated trade existing before the coming into force of the Act must be registered within three months but are to remain unaffected by the Act in other respects. Where there is no formal contract, the Act is to apply after three months from its coming into force. No contract may be entered into for less than one year or for less than 2,000 hours of productive labour in the trade.

The Lieutenant-Governor in Council may make regulations governing qualifications, courses of training, hours of labour and rates of wages, examinations, certificates and fees, registration of employees in a designated trade,

number of apprentices to be employed by any employer in such a trade, rates of bonuses to be paid to employees, and, generally, for carrying out the Act. A penalty not exceeding $10 a day may be imposed for contravention of the Act or Regulations.

Old Age Pensions

An amendment in the Prince Edward Island Old Age Pensions Act provides that the Board of Pension Commissioners may alternatively be referred to as the Old Age Pension Commission.

Yukon Territory

A section added to the Workmen's Compensation Ordinance provides that compensation for the loss of a tooth shall be the actual cost of replacing it by an artificial tooth or denture, the dental services required being determined by a qualified dental practitioner and approved by a qualified medical practitioner provided and paid by the employer.

The Motion Picture Ordinance forbids any person to operate a moving picture machine where motion picture entertainment is offered for gain unless he holds an operator's licence issued by one of the Canadian Provinces and a permit from the Treasurer of the Yukon Territory. Operators must be 18 years of age and must devote their entire time to their machines while operating them and examine them daily. Safety rules are laid down governing construction and equipment of projection rooms and operation of machines.

Recent Regulations under Dominion and Provincial Legislation

AN Order has been made providing for compensation to civilian Government employees injured as a result of war or war circumstances. The rate of out-of-work benefit for discharged members of the Women's Services must not exceed the rate of pay of the person at the time of her discharge. Money granted to discharged persons for vocational and technical training, undergraduate and post-graduate university education, must not be liable to Income taxation.

In the Provincial field, Alberta has extended exemption from the Hours of Work Act to certain occupations in rural districts. British Columbia has made the annual Orders to employees engaged in the mercantile industry, extending the provisions of the Hours of Work Act for a specified period, and governing payment for overtime during the Christmas season. Orders under the Quebec Minimum Wage Act have been renewed governing stationary enginemen and firemen; shoe counter manufactures; ice industry and trading; tailors and dressmakers; the mattress and upholstering industry; taverns; taxicabs and automobiles, foundries and forest operations, in specified areas. Saskatchewan has made new Orders under the Minimum Wage Act, and has revised regulations governing beauty culture, and hairdressing and barbering trade schools. New regulations have been made under the Saskatchewan Trade Schools Regulation Act.

Dominion

The Civilian Government Employees (War) Compensation Order, made November 22, 1944 and gazetted November 27, provides for compensation to employees injured as a result of war or war circumstances. It stipulates that the Order will be administered by the Canadian Pension Commission, and the provisions of the Pension Act not inconsistent with these provisions, must apply to every claim for pension made under this Order, regarding the employee as a member of the Forces at the time of the accident.

A salaried employee who sustains a war injury or a war flight injury, is to be granted leave with pay, for a certified period, providing this period does not exceed 180 days.

Employees with a salary range of $3,000 or less will receive a pension corresponding to that of a Lieutenant; $3,001 to $3,750, to that of a Captain; $3,751 to $5,000 to that of a Major; $5,001 to $6,500 to that of a Lieutenant-Colonel; $6,501 to $8,000, to that of a Colonel; and $8,001 or over, to that of a Brigadier. The rates of pension are set out in schedules A and B of the Pension Act.

In the case of an employee serving without remuneration, or that of a part time employee, rating will be according to the salary paid to a permanent full time employee for performing similar duties. This rating must be made, in the first instance, by the Deputy Minister of the Department concerned who must

certify the rating, in writing, to the Commission before the employee becomes exposed to the risk of war injury or war flight injury. If the Commission makes any adverse change in this rating, the applicant for pension may appeal to the Treasury Board whose decision is final.

A salaried employee who qualifies for a pension is not entitled to receive it until the date following the completion of the initial period of treatment, or 180 days after the occurrence of the injury, whichever is the earlier date.

Benefits under this Order are in addition to any which may be received by the employee or his/her dependents under the provisions of the Civil Service Act or the Civil Service Superannuation Act, but the former benefits are subject to deduction of any other compensation received because of war or war flight injury from any source to which the employee has made no direct contribution.

Officers of the Department of Veterans' Affairs may examine, give treatment to, and admit to hospital any employee suffering from a war injury, unless the Commission decides that the disability is not attributable to a war injury, in which case the treatment, at the expense of the Department, will be discontinued after seven days after notification of the decision of the Commission. The Department may examine, re-examine, give treatment to, admit to hospital, and re-admit to hospital any employee who is in need of such services, in the opinion of the Department, in respect of an injury previously determined to be attributable to a war injury or a war fight injury.

The Commission may make regulations for the purpose of putting this Order into effect by making provisions for prescribing the person and manner of making application, the records, documents or other information needed by the Commission in connection with any application.

Pensions under P.C. 196/4417 of June 18, 1941, or P.C. 311/6181 of August 4, 1943 may be increased in accordance with this Order, effective November 22, 1944. All payments arising under this Order must be taken from the funds provided from the War Appropriation.

National Selective Service Regulations

Order in Council P.C. 8999, made November 29, 1944, amends P.C. 7994 (L.G. 1942, p. 1058) made September 4, 1942, governing the administration of the National Selective Service Regulations, 1942.

The new Order adds a further clause to section one, which now stipulates that the control and supervision of the officers, clerks and employees of the Unemployment Insurance Commission in addition to the several premises occupied by the Commission are now placed at the disposal of the Minister of Labour for a period ending on a date to be fixed by proclamation, to the effect that the war no longer exists, or on any earlier date fixed by Order in Council. The Minister may utilize both personnel and premises for the administration of the National Selective Service Regulations, 1942, and necessary measures undertaken by the Department of Labour for re-establishment in employment of war veterans and civilian war workers, and will administer in co-operation with the Unemployment Insurance Commissioners, The Unemployment Insurance Commission Act, 1940, in addition to the administration of the National Selective Service Regulations, 1942. The rights, duties, functions and powers of the Unemployment Insurance Commission are therefore extended to the Minister of Labour for this period.

The same clause is added to section five, which now states that the officers, clerks and employees of the Unemployment Insurance Commission, under the control and supervision of the Minister of Labour, will perform any other duties required of them in connection with the administration and enforcement of the National Selective Service Regulations, 1942, and amendments, in addition to duties required of them under the Unemployment Insurance Act, and necessary measures undertaken by the Department of Labour for re-establishment in employment of war veterans and civilian war workers.

Post-Discharge Re-Establishment Order Amended

Order in Council P.C. 108/8367 made October 31, 1944 and gazetted November 6 amends The Post-Discharge Re-Establishment Order (P.C. 5210) (L.G. 1944, p. 935).

Subsection (6) of paragraph 5 is rescinded which stipulated that when a person is discharged from the Canadian Women's Army Corps, the Royal Canadian Air Force (Women's Division), or the Women's Royal Canadian Naval Service, the rate of out-of-work benefit must not exceed the rate of pay of the discharged person at the date of their discharge.

Subsection (7) of paragraph 5 relating to the out-of-work benefit to married women is renumbered as subsection (6).

P.C. 128/8367 made and gazetted on the same dates stipulates that money granted to a discharged person under the sections of The Post-Discharge Re-Establishment Order governing benefits for vocational and technical training, undergraduate and post-graduate university education, must not be liable to taxation under the Income War Tax Act.

Other Orders

The following Orders in Council are summarized in the *Manpower* Section of the LABOUR GAZETTE: P. C. 8726 concerning lay-off procedure under National Selective Service Regulations, and P.C. 9148 regarding pay of members of the Military Forces detailed for duty in civilian employment.

Provincial

Alberta Female Minimum Wage Act

An Order in Council, made October 17, 1944, and gazetted October 31, rescinds Order 11 of the Board of Industrial Relations fixing the maximum price which an employer may charge for meals and lodging.

Alberta Hours of Work Act

Order 28A, made November 3, 1944, and gazetted November 15 extends to October 31, 1945, the exemption of cooks, cookees, bull cooks, night watchmen, barn bosses, and blacksmiths engaged in the lumbering, logging and railway tie industries, from the provisions of the Hours of Work Act requiring a weekly rest day and limiting hours to 9 a day and 54 a week. As formerly the exemption applies only to operations in rural districts more than 10 miles from any city or in towns or villages of less than 1,000 inhabitants.

British Columbia Female Minimum Wage Act

The annual supplementary Orders governing payment for overtime during the Christmas season were gazetted November 23.

Order No. 24 Supplementary (1944) made by the Board of Industrial Relations November 17, 1944, and gazetted November 23, stipulates that persons employed overtime in the mercantile industry under the Hours of Work Order given below must receive one and one half times the regular rate of pay for all time worked in excess of eight hours per day on December 22, or in excess of 48 hours during the week ending December 23, 1944.

Temporary employees of any age in the mercantile industry working less than 40 hours per week between November 27 and December 31, 1944 (both dates inclusive), must receive not less than 35 cents per hour.

The provisions of Order No. 24 guaranteeing a daily minimum wage for part-time workers are waived for the stated period.

By order No. 59 Supplementary (1944) the same provision is made for male employees in the mercantile industry under the British Columbia Male Minimum Wage Act.

British Columbia Hours of Work Act

The amended temporary order permitting shop employees to work overtime during the pre-Christmas period was made by the Board of Industrial Relations November 17, 1944, and gazetted November 23. The Order provides that persons employed in retail establishments in the mercantile industry in British Columbia may be permitted to work in excess of the daily eight hour limit prescribed under the Act.

Employees in retail establishments in the mercantile industry in Vancouver, together with the area known as Point Grey, the District of Burnaby, the District of West Vancouver, North Vancouver, the District of North Vancouver, Victoria, Esquimalt, the District of Oak Bay, and the District of Saanich, may work two hours in excess of the eight hour limit per day, on Friday, December 22, and Saturday, December 23, 1944.

Employees in mercantile retail establishments in areas other than the above may work two hours in excess of the eight hour limit on Friday, December 22, and three hours in excess on Saturday, December 23, 1944.

Quebec Minimum Wage Act

Renewals: The following Orders under the Quebec Minimum Wage Act have been renewed until January 1, 1946, by Orders gazetted November 25: Order No. 6 governing stationary enginemen and firemen in the district of Montreal; Order No. 7 relating to shoe counter manufactures; Order No. 34 pertaining to the ice industry and trading in the city and district of Quebec; Order No. 31 governing tailors and dressmakers in the city of Quebec; Order No. 32 regarding the mattress and upholstering industry in Quebec City, Levis and Quebec-West; Order No. 23 relating to taverns in the district of Montreal; Order No. 26-A governing taxicabs and automobiles for hire in the city and district of Montreal; Order No. 36 pertaining to foundries in the city of Hull, and Order No. 39, relating to forest operations.

Saskatchewan Minimum Wage Act

New Orders from 1 to 6 inclusive under the Act were made November 16, 1944, and gazetted November 17. The Orders supersede all previous Orders 1-6 inclusive, and are to come into effect December 4, 1944. *Order No. 1* governs all classes of employees in Saskatchewan cities and within a radius of five miles, with the exception of agricultural workers, domestic servants, Government employees, employees in establishments operating games of skill, and in hotels, restaurants, refreshment rooms, boarding and rooming houses.

The normal working week must not exceed 48 hours. During a week in which a civic or statutory holiday occurs, the working hours must be reduced from 48 by the number of working hours the establishment is closed for business. Work is considered part time work where the working hours are reduced by six or more from the normal working week, or from such week as reduced by one or more civic or statutory holidays. Overtime is time worked in excess of 48 hours or the normal working week or such week as reduced by holidays, as above, subject to the hours provisions of the Factories Act.

Experienced employees must receive a minimum of $16.80 per week, except when engaged solely in the delivery of merchandise or messages. Inexperienced employees must receive not less than $11 per week for the first three months, $14 per week for the next three months, and $16.80 thereafter. Employees engaged solely in delivering merchandise or messages, on foot or on bicycle, must receive a minimum of $7.50 per week for the first three months, and $10 per week thereafter. When an employee furnishes a bicycle, the wage must be increased by 50 cents per week. Qualified operators of vehicles must receive not less than $16.80 per week.

Part time employees must receive not less than 35 cents per hour and for a period of at least three consecutive hours on any day they are required to report for work. Part time employees engaged solely in delivering merchandise or messages on foot or on bicycle must be paid not less than 25 cents per hour. Unless the employer obtains a written permit from the Minimum Wage Board, the number of part-time employees must not exceed 25 per cent of the total number of full-time employees, except in the case where four or less full-time employees are employed when one part-time employee may be engaged.

Overtime must be paid for at the rate of 35 cents per hour, or a pro rata rate of the regular wage, whichever is the greater.

No more than 25 per cent of the total number of employees must be inexperienced, except when the total is less than three, unless a permit is first obtained from the Board. This does not apply to apprentices approved by the Board. In the case of indentured apprentices the wages stipulated in the indenture may supersede the above rates, provided that a copy of the indenture is first filed with and approved by the Board.

All Orders of the Minimum Wage Board must be posted prominently.

Order No. 2 governs the hotel and restaurant industry, and includes boarding and rooming houses where there are more than five beds set apart for roomers, any place where meals are supplied daily to more than five persons for remuneration, and refreshment rooms, in the Saskatchewan cities and within a radius of five miles.

The normal working week must be a maximum of 48 hours. When a statutory or civic holiday occurs the work week must be reduced by 8 hours. Part time is where the working hours are less than 40 in any week. Overtime is time worked in excess of 48 hours. Experienced employees must be paid not less than $16.80 per week and inexperienced employees not less than $11 per week for the first three months, $14 per week for the next three months, and $16.80 per week thereafter.

Where a uniform is required, and is not supplied by the employer, the weekly rate must be increased by 50 cents.

Part-time employees must be paid at a rate of not less than 35 cents per hour and for 3 consecutive hours on any day they are required to report for work. The number of part-time employees must not exceed 25 per cent of the total number of full-time employees except where there are three or less full-time employees, in which case one part-time employee may be engaged. Overtime must be paid for at the rate of 35 cents an hour or a pro rata rate of the regular wage, whichever is the greater. Inexperienced employees must not exceed 25 per cent of the total number of employees, except where the latter number is less than three, in which case one inexperienced employee may be engaged.

Where meals or lodging are furnished by the employer and accepted by the employee as part payment of wages, deductions of 20 cents for each meal, and 25 cents for each night's lodging may be made.

Order No. 3 governs all classes of employment where a bowling alley or billiard hall, skating rink, curling rink, dance hall, theatre or shooting gallery or other games of skill are carried on in Saskatchewan cities and within a five-mile radius.

A maximum of 48 hours of work per week constitutes a full working week. Part time is where the normal working week is reduced by six or more hours. Overtime is time worked in excess of 48 hours per week.

Employees must receive not less than $16.80 per week, while part-time employees must receive not less than 35 cents per hour and for a period of at least three hours on any day they are required to report for work except in the case of men and/or boys who are granted admission to skating rinks for the purpose of sweeping the ice. Overtime must be paid for at not less than 35 cents per hour or a pro rata rate of the regular rate of pay, whichever is the greater.

Order No. 4 governs all classes of employment in, and within a five-mile radius of the towns of Assiniboia, Biggar, Canora, Estevan, Gravelbourg, Humboldt, Kamsack, Lloydminster, Indian Head, Maple Creek, Melfort, Melville, Moosomin, Nipawin, Rosetown, Rosthern, Shaunavon, Tisdale, Watrous, Wilkie and Wynyard, with the following exceptions: agriculture employees, domestic servants, government employees, persons engaged in establishments in which games of skill are carried on, employees engaged in hotels, restaurants, boarding and rooming houses and refreshment rooms.

The normal work-week consists of 48 hours, while part time is where the hours are reduced by six or more from the normal working week. Overtime is time worked in excess of 48 hours a week or of the usual number of hours worked during a normal work-week.

Experienced employees must receive not less than $14 per week, except where they are engaged solely in the delivery of merchandise or messages, on foot or on bicycle, or as operators of horse-drawn vehicles.

Inexperienced employees must be paid not less than $9 per week during the first three months, $12 per week for the second three months, and $14 per week thereafter.

Employees engaged solely in delivering merchandise or messages, on foot or on bicycle, must be paid at a rate of wages not less than $7 per week. Where a bicycle is supplied by the employee this rate must be increased by 50 cents per week. Qualified operators of motor or horse-drawn vehicles must be paid not less than $16.80 per week.

Part-time employees must receive not less than 35 cents per hour and for a period of not less than three consecutive hours on any day on which they are required to report for work. Part-time employees who are engaged solely in delivering merchandise or messages must receive not less than 25 cents per hour. Overtime must be paid for at a rate of not less than 35 cents per hour or a pro rata rate of the normal wage, whichever is the greater.

Inexperienced employees must not exceed more than 25 per cent of the total number of employees, except when this number is less than three, in which case one inexperienced employee may be engaged, unless the employer first receives written permission from the Board. This section does not apply to apprentices approved by the Board.

In the case of an indenture of apprenticeship, the wages stipulated in the indenture may supersede the rates set out in this Order, provided that a copy of the indenture is first filed with and approved by the Minimum Wage Board.

Order No. 5 governs the hotel and restaurant industry, including boarding and rooming houses in which there are five or more beds for the use of lodgers, any place where meals are supplied daily for a consideration to more than five persons, and refreshment rooms in the following towns: Assiniboia, Biggar, Canora, Estevan, Gravelbourg, Humboldt; Kamsak, Lloydminster, Indian Head, Maple Creek, Melfort, Melville, Moosomin, Nipawin, Rosetown, Rosthern, Shaunavon, Tisdale, Watrous, Wilkie, Wynyard, and within a five-mile radius.

A normal working week must not exceed 48 hours. Where a statutory holiday occurs in any week, the working hours must be reduced, during that week, by eight. Part-time is where the working hours do not exceed 40 in any one week. Overtime is time worked in excess of the normal working week.

Experienced employees must receive not less than $14 per week. Inexperienced employees must be paid at a rate not less than $9 per week for the first three months, $12 per week for the second three months, and $14 per week thereafter.

Where a uniform is required and is not supplied by the employer, the weekly wage must be increased by 50 cents. Part-time employees must receive not less than 35 cents per hour and must be paid for at least three consecutive hours for any day they are required to report for work. Employees working in excess of the normal working week must be paid not less than 35 cents per hour, or a pro rata rate of the regular wage whichever is the greater. Inexperienced employees must not exceed 25 per cent of the total number of employees except where the latter number is less than four, when one inexperienced employee may be engaged.

Where meals or lodging are accepted by the employee as part payment of wages, deductions must not exceed 20 cents for each meal, and 25 cents for each night's lodging.

Order No. 6 governs all classes of employment in places where a bowling alley or billiard hall, skating rink, curling rink, dance hall, theatre, shooting gallery or other establishment operating games of skill is carried on in the following towns: Assiniboia, Biggar, Canora, Estevan, Gravelbourg, Humboldt; Kamsack, Lloydminster, Indian Head, Maple Creek, Melfort, Melville, Moosomin, Nipawin, Rosetown, Rosthern, Shaunavon, Tisdale, Watrous, Wilkie, Wynyard, and within a five-mile radius.

The normal work-week must not exceed 48 hours. Part time is where the working hours are reduced by six or more from the normal working week. Overtime is time worked in excess of the regular working week.

Employees must be paid not less than $14 per week. Part time employees must be paid at a rate of not less than 35 cents per hour and for a period of at least three consecutive hours on any day on which they are required to report for work, except in the case of men and/or boys who are granted admission to skating rinks for the purpose of sweeping the ice.

Employees working in excess of the normal working week must be paid at a rate of not less than 35 cents per hour, or a pro rata rate of their regular rate of pay, whichever rate is the greater.

Saskatchewan Regulations for Beauty Culture, Hairdressing and Barbering Trade Schools

A revision of these Regulations with minor changes was gazetted November 30, 1944, and came into effect December 4.

"Deputy Minister" is substituted throughout for "Commissioner". The maximum amount which may be charged to or received from the public for each service rendered by trade schools, irrespective of materials and ingredients used, is $2.75 for cold waving, complete; 10 cents for a manicure, complete; 10 cents for marcelling, complete; 10 cents for a rinse, complete; and 5 cents for a singe, complete. Notices setting forth the amounts which may be charged the public must be conspicuously displayed within the workroom, and must be headed, in bold type "MAXIMUM CHARGES".

The regulations governing barber shops issued by the Department of Public Health must be adhered to, as formerly.

The subsection is omitted which stipulated that each student upon completing a course of instruction must take an examination from examiners appointed by the Commissioner, and upon passing this examination, must receive a certificate, paying a fee of $3 for each examination, and $2 for re-examination.

Saskatchewan Trade Schools Regulation Act

New Regulations were made under the Trade Schools Regulation Act, November 24, 1944, and gazetted November 30, rescinding the previous Regulations, O.C. 54/44. The new Regulations came into effect December 4, 1944.

Application for registration of a trade school must be forwarded to the Deputy Minister of Labour with a certified cheque payable to the Provincial Treasurer of Saskatchewan for the required fee, a copy of the contract for taking a course of instruction, a statement of courses of instruction offered by the trade school and the fee for each, the texts, books and other supplies required by each student and the charge of each, a copy of every catalogue, sales circular and advertisement used in connection with the trade school, a copy of any certificate used by the school, and certificates of the local Health Officer and Fire Chief regarding the construction, sanitation and condition of all buildings, equipment, tools and machinery. Every registration under this Act expires December 31 in the year of its registration. No changes in the course of instruction, fees, and supply requirements after a trade school is registered, may be made without the consent of the Deputy Minister.

Application for renewal of registration must be forwarded to the Deputy Minister together with the renewal fee, and a statement indicating any changes in courses, fees and supplies required. The fee for registration or renewal for one course is $25, $10 for each additional course, and a maximum of $200 for more than 18 courses.

Every operator of a trade school and every person who advertises or offers a correspondence or home study course must deposit security of $1,000 with the Deputy Minister.

When a person who has contracted to take a course at a trade school gives written notice to the operator of the school that he wishes to discontinue instruction, the operator must refund money for weeks of instruction not taken, except for 10 per cent of the total purchase price of the course, when the fee for the course is a fixed amount for the complete course divided into lessons. When the fee covers a course which is divided into weeks of study, the operator must refund the money for those lessons not taken, except the payment for an additional five weeks of instruction. When the fee for the course is divided on the basis of months of instruction, the operator must refund payment for those months of instruction not taken, except for the fee for one additional month. When students do not pay for their course in advance, the

same provisions apply. Correspondence lessons must not exceed 10 per cent of the total number of lessons or one month's tuition, whichever is less, in one consignment. The next consignment must not be sent to the student until the previous consignment has been completed, or a period of one month has expired. Where any dispute arises regarding this regulation, the Deputy Minister's decision is final.

In each trade school, the teachers' qualifications; standards of shop, laboratory and classroom instruction; student admission requirements; length of courses; conditions and construction of all buildings; use of proper safety devices to render machinery safe for school purposes; and the suitability of the premises and equipment for teaching courses, must all be subject to the approval of the Deputy Minister. Any appointment or change in the teaching staff, or the premises, must be submitted in writing to the Deputy Minister.

The minimum age for admission to any course is 16, unless the Deputy Minister is satisfied that the provisions of the School Attendance Act have been complied with.

No person must offer any course of instruction for sale unless he is a salesman certified by the Deputy Minister, and the trade school concerned is registered under the Act. Certificates to salesmen of courses expire each December 31, but may be terminated or suspended at any time by the "Minister", who is the member of the Executive Council charged with administering the Act.

No operator of a trade school may guarantee a position to any student.

The Deputy Minister must approve any advertisement relating to the trade school, and such an advertisement must not appear in the "Help Wanted" columns of any publication. Advertisements must clearly state the name of the trade school concerned, no misleading implications must be contained, and there must be no reference to prices charged to the public for work performed by students in the school. No reference must be made to the approval by the Deputy Minister, except by stating: "Registered under The Trade Schools Regulation Act, Saskatchewan".

The certificate of registration of a trade school must be conspicuously displayed under glass at the entrance to the school. Every trade school operator must submit a statistical report to the Deputy Minister as required.

Paris Branch of I.L.O. Functioned Four Years in Secret

IT was announced recently by Mr. Edward J. Phelan, Acting Director of the International Labour Office that the I.L.O's Paris branch office had resumed open operations in its former premises on the Boulevard St. Germain after four years of work in secrecy during the Nazi occupation.

Mr. Phelan said that he had received from Miss Rommel, who has been secretary of the Paris Branch for several years, the first report she had been able to make to him directly since the Germans took possession of the city some four years ago. The report disclosed that large quantities of I.L.O. publications were distributed by the branch during the German occupation. "These reports were eagerly sought after," Mr. Phelan said, "for the material they contained on what was happening in the outside world". They were obtained from the Geneva office of the I.L.O. with which Miss Rommel was able to maintain intermittent contact.

Among those who were reported as obtaining such publications regularly were the General Confederation of Labour and the National Council of Resistance officials of the Ministry of Labour in Paris and the editors of the underground press.

As the Paris offices of the I.L.O. were seized by the Nazis soon after their occupation of the city, the work of distributing reports was carried on by Miss Rommel from two small rooms in her own home, which soon became a centre of intense but secret activity. Requests for information and documentation of all kinds were received in steadily increasing numbers and demands grew for the I.L.O's publications, especially the French edition of the monthly International Review. The latter, according to Miss Rommel's report, "was not only a source of documentation unique in the Occupied Zone because of its objectivity; but also as a source of strength and hope." When Paris was liberated on August 25, 1944, Miss Rommel's secret office had been functioning for almost four years without molestation by the Nazis.

Since the Paris Branch has been re-established in its pre-war offices, Miss Rommel's report indicates that it is busier than ever. I.L.O. publications, as well as material with joint labour-management production committees and with recent social legislation of other countries is most frequently requested, she said.

Prices and Price Control

Activities of the Wartime Prices and Trade Board July-September, 1944

Civilian Supplies and Price Problems during the Quarter—Control of Prices and Supplies in the Transition Period

WITH the development of the military offensive in Europe, attention turned increasingly to the problem of reconverting to peacetime production once the high level of war requirements was reduced. Manufacturers making plans for the transition and the post-war period were anxious to know under what conditions they would be able to produce civilian goods. For this reason the Chairman of the Wartime Prices and Trade Board, Mr. Donald Gordon, in a speech given in Toronto on September 11, outlined the procedure to be followed by the Board in its control of prices and civilian supplies.

During the three months reviewed in this summary there were few signs of improvement in the supply of civilian goods. While there was some increase in the production of small hardware items and some other articles, production of most durable goods was still held up by war production programs and the shortage of labour. Textile, leather and paper products remained in short supply. Dry weather restricted the output of dairy products. On the other hand, stocks of tea and coffee improved so that rationing could be suspended, and the crop of fruits and vegetables was satisfactory.

The pressure of rising costs continued and made it necessary to provide financial relief for various manufacturers of textiles and wood products so as to maintain ceiling prices on their products. Further steps were taken to combat the lowering of the quality of apparel.

Decontrol

In his speech before the Canadian Club in Toronto, the Chairman of the Board pointed out that it was "the administrative objective of the Wartime Prices and Trade Board to reduce and simplify its system of wartime controls by withdrawing, as soon as practicable, all orders prohibiting or restricting the manufacture of finished civilian products".

War production and essential civilian needs must, of course, get prior claim on all necessary materials and labour. Many of the Board's restrictive orders can, however, be withdrawn, since simpler and more direct controls over the use of raw materials and plant facilities have been developed by the Wartime Industries Control Board, while National Selective Service is responsible for the efficient utilization of labour. To ensure adequate production of essential civilian goods, the Wartime Prices and Trade Board has the authority to direct manufacturers to produce stated amounts of certain articles, to arrange for special allocations of materials, and to request appropriate labour priorities. The indirect method of ensuring essential supplies by restricting non-essential end products can thus be avoided.

Manufacturers will, therefore, be able to produce articles freed from restrictions only if materials and labour become available in excess of more essential requirements. The removal of restrictions will, however, make it easier for them to plan their future civilian output so that when production can be started there will be no undue delay.

While the Chairman's announcement clarified the Board's position, it did not represent any break with previous practice, since the Board has always endeavoured to remove regulations and restrictions as soon as they were no longer thought to be necessitated by wartime conditions. A considerable number of end product restrictions were removed during the winter of 1943-44 and restrictions on new entrants and new lines of business were relaxed in June, 1944.

As materials and labour become available and manufacturers are able to take advantage of the removal of restrictions, many goods that were not sold in the "basic period" of the price ceiling will appear on the market. The Chairman emphasized in his speech that maximum prices for these goods are fixed strictly in accordance with the "basic period" principle, that is to say, on the basis of the price at which they would have sold in the basic period, taking into account their use-

fulness, serviceability, durability and intrinsic worth.

Strict control of prices on the basis of "basic period" values is to be continued into the period of transition since the potential inflationary pressures are likely to remain great. While reduction of war contracts will in time work strongly in the opposite direction, the early stages of the transition period are likely to be complicated by some continued shortages and bottlenecks in reconversion, by large pent-up consumer demand and by war inflated costs. These latter factors will tend to exercise an upward pressure on prices, as was the case after the last war, when prices rose abruptly for nearly two years, after which they declined even more abruptly for more than a year. In maintaining the price ceiling on the present occasion, therefore, the objectives are not only to prevent inflation but also to lessen the risk of subsequent deflation. Continued price control is also expected to increase the opportunities for developing domestic and export markets capable of sustaining a large volume of production and employment.

It was recognized, of course, that manufacturers of new civilian goods might, in some instances, have difficulty in operating under basic period ceilings, owing to wartime increases in costs that could be absorbed only while producing on government account and at full capacity. In exceptional cases, some price adjustments may be authorized, but only if financial need can be shown and if the "squeeze" of increased costs cannot be absorbed or offset by the manufacturer or distributor. The Chairman pointed out, however, that "we have also reason to believe that a good many of these cost increases will or should be of a temporary character". Without any lowering of wage rates, costs may fall as a result of increased labour efficiency in civilian production, reduced labour turnover and overtime, better and cheaper materials, lower shipping rates, technical improvements and increased volume of civilian production.

Since the establishment of maximum prices for goods not sold in the basic period and for newly established businesses has become a major problem of price control, the Board revised the regulations regarding the pricing of these "new goods" so as to make their application more uniform and more effective while at the same time reducing the administrative burden as far as possible.

The procedure that had previously been established for setting maximum prices for "new" consumer goods was modified in some respects and was extended to services and capital goods. In the retail field, the administration of the regulations respecting "new" goods and new entrants into business was to a considerable extent decentralized, much of the work being transferred from the Retail Trade Administration to the local offices of the Board.

Metals

Supply: With shifts in war production the supply of certain metals, particularly aluminum, magnesium and zinc, became adequate for current war and civilian requirements. The Board made arrangements with the Metals Controller to permit the unrestricted use of copper and copper base alloys in the manufacture of such goods as builders' hardware, plumbing, safety pins and zippers.

Certain steel shapes, such as sheets, were in very tight supply during the quarter and only limited quantities were available for civilian production. Certain sizes of bar, pipe and cold-roll strip were in reasonable supply and considerable quantities were released for civilian products.

Controls: In accordance with the procedure outlined by the Chairman a great many prohibitions and restrictions on the production of metal civilian goods were withdrawn during the quarter. Among the end products released from prohibitions are some 500 items whose production was forbidden under Order A-579, ranging from adhesive tape sleeves to stadiums. Also permitted are toasters, irons and other small domestic electric appliances, tricycles, metal coffins, lawn rollers and numerous other articles. Actual production must, of course, await the availability of labour and materials.

Simplification and standardization measures that were revoked included restrictions on the manufacture of furniture, plumbing and heating equipment, screws and rivets, various hand tools, jewellery and other items.

By the end of the quarter relatively few restrictions on production remained in operation but articles still under control included radios, washing machines, refrigerators and other large household appliances as well as commercial laundry equipment and equipment for commercial cooking and refrigeration. These articles contain various materials and components which are still restricted. The production of bicycles, farm machinery and office machinery also continued to be restricted.

Civilian Production: While there was no general improvement in supplies of civilian metal goods, there was some increase in the production of kitchen utensils, small articles like safety pins, and various hardware items. Progress was made towards the completion

of production programs for certain household appliances—e.g., washing machines, electric ranges, warm air furnaces—some of which had been held up by shortages of manpower and component parts.

The 1944 production of small arms ammunition was increased as a result of military cutbacks and better supplies of copper sheet. It was, therefore, possible to issue a limited amount of ammunition to sportsmen.

Improvements in the supply of tinplate and blackplate made it possible to take advantage of the extremely favourable apple crop by increasing the pack of various apple products.

Building Materials: During the three months under review it became apparent that building materials were one of the most serious tight spots in the civilian economy. The great increase in construction permits issued in 1944 brought into sharp relief the downward trend in the output of bricks, soil pipe, furnaces, bathtubs, plumbing fixtures, cement blocks and certain items of builders' hardware.

The shortage of building supplies was mainly a reflection of the overall shortage of labour though in the case of furnaces and plumbing fixtures, shortages of components and raw materials were also significant.

The Board made efforts to obtain improvements in the labour supply of some of these industries, so far as might be done without prejudice to military requirements, and in some cases, labour priorities were increased on the recommendation of the Interdepartmental Labour Priorities Committee. However, at the rate of construction currently contemplated, severe shortages in many lines are likely to continue for some time.

Textiles and Leather

Shortages and increasing costs of production remained particularly noticeable in the field of apparel, and led to problems of quality deterioration.

The Canadian allocation of cotton fabrics from the United States for the third quarter of 1944 was reduced by about one-third, though the allocation for the fourth quarter was somewhat higher. Some reduction, therefore, had to be made in the amounts of cotton fabrics allocated to clothing manufacturers and an improvement in the total supply of cotton articles cannot be expected in the near future.

The supply of essential articles will, however, be protected by the exercise of control over the types of imported fabrics and their distribution as well as by the system of production directives. It is planned to introduce a production program for men's fine shirts early in 1945.

Rayon too was in short supply, owing in part to heavy requirements for the synthetic rubber tire program. A production program for women's hosiery was started in the fourth quarter so as to promote better supplies. Acetate yarns, allocated to Canada by the United States War Production Board to meet in part the diversion of domestic viscose yarns to the tire program, are bulk purchased by the Commodity Prices Stabilization Corporation. Owing to the shortage of rayon throwing yarns, first quality yarns have had to be used as filling in low price dress goods, and a subsidy was authorized to offset the increase in costs.

The output of worsted suitings could not be maintained at the level specified in the directive issued in June, owing to an increase in the production of battledress uniforms. Negotiations were, however, carried on for the supply of a substantial quantity of British worsted suitings in the spring of 1945 when an increasing demand for suits for demobilized servicemen may arise.

With the curtailment of war contracts worsted spinners and weavers have found it increasingly difficult to absorb rising costs of operation. A subsidy was authorized in August, payable to domestic spinners and weavers, subject to profit control.

Some tightening of civilian leather supplies resulted from a reduction in Canada's allocation of South American hides on the one hand, and high military requirements on the other. Steps were taken to make the best use of available supplies. Among these were the release of "visole" synthetic soling material for adult in addition to juvenile footwear, and the controlled allocation of horsehides.

In contrast to the metals field, only a limited number of minor end product controls on apparel were withdrawn during the quarter. Among these were restrictions on men's and boys' furnishings, hats, small leather goods, the number of zippers in garments, the shapes and colours of buttons, restrictions on bias binding, shoe laces and other articles. There was some relaxation of restrictions on the production of footwear and luggage.

In view of the growing importance of the problem of maintaining price quality relationships, particularly in textiles, the Board's "Standard Division" was reorganized and enlarged during the quarter. The Division's investigators co-operate with Administrators to bring about the maintenance of quality standards. The Division prepares regulations, checks up on consumer complaints, and undertakes investigations both at the retail and the manufacturing level, to detect or prevent quality degradation. The Board's regulations

requiring the labelling of textiles and footwear are designed to make it possible to trace defective articles back from the retailer to the manufacturer.

In August retailers' markups for women's, misses' and children's dresses, coats and suits were limited to those taken in the basic period, but not to exceed 45 per cent of selling price. This ceiling on markups, more readily enforceable than basic period ceilings on this type of merchandise, is designed to check the excessive markups which had been taken by some specialty stores.

Foods

Dairy Products: The dry summer weather caused a deterioration of dairy pastures and a consequent decline in milk production. The overall shortage of dairy products was thus intensified and was reflected chiefly in a further decline in butter production, since fluid milk for domestic consumption and cheese for the United Kingdom were first charges on available supplies of milk.

In order to make the greatest possible amount of butterfat available for butter production monthly sales of fluid cream by distributors in the principal markets of Canada were restricted to the amount (in pounds of butterfat content) sold in June, 1944. The policy of reducing the butter ration by one-half pound every eight weeks was continued so as to build up an adequate reserve for the winter.

Tea and Coffee: As a result of improved shipping conditions stocks of tea and coffee improved to the point where rationing could be discontinued. Rationing ceased on September 19.

Fruits and Vegetables: As a further step in the Board's policy of bringing important fruits and vegetables under price control, maximum prices were set for apricots in July.

In setting prices for the 1944 crop of late summer fruits, the markup allowed to truckers in 1943 was eliminated. As truckers tend to sell near the point of production, the adjustment was aimed at promoting wider distribution of supplies. The price of peaches was fixed below last year's level, since the 1943 crop had been very low, and prices correspondingly high.

Maximum prices for canned fruits and vegetables were substantially the same as last year. As before, subsidies were paid on various canned fruits and vegetables, and the growers' subsidy on raw tree fruits, paid through the processor, was authorized again this year. Growers' subsidies on various vegetables are paid by the Department of Agriculture.

Owing to better crop conditions and adequate supplies of blackplate, the 1944 pack of fruits and vegetables was considerably better than that of the previous year. Tomatoes and tomato juice were canned in greater quantities. The apple crop was exceptionally good and an unlimited supply of metal containers was authorized to prevent spoilage of excess supplies.

Arrangements for the distribution of canned vegetables were very much simpler than those made in the previous year, and the carrying of excessive reserve stocks was avoided.

Ice: The hot summer weather resulted in a shortage of ice in August, particularly in Western and Central Ontario. Arrangements for conserving ice supplies included curtailment of the icing of carloads of fruits and vegetables and suspension of the icing of shipments of beer, ale and porter.

Other Foods: During the quarter standard maximum prices replacing basic period price ceilings, were set for soybeans, peas, processed cherries and canned poultry.

Used Cars

More effective control of used car sales has now been introduced. Since the production of passenger cars for civilian use has been suspended, the used car market has become increasingly important. Standard maximum prices for used passenger cars had been fixed by an order of the Motor Vehicles Controller. Enforcement of regulations was, however, difficult owing to the surreptitious manner of many transactions. Dealers frequently required a trade-in as a condition of sale, and by undervaluing the trade-in, could "evade" the price ceiling. This practice also enabled them to pay more than ceiling prices for some of their purchases.

Under the new regulations introduced in August, private purchases of used cars are restricted to one per year. Dealers are required to sell cars without demanding a trade-in, to persons holding an essentiality certificate and willing to pay cash. Where a trade-in is involved the value must be "fair and reasonable". Private sellers are not permitted to require a trade-in as a condition of sale, and must, in any advertisement, state their name and address and particulars as to the make of car and selling price. Finally, all transactions in used cars must be registered with the Board.

Rentals

Congested housing conditions in war industry areas and military centres made a further

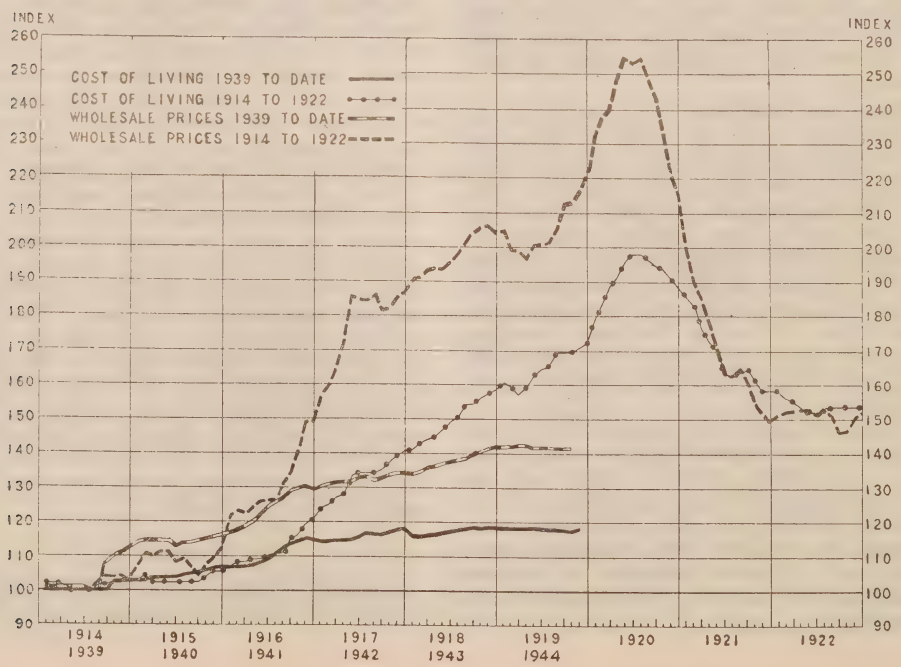
tightening of rental regulations necessary. The Board extended the protection against arbitrary eviction at short notice enjoyed by occupants of houses and apartments, to tenants of "shared accommodations" (i.e. flats and rooms). Under regulations made in July such tenants must be given six months notice if the landlord desires the accommodation as an extension of his own residence or as a residence for his father, mother, son, daughter, or daughter-in-law. Well behaved tenants cannot be evicted for any other reasons.

For the protection of landlords in special cases of hardship, the Regional Rentals Officer may exempt any lease of shared accommodation from these regulations. The regulations do not apply to boarders nor do they apply to accommodation in Halifax, Montreal, Kingston and certain other cities where specific rent control regulations are in force.

Prices, Retail and Wholesale, in Canada, November, 1944

Cost of Living, Prices of Staple Articles, and Index Numbers, as Reported By the Dominion Bureau of Statistics

THERE was a rise of 0·3 points in the Dominion Bureau of Statistics official cost-of-living index between October 2 and November 1; the increase was from 118·6 to 118·9. The food index advanced from 130·8 to 131·6, mainly because of seasonal increases in egg prices. These were partially offset by further small declines for fresh vegetables. The fuel and light index fell from 108·7 to 108·1, due to a decrease in the electricity index from 93·2 to 91·4. Reductions in electricity rates during the past year have provided a stabilizing influence upon the general cost-of-living index. Other group indexes remained unchanged in November as follows: rentals 112·0, clothing 121·6, homefurnishings and services 118·4, and miscellaneous items 108·9.



Retail Prices

The accompanying table on retail prices of staple foods, coal and rentals (Table IV) is prepared each month by the Dominion Bureau of Statistics. It shows the prices of these commodities in 64 cities across Canada at the date under review.

COST OF LIVING AND WHOLESALE PRICES IN CANADA 1914-1922 AND 1939-1944

BASE: PRICES IN JULY, 1914 and in AUGUST, 1939=100

* Based on the 1926 average as 100 per cent.

The prices of the staple food items included in the table are all used in the calculation of the index of the food group in the official cost-of-living index, and give a reasonably complete picture of prices throughout Canada as used in the calculation of the index of this particular group. They are the averages of prices of goods reported to the Bureau by independent stores. They do not include prices from chain stores. As the movement of chain store prices agrees closely with the movement of independent store prices it was considered that the extra work and cost involved in compiling and printing a separate table for chain store prices were not warranted although chain store prices are used in the calculation of the index.

The coal and rental figures given are also used in the official cost-of-living index. Quotations are shown for anthracite coal in the provinces of Ontario and Quebec, and for bituminous coal in the rest of Canada, where this type of coal is more generally used.

Rental figures given in the table are typical of rents being paid by tenant households in each city. In some cities, flats and apartments are more numerous than single houses; in such cases rents for flats and apartments are shown while figures for other cities represent single-house rentals. In all cases figures represent rents being paid, not the rent asked for vacant dwellings. The basis of these figures is the record of rents for every tenth tenant-occupied dwelling collected in the 1941 census of housing. The movement of rents since that time has been determined from reports submitted by real estate agents. The 1941 census averages have been adjusted in accordance with the change indicated by these reports, and the printed figures show a $4 spread centred around each city average.

Table III is designed to show the variation in the retail prices of commodities since the beginning of the war. Taking the Domiinon average retail price of each of the commodities at August, 1939, as 100, the table shows the percentage changes in prices since that date; also the actual price on the first of the current month.

The Dominion Bureau of Statistics issues an index number of retail prices of commodities included in the cost-of-living index excluding rents and services. This index is now being included in Table I.

The accompanying chart shows the trend of the cost of living and wholesale prices since the beginning of the present war compared with the trend in the period of 1914-1922.

Explanatory Note as to Cost-of-Living Index

The index number of the cost of living was constructed on the basis of a survey of expenditure by 1,439 families of wage-earners and salaried workers with earnings between $600 and $2,800 in 1938. The average expenditure was $1,413.90, divided as follows: food (31·3 per cent), $443; shelter (19·1 per cent), $269.50; fuel and light (6·4 per cent), $90.50; clothing (11·7 per cent), $165.80; home furnishings (8·9 per cent), $125.70; miscellaneous (22·6 per cent), $319.40.

The last-named group includes health (4·3 per cent), $60.80; personal care (1·7 per cent), $23.90; transportation (5·6 per cent), $79.30; recreation (5·8 per cent), $82.10; life insurance (5·2 per cent), $73.30. Other expenditure not directly represented in the index brought the total family living expenditure to $1,453.80.

A description of the cost-of-living index, how it is calculated, and the complete list of items included in each of the principal groups, food, fuel, rent, clothing, home furnishings, etc., with their weights, was published in the Labour Gazette for July, 1943, page 1057.

The control of prices under an Order in Council of November 1, 1941, P.C. 8527, became effective on December 1, 1941, (L.G., 1941, page 1371). The order provided that no person should sell any goods or supply services at prices higher than during the period September 15 to October 11, 1941, except under the regulations of the Wartime Prices and Trade Board. The activities of the Board in the operation of the price control policy are summarized from time to time in the Labour Gazette under the title *Activities of the Wartime Prices and Trade Board.*

Wholesale Prices, November, 1944

The general wholesale price index remained unchanged for November at 102.4, with advances in the animal products group balanced by declines among vegetable products and chemicals. The decline in vegetable products from 94·7 to 94·6 was attributable mainly to price reductions for oats, potatoes and onions which outweighed small increases for rye and barley. The chemical product index fell from 100·1 to 99·9. The offsetting rise in animal products from 106·3 to 106·7 was produced by price increases for eggs, lard, cured meats, steers and lambs, although there were moderate declines in carcass meat prices, calves and hogs. Other component group indexes remained unchanged for November as follows: fibres and textiles 91·7, wood products 118·1, iron products 117, non-ferrous metals 79·7, and non-metallic minerals 101·8.

The wholesale price index of Canadian farm products rose fractionally from 103·0 for October to 103·1 for November. The field product section fell from 91·6 to 91·5, while animal products increased from 122·0 to 122·5.

TABLE I.—DOMINION BUREAU OF STATISTICS INDEX NUMBERS OF THE COST OF LIVING IN CANADA

PRICES AS AT THE BEGINNING OF EACH MONTH

—	Adjusted to base 100·0 for August 1939	On base of average prices in 1935-39 as 100*

(b) The basis of these figures is the record of rents collected in the 1941 census of housing. The movement since then has been determined from reports from real estate agents, the census averages being adjusted in accordance with the changes indicated by these reports.

(c) Rents marked (c) are for apartments or flats. Other rent figures are for single houses. Apartment and flat rents have been shown where this type of dwelling is more common than single houses.

Old Age and Blind Pensioners in Canada

Financial and Statistical Summary as at September 30, 1944

IN the accompanying tables, which have been prepared by the Department of Finance, information is given concerning the Old Age Pensions Act and the amendment to that Act for the payment of pensions to blind persons.

Old Age Pensions

The Act provides for the establishment of a Dominion-Provincial pensions system to be effective in such provinces as might enact and give effect to special legislation for this purpose. All the provinces are now participating.

Under the Old Age Pensions Act a pension is payable to any British subject of 70 years and over who is not in receipt of an income of as much as $425* a year and who has resided in Canada for the 20 years, and in the province in which the application is made for the five years immediately preceding the date of the proposed commencement of pension. The Act also provides that an applicant must not have assigned or transferred property for the purpose of qualifying for a pension. Indians, as defined by the Indian Act, are not eligible to receive old age pensions.

The maximum amount of pension payable under the Act is $300* yearly. In cases where pensioners have a private income the amount of their old age pension is subject to reduction by the amount that their private income exceeds $125* a year.

Under the provisions of the Act as it was first passed, the Department of Labour of Canada (then the administering Department) paid quarterly to each province one-half of the net sum paid by the provincial pension authority during the preceding three months. At the 1931 session of the Dominion Parliament, however, the Act was amended, the amount of the Dominion contribution being increased from fifty to seventy-five per cent of the net sum.

In order to avoid duplication of departmental activities and to secure centralization of responsibility in carrying out the provisions of the Act, which involves accounting control and supervision, the administration of the Old Age Pensions Act was by Order in Council dated March 1, 1935, transferred to the Department of Finance from April 1, 1935.

Pensions for the Blind

An amendment to the Old Age Pensions Act, assented to on March 31, 1937 (L.G., May, 1937, p. 503) provides for the payment of pensions to blind persons who have attained the age of 40 years and have fulfilled other conditions set forth in the Act. Such persons must be so incapacitated by blindness as to be unable to perform any work for which eyesight is essential, and must not be in receipt of a pension or allowance in respect of blindness under the Pension Act or the War Veterans' Allowance Act.

The maximum pension payable to a blind person, whether married or unmarried, is $300* per annum. If, however, a blind person marries another blind person after March 31, 1937, the maximum pension is reduced to $150*. If a pensioner is unmarried the maximum pension is reduced by the amount of his income from earnings or other sources in excess of $200* a year. If a pensioner is married to a person not receiving a pension in respect of blindness, his income is deemed to be the total income of himself and his spouse (including any old age pension payable to the spouse) less the sum of $225*, and the maximum pension is reduced by the amount by which his income, so calculated, exceeds $400*. If a pensioner is married to a person receiving a pension in respect of blindness, his income is deemed to be one-half the total income of himself and his spouse (excluding the pension in respect of blindness payable to his spouse) and the maximum pension is reduced by the amount by which his income, so calculated, exceeds $200*.

Under agreements negotiated between the Dominion and the Provinces, the Dominion contributes 75 per cent of the cost of pensions to blind persons, the provinces assuming the remainder of the cost of such pensions.

The accompanying tabular statistics indicate the extent of operations under this amendment to the Old Age Pensions Act.

---

*Amended by Orders in Council P.C. 6367, August 10, 1943, and P.C. 3377, May 29, 1944, passed under the authority of the War Measures Act.

OLD AGE PENSIONS

Conventions of Labour Organizations

DURING the autumn conventions were held by three of the great labour organizations of the English-speaking world. The British Trades Union Congress convened at Blackpool, England, October 16 to 20. The American Federation of Labour assembled at New Orleans, Louisiana, November 20 to 30 and the Congress of Industrial Organizations at Chicago, Illinois, November 20 to 24. The deliberations of the three bodies were in large measure centred in wartime activities and the social structure that would be created after the war. Summaries of the proceedings of all three conventions are given in the following pages.

British Trades Union Congress

THE seventy-sixth annual convention of the British Trades Union Congress was held in Blackpool, England, October 16 to 20, 1944. It was attended by 725 delegates, representing 193 affiliated trade unions with 6,642,317 members, an increase of over 600,000 from the total reported at the convention of 1943. The President was Mr. Ebby Edwards, General Secretary of the Mine Workers Federation of Great Britain, the first representative of the miners to preside in 34 years.

Address by Congress President

In his presidential address, Mr. Edwards said that many of the wartime developments in industry had reinforced the trade union movement. Membership had increased greatly and inter-union relationship had made progress. Organization among women workers had placed women trade unionists on a footing of equality with their men comrades.

With regard to wartime controls, Mr. Edwards said that probably no aspect of the system of labour control was more irksome from the workers' point of view than the denial of his right to choose his own job and to move freely from job to job. He questioned the necessity for such controls in the post-war period, but admitted that, in so far as it promotes an orderly and fundamentally fair transfer of members of the armed services to civilian life and employment, it should be accepted by the Unions. At the same time, a like control of trade and industry must be provided. In this way the starting up of those industries and trades which primarily serve basic social needs, and are of first importance to national recovery and the whole community, irrespective of class, will be facilitated, he asserted. However, he said, "it must be a cardinal principle that neither the control of labour, nor the control of industry can be entrusted to any authority without the active participation of the representatives of labour.

Mr. Edwards discussed at some length, the problem of rebuilding the international trade union movement and asserted it was the duty of the British trade unionists to give aid and counsel to trade unionists in other countries who were endeavouring to rebuild working class organizations. He urged his hearers to make up their minds as to their duty and responsibility with respect to the German working class, and gave it as his opinion, that in view of the harsh treatment meted out to the German trade unionists by the Gestapo, "our good will and our deep desire for full international co-operation will not . . . . justify refusal to admit German working class organization to our fellowship."

He claimed the right of labour to "a responsible voice and active share" in the formulation and application of the terms of peace. "We must", he said "now give our minds to mobilizing and using the resources of all nations to reinforce the people's will to peace, to safeguard their security, and to ensure their prosperity."

Report of General Council

The agenda of the convention reflected the pre-occupation of British labour with the war and to problems emerging from it, especially as affecting trade union policy and organization. On the broad question of post-war conversion and recovery, the convention had before it for discussion a special interim report on post-war reconstruction prepared and sub-

mitted by the General Council. This report called for increased national ownership and control of Britain's basic industries. It was suggested that coal and transport be nationalized immediately, and that in other basic industries preliminary steps should be taken to unify each industry under a Board, with labour and management having equally responsible roles. This report was accepted by the convention.

The convention also endorsed the General Council's acceptance of the Government's employment and social service policies, "as being important steps in what they consider to be the right direction." Criticism was, however, made of aspects of the proposed social legislation, notably the provisions for insurance against industrial injuries, the limitation of sickness and unemployment benefit, the introduction of the contributory principle and the fixing of benefits without regard to earnings.

It was recalled that "the T.U.C. has made it clear on a number of occasions that if British industry is to be flexible and progressive after the war, labour must be prepared to face necessary changes." It was admitted, however, that the T.U.C. had no overriding authority over its individual unions and, consequently, the Council recognized that basic alterations in trade union structure were impracticable. Nevertheless, the Council "urged the continuance of amalgamation, federation and joint consultation between the various existing bodies." It was suggested further that in defining the territories of various unions and encouraging the recognition of union cards in related industries, the changing character of modern industry was a factor of paramount importance, and must be taken into account.

The Congress gave approval to the General Council in its effort to convene a world trade union conference, at which the political, economic, and social aspects of post-war problems could be explored.

Provision was made for the appointment of a Preparatory Committee to consider the procedure of the conference; this committee to include representatives of the All-Union Central Council of Trade Unions of the U.S.S.R., the British Trades Union Congress and the trade unions of the U.S.A. It was arranged to have the Preparatory Committee meet not later than December 4, 1944.

Definite approval was given the General Council in its action to secure authority to approach the Government for a legalizing of agreements embodying the principle of a 40-hour week and affirming it to be the policy of the Congress to secure the 40-hour standard throughout industry, with two weeks' annual holiday with pay.

Some of Resolutions Adopted

Among the recommendations contained in some of the adopted resolutions were the following:

Calling upon the Governments of the United Nations to insert in the peace settlement a statement of social principles and objectives as recommended in the resolution covering social provisions in the peace settlement adopted by the I.L.O. conference at Philadelphia in April, 1944.

Urging the British Government to make sure that suitable relations are established between the I.L.O. and any other international organizations which now exist, or may be established, for the promotion of economic and social well-being.

Requesting the Governing Body of the I.L.O. to take such steps as may be possible to extend the membership of the I.L.O. to include, amongst other nations, the U.S.S.R.

Calling for restitution by the German people to the countries that were "plundered and exploited to serve Germany's aims of conquest and domination" and also for the re-establishment of British trade and industry and the rebuilding of cities and villages destroyed by air attacks, or long range bombardments.

Empowering the General Council to develop a policy and program that will enable the British Trade Union movement to pay its full part as follows: (1) the re-establishment of the international working class movement; (2) to promote the creation of a Trade Union International embracing all *bona fide* trade union organizations; (3) to explore at the forthcoming World Trade Union Conference (in February, 1945) the political, economic and social war problems of common interest; (4) to work out the principles of a just treatment of the German people and the application of those principles in order to create and foster a genuinely democratic trade union movement in the settlement of Germany's future.

Urging the immediate nationalization of certain industries, notably transport, fuel and power, and iron and steel.

Pressing for public control in different ways and in varying degree over the whole of economic life, as for example, the control of prices and monopoly practices.

Going on record as favouring the continuance of join production committees in the post-war period and the extension of this principle into the spheres of production, industry and commerce generally.

Asking the Government to adopt the principle of equal pay for equal work in all government establishments and to enforce it in all contracts carried out by the government.

Recording the conviction of the T.U.C. that wage regulation machinery during the post-

war period must be based upon voluntary agreements arrived at through collective bargaining and calling for legalized enforcement, if required, of agreements relating to minimum standards of wages and conditions of employment, thus replacing wartime powers of enforcement.

Approving the British Government's "White Paper" on social insurance and pledging "the support of the trade union movement against any attempt by vested interests, of whatever kind, to whittle away or sabotage the plan."

Endorsing, subject to "certain reservations", the British Government's policy with respect to health insurance.

The Congress was addressed by representatives of the Labour Party, the Co-operative Union, the American Federation of Labour, the All-Union Central Council of Trade Unions of the U.S.S.R., the International Federation of Trade Unions and the French Council of Resistance.

Mr. G. A. Isaacs, M.P., Secretary of the National Society of Operative Printers and Assistants and a member of the General Council of the Congress for many years, was elected Chairman of the Council for the forthcoming year.

American Federation of Labour

THE American Federation of Labour held its sixty-fourth annual convention at New Orleans, Louisiana, November 20 to 30, 1944. Nearly 600 delegates were in attendance representing 6,806,913 members—an "all-time" record.

Report of Executive Council

The executive council in a lengthy report advocated the setting up immediately of machinery that would eliminate the causes of future wars and provide for the full employment of workers.

It asserted that because of wage freezing through the "Little Steel" formula, hourly wage rates in the United States are at a level so low as to cause alarm; that "wages have been held down while prices of living necessities have soared." It was claimed further, that "to-day's low wages are of greatest significance," and that (1) unless they are raised, then after the war millions of workers and their families will be condemned to live in poverty, and (2) these low wages will reduce buying power to such an extent that full production and full employment cannot be maintained. To avoid this, substantial wage increases must be secured for both union and non-union labour. Unions affiliated with the A.F.L. were urged to make a concerted drive for wage increases for all workers during the coming year and to stimulate legislative action to raise the wage floor provided in the Fair Labour Standards Act.

The council demanded prompt enactment of legislation to extend coverage of old-age insurance, to broaden and strengthen unemployment compensation on a uniform national basis, as a vital post-war measure, and that provision be made for health and disability insurance.

On the matter of world peace the council considered that the United States has a responsibility for helping to plan and operate agencies to keep the peace among nations; to develop policies for promoting world economic welfare, as well as an adequate body of international law backed by a world court.

A plan drafted by the Post-War Committee of the council was included in the report, and covered labour's viewpoint on "all the national and international problems that will follow victory."

Presidential Address

In his keynote address, President Green discussed the war at some length and pledged the continued support of "the army of production" to "our brave men who are serving in the armed forces of the nation." He declared that in addition to winning the war there was the complementary problem of concluding a just and lasting peace which will provide security, freedom and justice throughout the world. He forecast a degree of unemployment in the period immediately following the war, due to the necessity of converting industry from wartime to peacetime production and the return of many thousands of soldiers from the several war fronts. He insisted that these returning veterans be provided with jobs and thus not be compelled to undergo the "pangs of unemployment" as did the veterans of the first world war. He urged that preliminary steps be taken at once, so that the reconversion period be shortened as much as possible. Following this reconversion period, the President forecast another of unusual industrial activity to meet a heavy demand for new civilian goods.

Referring to the wage program following the war, he asserted that there must be estab-

lished and maintained a balance between the productive power of the nation and the consuming power of the masses of the people. He referred to the technological advances made in industry during the war and enumerated several specific instances where manpower was being replaced by improved machines which produced more and better goods. He analyzed the national income and emphasized the need of putting into the hands of consumers the purchasing power necessary to purchase the products of industry and agriculture. After the war the war purchases of the government must be replaced largely by civilian purchases of civilian goods, he declared.

The President concluded his address with a plea for labour unity and the dangers inherent in disunion, especially in the post-war era. He said: "I emphasize the importance of this subject and I hope the erring ones who left us will return, heed the call and come back home to the house of labour."

President Roosevelt's Message

In a message to the convention, President Roosevelt commended the part that labour had played in the national war effort. "It is the task of us at home to leave nothing undone so that our fighting men may continue gaining their glorious victories on every front," he declared. Regarding the post-war period, he continued: "I know that such co-operation will continue after the war is won, so that we can win a peace for the world which will be just and lasting and in the interest of safety, protection and the well-being of generations yet unborn."

Addresses of Government Labour Officials

Miss Frances Perkin, Secretary of Labour for the United States, in addressing the convention, reviewed briefly the labour legislation enacted in the United States during the Roosevelt administrations. Continuing, she said: "The labour movement with this body of statutes as defence . . has to-day perhaps the greatest opportunity that has ever been offered to any such group organization to serve this generation and all the people of the country." She foresaw a new era of mutual co-operation between employers and labour unions, which she designated "the constructive period for the American labour movement." The effort should be, she asserted, to develop an orderly pattern based on justice and realistic knowlege of industrial and economic facts, so that "like many another old-fashioned weapon, the strike too can be unloaded . . and not used, although retained just to give a sense of security." She urged an increasing public responsibility in the labour movement along the lines of participation in the general life of the community, in its charities, culture, education, better housing and in "the spiritual values so necessary to the full practice of democracy."

General Brehon Sommervell

The Chief of the Army Service Forces, General Brehon Somerville, emphasized the urgent need for increasing the production of war materials if victory was to be achieved with the minimum of time and casualties. He pointed out that 100,000 more workers were required in plants producing essential war materials and urged the delegates at the convention to do all they could to recruit these with the least possible delay.

Mr. Joseph D. Keenan

Mr. Joseph D. Keenan, Labour representative on the National War Production Board, discussed labour-management team-work in the production of war materials. He quoted as follows from an address of President Roosevelt to indicate the extent of this co-operation: "At our peak, American labour and management have turned out airplanes at the rate of 109,000 per year; tanks—57,000 per year; combat vessels—573 per year; landing vessels—31,000 per year; cargo ships—19 million tons per year; and small arms ammunition—23 billion rounds per year." In war production everything possible must be done to win the war, Mr. Keenan said. At the same time, labour, more than any other part of the national economy, can and must pool its resources, strength, influence and statesmanship in advancing the cause of liberty, justice, peace and prosperity throughout the world.

Mr. Paul V. McNutt

Mr. Paul V. McNutt, Chairman of the National War Manpower Commission, in his address to the convention enumerated four problems, which he asserted were "really not separate to be solved separately," but are essentially inter-related and "add up to one answer—victory and lasting peace." He stated them as follows: (1) To defeat Germany; (2) To defeat Japan; (3) To meet the challenge of reconversion; (4) To meet the challenge of peace. He was insistent in urging the full unity of the allies in carrying on the war and in preparing for peace. He deprecated "home front indifference" and called for an all-out war effort on the part of the government, industry and labour alike. He declared that labour unions "have a responsibility to see that democracy works within the ranks of labour," for, "after victory in Europe we will still be only half way to winning the war."

Mr. E. N. Scheiberling

The National Commander of the American Legion, Mr. Edward N. Scheiberling, in his address, indicated the purposes of that organization as a protective force for the veterans of two world wars and of the nation as a whole: (1) Protection of the country against future wars through an organized citizen-militia ready to spring to military service should war come; (2) Protection of American institutions through opposition to all foreign ideologies that seek to undermine our economic, social and political ways of life; (3) Protection of our economic system through full post-war employment and the greatest encouragement to individual initiative and sound business leadership; (4) Protection of comrades of World Wars I and II through adequate care and rehabilitation programs.

Mr. Arthur D. Altmeyer

Social security as it functions in the United States was the theme presented to the convention by Mr. Arthur J. Altmeyer, chairman of the National Social Security Board at Washington. He pointed out that even with full employment, the chief causes of human destitution continue to exist. "Sickness alone in normal times has been a far greater cause of cessation of earnings and consequent destitution than has unemployment," he said. Then there are the hazards of permanent disability, old age and premature death to be considered. Against these, not even individual savings, private insurance and the help of friends are sufficient. He spoke approvingly of contributory social insurance and urged its extension to provide protection against all these economic hazards, not only those of old age, premature death and unemployment. He urged the creation of a unified, comprehensive contributory system, requiring only one contribution and designed to cover all workers, and suggested many amendments that would improve the application of the present Federal-State unemployment insurance laws in the Uinted States.

Fraternal Delegates

Mr. John Brown, fraternal delegate from the British Trades Union Congress, in his address to the convention, stated that the present membership of the B.T.U.C. was "certainly in excess of 7,000,000." But, he continued, "this increase in power has brought with it great responsibilities," and he gave it as his opinion that the trade unionists of Great Britain were using their power to advance the common good.

With respect to the initiative of the B.T.U.C. in calling a world conference of trade unionists he affirmed that the problems of trade unionists "are pretty much the same . . . in all highly industrialized and progressive countries." He continued: "We feel that there can be no guarantee of justice in social relations, of peace and order in the world, of better conditions in industry, without a strong and united trade union movement."

Mr. Brown sketched the centuries-long struggle of labour to secure the right of collective bargaining in Britain and the subsequent conflicts over wages, hours of labour, social security, housing, etc., and concluded with the assertion that "on this common platform the American Federation of Labour and the British Trades Union Congress meet . . . to serve the common people . . ."

Mr. A. R. Johnstone, fraternal delegate from the Trades and Labour Congress of Canada, after discussing Canada's war effort, described in some detail the attitudes and aspirations of Canadian labour in the post-war period—the abolition of poverty, provision for full employment, the adoption of a 40-hour week with no reduction in earnings, the public control of cartels and monopolies, etc. He urged the representatives of National and International unions to put forth additional efforts to organize Canadian workers, a request that was given the approval of President Green.

Resolutions Adopted

The resolutions presented to the convention covered a wide range of human interests in many parts of the world. Among those of general interest, the following recommendations were contained:

Appointment of duly accredited representatives of the A.F.L. to participate in the peace conference was demanded.

Renewal of the "no strike" pledge and reaffirmation of the policy of assisting the war effort both financially and "as soldiers in the army of production." At the same time it was insisted that Government and industry should respect the rights and preserve the agreements of labour and to apply these in good faith.

Instructing the Executive Committee to approach President Roosevelt with a view to having the "Little Steel Formula" abrogated or liberalized to permit the purchasing power of both organized and unorganized workers to keep pace with the cost of living.

Approving the report of the A.F.L. executive advocating a national system of unemployment compensation; extension of old age and survivors' insurance to all persons employed by private employers and to State employees. Further, that the social security rights of persons in the armed services be more adequately

protected and that a national system of health insurance, with health services for all workers and their families, be set up.

Advocating the use of organized labour and co-operatives' organizations in the free countries to promote the rehabilitation of trade unions and democratic institutions in all the war-torn countries.

Insisting that there shall be no reduction in wages in the post-war era, and that the National War Labour Board adopt immediately a policy that would prevent employers reducing wages, unless such reductions are mutually agreed upon through collective bargaining, or by an order of the National War Labour Board, following full investigation.

Authorizing the president of the A.F.L. to take the initiative in renewing conferences with the United Mine Workers of America and the Congress of Industrial Organizations with a view to "the formation of a thorough Federation, embracing every trade and labour organization in American, organized under the Trade Union System."

Instructing the executive of the A.F.L. to take such legal, legislative, or administrative action as deemed necessary to protect the membership of international unions in the matter of collective bargaining negotiations and the right of representation before Government agencies.

The invitation of the British Trades Union Gongress ot a World Conference of Trade Unionists to be held in London, in February, 1945, was rejected.

It was decided that the A.F.L. would call a conference of charter organizations of the International Federation of Trade Unions to meet in the United States as soon as feasible, for the purpose of planning the reconstruction of the International Federation of Trade Unions. It was further decided to initiate the raising of a substantial fund to help finance the rebuilding of the I.F.T.U.

The President, William Green, and Secretary-Treasurer, George Meany, were re-elected unanimously. The Federation will hold its convention for 1945 in Chicago.

Congress of Industrial Organizations

WITH a delegate attendance of 567 representing a membership of approximately six million, the Congress of Industrial Organizations held its seventh Constitutional Convention in Chicago between November 20 and 24.

The most important resolutions adopted by the Congress had to do with the "no-strike" pledge, wage policy and the cost of living, post-war planning, employment of veterans, international labour unity, and the CIO Political Action Committee.

Report of President Murray

The report of President Philip Murray summed up the activities of the CIO during the preceding year. The main goal continued to be "the quickest military defeat over our Axis enemies, the utter destruction of Nazism, and avoiding any possibility of a negotiated peace." Until this was attained the "no-strike" pledge must be continued intact, he declared, prophesying that "history will record the remarkable self-discipline imposed by labour while maintaining its "no-strike" pledge in the face of any and all provocative acts."

Stabilization.—"The key to maintaining national unity at home," he stated, "has been the need of preventing inflation." He asserted that although wages had been "completely stabilized," equally effective action had not been taken against profits or prices. Corporations had been permitted to extract for themselves "the full benefits of increased labour productivity achieved during the war." To offset the increase in the cost of living he asserted that wage adjustments should be permitted, after which "the line should be held and firmly held." In the transition period increased wages would be necessary to assure the continued mass purchasing power necessary to encourage the production of peacetime goods.

He asserted that wartime controls could not end with the termination of the European war, since "the temptation of many industrialists to raise the prices of their products in the face of a limited supply may well cause a precipitate inflationary crisis." Stating that post-war production should not be left to the "uncontrolled whims," of such industrialists as thought of curtailing production and profiting from higher prices and lower wages, he urged a reconversion program for full employment and production, to be worked out by government in co-operation with industry, labour, agriculture and all other affiliated groups.

Guaranteed Annual Wage.—"A necessary step for full employment is the establishment of the principle of a guaranteed annual wage through American industries. There is no sound reason why industrial workers should continue to be the only substantial group in America who cannot figure their income in yearly terms but must live from week to week, or even from day to day, without knowing if they will have any income at all on the morrow," the report states. It is claimed that "the introduction of the guaranteed annual wage would be the strongest propelling factor

in assuring the demand for peacetime goods that would guarantee full production and full employment."

Manpower.—Reviewing the manpower situation since the outbreak of war, the report opposes national compulsory service in civilian life, and calls attention to "such causes of manpower difficulties as lack of housing, inadequate transportation, insufficient child care and other community facilities, and sub-standard terms and conditions of employment," which, it states, cannot be solved by arbitrary methods of compulsion.

Wages.—The report describes the efforts of various CIO unions to eliminate the "Little Steel" formula, which confines wage increases to 15 per cent above the level of January, 1941. It was stated that "the government's agencies now have conceded that there has been a minimum rise of 30 per cent in the retail price of goods and services bought by wage earners," and claimed that the actual total rise in living costs to March, 1944, was 45 per cent.

Reconversion.—A CIO Reconversion Committee had been established in June, 1944, to study "matters affecting the employment of CIO members arising from cancellations, cutbacks and changes in war production, and scheduling of civilian production." The report states that the type of planning which made the war production program successful must be applied to reconversion problems. "America must continue to use the War Production Board method of setting goals and co-operatively combining our intelligence and resources to achieve them. . . . The government simply cannot let go of our economy and expect its many parts to work together smoothly without some planning agency which equips itself with adequate information about the economy and fixes goals."

Organization.—An over-all increase of CIO membership in the United States and Canada of approximately 650,000 had taken place since the last convention. The two largest organizations were the United Automobile Workers, with 1,671 plants under contract and an average paid-up monthly membership of 1,051,455, and the steelworkers, with a total enrolled membership of 983,901.

Labour Representation.—The report states that "participation by labour union people in government agencies has come to be more accepted. . . . During the past year the problem has shifted from assent to the question of availability of CIO members to serve in as many places as were open to them." CIO members are utilized chiefly in the local, regional and national offices of four war agencies, the War Production Board, War Manpower Commission, War Labour Board and Office of Price Administration.

Political Action.—The CIO Political Action Committee had been first set up in July, 1943. Its purpose was "to educate and unite the people of America and to present to them the tremendous issues at stake in the 1944 election." United action with the AFL and the Railway Brotherhoods was sought, and was achieved in certain instances, the report states, particularly with the rank and file. The PAC succeeded in securing a large registration and a large turn-out of voters on election day, according to the report. "Candidates of both major parties were supported, depending solely on their stand on issues."

Other Activities.—The report also deals with activities of CIO committees in such fields as research and education, public relations, legislation, veterans' affairs, abolition of racial discrimination, war relief, health and welfare, Lousing, Latin-American affairs, and international labour unity.

Message of President Roosevelt

A message from President Roosevelt expressed the hope that the members of the Armed Forces would return to "a land of peace and well-being." He stated the American men and women on the production front had done "everything humanly possible" in providing weapons and supplies, and urged a continued effort with the aim of shortening the war and saving lives.

Mrs. Roosevelt

Mrs. Franklin D. Roosevelt appeared before the convention and addressed the delegates. She spoke of the necessity for study and thinking on the part of all citizens in order to meet the "challenges of peace" as the "challenges of war" had been met.

"I hope," she declared, "that we are going to educate ourselves, as citizens, to know a great deal more about our representatives than we have ever known before, to follow them up, to offer legislation in our communities, in our states, and in our nation, to watch conditions and know the whole of our communities, to work for the things in each community that we want to see adopted on a national scale."

Referring to the re-establishment of veterans, she stated that the interests of returned men were "bound up with the interests of every other citizen in this country." Continuing, she declared: "There can be no real lasting good for any veteran which is not also a lasting good for everyone in the community in which he lives. It is all very well to talk about G.I. bills for this and the other thing. I hope that we have really good bills. I hope we give educational opportunity. I hope we help in any way we can to give our boys a chance to make up what they have lost, but I hope we never forget that unless we think about what

is good for every citizen we are not really going to help them in the long run."

Hon. Henry A. Wallace, Vice-President of the United States

In his address to the convention the Hon. Henry A. Wallace, Vice-President of the United States, declared that the goal for post-war America was sixty million jobs. If this were not attained, there was a serious danger that the battle for a permanent peace would be lost also. "America unemployed means a world unemployed, and a world unemployed means violence no matter what kind of peace organization we may have."

He did not consider that the achievement of full employment would be easy. One important step would be the working out of a plan to "enable the average working man to earn $2,500 a year." This would help to furnish a market for "our tremendously productive agricultural and manufacturing plant."

Outlining the problems in achieving high wages, he continued:

> The enlightened big business man . . . . recognizes that profits due to technological progress must be reflected in high take-home wages, lower prices to the consumer, and investment in research and plant expansion. A large corporation with adequate reserve can adopt such policies on behalf of the general welfare. But a small or young concern without reserves and having no prospect of accumulating reserves under present tax laws will have to discharge many of its workers at the first breath of depression no matter how great its prosperity during the war. A new business, even though it has a big volume and makes big profits two-thirds of the time, has to pay so much of its profits to government that it cannot stand even a small shock of depression without firing its workers. Some type of government payroll insurance must be found to tide sound, young business over temporary depressions. Possibly a modification in tax laws will serve the purpose. Large, old concerns must be prevented from increasing already over-large pools of dead capital. Vital, young concerns must be given an incentive to employ more people. Little men with big ideas must be given a chance to employ labour. To meet this problem means that post-war, daring over-all concepts, must be put promptly to work. Without such concepts vigorously carried out some form of government socialism is a certainty.

Hon. Harold L. Ickes

The Hon. Harold L. Ickes, Secretary of the Interior, referring to the post-war period declared that "the productivity of American workmen is staggering," and asserted that the "backlog of consumer demands" would not be sufficient in itself to maintain employment for very long. He declared that high wages would be necessary to increase the demand for consumer goods, and laid stress also on the need for building up the nation's capital structure, both privately and publicly owned.

General Sommervell

General Brehon Sommervell, United Army Service Forces, outlined some of the difficulties in supplying the troops. "The war is entering a phase of acute specialization," he said, and declared that shortages existed in many critical items. He read a message from General Eisenhower asking for "an immediate increase in shipments, particularly of artillery and mortar ammunition, tanks and trucks." (The convention later authorized a cabled reply to General Eisenhower quoting renewal of the "no-strike" pledge and dedicating the CIO to "still greater effort" in production.)

"No-Strike" Pledge

Described by President Murray as a "sacred obligation" to those "fighting and dying" in various parts of the world, a resolution reaffirming the "no-strike" pledge of the CIO was unanimously adopted. The resolution calls for the continuance of the pledge until the "complete and absolute destruction of the German and Japanese military forces." It states that disputes must be settled peacefully through collective bargaining, mediation or disposition by the National War Labour Board and points to the task of organized labour to "prevent special groups from exploiting labour or benefiting from the sacrifices of others" through political action towards the attainment of a solution of basic economic problems.

National Wage Policy

The resolution of wage policy which was adopted by the convention reiterated the arguments expressed in President Murray's report in favour of wage adjustments beyond those allowed by the "Little Steel" formula. The resolution also called for a raising of minimum wage standards to 65 cents an hour, and for opposition on the part of the War Labour Board to the "anticipated desire" of some employers to cut wage rates during reconversion, at a time "when the need of maintaining an increased purchasing power to secure full production and full employment has become so clear."

Veterans and Seniority

During the course of the convention several speakers made reference to the provision of jobs for veterans. The point was frequently made that the interests of returning veterans were similar to those of workers at home,

and could best be served through the carrying out of a program of jobs for all, thus avoiding competition between veterans and workers for a limited number of positions.

In regard to seniority, a resolution was passed in which the CIO (1) recommended to affiliated unions to provide in their collective bargaining agreements that veterans who are employed for the first time in their plants be accorded cumulative seniority rights for the time spent in service since September 1, 1940, the date of the passage of the Selective Service Act; and (2) pledged protection of the accrued seniority of veterans who upon their discharge seek to return to their old jobs. The resolution deplored the action of certain administrative officials who have promoted the illusion among veterans that their way of securing jobs is through displacing workers with longer seniority."

The convention decided also to continue its present policy of waiving initiation fees in the case of veterans wishing to join a CIO union.

Post-War Program

Implementation of a program to provide sixty million peacetime jobs was urged in a resolution which also advocated protection for workers during the reconversion period. The resolution asked for payment of expenses for the transportation of transferred workers back to their homes, federal unemployment benefits up to $35 a week for the full period of unemployment, retraining of war workers and veterans with guaranteed maintenance allowance to be provided, and federal aid to state and local governments for public works to be used to take up the slack in reconversion unemployment. Present weekly wages should be maintained "as a minimum", and a guaranteed annual wage established. Government should assume its share of responsibility for full employment by undertaking "enterprises which are beyond the capacity of private industry." The resolution also called for expansion of international trade, and welcomed the conferences at Dumbarton Oaks and Bretton Woods.

International Labour Unity

A resolution on international labour unity referred to the co-operation which had already been established between the CIO and the Latin-American organization, the CTAL. Such collaboration should be extended in order that labour might present a united voice in the peace settlement and guarantee that Nazism be wiped out and war criminals punished.

It was resolved that:

> (1) The CIO endorses and approves President Murray's action in accepting an invitation of the British Trades Union Congress to attend both a preliminary conference in London on December 4 of representatives of the British Trades Union Congress, the Soviet Union, and of the United States, and the full conference in the same city early in January of next year.
>
> (2) The CIO supports the project of a new single powerful international labour body that shall include all the unions of free countries on a basis of equality, excluding none and relegating none to a secondary place and be capable of defending the interests of the common man.

Mr. Murray explained that the CIO had frequently met with representatives of the British Trades Union Congress and requested admission to the International Federation of Trade Unions. This had been refused on the grounds that the IFTU constitution only permitted one labour body to be represented from each country, and the United States was already represented by the AFL. No such objection had been raised regarding the forthcoming world labour conference, for which the British TUC had issued invitations to all trade unions of recognized standing. At this conference the CIO would press for future representation in a new world labour movement.

Labour-Management Production Committees

A resolution on labour-management committees pointed out that CIO locals had participated in over 1,500 of the committees. It stressed their present contribution to war production and their potential importance in the reconversion period, and urged:

> (1) That these Committees and our membership be commended for their valuable work in the prosecution of the war, and be encouraged to continue and to develop these functions on production problems as part of and an extension of union-employer relationship;
>
> (2) The Government of the United States continue to assist these Committees, not primarily in a promotional way, but as a technical service in this field of union-employer dealings.

Political Action

The convention enthusiastically adopted a resolution to continue the CIO Political Action Committee in its present form, with Mr. Sidney Hillman as chairman. Mr. Hillman addressed the delegates and reviewed the recent accomplishments of the PAC. He referred to its work of "political education" of the masses of the people through promoting consideration and discussion of important issues," and stressed the intention of continuing in this task.

Other Resolutions

Among the many other resolutions adopted by the delegates were the following:

> Approving the sale of bonds through the payroll savings scheme, urging its continua-

tion after the war as an opportunity for systematic saving, and calling upon CIO members to buy bonds to the limit of their ability for the duration.

Supporting price guarantees to farmers and stressing the mutual benefit to farmers and industrial workers of full employment and maximum production programs.

That the CIO continue its "fundamental task of organizing the unorganized into strong and powerful industrial unions," with special reference to a united drive for full employment after the war.

Urging every effort through education and legislation to combat race hatred and bigotry.

Commending the activities of the National CIO War Relief Committee.

Supporting permanent legislation for hot lunches for school children.

Asking a government program for the training of young workers, and opportunity for all young workers who qualify for entry into college to do so.

Opposing child labour.

Asking repeal of the Smith-Connally Act, and of state anti-labour legislation.

Calling for national and state legislation establishing minimum standards of health and safety.

Commending the work of CIO women's auxiliaries.

Favouring a sound forestry program, and a program to ensure year-round employment for wood-workers.

Supporting the Italian Confederation of Labour in its work of re-establishing a free trade union movement in Italy.

Favouring equal pay to women for equal work in all plants under CIO contract, and state legislation to prevent wage discrimination against women; provision in union contracts for adequate rest and lunch periods, maternity leave without loss of seniority, and group insurance including maternity benefits.

Favouring slum clearance projects and low-cost public and private housing programs.

Urging passage of social security legislation.

Favouring federal aid to states for expanding educational facilities and promoting an adult education program.

Calling for unity with the AFL and the Railway Brotherhoods in pressing for passage of important legislation.

Advocating a system of voluntary co-operation and labour consultation in the transfer of workers to strategically important war establishments, and pledging full support in manning such plants.

Calling for elimination of the poll tax and extension of the right to vote to all citizens 18 years of age and over.

Favouring tax relief to persons with incomes below $5,000 and to small business and new business enterprises.

Favouring maintenance of rent and price control.

Election of Officers

Philip Murray was re-elected as President without opposition, and James B. Carey was unanimously returned to office as Secretary-Treasurer.

Canadian Labour Papers

THE following is a list of labour papers published in Canada, compiled by the Industrial Information Division of the Wartime Information Board. The list is intended to include all the official publications of *bona fide* labour organizations, omitting political papers even though they may be published by various labour groups. Any omissions or errors in affiliation, etc., should be brought to the attention of the Wartime Information Board.

REPORT OF NATIONAL WAR LABOUR BOARD

ARISING OUT OF ITS

PUBLIC INQUIRY INTO LABOUR RELATIONS AND WAGE CONDITIONS

together with a

MINORITY REPORT

(*Printed as a supplement to the* LABOUR GAZETTE, *February, 1944*)

OTTAWA
EDMOND CLOUTIER
PRINTER TO THE KING'S MOST EXCELLENT MAJESTY
1944

Report of National War Labour Board

THE Report of the National War Labour Board, signed by the Chairman, the Hon. Mr. Justice C. P. McTague, and by Mr. Leon Lalande, employers' representative, together with a Minority Report, signed by Mr. J. L. Cohen, former employees' representative, were tabled in the House of Commons on January 28, 1944.

The reports arose out of an inquiry undertaken by the Board into labour relations and wage conditions in Canada. Public hearings were held by the Board in Ottawa between April 15 and June 17, 1943, during the course of which a considerable number of representations were made by labour and business organizations and by various other interests.

The reports were transmitted to the Minister of Labour during August, and were "carefully studied by the Government in considering modifications of its labour policy", according to a statement made by the Prime Minister on December 4.

Majority Report

To:

The Honourable, the Minister of Labour for Canada, Ottawa, Ontario.

Introduction

The Public Inquiry conducted by the National War Labour Board under the authority contained in P.C. 1141, dated the 11th day of February, 1943, was undertaken primarily with a view to ascertaining present causes of labour unrest in this critical war period; to making recommendations to the government as to the steps which it might take to bring about better labour relations; to making to the parties directly interested suggestions for the betterment of relations not necessarily involving government intervention or regulation.

The formal hearings were held in Ottawa between April 15, 1943, and June 17, 1943. Fortunately unusual interest was taken and we had the benefit of a great many briefs and a large volume of representations from many and varied interests. Since the proceedings have been transcribed and appear in print, we deem it unnecessary to detail the appearances before us.

The Inquiry naturally divided itself into two main branches as anticipated by the Order in Council authorizing it. The first had to do with the field of labour relations generally and the second with the question of wages and cost of living bonus in wartime. Our recommendations will follow the same order.

Since what recommendations we propose must flow from the factual situation which we find it is perhaps but logical that we should undertake to outline the facts as we find them including those of a historical kind leading to present conditions which, while far from happy, are not at all impossible of cure or at least betterment.

The most serious question involved at the present time is that of the right of collective bargaining. It must be kept in mind that this is a right which in a practical way has been recognized in Canada for a period of half a century. The recognition of the right has been far from universal. By far the majority of employers have resisted it over the period. Generally speaking, the great mass of employers, until comparatively recent years have employed all weapons in their power to resist and discourage the trade union movement. There have been exceptions, of course. The Canadian Railway Association and the various Standard Brotherhoods of Railway Employees can and do point to a proud record of employer and employee relationships in the field of collective bargaining over a long period of years. Many of the American Federation of Labor Unions have had an equally long and constructive relationship with employers. When it is remembered, however, that the International trade unions represent but approximately 20 per cent of Canadian labour generally it is apparent on a comparison with other countries such as England, Sweden and Australia that Canada's trade union movement has been very, very slow indeed. Until comparatively recent years we have been in the main an agricultural country. That factor, together with resistance to the movement by reactionary industrial employers, induced by the fear motive or other even more selfish motives, has served to hold in check any widespread advance in the movement of trade

unionism for quite a period of years. One would have thought that with the Treaty of Versailles after the last war and its emphasis upon labour's right to freedom of organization, the development would have been more rapid even without government stimulus by legislation. That there was such a paucity of legislation may be accounted for to some extent by the difficulties inherent in our dual constitution. It is perfectly natural that labour should have felt generally resentful in such circumstances, particularly when it had the opportunity of observing the progress made in insuring its place in society in the sister Dominions of Australia and New Zealand and later in the United States. The feeling of frustration became accentuated with the depression years commencing in 1929 when a great part of labour had to exist on relief furnished by the State on account of industry's failure to furnish even a reasonable measure of employment. In those days was fostered the aggressiveness which has marked the labour movement both here and in the United States in the last few years. The feeling of utter helplessness and hopelessness acquired during the depression years has naturally led to unorganized labour's willingness to be organized under a new regime of aggressive unionism which had its birth as a protest against more conservative leadership and a form of organization which a large section of labour felt was unable to cope with corporations adopting large amalgamation and mass production methods. The development is natural. The industrialists who condemn it must accept a large measure of responsibility for it. It was not to be expected that labour could be denied what it conceived to be its rights over a period of years by refusal to bargain with it collectively and remain quiescent, especially after its bitter experience of the depression period. At any rate, a large section of labour is militant and determined to exact its rights in the present period of large industrial expansion for war production. On the other hand, a large section of industry is equally determined to yield none of those rights.

In the struggle thus resulting there has come to the fore a new type of labour leader. He appears to be motivated by an interest which is divorced to a large degree from the long term interest of his constituents. His ambition is to organize quickly by stirring up unrest. He does not hesitate to campaign with vilification of the employer no matter how undeserved it may be. Neither does he scruple about misrepresenting what he can accomplish if his prospects will consent to be organized. His success is measured by the volume of union dues which can be collected and by his periodical report to his Congress of the number of new members acquired. Naturally such tactics result in employers adopting every conceivable device to resist union organization. When union organization is in process in a plant employers who have never before recognized the union principle, adopt the expedient of inspiring the formation of an independent company union and even financing it or they promptly make agreements with Shop Committees selected by themselves. In time of war it is a futile sort of process both ways, far from constructive. Its results are far-reaching. The majority of labour leaders and a great many industrialists do not adopt such tactics. Nevertheless, a certain type of labour organizer in his anxiety to obtain numerical results does not confine his activities to unorganized plants but extends them into plants and concerns already organized by a rival union and so results the jurisdictional dispute with unnecessary stoppages of work and production. In this time of war no body of men is entitled to greater credit for keeping the wheels of war industry going than certain groups of union leaders. However, every time the unscrupulous leader gains a concession through pressure methods including illegal strikes the lot of the constructive leader, particularly one whose union is affiliated with the rival Congress, becomes much more difficult.

Labour itself, which is fundamentally sound and loyal, suffers from a good deal of irresponsible leadership. Its total legitimate ends cannot be acquired overnight. The movement is large and it is dynamic. Recalcitrant industry cannot stop its progress. Its progress is more likely to suffer almost irreparable harm from the activities of the conscienceless professional organizer. A few years from now the names of many organizers to-day very prominent in the news will either be forgotten or remembered only too well for their disservice to the cause they pretended to promote. Others whose names are not so prominent to-day will be remembered for the very constructive and creditable part they played in a time of national crisis with great credit to the movement as a whole. A few years from now we venture to predict there will be left little if any unorganized industry.

The glib use of the term labour as all inclusive covers a multitude of sins and leads to grave inaccuracies in building up even an argument. Eighty per cent of labour in this country is unorganized. Furthermore there was considerable evidence before us that a goodly portion of it has serious objection to being organized in the International Movement. The Catholic Syndicates in Quebec are organized on an entirely different ideal-

istic basis from the international unions. Even among the international unions there are grave differences of viewpoints. See Labor and Democracy (1939 Edition) by William Green. All of these facts must be kept in mind when one attempts to deal with the labour problem in any general way. The easy use of the general term labour on which to base an argument is an old political trick ever becoming more popular. If there is to be a code of labour relations it must take cognizance of unnecessary and undesirable tactics on the part of labour organizers as well as of industry. To adopt a hush, hush attitude either way is to proceed from an unsound and deficient premise.

II—Collective Bargaining

To depart from the field of general observation, there can be no doubt that a large section of organized labour sees as the only solution to existing unrest the introduction into war-measure legislation or order, insofar as war industry is concerned, the principle of collective bargaining as exemplified by the Wagner Act in the United States. We think it can be stated also, conservatively, that a considerable part of industry, while not advocating the principle, is prepared to accept it as necessary in present conditions in the interests of industrial peace. It is difficult to gauge the view of the great majority of people, including unorganized labour, which is still by far the great body of labour in this country. As was to be expected, this large body of public opinion did not even attempt to present its views beyond, in some cases, advancing the idea that if compulsory bargaining were to become law it should not interefere with the right of workers to organize in local or shop unions as contrasted with international or national unions. Some sections also made plain their idea that no worker should ever be compelled by law or by agreement to become a member of any trade union. The same viewpoint was expressed by organizations of professional men engaged in industry.

In the field of Labour Relations, the present government announced in principle in P.C. 2685 its view of what the relationship between industry and labour should be in the interest of the war effort for the war period. That it was considered to be better for the national interest that P.C. 2685 should not be coercive is clearly indicated in the report of the conference between the Government and Labour (Labour Gazette, June, 1940), where the Prime Minister is reported as emphasizing "that it was better not to proceed by coercion if the results could be achieved otherwise." Both industry and labour to a large extent appear to overlook the fact that P.C. 2685 was an integral part of an over-all wartime policy. Prior to the passing of P.C. 2685, the first Excess Profits Tax Act had been passed to prevent war profiteering by industry and the Wartime Prices and Trade Board had been set up to control prices and consumable commodities. Prior to P.C. 2685 and subsequently, very substantial increases in individual income tax were put into effect. It was not until December, 1940, that the principle of wage control was introduced. In other words, the principle enunciated in P.C. 2685 was an integral part of the general policy. It had to work if the general policy was to work. We agree with the Prime Minister that it would have been preferable if the interests concerned could have made it work by co-operating together without compulsion; the fact as we see it, is that it has not worked. It would be idle to speculate as to where the chief degree of fault lies. The only solution that we see is to make collective bargaining compulsory under a Code providing a set of rules that will be fair to both parties and in the national interest and administered by an umpire who cannot be called in question. The guests invited to the feast under P.C. 2685 scorned the invitation. Now they must be gathered in from the streets and lanes, the highways and byways, and compelled to get along together.

Generally speaking, we have reached the conclusion from the evidence that under present war conditions it is in the national interest that the principle of collective bargaining should be made compulsory. Without going into details, any such measure must take into cognizance that the national interest is more important than that of either industry or organized labour. Since a great deal of the present unrest is founded on mutual distrust, provision must be made against abuses which may be practised by industry against labour or vice-versa. In other words, if there is to be a Code it must be one that recognizes the realities of the situation. It must be designed to eliminate as far as possible reasons for mutual distrust. Such a Code should be administered by an independent Board in the sense that its members should have no direct connection as industrialists or be officers of any labour organization.

The principles enunciated thus briefly are not too easy to put in the form of an Order in Council, simple though they may appear when stated baldly. However, there are many valuable suggestions to be found in the briefs submitted to us and the experience of other countries in the field of compulsory bargain-

ing should furnish a valuable guide. If it is felt advisable that we be consulted in the framing of such a Code we shall bring to it our best efforts and experience. For the purpose of our report we prefer to deal with the matter in principle only.

It should be mentioned, perhaps, at this stage, that there are matters of policy involving the constitutional aspects present in the situation. With these, of course, as a Board we have nothing to do. That the matter of compulsory bargaining is engaging the interests of the various provinces there can be no doubt. During the present year compulsory collective bargaining has become law in British Columbia, Alberta and Ontario. It has been in force in Nova Scotia for some years. According to the evidence before us the problem is presently in course of study in the provinces of Quebec, Manitoba and Saskatchewan with a view to the enactment of legislation. Government must make the decision as to whether it is better in the national interest that this particular problem should be left to be dealt with by the Provinces in toto or whether, as a war measure and for the war period, there should be framed a general Dominion Code applying to war industry properly defined no matter where situated. At any rate, care should be taken to see that there is no over-lapping. Another view is that there should be a Dominion Code to be made applicable in those Provinces where compulsory collective bargaining is not provided in law at present, and not applicable to such provinces as already have such a law, and to cease to be applicable in such provinces where compulsory bargaining Acts are passed in the future. It is our own view that there should be enacted or provided by Order in Council a Dominion-wide Code as to compulsory collective bargaining, applicable to war industry and that the provinces should be left to deal with non-war industry within their own confines. As long as some of the provinces refrain from enacting compulsory collective bargaining legislation we believe that as far as war industry is concerned the simple and direct method is to have the subject dealt with for the war period by Dominion Order in Council under the War Measures Act. An Order in Council covering only war industry properly defined will tend to ensure against overlapping.

The above deals with the matter to the point where a bona fide collective bargaining agreement has been concluded. The next problem is how should disputes arising during the term of an agreement, or disputes between employer and employees where there is no formal agreement, be dealt with. In this connection we assume, of course, that disputes as to who is the proper bargaining agent entitled to represent the workers in any unit (the term is used to cover craft unions and industrial unions as well) will be dealt with under the compulsory Bargaining Code. At the present time these disputes, as well as any others, are dealt with under the Industrial Disputes Investigation Act, supplemented by various Orders in Council. It is summarizing the evidence before us conservatively to say that this method of dealing with disputes in the conditions that exist today is the source of much and almost universal dissatisfaction. The requirement of a strike vote before the machinery of the I.D.I. Act can be invoked meets equal condemnation from labour and industry. The long delays and complicated methods of having surveys done by commissioners and Boards of Conciliation are the object of heated criticism by both. It seems to us that in the national interest in time of war compulsory arbitration is what is required. Both labour and industry appear quite prepared to accept the principle as a necessary measure of discipline in the war interest as long as it is carried out by an independent body with despatch and fairness. In other words, no matter what provision is made for the settling of disputes in a collective agreement or where there is no collective agreement the parties, if unable to effect settlement, must submit the matter to an arbitration board which might be the same or another division of the Board set up to administer the Collective Bargaining Code. The decision of a Board must be accepted as final. Failure of such acceptance, if accompanied by a strike or lockout action, must be met by appropriate sanctions in the way of fine or imprisonment or both preferably under the Defence of Canada Regulations. Obviously such a method of dealing with disputes involves the suspension of the Industrial Disputes Investigation Act for the war period as well as the revocation of some existing Orders in Council. It may involve also the setting up of panels of such a Board in the different provinces and an associated mediation service as well. Prompt action in settlement of disputes is the desire of all parties.

III—Labour-Management Co-Operation

Before going on to deal with the question of wages it may be appropriate at this stage to discuss certain questions raised by labour in quite an emphatic way. To anyone with an eye to see and an ear to hear it must be clear that labour, more particularly organized labour, is suffering from a sense of frustration as far as the war effort is concerned. It

wants to take a responsible part in production, the planning of production and the revising of planning when the same becomes necessary. As far as production is concerned, that is a matter between labour and industry. The principle of the Labour-Management Committee is one widely adopted in England and becoming more and more prevalent in the United States. To some extent it has been recognized here, particularly in the aircraft industry and in some crown companies. However, there appears to be a tendency on the part of management to fear encroachment on its functions and to be somewhat scornful, and certainly dubious, about labour's ability to take a constructive part. Such an attitude reveals a failure to appreciate the realities of the situation. Production depends as much on labour as on management. What is needed for war production is labour-management co-operation, call the instrument to attain it what you wish. Toleration and patience are required. Labour-Management co-operation in production should not be confused with grievance procedure or committees. Management would do well to promote it, foster it and guide it. To refuse to have anything to do with it is to fail to understand the world we are living in and to be stubborn. Stubbornness merely begets stubbornness, and production suffers.

Generally speaking industry in Canada has adopted a rugged individualistic viewpoint to the problem of labour relations. This is a viewpoint which appears to be outmoded in the light of modern conditions. In the Scandinavian countries Employers' Associations were an early development. In England the same development has taken place. There the various employers in a class of industry associate together to deal with the labour union concerned on the mutual problems of labour relations. In fact in many classes of industry general joint councils representative of employers and labour have been created to establish general policy in labour relations in the industry. In Canada we have had such a development in the construction industry. It is a development that could be widened in this country with great benefit to both industry and labour. We feel sure it would go a long way to eliminating mistrust and unnecessary friction which has a tendency to be emphasized when the bargaining takes place in too narrow a field. Indeed such a policy might well be extended eventually to a general national Council of Industry and Labour for the purpose of research and development of labour relations policy on a national basis.

IV—Labour Representation on Government Boards

The questions of production planning and revision of plans concern government as well as industry. Labour feels it is entitled to representation on Government Boards dealing with production. We think so too. Fine technical qualifications are not the only requirement for direction of production. Actual production is as much the problem of labour as technical planning is the problem of someone else. The executive end can well be the problem of both, and labour has an important place in a well-rounded out economy. Besides labour representation insures an understanding, a means of communication to the ranks, of the importance of the work which is often singularly lacking. Labour feels as well that it should have representation on Boards whose work generally affects labour's interests. We feel so too. A great deal of misunderstanding and confusion in respect of the principles involved could be overcome to a large degree if labour were represented on such Boards. Then again, labour is uneasy about cessation of production in certain lines, uneasy as to what is going to happen to it, or where or when or whether a place is to be found for it in other activities. If labour had some advance notice, through its own representatives, a much better feeling would prevail and more confidence in Government would result. To give labour representation on such Boards as local selective service boards and deny it representation on policy-making boards is only to pay lip service to an important principle.

V—Wages and Cost of Living Bonus

As to wages and cost of living bonus, generally speaking, labour does not understand or fully appreciate government policy in respect of price control and supplementary wage stabilization. It feels that the sacrifice imposed upon it is disproportionate, and a considerable proportion of it is dubious about the necessity for stabilization of wages. There are exceptions of course among labour leaders, but not too many. It would appear that no adequate attempt has been made by government or its agencies to educate the common man to the value or objective of the policy from his viewpoint. It is our view that no time should be lost in such a program of education. The impact of income taxes on individuals and on corporations is not understood. Loose statements regarding war profiteering by executives of corporations and by corporations are made in such a man-

ner as to indicate a general conviction that there can be no question about the truth of the statement. No doubt the statements will continue to be made and will carry conviction and be taken for granted until some real effort is made to make clear the real situation. Such a process of education requires a simplified method of making plain the impact of income taxes and, especially in the case of corporations, excess profits taxes. Labour has a general uneasy feeling that it is being deceived. It should be undeceived by Government making the real situation simple, plain and easy to understand.

Generally speaking, labour advances the argument that there is no logical or necessary relationship between wage control and price control. It argues that wages could be left to collective bargaining and that if purchasing power is thus unduly enhanced it can be taken up by a more rigid and extended rationing system, by taxation, compulsory savings and investment in government securities. Naturally, there is merit in the argument, but it seems plain that if the controls were fully relaxed prices would soar so rapidly and rationing and compulsory savings be so far behind that the harm would be done and the wage-earner find himself in the worst possible position in the community. That very problem is one that appears to be concerning the United States and there labour is advocating rolling back prices to what they were some time ago. In the United States labour appreciates the danger of inadequate price control. In this country, where price control is reasonably adequate and on the surface appears to be going smoothly, labour perhaps is not quite as appreciative of what is likely to happen to it if price control were to break down as the result of an over-increase in wages. The relation between commodity prices and wages is not merely founded on logic; economics is a nearer relation than logic. When wages go up, either costs go up or they do not. Anyone will admit the proposition that increased wages do not necessarily mean increased costs, but our judgment would be that in a very great number of cases they do. With our limited knowledge of economics and the country's finances we should not care to take the responsibility to recommend the abandonment of wage control. It is our considered opinion that it is in labour's best interests to see that it is maintained, although, perhaps, with some modification. If it were to be abandoned some considerable time would have to elapse to enable new methods and extension of existing means to absorb enhanced purchasing power. It seems clear to us that the Government, having once adopted a policy of wage control it would be highly dangerous at this stage of the war in the interests of labour to effect any complete change-over.

Much emphasis has been placed by labour on the moral and political justice of establishing a floor to the wage control policy. Some organizations advocated a minimum wage of 50 cents per hour. The consensus of labour opinion, however, was more conservative. It advocated that there should be freedom of collective bargaining without control in the case of workers earning up to 50 cents per hour. There is a great deal of merit in such a proposition. Statistics as to the amount of money required for bare necessities in an average family clearly demonstrate that the head of a family on a wage of 50 cents per hour for a 48-hour week ($24.00 weekly) cannot provide his family on the standard necessary for normal health. Rigid control at such a level of earnings in the case of a family is hardly defensible, politically and morally. Even in a war economy a policy which consigns human beings to economic serfdom when a large portion of the community escapes it is imcompatible with the ideals on behalf of which we are waging war.

The question is what should be done about it. One solution would appear to be to accede to labour's proposal to leave workers earning up to a rate of 50 cents per hour free to bargain without controls. Such a solution would be based, however, on the assumption that all such workers are heads of families—a completely unwarranted one. It must be obvious that with employment figures as they are now that in such families there is frequently more than one earner and more than one cost of living bonus being paid. On the basis of the case developed before us, families in such a position would become the beneficiaries of relief primarily required for the wage-earner who is the sole support of his family. Another answer would appear to be a system of family allowances to be paid for by the Dominion Government. There can be no doubt that the administration of such a system will present complexities and complications. However, it probably can be done. The family allowance could be made available to the worker who is head of a family for each child below the age of 16 years, the allowance to be on a reducing scale for each subsequent child. It may be that Government will find it too complicated to introduce such a system. If that be the case then we recommend that all workers earning less than 50 cents per hour base wage be allowed to bargain free from any Governmental control. In other words, we prefer that workers earning 50 cents per hour or less should be left free to bargain

without controls. However, if such a recommendation would, in the opinion of the Government's financial advisers, place too great a burden on the price ceiling, we recommend in the alternative a system of family allowances on the principles enunciated above. We are aware that family allowances usually find their place in a general program of social security, rather than as a part of a wage control policy. But substandard wages are indefensible at all times; and if the authorities having the responsibility of policy with regard to fiscal matters and cost-price relationships do not see their way clear to remove during the war emergency the control of wages below the level of 50 cents, then we can think of no other solution for the case of the head of a family who is receiving a substandard wage, than a system of family allowances.

We have found a good deal of dissatisfaction among workers with respect to the cost of living bonus. When P.C. 7440 first established this principle, payment of the cost of living bonus as far as the employer was concerned was to be on an optional or voluntary basis. In other words, it was recommended that if there were to be wage increases, these should take the form of a cost of living bonus. When P.C. 8253 was passed, the only cost of living bonus which became mandatory was one already being paid or one due by reason of the increase in the cost of living index number above the index number for October, 1941. The National War Labour Board was also given the power to award further cost of living bonus based either upon the cost of living index as at August, 1939, or at the date of the last general wage increase, whichever was later. Evidently the alternate base was established on the unwarrantable assumption that any increase given after August, 1939, was solely to indemnify the worker against increased living costs. In the result there is a widespread variation in the amount of cost of living bonus which the worker and his family simply cannot understand. It is understandable in some cases where the assumption was correct, but otherwise we find ourselves in the same perplexity as labour. Labour's proposed solution is to level the cost of living bonus up to the high point. That is to make it uniform based on the rise from August, 1939. Such a solution would be convenient, but would undoubtedly work a hardship on many employers besides which it might well be unacceptable to large classes of labour like the railway employees, who consider their cost of living bonus at the maximum as the quid pro quo for their agreement to forego wage increases for the duration of the war. The solution is not easy. One must try to find the least harmful answer. Ours is to convert all cost of living bonus payments into the base wage rate. We recognize that employers may object from the point of view of possible post-war adjustments of wages, but in the circumstances we feel it is the best answer to a rather knotty problem. If the principle of the cost of living bonus is to be continued from a new base, consideration might be given to making it payable only to workers below a certain level of earnings.

Labour has much criticism of the method of computing the present cost of living bonus. It believes that the cost of living index as compiled by the Dominion Bureau of Statistics is not a fair criterion, and that it is antiquated. Furthermore it is of the opinion that the methods of securing information as to cost of living changes are loose and inaccurate. Also it contends that the weighting of the various components is unscientific and fails to reflect the relatively greater food costs to low wage earners. It is able to make out a good case in respect of many of the items such as food and rent in different localities. We understand that the index is in process of some overhaul at the present time. In this connection we suggest that it should not be assumed that the original base is correct. Times are changing rapidly. Prunes are, perhaps, not so popular or available as they once were. Health standards are improving, or should be improving, and houses at certain rents provide little comfort if they are not available. It may be that if the cost of living principle is to be maintained a fresh start can be made with a more up-to-date base; this à propos of our recommendation that the present cost of living should be converted into the base rate. It would be advisable to have labour represented on any body charged with the responsibility of setting up a new base.

In a general way, from the point of view of form and any intelligent understanding of what it means, P.C. 5963 is in need of a general overhaul. No doubt it was compiled under difficulties and pressure. In our opinion it can be much simplified. A good deal of its content is unnecessary. It can be revised in much more logical fashion. The number of sections can be reduced and its definitions can be made less complex. Generally speaking simplification is in order.

In principle, as to wage adjustments, P.C. 5963 may express what was intended, but in practice it has not achieved its purpose. In its administration on the principle of comparable jobs in the same locality or a comparable locality, the general result has been a continuing upward revision of wage-rates.

As adjustments are made, new norms of comparison are set up. Regional Boards are human and prone to generosity. This Board is open to the same accusation. Wage control up to this time has been far from inviolate. It is by no means perfect. When it is recalled that up to the end of February 1943 over 83 per cent of the applications for increases or the setting up of new classifications were made by employers and over 11 per cent were joint applications, one cannot be too critical of labour's activities. Employers in the excess profits tax bracket have not entirely forgotten that fact in erring on the side of generosity. Moreover, various Boards are inclined to be casual where authorization only is asked or where the parties are in agreement. What should be done with Section 25 is difficult to say. It may be that the Board should be granted power to adjust gross inequalities and injustices without reference to the locality principle. It seems to us that the present process cannot be allowed to continue indefinitely if price control and wage control are to survive. On the other hand, we are of the opinion that the principle of the incentive wage has not been emphasized sufficiently. At this stage of the war with a pronounced shortage of manpower a most important compensating factor should be incentive wages based on production. Incentive wages should be left to the general discretion of the National War Labour Board and the Regional Boards. So also should be left the right to authorize or direct changes in working conditions which have the effect of directly or indirectly increasing wages. The Boards should have the power to reduce wage rates; it is conceivable that in order to cure maladjustments or inequities in the wage structure of an employer or of an industry, a reduction of unsound rates may be necessary.

In discussing the overhaul of P.C. 5963, we are of the opinion that the penalty sections need recasting and extending. We have observed cases of where strikes are threatened if the Board does not render a decision favourable to the Union concerned. There has been recently at least one case of a strike to compel government action to alter existing laws. There are also cases of where strikes have been called where the decision has not been favourable. Union organizers have been known to forward organizational activity on the assurance of higher wages. If the work of the Boards is to be effective then penalties must be found to eliminate this kind of agitation. These might also be dealt with under The Defence of Canada Regulations.

VI—Women's Employment

Another question which is relevant to the subject of wages and cost of living bonus is wages to women workers. This question was raised in several of the briefs placed before us. The Orders in Council dealing with wages, P.C. 7440, P.C. 8253, and P.C. 5963, do not deal specifically with women's wages, although P.C. 5963 does deal with the cost of living bonus payable to women workers. As the law stands at the present time, there is no present time, there is no distinction as to wages between sexes. In other words, wages go with the classification of workers, be they male or female. With a great number of female workers absorbed in industry the question is by no means a minor one. Certain of the labour unions subscribe to the principle of "equal pay for equal work". The slogan is a little too general. Results and costs have a good deal of relevance. Our study of the question leads us to the conclusion that the solution worked out in Australia is the sensible one. The Australian Act proceeds from a practical and factual approach. There a separate Board is set up composed of a Chairman, one representative appointed by the Commonwealth, one on the nomination of another employer and two on the nomination of labour. This Board has complete jurisdiction in the matter of women's employment. It deals with each application on its merits after argument by employer and trade union involved, if any, and in each case sets the scale of wages to be paid women and the period or periods of apprenticeship, if any. It is our considered view that it is unwise to deal with the question on any arbitrary rule basis because in certain lines of production we believe that the average woman is equally or more efficient than the average man. In other lines, the women workers, perhaps, cannot hope to equal male efficiency. In Australia the wage paid women doing work ordinarily done by men can in no case be less than 60 per cent of the man's wage. At any rate we feel that the matter should be dealt with as in Australia. The Australian Act can well serve as a guide for any Order in Council which may result if our recommendation is implemented. Such a Board should of course have the power to decide whether or not women should be permitted to work at all in a particular plant or industry.

VII—Income Taxes

There are some other matters which are contributing to unrest and absenteeism which perhaps do not come directly in our field but rather in the field of income taxation. With

the question of the amount of taxes to be levied we do not presume to offer any suggestions. We feel that is outside the scope of our inquiry—strictly in the field of the Finance and National Revenue Departments. However, we have not the slightest doubt that the methods of deduction presently employed are causing a general tendency to shirk and avoid overtime work. It must be remembered that income taxation now is directly affecting a large body of workers who are unaccustomed to payment of the tax. Under present deduction methods the worker, naively if you like, reaches the conclusion when he examines his net pay cheques, that the greater part of his return for overtime work goes into income tax. Hence he shies from overtime work and extra shifts. There is no use arguing he is wrong. To him his net pay-cheque is a stronger argument than any other. In this connection, in the interests of production, we recommend that a change in the methods of deductions be instituted which will dispel the illusion that the last dollar in the pay envelope is taxed higher than the first. Our survey leads us to the conclusion that the question is more serious than what may be thought generally. The additional production which should be achieved by following the recommendation we think will compensate amply for the trouble involved in making a change over from present tax deduction mechanics. In the same connection we find that a large proportion of the workers are extremely sceptical about the amount of compulsory savings being deducted. They have no tangible evidence by way of receipt that they have a credit, so to speak, with the Government. It may be that after an income tax year's experience, the dissatisfaction will disappear. However, we do think the National Revenue Department should give some consideration to a method of giving interim receipts or authorizing employers to give them at set periods, subject to subsequent audit, so that the worker will have some tangible evidence that he has a credit even though it may be a contingent one.

VIII—Recommendations

Naturally, it is not to be expected that our report will be entirely approved by any particular section. However, if it is kept in mind that we are only at a certain stage in a rapidly moving panorama of events, both labour and industry may tend to be patient and assist in mutual effort to carry any developments suggested by us into further stages of betterment. This is a time of sacrifice. No one is expected to better his position out of the war effort except insofar as to enable him to come up to a reasonable minimum standard. Both labour and industry must submit themselves to harder discipline, law and order in wartime. Strikes only serve to move the clock back and obstinacy on the part of industry to reasonable demands stops it working. If the recommendations set forth herein are implemented in whole or in part then it must be kept in mind that there is still the important problem of administering any Code or Codes that may result. Administration is just as important as any Code. Both labour and industry are entitled to expect impartiality, despatch and firmness in the solution of their problems. A mere report is no effective guarantee of any such qualities. These must be brought into play in the resulting process of administration.

For the purpose of easy reference our recommendations may be summarized as follows:

1. *In the Field of Labour Relations*
   - (*a*) The setting up of a National Labour Relations Board to administer a Labour Code providing for compulsory bargaining. Such a code should provide proper safeguards against abuses by either labour or industry. Penalties for infractions on the part of either industry or unions could be dealt with under The Defense of Canada Regulations.
   - (*b*) All disputes arising during the currency of collective agreements or where there is no formal collective agreement to be dealt with by compulsory arbitration under the jurisdiction of the National Labour Relations Board, with agencies set up in each province and with mediation services attached. Strikes and lockouts to be outlawed and appropriate penalties provided under the Defence of Canada Regulations. Suspension of the Industrial Disputes Investigation Act until the proclamation of peace and revocation of Orders in Council inconsistent with the above.
   - (*c*) The above to be applicable to war industry only according to proper definition.
   - (*d*) Subsidiary to the above but without any new legislative action by the Government, the following:
     - (i) The setting up of Labour-Management Committees in all industry including Crown companies.
     - (ii) Labour representation on all Government Boards having to do with war production and on Boards dealing with matters directly affecting labour as such.
     - (iii) The establishment of employers' Associations by industries with a view to setting up joint Industry-Labour Councils to deal with matters of policy in the field of labour relations in a given industry. It is hoped that this will lead eventually to the establishment of a National Council composed of employers and labour to deal with labour relations

policy generally and make recommendations to the Government as to proposed changes in legislation.

2. *As to Wages and Cost of Living Bonus*

(*a*) Continuance of National War Labour Board and Regional Boards in substantially the form presently existing but with different personnel if deemed advisable.

(*b*) General overhaul of P.C. 5963, with particular objectives as follows:

(i) The establishment of a floor of 50c. per hour up to which there shall be no control or in the alternative the establishment of a system of family allowances payable by the Government to heads of families falling in such category as described in the body of the report.

(ii) The amendment of Section 25 so as to limit the Board's jurisdiction to increase wages to the rectification of gross inequalities and injustices without reference to the comparative principle. Incentive wages and changes in working conditions in the interest of production should also be within the Board's jurisdiction. The power to reduce unsound wage rates should also be given.

(iii) Conversion of all cost of living bonuses into the base rate, and discontinuance of the present principle of cost of living bonus or, as the Government sees fit, starting of cost of living bonus from a new base on a revised cost of living index.

(iv) Appropriate penalties for infractions of the Order or its spirit under Defence of Canada Regulations.

(*c*) The establishment of a Women's Employment Board to deal with women's wages in industry along the lines of The Australian Act.

(*d*) Education of the public on the government's wartime fiscal policy, particularly as to how the worker and primary producer are affected.

3. *Income Tax Deductions*

Change in methods of income tax deductions so as to put deductions on a more level basis and dispel the prevailing impression that overtime pay is taxed at unduly heavy rates. Interim receipts on some basis to evidence compulsory savings credits.

IX—Commentary

It was hoped that the Board would be able to arrive at a unanimous report. Since the preceding draft of this document was prepared we have received Mr. Cohen's dissenting opinion. Certain expressions and language in that opinion make it necessary for us to comment.

In the very first paragraph of Mr. Cohen's report it is described as an *independent* report. It may be that no innuendo was intended but on the other hand it could be interpreted quite logically to contain the suggestion that our report is not an independent one but one that is dictated or influenced by the government. It is perhaps unnecessary for us to enter any formal denial. Not only is our report completely independent of government dictation but it is also completely free from any bias in favour of any particular interest.

If our report is not to be deemed independent because it takes serious cognizance of government fiscal and economic policy in time of war then we cheerfully plead guilty. We are very seriously concerned with the effects of inflation on the life of the worker. We can conceive no greater disaster that could befall the workers of this country than the collapse of the price ceiling particularly if it were to take place shortly before or shortly after the peace is won. That the price ceiling is in a dangerous position must be inferred from the evidence of Mr. Gordon. We prefer to assume that Mr. Gordon's evidence is not only sincere but also that he is not mistaken.

Believing as we do that there are inequalities and injustices in the existing wage structure—we have so stated in our report—still we are quite convinced that in labour's interest in wartime it is most unwise to gamble recklessly with the price ceiling. That is why we propose the family allowances in the low wage area as an alternative to a floor and that is why we propose the present solution of the muddled cost of living bonus by merging it in the base rate. To pay an extra 25 cents per week to all labour means a raise in the yearly wage roll of between $28,000,000 and $35,000,000. To multiply that figure several times to give effect to Mr. Cohen's proposals staggers us to a greater extent than it does Mr. Cohen. If we were solely inspired by the motive of present and immediate popularity with labour we might exercise less caution. If the price ceiling collapsed as a result we are afraid that in the ensuing misery the popularity would collapse as well.

We have no idea of invading the income tax field to recommend special class concessions. The Commissioner and the Government are already apprized of the situation with respect to overtime work and cost of living bonus. We do not deem it necessary to prepare special exhortations to labour, industry or the Government; nor do we presume to formulate a definition of the "national interest".

X—Conclusion

In closing we wish to extend our thanks and appreciation to all of the various labour and

industrial organizations for the free, frank and candid way in which they placed their troubles and suggestions before us. It was obvious that all were striving to be helpful. We are appreciative also of the helpful memorandum prepared for us by the staff of the International Labour office. We hope some tangible good will result from all this earnest co-operation and our own modest efforts. The Inquiry was timely.

All of which is respectfully submitted.

NATIONAL WAR LABOUR BOARD.
(Sgd.) C. P. McTague, *Chairman.*
(Sgd.) Léon Lalande, *Member.*

Ottawa, August 19, 1943.

Minority Report

To:

The Honourable, the Minister of Labour for Canada, Ottawa, Ontario.

Section 1—Introduction

1. As my colleagues have pointed out in the Report to which they subscribe, the National War Labour Board has conducted and completed its Inquiry. The object of the Inquiry, as announced at the opening session on the 15th of April, was as far as humanly possible, to get to the root of matters which create unrest, thereby retarding production and injuring the welfare of the nation. Unfortunately, we are not in complete agreement, either as to the nature of the problem or as to the specific Recommendations which should be made. I am therefore submitting herewith an independent Report on the matters covered by the Inquiry.

Section 2—The National Interest

2. The subject of the Enquiry, "wage conditions and labour relations", involves a consideration of practically all of the factors which increase or lessen the productivity and effectiveness of the nation. The question must be considered in relation to the war, and more particularly in relation to the special characteristics of the war in which we are now engaged.

3. The chief characteristic of this war is the complete dependence of the military forces upon the economy of the nation and the soundness of the home front. The kind of war machines required places a premium upon the acquisition of heavy industry and impels the discovery of new methods and materials which can have a tremendous post-war significance. This has made a complete new industrial development necessary, particularly in Canada, which only in recent years developed from a relatively agricultural economy to a fuller industrial economy. To a great extent, existing industries have been diverted to military needs with little delay or cost, as for instance the automotive industry. Generally speaking, and to an extent of which the public is hardly aware, new industries have been and are being created at great cost and effort. These new industries also put new life into, as well as impose new burdens and responsibilities upon, existing industry. In the process, the nature of economic activities has been transformed and the productive capacity of the nation greatly enlarged.

4. These new industries, and the revival and more intensive use of existing industries, have been hammered out by meeting the needs of war. They have been made possible to a great extent by the use of public funds or credit or public assistance of some kind. Their immediate purpose is to secure the needs of the military forces and until victory is won that need is paramount. But it is idle to ignore the fact that the complete economic transformation which has thus been brought about cannot, and will not, be discarded when the war is at an end. Hundreds of thousands of men and women who have been drawn into industry and given special training, as well as hundreds of thousands of workers who were formerly in industry, but generally unemployed or underemployed, have now found that a nation at work, impelled by the war needs, can employ everyone and even tremendously increase their productive ability. It is idle to assume that Canada could support itself or function if it demobilized this vast industrial army, or attempted to return them to the casual activity or to the unemployment or underemployment which was formerly their lot.

5. The same can be said of the enormous equipment of plant and industrial capacity. This plant and capacity is so extensive, so new and challenging in its potentialities, that the basis has been laid down for a new Industrial Revolution. The Hon. Mr. Howe, speaking in the House of Commons on the 11th of June, 1943, after an astoundingly illuminative report to Parliament on the productive capacity of the nation, stated as follows:—

"Canadian industry has developed remarkably under the stimulus of war. Never again will there be any doubt that Canada can manufacture anything that can be manufactured elsewhere."

This complete transformation of Canada's economy, and its relation to an internationally industrial world, is here to stay and will continue to operate and develop further. Were the war to be concluded to-morrow we could not ignore for a moment, if the nation is to prosper, the vast industrial transformation of the country or the role it will have to play in a new world economy.

6. Just as Canada's role in a world at war is shaped by the war and by the particular characteristics of the war, so will Canada's role in a world at peace be shaped by the peace and the particular characteristics of that peace. Canada at war is really framing and equipping a Canada at peace, with the ever-pressing fact that Canada at peace must not only keep employed those now working, but must provide work for those now valiantly fighting on the various war fronts. This has profound implications, if we are to estimate correctly the urgency and magnitude of the problems, and at the same time the opportunities, which face us.

7. The aim of the Axis powers in this war is economic effectiveness and self-sufficiency by world domination—slavery on a global scale. The aim of the United Nations is a coalition of peoples, each supplementing and aiding the other while at the same time benefiting from the special capacities and contributions of each. Canada will either play an active part in this process of economic collaboration and establish a basis upon which it will continue and expand the industrial development of recent years or she must fall into the abyss of poverty, on the edge of which our people has been tottering for decades. Canada will either work with or work against history. To work with history, assures us active participation in a fruitful future. To work against history—to turn away from participation in the economic activity and collaboration which must follow the victory—is to isolate ourselves economically. Such a course would condemn Canadian workers and farmers to unnecessary poverty, freeze the size and limit the potential development of our middle classes, and confine industry to small scale operations with all the uncertainties thus entailed. Our effectiveness in the war depends upon the complete integration with which we use our transformed economy. By the same process, we equip ourselves to play a role in the post-war period as important as that we are filling in the war period.

8. There has been an inclination in Canada to drift on these issues and to take it for granted that just as the war will be won by the armed collaboration of the United Nations, with our own fighters playing a noble role, so, somehow, events will make us secure in the peace. That doctrine is false. It is treacherous to the destiny of Canada. It can spell the doom of our future ability properly to maintain ourselves. Let there be no mistake, the role and place of Canada in an integrated global peace economy will be determined by the fitness and ability we demonstrate in the global war economy. Apprenticeship for the future is now. There will be no time later for schooling.

9. The national program now, is production for war. At the same time, the force of history will enable and require us to use that capacity for our national effectiveness in peace. This constitutes the national interest, equipping ourselves to win the war and thereby equipping ourselves to function properly in the peace. It is a program, and the only program, which can enable the employment of all, which can enable all classes of the population to contribute and use their resources, experience and ability, and which can give agriculture a full partnership within a prosperous nation. It can enable Canada to function effectively. It can enable our capital and labour—the full utilization of our economic and our human resources, our talents and energies—to play a significant, a constructive and a national role, now in the war and later in the post-war world wide economy. It is only by reference to the national interest, thus defined, that we can ascertain the rights and obligations of all of us and discern that which is good or bad, wise or unwise, operative or outmoded.

10. Artificial restraints, avoidable and therefore unnecessary, upon our economic—and hence upon our military—effectiveness, are clearly against the national interest of all. The two fronts, the military front and the home front, are inexorably related. Just as military defeat can mean poverty and enslavement for the whole of Canada, so economic and domestic weakness can result in military disaster. The basis for a strong home front is a genuine national program making possible the fullest utilization of the nation's capacities. However, this is an active not a passive principle. It is not made possible by a passive attitude to forces which make for maximum national capacity to produce and function. It is secured only by enabling and evoking the wholehearted and spirited participation by all of the people in fulfilment of the national need. These standards, once achieved in the war, will continue in the peace, but only if a secure basis is provided upon which all elements of the nation—industrial, commercial and agricultural, management as well as labour—are able to make their full contribution to the national welfare.

11. A prime requisite is recognition of the fact that expressly in a war economy, human resources, particularly men and women who are trained, constitute the nation's most expensive expendables. The chief resources of a nation are its resources of labour power. They provide the very base upon which the nation must construct its program. To use that labour power unwisely, to reduce the energy, health or skill of workers and consequently their capacity for efficient production, is a policy which if continued can only have dire results for the nation. The human resources of a nation adequately equipped, enabled to exert their utmost and to co-operate fully in the work of the nation, is the guarantee and the only guarantee of the nation's effectiveness and its productive future.

12. Full and effective mobilization of our resources depends not only upon the physical welfare of our workers, basically important as that is, but also upon their morale and their sense of security in relation to the whole national program. The day has gone when the public, or any section of it, can be a mere onlooker while affairs of importance are transacted upon the national stage. Modern needs—industrial and otherwise—require the full participation of the whole people, actively and enthusiastically. When, instead of participation, workers are met with a policy of exclusion—whether from the deliberations of industry or government—when, instead of participation, workers are met with a policy which ignores their just claims, to say nothing of the benefits which could accrue to all from co-operation with labour and from a sound labour polity, the national interest is damaged. It is most natural that the worker will measure general statements about the war and about the absolute importance of being conditioned by war needs, by the degree with which his own fundamental rights and interests are being scrupulously respected. The failure to protect these rights, the denial of just claims, exclusion from active participation within and with industry, and within and with government, leads the worker inevitably to doubt all statements about the war and the sincerity of those who make them. The National interest is thus undermined.

13. It must not be forgotten that the worker acutely remembers the want and suffering which he and his family have undergone during the last twenty-five years. To him, it is a tragic contradiction that the years of peace spelled depressions, mass unemployment, starvation relief, and a callous indifference to the waste of human lives; while a ravaging war brought work and opportunity and a miraculous display of the productive powers of the nation. This contradiction must be eradicated if we are to secure maximum war effort, if we are to organize the nation as it marches through the war with *its* needs, to peace with *its* needs. The contradiction can only be eradicated by concrete action now. The "status quo" can in no way be given a mantle of respectability, let alone reverence. More parliamentary committees on post-war planning, no matter how well-intentioned and sincere, will not remove bitter memories of the tragic past or replace them with optimistic hopes about the future. The war effort itself has demonstrated to all, whether engaged in industry, commerce or agriculture, that given the will there is a way. The Canadian people have drawn their own conclusions from their experiences in the course of this war. They are convinced that the question is not one of technique of government or production but one of determination—determination to realize for the people of Canada the four freedoms of the Atlantic Charter. It is from this broader standpoint, as well as the technical questions related thereto, that we must consider the problems of the Inquiry. We are not concerned only with correcting specific wrongs and rendering justice where error or selfishness has resulted in injustice or maladjustment. We are concerned with convincing the people of Canada about the danger to the nation presented by the war and the reality of the objectives which will crown the peace. It is only by this means that the war, and everything related to war effort, will guide and discipline personal and group conduct.

14. This involves the task of making clear to all that the transformed economic role of Canada will be used for the benefit of all and to enable the utilization of all of our resources, capital and labour, industry and agriculture, trade and commerce. It involves the task of planning a national program which will make available for the common welfare of the country as a whole the constructive contributions of all sections of our people and the full utilization of our capital resources and facilities. The achievement of this program now for war, later for peace, and nothing else, constitutes the national interest.

15. The Inquiry was instituted because there appeared to be matters in the field of labour relations and wage conditions seriously affecting the national interest. The evidence has more than emphasized the pressing need for a sound and comprehensive labour policy as a prime factor in national and productive effectiveness. This is reflected in the anxiety

manifested by so many who appeared at the Inquiry that standards of citizenship be established and that concrete plans be worked out enabling these standards to be applied. It is obvious that in the main they desire that a new measure of national interest be propounded related to present-day needs and those of the immediate future. Many questions were put forward at the Inquiry, all of them important to the war effort. The more important of these, and appropriate Recommendations, will be dealt with in this Report.

Section 3—Collective Bargaining, Union Recognition and Unfair Labour Practices

16. The first question which presents itself for consideration, and which indeed is associated with many other problems is the question of the organization of workers for collective bargaining to recognize and deal with these organizations so that through them workers can play a constructive part in the national effort.

17. It is important to understand from the outset that the concept of collective bargaining implies much more than the mere mechanics of management sitting down with union representatives to arrange or discuss a specific contract. That is its first task: to assist the worker as much as possible at the basic point which determines his ability to function as a member of society, namely, his access to food, clothing, rest and shelter. But that process only begins the achievement of the ultimate objective of collective bargaining, which is to secure for labour generally the right to participate, and, by trade unions, the means of participating, in shaping the pattern and progress of society. If we accept this concept of collective bargaining it becomes clear that we are not dealing only with the rights of workers but with the question of whether the nation can benefit from, and whether its full effectiveness requires that, collective bargaining shall be established so that the instruments by which labour can freely participate with and within the nation, can be organized and established.

18. Is the national interest advanced by such a development of labour organization? Is the national interest damaged by actions which oppose labour organization? Put in more concrete form, the question assumes two aspects:—

1. Does the full exercise by workers of freedom of association and collective bargaining contribute to the co-ordination and effectiveness of the productive powers of the nation and to the fuller participation by the people in all other phases of the war activity?

2. What should be the attitude of the nation towards any actions which interfere with their exercise, and how should the national interest express iteself?

19. The right of workers to organize and to form associations, through which they may deal collectively with their employers and play a full role in the affairs of the nation, is freely admitted. Likewise for many years and on many solemn occasions it has been officially declared. During the present war, the outstanding example is Order in Council P.C. 2685, which was proclaimed by the Dominion Government in June, 1940, and heralded as a very charter of liberty for labour and its right to organize. No social right can exist however unless it is protected against trespass. If the exercise of that social right serves the national need, trespass on the right betrays the national interest. Actually, in respect to the right of the workers to organize, many employers have felt themselves entitled or obliged to engage in activities which have come to be known as "unfair labour practices." These have made it impossible for workers to exercise the rights which they are officially told they "should have". The forms of these "unfair labour practices"—discrimination, "company unions". and persistent refusal to recognize or deal with a designated bargaining agency—are too well-known, and the record of the Inquiry is too replete with references to these matters, to require any detailed elaboration here. Our concern is with the effect of these things on the national interest.

20. When employers resort to "unfair labour practices" and resist collective bargaining they not only trespass upon the rights of labour, they injure the national interest. The morale of the worker is affected and his production is lowered. Time and energy is consumed in establishing organizations and protecting them against the opposition of the employer. Workers' Organizations which could assist the national effort are stifled or destroyed. The worker and his friends become infected with a deep skepticism about the war motives of employers and government, and skeptical about the war itself and its objectives.

21. This is only natural when the worker, furnished with government declarations assuring him of freedom of association, observes employers actively interfering with and wherever able actually destroying workers' organizations while government stands idly by. Such a situation not only produces industrial unrest but strikes at the roots of the whole structure of war morale. It destroys the very foundation upon which a co-ordinated national effort can be built. To be

warned on the one hand that Hitler's first act was the destruction of trade unions and labour organizations generally, while, at the same time workers see employers spending time and energy in preventing unions from coming into existence in Canada at all is a situation, to put it mildly, which discourages the worker and weakens his faith in the whole war program. Hitler's barbarous acts were not only directed against the physical destruction of trade unions and the physical liquidation of labour leaders. His aim and purpose was to reduce labour's standards by these means and to depress the role of labour in the nation. To observe tendencies of a similar nature in Canada, although lacking the barbarism and brutality of Hitler, mocks the very ideals which the worker is told constitute the war aim and objective, and strikes at the roots of his effectiveness.

22. It is true that many of the problems and attitudes relating to labour matters in Canada to-day result from the fact that we have failed to develop and broaden our industrial attitudes and relationships corresponding with our industrial development. An artificial limitation thus operates upon production and upon national integration. We do not serve the national interest if we postpone recognition of this fact. Such a course only delays remedy.

23. What is the appropriate, the effective remedy? There is no merit in the approach which seeks to find scapegoats, and it is wrong to attribute to this or that type of union organization, or to the malevolence of some trade union leader, or to rivalries between unions, the industrial disturbances which have been so seriously affecting the nation. It is true that there are good and bad characters, as well as wise and unwise, within the trade union world as within other sections of society but it is idle to ascribe industrial instability to any such phenomena. To be angered by wartime strikes instead of tracing and curing the cause, solves nothing and delays the initiation of a program which by its efficiency and fairness would not only avoid but logically condemn any strike action. The order of the day is wisdom, with our courage directed to the future, not blame and recrimination over the past. Little is now to be gained by discussing whether a government representative who shuts down a war plant on issues which may have been unsubstantial or even unjust, is merely to be charged with bad judgment, while workers or their leaders, who may do likewise on issues which may be substantial as well as just, are to be charged with disloyalty. A bad labour policy will continue to develop bad labour situations. The first essential is to establish the bedrock upon which a correct labour policy can be based.

24. It is relevant at this stage to ascertain what legislation in fact has been enacted by the Dominion authority since the outbreak of the war bearing on the question of union recognition and collective bargaining.

25. Wartime legislation having a bearing on union organization has been confined mainly to:

1. Order-in-Council P.C. 3495, enacted on the 7th day of November, 1939, by which employment in war industries was made subject to the provisions of the Industrial Disputes Investigation Act.
2. The declaratory Order-in-Council P.C. 2685, which declared in effect that employees *should be* free to organize and *should be* free to bargain collectively.
3. Order-in-Council P.C. 4844, enacted on the 6th July, 1941, a somewhat ineffective instrument dealing with discrimination of any employee "for the reason that he is a member of or is working on behalf of a trade union."

26. Without going into details, Order in Council P.C. 3495, extending the scope of the Industrial Disputes Investigation Act, tended to hinder rather than assist union organization. It made all employment in industries so covered, subject to the restrictive provisions of the Act. At the same time, under cover of the delayed procedure of the Act, employers were able to engage actively in resisting and sometimes in destroying union organization. The Industrial Disputes Investigation Act was never designed to deal effectively, and in no way could, with issues of collective bargaining and union recognition.

27. The Industrial Disputes Investigation Act is most ineffective, and even provocative and harmful, as a means of dealing with strikes in wartime. The requirement of a strike vote before the machinery of the Industrial Disputes Investigation Act is put in operation asks the worker to declare his intention to go on strike before official authority takes any notice of the matter. Having thus aroused strike sentiment, the Act and its administrators assume that the strike threat is neither serious nor imminent. The long delay and confusion resulting from the appointment of an investigator to decide if a commissioner should be appointed to advise if a Board of Conciliation should be set up to consider what recommendation should be made to the parties, has become the object of derision by management as well as labour and by the public generally.

28. Order in Council P.C. 2685, had little or no effect on the situation except to raise

high the hopes of the workers that, Government policy having been declared on the question of collective bargaining, employers, with or without pressure from government agencies, would implement those rights which the Order in Council declared workers "should have". Generally speaking, these hopes were dashed to the ground as employers found that with complete impunity they could pay little or no regard to the declaratory Order. The final collapse of Order in Council P.C. 2685, as an aid to union organization or collective bargaining resulted from the emphatic pronouncement of the then Minister of Labour in the House of Commons on the 4th day of June, 1941, that the Order was only a recommendation to employers, and that it was not binding upon them. That pronouncement of the Minister was followed precipitately by Order in Council P.C. 4020, on the 6th of June, 1941, which set up the Industrial Disputes Inquiry Commission. The administrative policy of that Commission, whatever was the legislative intention, virtually cut across the path of effective union organization by use of the proposal which came to be known as the 'Kirkland Lake Formula'.

29. As to Order in Council P.C. 4844, its ineffectiveness is illustrated by the fact that only in June 1943, two years after its original enactment, was any provision included tending toward enforcement. The record on this point may be completed by reference to the fact that until December 1942, when Order in Council P.C. 10802 was enacted, the Government itself discouraged recognition of unions by Crown companies, thereby setting a woeful example to other employers. The net result is that neither the legislative nor administrative practice of the government has been designed, or applied, to assist or facilitate union recognition and collective bargaining. In the final analysis, the process has even been hindered. It is an under-statement to say that as a result of this unsatisfactory legislative and administrative record workers and the public generally are now dubious about the sincerity or clarity of government policy.

30. It is clear from the record, if one need go into so obvious a matter, that constructive benefit accrues to industry as a result of the wholehearted acceptance of union organization. One need only refer to the evidence of railroad management and of employers in the construction industry. They testified emphatically to the positive benefits resulting from clear acceptance of collective bargaining and union recognition. How is this to be secured for the rest of industry and commerce—by trial and error and by the passage of time, or by means of legislation?

31. The frustration, doubt and unrest which has resulted from the government labour policy, as so far expressed, can only be eradicated now by clear and decisive action. It is the task, and should be the aim, of statesmanship and sound government in a situation of crisis to move forward and assist others to move forward to the prompt solution of pressing national problems. Legislation is the means by which government discharges that responsibility. As my colleagues point out, large sections of our people advocate or concur that legislation is needed to deal effectively with the whole issue of collective bargaining. There is no other means of catching up with time and thus effecting that 'Magna Charta of Industrial Liberties' which the Prime Minister so eloquently referred to in his volume on 'Industry and Humanity', (Revised edition 1936, p. 109) in which he stated:

> "Labour is entitled to its Magna Charta of Industrial Liberties. The more comprehensive the charter is, the more explicitly its stipulations are worded the wider their application, the better for the peace of industry, and all that industrial peace makes possible."

The time to translate that noble objective is now, when its application is most urgent, and its benefits can be most effective. The authority of the War Measures Act is available for that very emergency and it should be utilized without delay to bring into operation a Dominion-wide Labour Code which will declare rights and obligations within industry and assure their enforcement. It cannot be stated too emphatically that this is no time to follow a course which may only diminish symptoms and fail to cure the disease. To avoid fundamental issues now, is to invite greater difficulty later.

32. Such a proposal does not ignore the fact that there are constitutional aspects to these matters as they relate to peacetime legislation, nor, as pointed out by my colleagues, that the matter of compulsory collective bargaining has been engaging the legislative interest of some of the provinces. Having regard to this fact, there appear to be three alternative legislative courses:

1. That the matter be dealt with entirely by the provinces.
2. That there should be framed a general Dominion Labour Code applying to all industry or enterprise relating to the war effort, anywhere in the Dominion.
3. That such a Dominion Labour Code be made applicable in those provinces where compulsory collective bargaining legislation does not prevail, and non-applicable in such provinces which have already enacted such legislation or which may subsequently do so.

33. The first and third alternatives are neither practical, nor are they consistent with

our record and policy of wartime legislation. As to the first, labour unrest and industrial instability would only be aggravated by variations of treatment between one section of the population and another, or between one industry and another. As to record and policy, all labour legislation during the war has recognized the necessity of an integrated over-all Dominion policy on wartime legislation. In addition to these factors, it should be pointed out also that question has been seriously raised as to whether any provincial legislation which has been enacted since Order in Council P.C. 3495, that is, since November 7, 1939, has any legal validity as to any industry now covered by the Industrial Disputes Investigation Act as extended by the Order in Council.

34. Having regard to the whole situation, the only sound, consistent, and effective treatment is the enactment of a Dominion-wide Labour Code by Order in Council under the War Measures Act, by which the right of the worker to organize is protected and the obligation of employers to bargain collectively with organizations so formed is made compulsory. Provisions should be included assuring these rights against trespass or interference by any unfair labour practice, including protection against discrimination, against the refusal of employers to bargain collectively, and against "company unions" properly defined. It cannot be emphasized too clearly that facilities must be provided for summary application and treatment. Delay is a swamp which breeds fear and suspicion. Its mire can, at the same time, engulf the best of intentions and conceal the worst. Despatch, fairness, and thoroughness must be the keynote.

Recommendation No. 1.—It is therefore recommended, that a Dominion Labour Code, as above described, be enacted and put into operation without delay.

35. I am pleased to note that my colleagues agree with this proposal, but there are several incidental, and yet important, features on which we appear to be in disagreement. It is important of course that the Code should provide appropriate enforcement machinery which will ensure despatch and fairness of administration with adequate penalty provisions so that the measure will be effective. In my opinion, however, the tribunal administering the Code must itself be empowered to effect enforcement. I fail to see any merit in the proposal which would link the Defence of Canada Regulations with the enforcement of the Labour Code. It has already been suggested that too many government departments interfere in too many ways with labour matters. To attach the Department of Justice as a part of the administrative activities of the board which will administer the Labour Code takes a backward step not a forward one. Nor can I agree with the observation made by my colleagues as to the composition of the body which should administer the Code. In my opinion it is most important, whatever its number, that the Board, except as to the Chairman, should be composed of direct representatives, equally, from management and from labour. The practical experience which such representatives could carry with them on such a Board is indispensable for its successful operation. It is idle to talk about judicial application or a judicial approach until practical standards have been established by which judicial action is to be governed. The establishment of these practical standards is a creative and important aspect of the administration of a Labour Code, and the active participation of direct representatives of management and labour is a prerequisite to a realistic and successful treatment of the whole problem. It should not be forgotten that one of the objectives of the Code, and its administration, is to bring management and labour together for the welfare of the nation. That is a task which cannot be accomplished by proxies, no matter how talented or judicious. Nor do I agree with the formulation of my colleagues of the definition of the industries which should be covered by the Code. They suggest a narrow, restrictive, definition of "war industry". In my opinion that is a grave error. The Code should be made applicable to *all* employment related directly or indirectly to the war effort, and this should be clearly defined, firstly so that it covers the whole of an industry, any part of which is engaged in war work, and also to include all auxiliary industries or operations which relate to the effectiveness of the war effort. In this, as in all else, we must avoid different treatment between one section of the population and another, and a Labour Code which does not substantially cover all employment which is important in relation to the war effort, would create more discrepancies and bring on more instability. It is obvious, of course, that as to employment not important to the war effort the provincial legislation, if it exists, would apply. I agree in this respect with the observation of my colleagues that whatever ultimate course should be adopted as to federal or provincial legislation would perhaps be clearer as a result of the experience which will be gained during the war period.

Section 4—Compulsory Arbitration of "Grievance" Disputes

36. It was generally agreed at the Inquiry, both by labour and management, that any dispute arising out of the interpretation or application of a collective bargaining agreement already concluded (for convenience referred to here as "grievance" disputes) should be the subject of compulsory arbitration for the period of the war. At the present time, these disputes, as well as others, are dealt with under the Industrial Disputes Investigation Act, supplemented by a number of Orders-in-Council. The ineffectiveness of the Industrial Disputes Investigation Act as a means of effecting peace in industry has already been referred to. It is clear that in the national interest and particularly in time of war, a more summary and effective machinery is required.

37. *Recommendation No. 2.*—It is therefore recommended that the Code include provision for the compulsory arbitration of "grievance" disputes, with adequate machinery, including appropriate penalties for enforcement, to secure summary and effective administriation. Obviously, as my colleagues observe, such a method of dealing with "grievance" disputes involves the suspension of the Industrial Disputes Investigation Act for the period of the war, as well as the revocation of many Orders-in-Council dealing with the subject.

Section 5—Other Disputes

38. If legislation is thus provided to deal with disputes relating to collective bargaining, union recognition, jurisdictional conflicts, unfair labour practices and to "grievance" disputes arising out of collective agreements reached, and remembering that wages and cost of living bonus and associated questions are dealt with by the Wartime Wages Control Order, it is obvious that virtually the whole area of dispute between labour and management would be covered by wartime labour legislation. Matters not already covered by these enactments are little likely, if at all, to provoke serious dispute. It is desirable however that even as to this residue a summary procedure be provided for their conciliation.

39. *Recommendation No. 3.*—It is therefore recommended, that as part of the machinery for administration of a Dominion Labour Code, permanent Boards of Conciliation should be constituted, available on the summary application of either party to the dispute, to deal with matters not otherwise covered by the Labour Code or by the Wartime Wages Control Order. While, as indicated, the realm of dispute here is narrow, it would be wiser to provide for appropriate sanctions as to these matters also.

Section 6—Planning in Industry

40. I concur fully with the observations made by my colleagues with respect to the necessity of labour-management co-operation in and concerning production. The degree of such co-operation measures the extent to which our productive capacity is fully organized and operating effectively in the national interest. Practical experience with joint production program has demonstrated that they materially increase production. I understand that Great Britain, largely as a result of co-operative planning and the full participation made available to her workers, has the highest per capita productivity rate of any warring nation. That record ensures her an effective place in the world economy organization after the war. It is to be regretted that in Canada, official statistics notwithstanding, virtually nothing has been done in the direction of establishing joint production committees. Prime Minister King, referring to post-war representation on world bodies, recently spoke of representation on a functional basis. The use of the term "functional" to describe the test by which a nation's right will be determined to participate in this or that phase of the world economy after the war, is a realistic anticipation of the factors which will determine Canada's place in the post-war world. It is not at all certain that management has fully heeded the intimation, or its significance in relation to its own ability to function effectively in a post-war economy; certainly it does not appear adequately to have realized that removing hindrances to trade union organization and co-operating fully with labour so that Canadian industry can be most effective, is an essential basis for an effective Canada. The future Canada, its "functioning" future, depends upon the realization of this. It cannot be made too clear that joint production committees are not clearances for grievances nor are they to be mere passive arrangements for letterbox suggestions. The worker must be taken into confidence and must be assured, in turn, that his confidence will not be abused. Above all, such committees should not be used as screens for mere speed-up plans which do not take the health and welfare of the worker into account, or which do not furnish him with the reward and incentive to which he is entitled. The worker has no desire to keep his efficiency down so long as his health and endurance is not endangered and so long as he knows that he will share in the economic results which flow from increased individual efficiency. But the worker can have no assurance or knowledge as to the value or merit of any incentive or improved production plan unless he is an active participant in all that relates to its

introduction. Multiplied manifold, in terms of the number of workers employed, it is obvious that the national interest is enhanced, and the ability of the nation to support itself is improved, if the people actually engaged in industry participate jointly with each other in all matters respecting planning and production.

41. The question of joint planning for production takes on three aspects, namely, production within a given plant or enterprise, production within a given industry or operation, and production on a national scale. It is in the interests of every section of industry, and of the community as a whole, that a constructive plan should operate at each of these three levels.

Recommendation No. 4.—It is therefore recommended, that:

1. The Ministry of Munitions and Supply call a conference of appropriate government officials with representatives of management and labour in each industry to adopt a model working plan for plant joint production committees.
2. Joint Production Industrial Councils be set up for each industry or operation as a whole, composed of direct representatives of management and organized labour, co-operating with the suitable government departments or operations.
3. An over-all National Industrial Council should be set up composed in the same manner as the Joint Production Industrial Councils, for the purpose of co-ordinating and utilizing most effectively the work and activities of the Joint Production Councils in the interests of maximum production and industrial planning.

Section 7—Representation on Government Boards or Administrative Bodies

42. There is the same need for enabling labour to co-operate fully and effectively with government agencies. This refers particularly to the various Government Boards and agencies, policy-making or administrative, which have been set up as part of the country's war apparatus. Labour was most emphatic at the Inquiry about its right to proper representation on such bodies. It was pointed out, for instance, by the General Conference Committee, representing the eighteen Standard Railway Labour Organizations and the Dominion Joint Legislative Committee of the Railway Transportation Brotherhoods, an organized group representing 140,000 railway workers in Canada, that it was their firm view that the objective of the Government and the Wartime Prices and Trade Board had been to "control the index" and not to control the cost of living, and, furthermore, that many practical considerations in connection with rationing as it related to the life of the worker had been overlooked or been improperly handled by the authorities. They were without information they indicated as to subsidies paid and the reasons or justifications for such payment. Proper representation of labour on the Wartime Prices and Trade Board and upon similar bodies would avert suspicion and help to correct bad judgment. In connection generally with labour's claim for representation on all government boards, agencies or directorates I concur fully with the statement of my colleagues that the claim so made "is valid, not only in labour interests, but in that of the country."

With the exception of the War Labour Boards, a few Crown companies and the Canadian Broadcasting Commission, and that recently arranged, labour is without any representation on any important government war board or agency. Such a situation reflects a woeful disregard, not only of labour's right to be represented on these bodies, but of the benefits which must accrue to the national interest if labour's experience is utilized and if labour generally is treated as a full and active participant in the whole war effort. No time should be lost in remedying so deplorable a situation.

Recommendation No. 5.—It is therefore recommended that labour be afforded proper representation on all policy-making or administrative government boards or bodies.

43. Before parting with this portion of the Report, it appears to me to be appropriate to stress that these questions, collective bargaining, planning for production in industry and representation of labour on government boards, are not matters which affect workers only. They affect the whole nation. The question is not whether we should allow the worker to exercise his rights; the question is whether we should allow the nation to be wronged. Until collective bargaining is established, until labour participates fully in production and planning, until labour is given proper recognition by government, the nation is not at its best; it is not most effective. This is against the national interest both in respect to the war and in respect to the severe "functional" tests which will be imposed upon all sections and interests in Canada by the world economy later.

Section 8—Wage Control

44. The Inquiry disclosed an unsatisfactory situation with respect to wage conditions in Canada. Considerable substandard and inequitable wages exist within and between

plants, within and between industries and within and between geographical areas.

45. While low wage areas exist in all provinces, the clearest case of concentrated substandard wages in a concentrated industrial province appears to be that of the Province of Quebec. The evidence at the Inquiry was clear on this point with special reference to vital and health statistics to the serious disadvantage of the Quebec population. It must be said that other factors, for instance lack of adequate agencies or health facilities, contribute to the alarming health and death rate situation. But the depression of the standard of living resulting from low wages must definitely play an important and vital role.

46. There should be no second-grade citizens within a democracy. In that connection I had occasion to say in April, 1941, and deem it relevant to quote here that:

"I know of no principle which justifies the proposition that any group of people, of any province or of any industry, are mere stepchildren of the Canadian social order and expected to be satisfied with a lower standard of living than that generally approved by contemporary social and economic standards."

47. What has been the wage policy of Canada, and how has this policy affected the situation of substandard and inequitable wages? We have already observed that wartime legislation in respect to collective bargaining was quite ineffective. The result was that the influence of union organization as a corrective in the wage situation was minimized if not substantially ignored. What is the legislative record of the Dominion Government on the subject of wages itself? An examination of that record discloses also that no action was taken materially to assist the correction of substandard or inequitable wages and that much of the legislation that *was* enacted, only aggravated the situation.

48. The first reference to wages in wartime Dominion legislation is to be found, again, in the declaratory Order-in-Council P.C. 2685, in which it was declared that:

"fair and reasonable standards of wages and working conditions should be recognized and (that) where any temporary adjustments in remuneration are made due to war conditions they might well be in the form of bonus payments."

49. This declaration clearly recognized two situations in respect to the wage problem:

(1) The recognition at fair and reasonable standards of wages and working conditions, which inherently involved the revision of wages or working conditions which were *not* fair and reasonable, and

(2) The need of temporary adjustments in remuneration due to war conditions, which would obviously refer to increases in the cost of living. In respect to this situation, it was indicated that remuneration to take care of such temporary adjustments due to war conditions might be in the form of bonus payments.

50. No provision was made to implement this declaration and it cannot be said that it had any perceptible effect. Some wages were increased, but more generally only in those industries in which union organization already prevailed or was seriously threatened. In the non-unionized areas, the element of labour scarcity was the main operative factor, and that did not begin to make itself felt until later in 1940.

51. Strife and instability were the consequence. In the meantime, on the 16th of December, 1940, the Dominion enacted Order-in-Council P.C. 7440, which purported to set up a wage policy for war industry covered by the Industrial Disputes Investigation Act, as extended by Order-in-Council P.C. 3495.

52. Generally speaking, the principle set out in Order-in-Council P.C. 7440, was that existing wages, unless they were lower than wages for the same classification in the 1926-29 period, were to be deemed fair and reasonable. This presumption could be overcome only if it could be established that the wage condition in the 1926-29 period was either unduly depressed or unduly high. The language of the Order-in-Council contained no reference to any standard by which it could be determined that the 1926-29 level was depressed or high, and in effect the Order-in-Council came to be regarded as freezing any wage which was not low in comparison with its 1926-29 level.

53. No attention was paid to the fact that between 1926-29 and 1940, extensive changes and improvements had taken place in industry which had a direct effect on the effort, skill and productivity of workers. This was often reflected in the difficulty found in trying to establish a comparison between classifications in 1940 or 1941 and similar classifications in the 1926-29 period. The terminology itself gave no sufficient clue either to the work performed or produced, the relative unit cost, or the justifiable reward to the worker. The productivity of labour has increased as compared with 1926-29, and very much so in 1943 as compared with 1940 as a result of the momentum and technical development of wartime industry. As a result, the per unit labour cost in production has been steadily declining, as Government statistics themselves show and as Government representatives have

admitted. None of this was taken into account or provided for in the formula presented by Order-in-Council P.C. 7440, nor has it been considered in any of the subsequent Orders, notwithstanding the real relationship between the factor of increased productivity and the abstract notion that wage increases directly involve inflation.

54. The matter came to an issue in the case of Peck Rolling Mills, a plant engaged in steel processing. The employees there sought a wage increase in their base rate of 32c per hour which included also a 15c per day cost of living bonus. A Board of Conciliation was appointed, and a report rendered in March 1941, in which a majority of the Board ruled that according to Order-in-Council P.C. 7440, the basic minimum wage of 32c per hour for an adult male worker in that plant was a "fair and reasonable" wage because there was no proof that *within the City of Montreal* a higher level had prevailed for such employment in 1926-29. The report of the Board excluded any standard but *local* rates or wage conditions in determining whether the 32c rate was "fair and reasonable".

55. Provision had been made in Order-in-Council P.C. 7440 for a review of reports of Board of Conciliation and for remitting back to a Board any report which was not in conformity with the provisions of the Order. An application to have this done in this case was rejected, with the result that the Peck Rolling Mills report became the authorative interpretation of Order-in-Council P.C. 7440.

56. An attempt was made to correct the manifest unfairness of this decision by enacting an Order in Ccouncil which increased the minimum wage on war contracts from 30c to 35c per hour for men and from 20c to 25c for women. Some of the evidence at the Inquiry suggested considerable evasion of this Order in Council, in spirit if not in letter. Furthermore, the Board was advised during the Inquiry that some employers, particularly in Quebec, were even declining to accept war contracts because it would bring them under the 35c and 25c wage minima. This corroborates the evidence at the Inquiry of the existence of extensive sub-standard wage conditions.

57. The Wartime Wages and Cost of Living Bonus Order was enacted on the 24th of October 1941 despite the prevailing condition of substandard and inequitable wage conditions.

58. Neither that Order in Council, nor the present Order in Council P.C. 5963 which replaced it, in any way took into account increased productivity or the need of further increasing production or the difficulties and inequities which existed in the Canadian wage picture. As a result, friction has resulted between labour on the one hand, and the operation of the rigid and inflexible formulae of the Wartime Wages Control Order on the other.

59. Labour has not disagreed with the policy of maintaining wage controls with a view to a stable wartime economy, including stabilization of wages. My colleagues are quite wrong in stating that labour has asked for an abandonment of controls. On the contrary, labour has asked for their continuance during wartime, and their extension during the post-war period. What labour has asked for is that the control policy be just and realistic and that controls should not be used as a screen behind which to deprive labour and the country of the benefits which would accrue if production needs and production results are taken into account and if injustices or mal-adjustments in the wage structure are corrected.

60. Section 25 of the Order in Council is the pivotal section as to wages. It virtually reproduces the Peck Rolling Mill formula of the "local wage", adequate or otherwise. Its restrictive provisions are unsound in a real program of economic stabilization and injurious both to labour and national effectiveness. The section, as now worded, interferes with necessary and with reasonable and equitable wage adjustments and its net effect is to disturb rather than to integrate wage control with a general policy of stabilization. No smooth surface for national operation is ever obtained by freezing injustices. They persist and protrude, and interfere with effective planning. Wisdom, apart from justice, dictates that this be recognized.

61. Substandard wages usually create low labour productivity. As a result, particularly when the substandard wage creates unrest and industrial instability, the net and practical effect of a low wage standard is to inflate the unit cost of production and thus injure the total productivity of the nation. It is unsound to conceive as necessary the maintenance of substandard or inequitable wages to ensure a stabilized economy. Where substandard or inequitable wages affect productivity, either directly by their effect on the morale, skill and endurance of the worker, or indirectly by their effect on the stability or continuity of industrial operations, it is substandard wages which present the inflationary threat while correction of these, in the net result, assists stabilization.

62. During the Inquiry, labour expressed its full recognition of the fact that special conditions operating in a wartime economy, mainly characterized by the predominance of production of war goods and a relative decrease of consumer goods, with a simultaneously expanding national income, do contain a threat of inflation unless proper controls are exercised. Labour expressed its consistent opposition to inflation as a means whereby money gains could be wiped out and real wages lowered. But just as, in recognition of this fact, there has been no general wage demand by labour so it is erroneous under the influence of a mechanical notion of the relationship between wages and inflation, to institute—as in effect Section 25 does institute—a general bar to the correction of unsound, substandard or inequitable wages.

63. The argument directed by the authorities on the question of the relationship between wage increases and the threat of inflation is based almost entirely upon "free market" theories which do not take into account the different situation which now prevails in a market which is not free. Canada operates to-day however in a controlled market, in a market in which the quantity of any goods which can be produced is regulated by the distribution of raw materials, in which the selling price and sales conditions are controlled and in which many consumer commodities are rationed, with purchasing power completely cancelled out as a price factor. What then is the relationship of wage increases to inflation in such a "controlled" market?

64. In the first place, it is necessary to contradict the statement made by Mr. Donald Gordon, Chairman of the Wartime Prices and Trade Board, at the Inquiry session of May 25th, when he stated that:

"Under present conditions every increase in wage rates unless it is accompanied by a corresponding increase in output involves an increase in costs which must be borne by the community."

If the implication is, as seems to have been intended, that "borne by the community" means inflation, the statement is a wrong one.

65. So far as the question of inflation is concerned—evidenced by a growing disparity between consumer goods and purchasing power which can be used to purchase such goods—all wage increases in respect to the production of non-consumer goods, that is, war production generally, can be disregarded entirely as a cost factor, although such increases appear later in the total available purchasing power. Such wage increases, that is, increases in the wages of those producing war goods or services, may increase the cost of conducting the war, but they are not reflected as a cost item in the production of consumer goods, and consequently play no part, as cost, in the relationship between consumer goods and distributed purchasing power. So far, then, as production cost is a factor in inflation, only the cost of producing consumer goods, as distinguished from the cost of producing war goods, is to be reckoned with.

66. Even as to these, Mr. Gordon is wrong in his assertion that every such increase in wage rates "involves an increase in cost which must be borne by the community". That statement ignores the extent to which the profit element is still elastic or the fact that economies can be effected in other factors in the cost of producing or distributing consumer goods or services. The present questionable practice of costly advertising for the sole purpose of keeping a trade name alive is an instance of cost saving which can be readily effected and, undoubtedly, there are many others which are known to those actively operating the price control machinery. Assuming, however, that profits, or that economies resulting from more economical methods of production or distribution, do not absorb, or do not altogether absorb the increased cost which would result from an increase in the wages of workers producing consumer goods, there is nothing to suggest that the present policy of subsidies to the production or operation of consumer goods and services, where absolutely necessary, would not take care of the situation. There is no justification for pursuing a policy of subsidizing producers of "consumer goods" without, at the same time, dealing with the labour phase of such industries.

67. The alleged inflationary threat resulting from the increased distribution of purchasing power represented by more wage payments either to workers engaged in producing consumer or war industry goods, is already being taken care of by taxation, by compulsory and voluntary savings, by price and volume control of commodities and by rationing. With price and volume control and rationing in effect, the mere distribution of more purchasing power could not possibly have an effect on the price of consumer goods. The only result, and one to be desired, is to effect a more equitable distribution of such consumer goods as are produced by giving more people purchasing power and therefore opportunity to share in the purchasing of such consumer goods as are on the market. The distribution of more purchasing power in an area or industry now paying substandard or inequitable wages would, of course, result in extra

claims an consumer goods. This, on the other hand, as has been done in Great Britain, can be taken care of by distributing and diverting to such areas extra food, furnishings or other essentials which would absorb the extra purchasing power. It is idle to ignore the fact that, while rationing proceeds on the abstract assumption that every unit of the population consumes an allotted amount, those who receive substandard or inequitable wages are not able to purchase the rationed allotment theoretically set aside for them. Meanwhile, others with surplus purchasing power, actually procure more than the share set aside for them. This is accomplished in a number of ways, as for instance, the patronage of restaurants and hotels to supplement food rationing.

68. It is wrong to assume that price control of goods or services which are not rationed, by itself effects an equitable distribution of goods without a fair distribution of purchasing power. It merely means that those with purchasing power can purchase excessively, unless they do so in a measure which becomes an offence under the Regulations, while others, without purchasing power, do not get their allotted portion. Correcting substandard and inequitable wages, and effecting a more equitable distribution of purchasing power, with price and volume control in operation, would effect a more equitable distribution of consumer goods without adding to the price paid by the consumer. If, under purchasing power pressure, labour and materials are increasingly diverted from luxury products to essential consumer commodities, that would be a development much to be desired. The distribution of more purchasing power, by correcting unsound or inequitable wages, might mean that citizen "A" who can now buy more than he needs would spend less on such things and would be obliged to save more, while citizen "B" who is now not able to buy the things he needs, would then be furnished with purchasing power enabling his to share in the purchase of such consumer goods as are available. This would only mean that citizen "B" would be able to buy the unit of goods which had been allotted for him and which citizen "A" has been able to buy without really needing it. Thus citizen "A" and "B" would share more equitably in the purchase of consumer goods and citizen "A" would be obliged to divert more of his money to government bonds or savings. In effect, such a policy would take as its point of departure the fundamental principle of apportioning the national income, by central authority, in order to maintain the greatest civil equity and satisfy the basic needs of the entire population so far as war condition and available supplies will permit. Applied specifically to the war situation, if citizen "B", who is now ill-equipped with purchasing power, is a war worker, his relative inability to compete with citizen "A" and therefore share equitably in the purchase of consumer goods, can have a serious effect on the war effort by the decrease in health, lowered production, unnecessary absenteeism, disturbed morale and general discontent and instability which features a low wage situation.

69. In summary, it is wrong to assume that wage increases necessarily carry an inflationary threat or even that they always add to the net cost of producing consumer goods. Certainly wage increases outside the consumer goods area play no role as a cost factor. Likewise, with price and volume control and rationing governing many commodities the extra purchasing power, after taxation deductions, which would be distributed by wage increases, whether to those engaged in war industry or otherwise, can only have the effect:

(*a*) of assisting those receiving such increases to buy the share of goods rationed for them,

(*b*) of assisting those receiving such increases to compete, on a reasonably fair basis for the purchase of non-rationed consumer goods and services as are available for purchase, and

(*c*) of increasing savings or the purchase of government bonds and certificates.

The inflationary threat is confined entirely to the cost factor resulting from wage increases to workers engaged in producing consumer goods and, where profit or cost savings cannot absorb the cost of these, the policy of subsidy is available to protect labour as well as management in such subsidized consumer industry. In contrast to these conclusions, Order in Council P.C. 5963, and its predecessor Order in Council P.C. 8253, were drawn on the assumption that every wage increase automatically results in the increased cost of the things we buy and that every wage increase automatically adds to an inflationary spiral.

70. The restrictive character of Order in Council P.C. 5963, and its inability to meet the realistic problem of wages in relation to production, is to be found in Section 25 which reads as follows:

"25. If the National Board finds that a range of wage rates or a single wage rate forming part of the basic scale of wage rates paid by an employer on November 15, 1941, is low as compared with the ranges of wage rates or single wage rates, respectively, generally prevailing for the same or substantially similar jobs, positions or occupational classifications in the locality or in a locality which, in the opinion of the Board is comparable, it may direct such increased

range of wage rates or single wage rate to be paid as it finds fair and reasonable having regard to all circumstances deemed by it, in its discretion, to be material."

71. It will be observed from an examination of this clause that the first portion of the section is quite inflexible. No discretion is given to any War Labour Board with respect to any wage application, unless the single and specific provision of the Order in Council has been first complied with, namely, that it has been established that the wage is low in relation to a wage for the same or similar classification in the same or comparable locality. The section gives no right, at this time when every stimulus should be given to production, to take into account the extra productivity of workers, or other practical questions related to the application of labour power to the ends of production. At the same time, where wages over a whole area or industry are low, Section 25 legislates two wrongs into one right. Workers in a specific locality or in a given industry may be receiving the same wage but it may still be a wage which should be increased in all equity and in the interests of the country and the war effort. The section as now worded forbids such correction.

72. Careful consideration of the situation leads to the conclusion that the interests of the nation would be best served by replacing Section 25 by a section which would furnish the War Labour Board with authority to deal with wages which are substandard or inequitable, or when greater productivity or manpower needs justify a wage revision. Such a policy would realistically reflect the actual wage conditions prevailing in Canada and the problems they give rise to in effecting a program of maximum national productivity. A wage structure, if it is to meet the national interest, must be designed to evoke and make possible the maximum national productiveness. It is impossible, by a single legislative formula, to provide automatically for all the contingencies which must be taken into account in relating a policy of wage control to such a program. The problem in each case is one of judgment, based factually on the national interest. The Government itself has taken occasion to announce that Order in Council P.C. 5963, was not intended to freeze wages but only to control them, reconciling the war needs and the correction of manifest injustices on the one hand, and the policy of price control and stabilization on the other. Upon that basis, the legislation dealing with wage control should be drafted in harmony with the purpose announced.

Recommendation No. 6.—It is therefore recommended that Section 25 be replaced by a section, revised in the manner above indicated, stabilizing wages, but enabling adjustments and increases to be made where dictated by the national interest,

(*a*) if an increase is justified by greater productivity,
(*b*) if the wage is substandard or inequitable,
(*c*) if an increase is justified by manpower needs.

Such a revision of Section 25 of the Wage Control Order would bring it in harmony with the views expressed by the National War Labour Board, as announced in the press statement issued by the Board on the day of its appointment, in which the following was stated:

" . . . . It is our understanding that neither the Government or the text of the Order which we are now charged with administering expects or requires a legalistic or narrow technical approach, particularly in cases where, by comparison with others, or having regard to standards reasonably necessary for proper morale, wage rates are inadequate or depressed."

That statement of principles is based upon a realization of the fact that production cost is determined by the quantity and quality of goods and services produced—by the value created by labour—and not merely by the money measure of its wages.

Section 9—Floor to the Wage Control Policy

73. Much emphasis has been placed on the moral and political justice of establishing a floor to the wage control policy. Some organizations advocated a minimum wage of 50c per hour, but the general consensus of labour opinion was that there should be freedom of collective bargaining without control, for workers earning up to 50c per hour or less. My colleagues agree with me that there is a great deal of merit in such a proposition and, as is pointed out, statistics as to the amount of money required for bare necessities in an average family clearly demonstrate that the head of a family cannot provide for his family on the standard necessary for normal health even on a wage of 50c per hour for a 48-hour week ($24.00 weekly) working 52 full weeks in the year, without even making any allowance for tax or other wage deductions. As my colleagues state, rigid control at such a level of earnings is hardly defensible, politically and morally. Particularly in a war economy, when we are concerned with the greatest effectiveness possible, a policy which consigns human beings to economic serfdom when a large portion of the community escapes it is not only incompatible with the ideals on

behalf of which we are waging war, but impractical in a program of maximum efficiency.

74. Under these circumstances, and having regard to the discussion in the preceding section with respect to the question of inflation, the obvious solution would appear to be to leave wage rates of 50c per hour or less free for bargaining without controls, but with the provision for adjudication if the parties are unable to agree.

Recommendation No. 7.—It is therefore recommended, that the War Labour Code should provide that employers and workers should be free of any control, and that the full right of collective bargaining should prevail, with respect to wages of 50c per hour or less, thus exempting such wage rates, or their daily or weekly equivalent, from the operation of the Wage Control Order. In the event of disagreement, the actual wage to be paid should be determined by the War Labour Board holding jurisdiction, but it should be made clear that in exercising such authority the Board is to be free of any restrictive formula and should fix the wage, having regard to all the equities and to the recognition of "fair and reasonable standards of wages." This does not mean that 50c in any given situation is necessarily an adequate minimum wage and certainly a floor to wages is not a goal. It is only a protection against manifest injustice. Within such a field there is no justification for the application of any rigid restrictive formula.

75. I am utterly opposed to the alternative proposal of my colleagues of some plan of family allowance as a substitute for a floor to the Wage Control Order; the two matters have no conceivable relationship. My colleagues appear to base their proposal upon the assumption that families are adequately taken care of in the case of wages above 50c an hour, or that a married man without children, or even an unmarried person is not entitled to receive a wage rate of at least 50c per hour. The first proposition is wrong, in fact, unless we get into a bracket considerably higher than 50c per hour. The second proposition is wrong in principle and would be unworkable. The proposal to substitute some family allowance relief measure instead of correcting substandard wages ignores the true character of wages. Wages constitute the incentive for production by the worker and the means by which he receives his share of the value of the goods he has worked upon. To freeze substandard wages and supplement large families implies application of the "iron law" theory of wages, that wages need only cover mere subsistence and replacement. Furthermore, the proposition denies the principle of equal pay for equal work. It ignores the fact that unmarried workers may have dependants or that they are entitled to provide for a future in which they can support dependants. The principle of family allowance in a general program of social security is commendable, if it is available for all sections of society, rural as well as urban, but to put it forward as a substitute for the correction of substandard wages means to force all families, now in the substandard wage area, to become permanent wards of the state for the whole period during which the Order in Council would remain operative. It would create a situation in which part of our employee population would be economically free and able to support itself by its wages, while another part, and a great part, would be economically enslaved, dependent upon Government relief and bounty. Such a half-free half-slave proposition would be most destructive to the morale and effectiveness of the nation. It would have nothing but a provocative effect on those engaged in areas or industries in which substandard wages are now being paid, and the payment of family allowance to such of these workers as would qualify because of the size of the family would in no way offset the disturbing fact that their wages had been frozen at a substandard level. In this case, the proposal would not even lessen the symptoms, let alone cure the disease. It would add to the symptoms and would aggravate the disease. Furthermore, having regard to the fact that the cost of such a scheme would have to be borne by the general public out of general taxation, the proposal would impose upon those engaged in industry which is not substandard in its wage rates, or upon those who are not engaged in industry at all, the burden of subsidizing industries and areas maintaining substandard wages. I cannot think of any proposal which would do more damage to national unity, than one which would inevitably carry such taxation consequences.

Section 10—A Uniform Cost of Living Bonus

76. The record with respect to cost of living bonus payments in Canada adds chaos to confusion. As noted earlier, Order in Council P.C. 2685 contained the declaratory statement that "where any temporary adjustments in remuneration are made, due to war conditions, they might well be in the form of bonus payments."

77. This declaration was received in a variety of ways, more importantly as follows:

1. In the main, the declaration was ignored completely.
2. In some instances, and they appear to be quite in the minority, provision was made for supplementing wages, which were already considered fair and reasonable, by bonuses designed to take care of the increased cost of living.
3. In others, equally in the minority, wages, fair or otherwise, were supplemented by wage increases to compensate for increases in cost of living.
4. In still others, wages which were *not* fair and reasonable were left undisturbed while bonuses were provided, ostensibly to take care of the cost of living increases.

78. Order in Council P.C. 7440, enacted in December, 1940, besides laying down the policy with respect to the 1926-29 standard of fair and reasonable wages, purported to indicate a policy with respect to cost of living bonuses. It provided, by way of instruction to Boards of Conciliation and supposedly to employers, that cost of living bonuses were to be paid, supplementing wages which were considered fair and reasonable, to indemnify workers against increases in the cost of living.

79. The effect of Order in Council P.C. 7440 was little more than that of the declaratory statement of Order in Council P.C. 2685. Employers continued, in the manner already described, to pay or withhold cost of living bonuses, or to increase or fail to increase wages, according to the viewpoint of the employer, enlightened or otherwise, and according to the intelligence or effectiveness with which his workers were able to influence the decision. The result was, that by the time Order in Council P.C. 8253 was enacted in October, 1941, a confused mosaic of wages and cost of living bonus had been developed. The most careful research would probably fail to ascertain the extent to which in October, 1941, workers, whose basic wages were considered fair and reasonable, were receiving a cost of living bonus to compensate for increase in cost of living, or the extent to which wage increases had been given for that purpose, or the extent to which wage increases had been given merely to correct substandard wages, or the extent to which cost of living bonuses had been given as a colourable means of avoiding the revision of basic wages which were *not* fair and reasonable.

80. It was against this chaotic background that Order in Council P.C. 8253 was enacted in October, 1941, which, for the first time, made the payment of any cost of living bonus mandatory. It declared that from the date of that Order in Council onward every employer would be obliged to pay to his employees a cost of living bonus equal to the rise in the official cost of living index which would take place after the enactment of the Order. As a result, on the 15th of February, 1942, every employer became liable to pay a cost of living bonus of 60 cents per week to every employee, with exceptions for junior male workers and female workers which will be referred to later. To the extent that low wage industries had not been organized, and generally there was an affinity between low wage standards and lack of organization, low wage workers in the main had not been able to obtain any cost of living bonuses until the 60 cents payment became mandatory. By that time, even the official index established an actual increase in the cost of living of $4.25 per week. This inequitable situation was virtually frozen, save as subsequent applications have been partly able to correct the situation. The confused position of the cost of living bonus which had resulted from the previous history of Orders in Council P.C. 2685 and P.C. 7440 was virtually ignored. Where no cost of living bonus had previously been paid, the order only made it mandatory to pay the 60 cents which accrued on the 15th of February, 1942. On the other hand, if an employer was already paying a cost of living bonus pursuant to Order in Council P.C. 7440, he was required by Order in Council P.C. 8253, to continue the payment of that cost of living bonus, together with the further bonus made mandatory by Order in Council P.C. 8253. If he was only paying part of the cost of living bonus then payment of that part was made mandatory under the Order together with payment of the 60 cents in February, 1942. The net result of the Order was that it crystallized and preserved all of the discrepancies and variations which had developed by October, 1941, in respect to payment of cost of living bonuses.

81. The only relief permitted by the Order in Council was that under Section 34 an application could be made to the War Labour Board for leave to increase any cost of living bonus which was below the full amount. If such application was made, the War Labour Board had the discretionary right to increase the cost of living bonus above the amount then being paid, but in exercising this jurisdictin the Board was expressly limited at the most to calculating the bonus on the basis of the cost of living index in August, 1939, or in the month in which the workers involved had last received a general increase, *whichever date was later.*

82. This provision took it for granted that the last general wage increases to employees

who were not getting the full cost of living bonus in October, 1941, were increases which had nothing to do with correcting substandard or inequitable wages but were granted

(*a*) to compensate for the increased cost of living, and

(*b*) were sufficient to take care of the increased cost of living.

The order entirely ignored the factual situations in which wage increases had been given, whether in part or in whole, to correct substandard or inequitable wages or, in which such increases only partly took care of the increased cost of living. The section remained in this form until March, 1943, when, on the recommendation of the present National War Labour Board, the Order in Council was further amended by adding to Section 34 the following provisions:

"Provided, that where in the opinion of the National Board, the application of this subsection has resulted in, or will result in, unequal and unfair combinations of wage rates and cost of living bonuses within an industry, it shall be within the power of the National War Labour Board to order such adjustment of the cost of living bonus through the use of a month other than as prescribed above but not earlier than August, 1939, as the National War Labour Board may determine."

The effect of this amendment, of course, is limited to cases in which inequalities can be established "within an industry," with whatever limitations that formulation may involve.

83. The result is that cost of living bonuses now range from 60 cents, which still remains the only amount made mandatory for all employees by Order in Conucil P.C. 8253, up to $4.25, the full amount of cost of living bonus based on the official index. The evidence before the Inquiry was most emphatic, from employers and from representatives of labour alike, as to the dissatisfaction and the disturbance prevailing throughout the country as a result of these inequalities. The National War Labour Board, since its appointment in February, 1943, has made some revisions in that direction. It has corrected the situation in the aircraft industry in Montreal in which cost of living bonuses varied from $1.50 to $4.25, and it has made that bonus uniform at the rate of $4.25. It has made a similar ruling with respect to the aircraft plant at Malton. It has just issued a general order levelling all cost of living bonuses in the shipbuilding industry at $4.25.

84. The situation is still full of contradictions, inequities and inequalities in respect to payment of cost of living bonuses and the question is what should be done about it. Careful study leads to the conclusion that the most effective and equitable method of dealing with the problem and avoiding the confusion, with the resulting instability, which now exists, is to make the cost of living bonus uniform throughout the country at $4.25 per week.

85. There are two main arguments against this proposition. It is argued firstly, that in some instances wage increases have been granted during the war, not to correct substandard or inequitable or unequal wages, but to take care of cost of living increase. It is argued further, that the payment of the additional amounts which would be involved in the payment of a uniform cost of living bonus would unduly embarrass industry with, perhaps, an inflationary effect on the economy.

86. It is practically impossible to ascertain the extent to which any wage increases have been put into effect, since the outbreak of the war, solely to take care of increase in the cost of living. Experience with the whole situation leads to the reasonable conclusion that only a negligible number of such increases have been effected. As to the inflationary threat resulting from the levelling off of the cost of living bonus, we have already discussed the effect of purchasing power in a controlled market. As against the little, if any, likelihood of inflationary threat resulting from increasing the bonus, there is the balancing item of greater stability in production, if the present argumentation and confusion with respect to the cost of living bonus is removed. Apart from any other feature, a levelling of the cost of living bonus will have the effect of limiting the desire of labour to shift from plants or areas with a low cost of living bonus to plants or areas in which the full cost of living bonus is being paid. It should also be kept in mind that a great deal of the dissatisfaction with decisions of the War Labour Boards ,and with delays in decisions, result from the complexities involved in cost of living bonus application. All this would be removed, if the payment and amount of cost of living bonus was made uniform throughout the country. So far as the cost pressure on business is concerned, there is no reason why this cannot be met in the same way as any other factor is now treated by the Government, and by the Wartime Prices and Trade Board, with respect to pressures on industry which their present ceiling prices cannot absorb.

Recommendation No. 8.—Having regard to all these circumstances, it is therefore recommended that Order in Council P.C. 5963 should be so amended to make mandatory the payment to all employees, subject to what is hereafter contained as to

junior male employees and female employees, a cost of living bonus of $4.25 per week, to rise and fall uniformly with the official cost of living index.

87. It follows that I am in complete disagreement with the proposal put forward by my colleagues on this subject. Their recommendation that the irregularities and injustices in respect to the payment of cost of living bonus can be disposed of merely by converting all present cost of living bonuses into wage rates, appears to me to evade the actual problem. It would merely transfer to the sphere of wage, the inequities and inequalities which now exist in the sphere of cost of living bonus. The mere transference would not solve anything. In approaching this question one must balance two alternative conditions. If the cost of living bonus is increased to the full amount for all workers it can only operate unfairly in favour of those workers, receiving wage rates considered fair and reasonable, who had received wage increases *solely* to indemnify against increase in the cost of living. As against this, the proposal to ignore present inequities and injustices in regard to cost of living bonus, by merely merging all cost of living bonuses with wage rates, operates unfairly as to all workers who do not now receive a full cost of living bonus or who have not received sufficient, or any, wage increase to offset cost of living increase. As against these two considerations which is likely to operate more unfairly? Are we to ignore the group in the first category who, in addition to wages already fair and reasonable, have received wage increases *solely* to indemnify for cost of living increases or are we to ignore the group in the second category, namely, those who now receive less than the full cost of living bonus and who have not received wage increases to take care of increases in the cost of living? It seems obvious that to ignore the second category would result in far greater injustice and give rise to far more dissatisfaction than to ignore the first category which is demonstrably quite negligible. I am unable, therefore, to agree with the proposal put forward by my colleagues and I recommend instead that a full cost of living bonus be provided for all adult male workers.

88. I am unable to comprehend, let alone agree with, the recommendation of my colleagues that the principle of cost of living bonus should be abandoned. While no such reference is contained in the body of their report, the concluding summary of their recommendations recommends "discontinuance of the present principle of cost of living bonus, or as the government sees fit, starting of cost of living bonus from a new base on a revised cost of living index." Had this proposal been preceded by a recommendation from my colleagues that the Wartime Wages Control Order be amended to permit wage increases to compensate for increases in cost of living, the recommendation that the present cost of living bonus principle be discontinued might seem to be in order. But to make no provision for wage increases to compensate for increases in the cost of living, and at the same time to suggest abandonment of the cost of living bonus principle, is to serve notice upon workers that they must themselves, out of their present earnings, assume the full risk of any increases in the cost of living. The proposal is neither sound nor constructive and I am unable to agree with it in any measure.

Section 11—Cost of Living Bonus to Junior Male Workers and Female Workers

89. The provisions of the Wartime Wages Control Order as to payment of cost of living bonus to male employees under the age of 21 and to female employees is to be found in Section 48 of the Order. By virtue of that section the cost of living bonus to any male employee under 21 years of age is limited to 1 per cent of his weekly wage for each point in the index rise for which he is entitled to receive bonus. The cost of living bonus to female workers is likewise limited to 1 per cent of the basic weekly wage for each point, if she is employed at weekly wage rates of less than $25 per week. If she is employed at a weekly wage rate of $25 per week or more she is entitled to the full bonus of 25 cents per week per point. Thus, we have the anomalous position that women employed at weekly wage rates of less than $25 per week, and hence more in need of proper indemnity against the increased cost of living, are entitled to less cost of living bonus than those employed at weekly wage rates of $25 or more per week. I am equally critical of the distinction betwen male employees under 21 years of age and male employees over that age. If age is to be the dividing line in the case of males, as the means of sorting out those more likely to be on their own or with dependents to support, or otherwise entitled to the full bonus, as for instance, the nature of the work they perform, the appropriate age is 18. If wage rate is to be the dividing line as to women, to sort out those more likely to need an adequate cost of living bonus, or otherwise entitled to a full bonus, the appropriate wage division should not be set at a higher amount than $15.

Recommendation No. 9.—It is therefore recommended that the Wartime Wages Control Order be amended to provide:

(i) That all male workers of 18 years of age or over and all female workers employed at weekly wage rates of $15.00 or more should receive, uniformly with all adult male workers, the full cost of living bonus,

(ii) That all male workers under 18 years of age or female workers employed at rates of less than $15.00 per week should be paid a full cost of living bonus equal to 1 per cent of the wage rate for each point of increase in the cost of living index since August, 1939.

Section 12—Cost of Living Index

90. The computation and compilation of the present cost of living index has been seriously criticized on the ground that the index, as now compiled by the Bureau of Statistics, is not a fair criterion and that it is outmoded. Criticism has been directed against the means now used in securing and checking upon information as to cost of living changes, and it is contended that the "weighing" of the various components is unscientific. It is particularly pointed out that workers in low wage brackets necessarily spend a large proportion of their wage income on the very items in the budget which have been the subject of the greatest increase in cost. The result is that, as to such workers, the index is no reflection at all of the actual increase in their cost of living.

91. The damage which results from an improper index can hardly be exaggerated. Apart from the injustice which is done to workers whose earnings depend upon the rise or fall of the index, and the injury to their morale and well-being as well as to their productivity, an inaccurate index generally undermines public confidence in the whole government, and war program. All housewives, and most workers, thus acquire a contempt for official pronouncements and assurances and a disbelief in their accuracy or sincerity. Furthermore, to the extent that management or government base their thinking and planning upon fluctuation in the cost of living, an index which is inaccurate becomes responsible for wrong conclusions. Industry and government are thus misled, not guided, and great harm can accrue before errors in policy or program are ascertained or corrected.

92. I agree, in general, with the observations made by my colleagues on this subject and upon the necessity of a complete revision of the whole cost of living index and the method of its periodic revision.

Recommendation No. 10.—It is therefore recommended that, in participation with representatives of labour, the whole question of the cost of living index, its base, methods of computation and calcluation, should be reviewed and reconsidered.

Section 13—No Taxation on Overtime or Cost of Living Bonus

93. Another cause for concern is to be found in some of the features of the taxation policy and the present method of deduction for income tax from current wages. The evidence at the Inquiry was very emphatic, both on the part of management and representatives of labour, as to the unrest and general resentment resulting from the present policy and methods. The fact that deduction is made on the assumption that the wage check for a specific week reflects a normal weekly wage return for the worker operates unfairly, and certainly unwisely, if it penalizes the worker, or convinces him that he is penalized, if he works extra hours or an extra day. The evidence was conclusive that in consequence working extra time or overtime is often avoided. We understand that the question of tax deduction from wages is now under review in relation, for instance, to the coal mining industry, and it appears that the authorities are becoming aware of the harmful effect on production resulting from the present deductions. No time should be lost in working out a practical solution.

94. There was considerable argument put forward at the Inquiry from management as well as labour that wages received for overtime work should not be subject to any taxation liability. The application of this policy might involve some difficulty but it merits the most careful examination. To the extent that the imposition of a tax on overtime work discourages such work, the net result of such taxation is that there is neither production for the industry nor revenue for the nation. There is then nothing upon which a tax can be based and nothing is produced. As against this, a policy of waiving taxation on overtime work, in a great measure, involves no loss to the Department of National Revenue and at the same time adds volume to production.

Recommendation No. 11.—It is therefore recommended that there should be no deduction for income tax from any wages received for overtime work and that the authorities give serious consideration to the whole question of tax liability for wages received for overtime work. In this respect, it might be pointed out that the proposal of my colleagues that there should merely be no deduction on overtime wages would leave a backlog of liability which would operate to the advantage of the worker with the greatest mobility, and to the disadvantage of those who are most definitely settled in an area and so more easily available for collection of in-

come tax arrears. It does not seem to be in the interests of the country that we should accumulate either bad debts or bad feeling. I suggest a careful, realistic, examination by the authorities of the merits and consequences of such a proposal.

95. The evidence at the Inquiry was equally explicit with respect to the discontent resulting from taxation on the cost of living bonus. Having regard to the fact that the cost of living bonus is in the nature of a subsidy to the worker, to compensate him for an increase in the cost of living and thereby justify controlling his free activity in respect to wage negotation, it appears to me to be quite illogical to tax cost of living bonus. The taxation of a subsidy, to say the least, is an anomalous proposition.

Recommendation No. 12.—It is therefore recommended that the prevailing tax legislation be amended by Order in Council to exempt workers from any liability for income tax on amounts received as cost of living bonus.

Section 14—Certificates for Compulsory Savings

96. The Inquiry disclosed that a large proportion of workers are extremely skeptical about deduction from their wages by way of compulsory savings. They have no tangible evidence that they have a credit with the government, or any indication of the time or circumstance which entitle them to its return. It is desirable that workers should understand, in the clearest way possible, what portion of the deduction from their wages represents compulsory savings, and the conditions of repayment. The greater the assurance which workers have that they have a credit with the Government by way of compulsory savings, and hence some cushion against possible post-war unemployment, the more "savings conscious" does the worker become, and thus more likely to divert voluntarily whatever he can from his present earnings to the purchase of war bonds and certificates.

Recommendation No. 13.—It is therefore recommended that the Department of National Revenue arrange that every worker be furnished with a certificate, say at quarterly periods, either from the Department or the employer, recording the amount deducted for compulsory savings, and the terms and conditions relating thereto.

Section 15—Employment of Women in Industry

97. The growing introduction of women into industry is a serious problem. It is wrong to assume that a greater number of women are now employed in industry only because of the diversion of man power to the armed or industrial forces. The introduction of women into industry is a direct result of the intensification of our industrial economy. The employment of women is bound to continue and to grow as the industrial nature of our economy continues to expand.

98. It is important, therefore, that fundamental principles should apply with respect to wage policy in the employment of women. As is pointed out in the report of my colleagues, the Orders-in-Council now in force on the subject make "no distinction as to wages between the sexes". This is in harmony with the only sound principle which can apply to the employment of women, namely, the principle of "equal pay for equal work". Any attempt to apply any other formula would have a most disturbing effect.

99. The difficulty arises from two sources. The Government, having proceeded legislatively on the principle of "equal pay for equal work", has been timid about consistently applying the formula. The experience in the Ford plant at Windsor is illustrative. Time and again, the company and the Department of Munitions and Supply have intimated the need for recruiting women for employment in the Ford and similar plants. Time and again, the Union concerned has welcomed the introduction of women into employment as a means of increasing production. Time and again, so soon as it is asserted that it will be expected that the principle of "equal pay for equal work" will be applied, the insistent need for female labour seems to dissolve. Government and employers alike must make up their minds on the consistent and fearless application of the formula of "equal pay for equal work".

100. The second source of difficulty results from an understanding of the formula itself. There appears to be some fear, or misunderstanding, that the formula is to be given automatic instead of factual application, and that it may be argued that work done by a woman is equal to that of a man, disregarding the question of productive results or productive costs. That difficulty is one that can only be met by recognizing the fact, as my colleagues point out, that in certain lines of production the average woman is as efficient as, or may

even be more efficient than, the average man, while in other lines, women may not be able to attain the same efficiency as men. This involves the factual application to each plant or industry of the formula of "equal pay for equal work."

101. My colleagues propose the establishment of a special board to deal with the subject, following the pattern of the Australian Act on the subject. The proposal is put forward on the ground that such a Board could give special study and gain special experience in respect to a specific problem. After giving the matter some careful thought, I have concluded that the establishment of such a board is quite unnecessary if the principle of "equal pay for equal work" is applicable. It has not been demonstrated that industry itself could not deal with the problem, if it were made clear that the principle of "equal pay for equal work" is to be applied, nor has it been established that the Labour Boards now dealing with wage matters would not also be able to deal effectively with the question of women employment. It would appear to be most advisable that one Board should deal with all wages, whether of male or female workers, thus securing the benefit of an overall knowledge of, and experience with, wage matters, applied to all workers, male or female. Then too, on the general basis of the danger of the minimum becoming recognized as a maximum, the reference to the Australian provision that women's rates can in no case be set at less than 60 per cent of the men's rates will probably lead to difficulties. It may suggest a standard rather than a protection. What sounds like a warning in Australia may echo as an invitation in Canada. Having regard to the danger involved in the experiment, I am quite opposed to the proposal that a special Women's Employment Board be established, at least until we have really tested the ability of industry itself, or the present Labour Boards, to deal with the question.

Recommendation No. 14.—It is therefore recommended that the employment of women in industry should be encouraged to the fullest extent necessary in the interests of production, having regard to health and physical welfare, but that all employment of women be based on the consistent application of the wage principle of "equal pay for equal work".

Section 16—Manpower and Selective Service

102. The rational and most effective distribution of our labour power becomes daily more urgent as military and economic needs absorb more and more of our people. The problem is not an easy one and it cannot be made too clear that we cannot settle the manpower problem until we have settled the labour problem. Moving men and women by a stroke of the pen becomes an idle gesture if it means that we attempt to move labour power from one industry to another, or from one area to another without regard to the comparative situations, either as to labour relations or wage conditions. It is no secret to say that, in the main this has been the experience of attempts to re-direct men into employment in the coal mines.

103. The concept that labour power should be so distributed that most energy and efficiency is exerted where it can do most good is the highest practical application of the principle of national interest enunciated at the outset of this Report. It is just for that reason that we find that at this point the problems we have discussed, whether under the head of labour relations and associated questions, or under the head of wage conditions and associated questions, must be solved on a sound basis or that the national interest is defeated.

104. Let us see how the failure to settle the questions which this report has dealt with cuts directly across the path of a program of utilizing our labour power "in the most effective way and according to proper priorities for effective production." Let us examine the matter first in connection with labour relations. Disregarding the question of jurisdictional difficulties within the area or organized labour, which itself would be corrected, certainly largely cured, by adequate collective bargaining legislation and machinery, what is the result of transferring a worker from an industry in which labour is organized, in which collective bargaining prevails, in which joint-production councils operate and in which, at the industrial level, there is co-ordination of planning and production, to an industry in which these things do not prevail? It is idle to expect that the worker will enter his new field of employment and disregard the absence of a union, or of collective bargaining, or of joint consultation with management on planning or production. A transfer of labour power under such circumstances invites disturbance, dislocation and lowered production. The same conclusion emerges if we examine the question under the head of wage conditions or associated questions. Are we to transfer men from industries and areas in which fair and reasonable standards of wages are being paid to areas in which substandard wages prevail? Is it to be expected that this will secure free mobility and full performance

from labour? It would be naive to give an affirmative answer to either question. The same situation confronts us if we contemplate the result of transferring women from employment in which the principle of "equal pay for equal work" is consistently applied, to employment in which that principle is ignored, or if we transfer workers from plants in which a full cost of living bonus of $4.25 per week is paid to plants in which employees only receive 60c per week.

105. As we review these matters—whether under the head of labour relations or wage conditions—we perceive that what appear at first sight to be only the rights or interests of workers become the nation's need, and the national interest. Injustice and mal-adjustments in the sphere of labour shew themselves up as threats to maximum national performance. It then becomes a matter of national interest to abolish them so that they can no longer exert artificial limitations upon our national effectiveness.

106. There is no point at which the wisdom or justice or effectiveness of government policy is so clearly tested as on the key question of the use and distribution of our human resources. It forms the very hub of national program. Much interest is now being manifested in the methods by which a selective service program can be efficiently administered. Too little interest, if any, is being manifested in the principles and policies upon which any sound program must be based. Whatever course is followed, this much is clear, that we cannot devise and successfully administer a sound policy for the *distribution* of labour unless at the same time we devise and successfully administer a sound policy for the *treatment* of labour.

Recommendation No. 15.—It is therefore recommended that in devising and administering the selective service program, steps be taken to provide a sound policy for the *distribution* of labour based upon a sound policy for the *treatment* of labour.

Section 17—Codification of Wartime Labour Laws

107. One result of the almost complete absence of any federal legislation on labour matters, whether in the field of labour relations or remuneration, is the procession of Orders in Council which have succeeded each other since the outbreak of the war. The position of the layman who must find his way through the confusing labyrinth of these enactments is a very unhappy one. I am not sure that the lot of the lawyer is much better.

108. Confusion about the meaning of legal enactments is not merely a matter of inconvenience, whether to the lawyer or the laymen. That consideration in itself is relatively trifling. Confusion about the meaning of legal enactments leads to social disorder because of the confusion created as to rights and as to obligations. No law should ever be so framed that it reads as a promise when its actual legal intent is to deny. Some of our wartime legislative enactments, particularly in the field of labour, appear to have been framed to convey assurance against the very discipline which the instrument imposes. No stability, no clarity about the wisdom of government policy, no constructive canons of citizenship can be established on that basis. A law which is not clear is a law which is not frank. The public, certainly those directly affected by legal enactments, are entitled to frankness. Social action, social thought, even criticism and opposition, then proceeds on a clear and on a sounder basis, and the government and the public are then more likely to arrive at sound conclusions.

109. A clear codification of all Orders-in-Council dealing with all labour matters, with stress on the need for simplicity, clarity and frankness of expression is obviously called for.

Recommendation No. 16.—It is therefore recommended that at the same time as enactments are effected pursuant to the recommendations made above, a clear and succinct codification be enacted of all Orders in Council passed under the War Measures Act dealing with labour matters.

Section 18—Summary of Recommendations

110. For the purpose of summary, I may say at this point, that my recommendations are as follows:

1. That a Dominion-wide Labour Code be enacted by Order-in-Council under the War Measures Act in which the principle of collective bargaining and union recognition will be made compulsory, with provisions against trespass or interference by any unfair labour practice. These should be carefully listed and must include all forms of intimidation or discrimination, outlawing of "company unions" properly defined, and refusal to bargain or deal with the collective bargaining unit of the workers affected. The code should cover all employment related directly or indirectly to the war and this should be clearly defined firstly so that it covers the whole of an industry, any part of which is engaged in war work, and also to include all auxiliary industries or operations which relate to the effectiveness of the war effort. The Code should be administered by a National Board supplemented by Regional Boards made up, except as to

Chairman, of direct representation equally of management and labour. Suitable machinery should be provided for prompt and effective disposition of cases with adequate penalties ensuring enforcement.

2. That the Labour Code include provision for the compulsory arbitration of "grievance" disputes, with adequate machinery to secure summary and effective administration supported by appropriate penalties for enforcement.
3. That as part of the machinery for administration of the Labour Code, permanent Boards of Conciliation should be constituted, directly representative, except as to Chairman, of management and labour, such Boards to be available on the summary application of either party to the dispute, to deal with disputes not otherwise covered by the Labour Code or by the Wartime Wages Control Order.
4. That measures be taken to organize joint labour-management councils and in particular that:
   (i) The Ministry of Munitions and Supply call a conference of the appropriate officials of its own and the labour department and representatives of management and labour in each industry to adopt a model working plan for plant joint production Committees.
   (ii) Joint Production Industrial Councils be set up for each industry or operation as a whole, composed of direct representatives of management and labour, co-operating with the suitable government departments or operations.
   (iii) An over-all National Industrial Council should be set up composed in the same manner as the Joint Production Industrial Councils, for the purpose of co-ordinating and utilizing most effectively the work and activities of the Joint Production Councils in the interests of maximum production and industrial planning.
5. That labour be afforded proper representation on all policy-making or administrative government boards or bodies.
6. That Section 25 of the Wartime Wages Control Order be replaced by a Section stabilizing wages, but enabling adjustments and increases to be made:
   (*a*) if justified by greater productivity,
   (*b*) if the wage is substandard or inequitable,
   (*c*) if justified by manpower needs.
7. That all wage rates of 50c. or less be free of any control and that as to such wages free collective bargaining should prevail, with the provision that in the event of disagreement the wage to be paid should be determined by the War Labour Board holding jurisdiction. The discretion of the War Labour Board is to be exercised free of any restrictive formula and with due regard to all the equities and fair and reasonable standards of wages.
8. That the Wartime Wages Control Order be so amended as to make mandatory the payment to all adult male employees of a uniform cost-of-living bonus of $4.25 per week to rise and fall uniformly with the official cost-of-living index.
9. That the Wartime Wages Control Order should be amended to provide that all male employees of the age of 18 years or over, and all female workers employed at rates of $15.00 per week or more shall be entitled to the full cost-of-living bonus provided in recommendation No. 8, above, with the further provision that all male workers under 18-years of age, or female workers employed at rates of less than $15.00 per week, should be paid full cost-of-living bonus equal to 1 per cent of the wage rate for each point of increase in the cost-of-living index since August 1939.
10. That in participation with representatives of labour, the whole cost-of-living index, its basis, method of computation and calculation, should be reviewed and revised.
11. That existing tax legislation be amended by Order-in-Council so that there will be no deduction for income tax from any wages received for overtime work and that the authorities give serious consideration to the whole question of tax liability as to wages received for overtime work.
12. That existing tax legislation be amended by Order-in-Council to exempt workers from any liability for income tax on amounts received as cost-of-living bonus,
13. That the Department of National Revenue arrange that every worker be furnished with a certificate, either from the Department or the employer, recording the amount deducted for compulsory savings, and the terms and conditions relating thereto.
14. That the employment of women in industry should be encouraged to the fullest extent necessary in the interests of production, having regard to health and physical welfare, but that all employment of women be based on application of the wage principle of "equal pay for equal work."
15. That steps be taken to provide for the efficient and effective administration of a sound policy for the distribution of labour based upon a sound policy for the treatment of labour.
16. That a clear and succinct codification be enacted of all orders-in-council, dealing with labour matters, passed under the Wartime Measures Act.

Section 19—Conclusion

111. At the outbreak of the war labour volunteered its pledge of no strikes in wartime, thereby demonstrating its recognition of the role and responsibility of labour in the present war. Management and government have failed to reciprocate that pledge or to assist its implementation by proper legislation, proper administrative policy or co-operation with the organized representatives of labour. The default whether of management or government must be remedied; labour's no strike pledge must be revived and adhered to. The past, with the unhappy situation which led

to the Inquiry, must be replaced by a wiser and more constructive future.

112. The cause of labour is not a sectional cause and the problem of labour is not a sectional problem. At no previous time in history has it ever been so true that the crux of the nation's interest lies in a complete solution of the problems of the millions of men and women who toil in the factories, in the mines and on the fields. That situation is at the same time labour's opportunity and labour's responsibility. Labour must take its place and fill its role by dealing with the basic issues which face our nation and thereby make itself and the nation strong and secure. This will not be accomplished if labour remains divided, if it gives cause for confusion or prejudice about its real aims, and if the true relationship is not recognized between its problems and welfare and the problems and welfare of the nation.

113. Management and government must make their full contribution if natural progress and security are to be achieved. Management's opposition and enmity to labour organization is *its* 'strike'. It injures itself thereby; more importantly it injures the nation. Labour organization is a counterpart of the machine age and it is as destructive of the national interest to oppose the one as it is futile to oppose the other. Management should reciprocate labour's 'no strike' pledge by a 'co-operation with labour' pledge. It will thereby advance the principle that the ability of Canada to protect and care for its people must become the touchstone of our social and economic relationships.

114. Government is faced with a grave responsibility. The historic importance of our day cannot be over-emphasized. We are living in a crucial hour similar to the movements which swept away ideas and practices which acted as barriers to the free movement of trade and commerce, which resulted in the struggle for representative government and which culminated in the Confederation of the Dominion. The modest factory has now given place to a gigantic industrial system. The individual artisan has now been transformed to a modern working class—over two millions strong. Yet, the fact is, that our industrial relationships and their related moral precepts linger on from the past. They are not able to serve the present or the future needs of the nation. The matters dealt with in this Report, and the body of fact and opinion revealed in the Inquiry, reflect issues as important to our time as were the struggles for representative government in their time. Our present basic problem, indeed is, in effect, the extension of the principle of representative government, applied to industry and commerce and to government activities associated with industry and commerce. They are issues which will not permit superficial, opportunistic treatment. They will respond only to measures which are guided and dictated by the national interest as we have ascertained it.

115. My colleagues observe that the Inquiry was timely. With that I agree, but in the same sense action is timely! Canada dare not continue any longer a policy which cripples its effectiveness and endangers its future. The people of Canada are waiting for guidance and leadership. Government must not fail them. The historic hour calls upon government, at once, to lead and guide and, above all, to equip the nation, so that we can march, integrated and strong, to win the war and to guarantee the peace.

Respectfully submitted,

(Sgd.) J. L. Cohen,
Member,
National War Labour Board.

Report of the Canadian Government Delegates to the Twenty-sixth Session of the International Labour Conference

Philadelphia, April-May, 1944

Ottawa, May 24, 1944.

The Hon. Humphrey Mitchell, M.P.,
Minister of Labour,
Ottawa.

Sir,—The undersigned delegates, appointed to represent the Government of Canada at the Twenty-Sixth Ordinary Session of the General Conference of the International Labour Organization, have the honour to report that the Conference met at Philadelphia, United States of America, from the 20th of April to the 13th of May, 1944.

Organization of the Conference

2. Forty-one States Members of the Organization were represented at the Conference, the total number of delegates and advisers being three hundred and sixty.

3. The Canadian Delegation was composed as follows:

Government Delegates:[1]
Mr. Paul MARTIN, K.C., M.P., Parliamentary Assistant to the Minister of Labour, Ottawa.
Mr. Brooke CLAXTON, K.C., M.P., Parliamentary Assistant to the President of the Privy Council, Ottawa.

Government Advisers and Substitute Delegates:
Mr. Arthur MACNAMARA, Deputy Minister of Labour, Ottawa.
Mr. Vincent C. MACDONALD, K.C., Assistant Deputy Minister of Labour, Ottawa; Canadian Government Representative on the Governing Body of the International Labour Office.
Mr. Paul Emile RENAUD, First Secretary, Department of External Affairs, Ottawa.
Mr. Alfred RIVE, First Secretary, Department of External Affairs, Ottawa; Substitute Canadian Government Representative on the Governing Body of the International Labour Office.

Government Advisers:
Mr. W. D. KING, Deputy Minister of Trade and Industry for Alberta.
The Hon. James O. MACLENAGHEN, Minister of Labour for Manitoba.
The Hon. L. D. CURRIE, Minister of Labour for Nova Scotia.
The Hon. Charles DALEY, Minister of Labour for Ontario.
Mr. J. O'CONNELL-MAHER, Associate Deputy Minister of Labour for Quebec.
Mrs. Cora CASSELMAN, M.P., Ottawa.
Mr. Alfred CHARPENTIER, President, Confederation of Catholic Workers of Canada, Montreal.
Mr. H. C. GOLDENBERG, Department of Munitions and Supply, Ottawa.
Mr. Allan MITCHELL, Director of Employment Service, Department of Labour, Ottawa.
Mr. Eric STANGROOM, Unemployment Insurance Commission, Ottawa.
Mr. George Moir WEIR, Acting Director of Training, Rehabilitation Branch, Department of Pensions and National Health, Ottawa.
Mr. Walter S. WOODS, Associate Deputy Minister, Department of Pensions and National Health, Ottawa.

Government Substitute Advisers:
Mr. Jean-Pierre DESPRÉS, Secretary, Superior Labour Council of Quebec.
Mr. Louis FINE, Chief Conciliation Officer, Department of Labour of Ontario, Toronto.
Mr. Antoine GARNEAU, President, Health Insurance Commission of Quebec, Quebec.
Mr. Allon PEEBLES, Director of the Research and Statistics Branch, Department of Labour, Ottawa.

Government Delegation Secretary:
Mr. John MAINWARING, Department of Labour, Ottawa.

Employers' Delegate:
Mr. William Charles COULTER, President, Coulter Copper and Brass Co., Ltd., Toronto.

Employers' Advisers:
Mr. J. C. CAMERON, Professor at Queen's University, Kingston, Ontario.
Mr. J. R. KIMPTON, Assistant Manager, Department of Personnel, Canadian Pacific Railway, Montreal.
Mr. Hugh W. MACDONNELL, Legal Secretary, Canadian Manufacturers' Association, Toronto.
Mr. Ralph PRESGRAVE, Vice-President, J. D. Woods, Ltd., Toronto.
Mr. Allan C. ROSS, Ross-Meagher, Ltd., and Ontario Vice-President of the Canadian Construction Association, Ottawa.

Workers' Delegate:
Mr. Percy R. BENGOUGH, President, Trades and Labour Congress of Canada, Vancouver.

Workers' Advisers:
Mr. William L. BEST, C.B.E., Vice-President and Legislative Representative of the

[1] The Canadian Minister of Labour attended some of the most important meetings and addressed the Conference on April 21, as reported below.

Brotherhood of Locomotive Firemen and Enginemen, and Secretary of the Dominion Joint Legislative Committee, Railway Transportation Brotherhoods, Ottawa.

Mr. George BURT, Regional Director, United Automobile Workers of America, Windsor, Ontario.

Mr. Robert CARLIN, M.P.P., International Board Member, International Union of Mine, Mill & Smelter Workers, Sudbury, Ontario.

Mr. Norman S. DOWD, Executive Secretary, Canadian Congress of Labour, Ottawa.

Mr. Ernest INGLES, Vice-President, International Brotherhood of Electrical Workers, London, Ontario.

Mr. Edouard LAROSE, General Representative, United Brotherhood of Carpenters and Joiners of America, Montreal.

4. Immediately before the session was declared opened, the Honourable Frances Perkins, Secretary of Labour of the United States of America, read to the Conference a message of greeting from President Roosevelt, of which the following is an excerpt:

I see in the International Labour Organization a permanent instrument of representative character for the formulation of international policy on matters directly affecting the welfare of labour and for international collaboration in this field. I see it as a body with the requisite authority to formulate and secure the adoption of those basic minimum standards that shall apply throughout the world to the conditions of employment. As part of these arrangements, also, I see in the International Labour Organization an organization which shall serve the world for investigation and research, for discussion and debate. But more than that, it must be the agency for decision and for action on those economic and social matters related to the welfare of working people which are practical for industry and designed to enhance the opportunities for a good life for peoples the world over.

It is to the International Labour Organization that we shall look as the official international organization where ideas, experience and movements in the field of labour and social development may find practical and effective expression.

5. The Conference was then declared opened by the Chairman of the Governing Body of the International Labour Office (Mr. Carter Goodrich, representative of the United States Government).

6. The election of the officers of the Conference gave the following results:

President:

The Honourable Walter NASH, Government Delegate (New Zealand).

Vice-Presidents:

Mr. Mariano BUSTOS LAGOS, Government Delegate (Chile).

Sir John FORBES WATSON, Employers' Delegate (United Kingdom).

Mr. Robert J. WATT, Workers' Delegate (United States of America).

Under the Constitution the Acting Director of the International Labour Office (Mr. E. J. Phelan) is also the Secretary-General of the Conference.

7. The items placed on the agenda of the Conference by the Governing Body of the International Labour Office were as follows:

1. Future policy, program and status of the International Labour Organization;
2. Recommendations to the United Nations for present and post-war social policy;
3. The organization of employment in the transition from war to peace;
4. Social security: principles, and problems arising out of the war;
5. Minimum standards of social policy in dependent territories;
6. Reports on the application of conventions (Article 22 of the Constitution);
7. Director's Report.

For each of these items the Conference had before it a report prepared by the International Labour Office, embodying texts of declarations, resolutions or recommendations to serve as a basis of discussion.

The Conference had, further, on its agenda the following items:

8. Resolutions presented for consideration by Delegates in accordance with the Standing Orders of the Conference;
9. Election of the Governing Body of the International Labour Office in accordance with Article 7 of the Constitution of the International Labour Organization;
10. Participation of the Republic of Costa Rica in the International Labour Organization.[1]

8. The Conference decided to set up the following committees:

Selection (or steering) Committee.
Chairman: Sir Samuel Runganadhan (India).

Committee on Items 1 and 2.
Chairman: Miss Frances Perkins (U.S.A.).
Vice-Chairmen
Mr. Coulter (Canada).
Mr. Hallsworth (British Empire).

Committee on Item 3.
Chairman: Mr. Paul Martin, K.C., M.P. (Canada).

Committee on Item 4.
Chairman: Mr. Guillermo Padilla Castro (Costa Rica).

Committee on Item 5.
Chairman: Mr. Honig (Netherlands).

Credentials Committee.
Chairman: Mr. Van den Tempel (Netherlands).

Committee on the Application of Conventions.
Chairman: Mr. Ohlin (Sweden).

---

[1] Under this item the Conference was called upon to give formal confirmation to the decision provisionally taken by the Governing Body of the Office to readmit the Republic of Costa Rica as a Member of the Organization. This confirmation was given unanimously by the Conference on April 21.

Committee on Resolutions.
Chairman: Mr. Trujillo Gurria (Mexico).
Vice-Chairmen:
Mr. Kirkaldy (British Empire).
Mr. Dowd (Canada).

Drafting Committee of the Conference.
Chairman: The President of the Conference.
Special Drafting Committee for the Proposed Declaration of the Aims and Purposes of the Organization.
Chairman: The President of the Conference.

Address by the Canadian Minister of Labour[1]

9. Before proceeding to discuss its agenda, the Conference heard an address by the Hon. Humphrey Mitchell, Canadian Minister of Labour (April 21). Mr. Mitchell expressed the good wishes of the Government of Canada and its people and the earnest hope that the deliberations of the Conference "will maintain the high standards of social endeavour that have been recently set in motion by (the Canadian) Government to eradicate from the lives of the men and women those three great basic fears: the fear of destitution through unemployment, the fear of destitution through old age, and the fear of destitution through sickness." After a short reference to the past and present relations of Canada and the International Labour Organization and the social measures adopted by both, Mr. Mitchell concluded:

"May we all leave this Conference inspired with the spirit of freedom that has contributed so much to the advancement of mankind. After all is said and done, your life and my life are only a heartbeat in the life of the nation or a civilization. May it be said of us here that we will have set in motion policies that have for their purpose the protection of men, women and children of our time and those who are to follow."

General Discussion of the Agenda

10. The Conference devoted its plenary sittings on April 24, 25 and 26 to a general discussion of items 1 and 2 on its agenda, namely:

1. Future Policy, Program and Status of the International Labour Organization;
2. Recommendations to the United Nations for Present and Post-war Social Policy.

11. Thirty-seven delegates took part in this discussion, including Mr. Paul Martin and Mr. Percy Bengough, respectively Government and Workers' delegates of Canada. Mr. Bengough said that the question of the future policy, program and status of the I.L.O. was, in his opinion, the most important question for consideration and decision that was before the Conference. The I.L.O. had the confidence of the people of the world. It had demonstrated its possibilities. There was no time now, nor was it necessary, to experiment in the endeavour to form another international organization to do the great work that had to be done.[2]

12. Mr. Martin, referring to the draft Declaration of the Aims and Purposes of the I.L.O.,[3] said that he welcomed the draft as a basis for discussion, but urged that it be revised so as to define with more precision the scope and functions of the Organization. There should be no room for doubt in the path which it was proposed the Organization should tread, particularly as it was recommended to the United Nations by the Office that it be repeated in affirmative terms in the peace settlement.

"The pattern which is beginning to take shape," he declared,

suggests that there will be a number of separate organizations, each of which will cover a particular phase of international economic or social relations. These separate international organizations are projected in the sphere of monetary and exchange policy, commercial policy, international collaboration to permit full employment, commodity policy, international investment, food and agriculture. It seems probable that there will be others.

In the view of the Canadian Government, these international organizations must eventually be brought together in an international framework. It is important that the functions of each should be clearcut and definite. Any tendency for one organization to take on vague general purposes which would encompass an excessive range of activities must be avoided if we are to avoid overlapping and confusion.

In regard to the internal affairs of the Conference, Mr. Martin suggested a change in the rules to provide for the attendance at the Conference, as part of national delegations, of two classes of observers: (1) representatives of the constituent states or provinces of the federal State; (2) representatives of important national bodies which have a direct and legitimate interest in the work of the I.L.O., but cannot properly be fitted into the existing composition of delegations as governmental advisers.

Certain questions as to the relation between the Organization and other international bodies, in particular the League of Nations, and as to the future program of the

---

[2] For the full text of Mr. Bengough's statement see Annex 2.
[3] See Annex 5.

Organization, Mr. Martin thought could hardly be settled at the present session. The necessary result of the expression of opinion given to the Conference should be the appointment by the Conference, or by the Governing Body of the Office, of a committee empowered to deal with resolutions or declarations affecting the future of the Organization.[1]

"Such a committee," he continued,

should meet as frequently as necessary, preferably in Montreal, and should, in active collaboration with the Office, discuss and revise the Office reports in the light of the discussion in this Conference.

The committee should have as its great task the fitting of the Organization into its proper and rightful place in the new international framework now beginning to emerge. Arrangements for collaboration between the International Labour Organization and other existing or projected organizations should be regarded as of a tentative and interim character, pending the establishment of a world council or the restoration of the League, or the creation of another central control agency . . . .

The work of the committee would crystallise in a report for submission to Governments with a view to action thereon at the next Conference.

13. In accordance with this view, the Canadian Government Delegates submitted for the consideration of the Conference, on April 26th, the following resolution:

Be it resolved that the Governing Body be asked to appoint a Committee to meet during and after this Conference as and when necessary for the consideration, in active collaboration with the Office and in the light of the views expressed in this Conference, of the following matters:

(*a*) the relationship of the Organization to other international bodies;
(*b*) the constitutional practice of the Organization and its clarification and codification;
(*c*) the status, immunities and other facilities to be accorded to the Organization by Governments as necessary to the efficient discharge of the responsibilities of the Organization;
(*d*) the method of financing the Organization;

And that the above Committee prepare a report or reports on such matters for submission to Governments in time for consideration of them with a view to action thereon at the next session of the Conference.

14. Another important resolution was submitted during the general discussion of items 1 and 2 by Mr. Beasley, Australian delegate. This resolution read as follows:

This Conference recommends to Governments that a Conference of representatives of the Governments of the United, associated, and other Nations, willing to attend, be called at an early date, to consider an international agreement on domestic policies of employment and unemployment; and this Conference pledges the full co-operation and the assistance of the International Labour Organization in calling such a conference on employment, and in helping to carry into effect appropriate decisions it might make.

15. These two resolutions along with the draft texts submitted by the Office, were referred to the committee set up to consider items 1 and 2 of the agenda, with the exception of the draft Declaration on the Aims and Purposes of the Organization, which was referred directly to a Special Drafting Committee.

Discussion of the Acting Director's Report

16. On May 8, the President of the Conference opened discussion on the Report of the Acting Director of the International Labour Office on the activity of the Organization since the last session of the general Conference. Thirty-two delegates took part in this debate, including Mrs. Cora Cesselman, Canadian Technical Advisor, who emphasized Canada's place in the world's economy, her war production effort and constantly improving social legislation.[2] The speeches delivered were rich in information concerning the conditions in the different countries. They were significant, too, for the warmth with which they expressed attachment to the International Labour Organization and the sense of the services which it can render. It was generally recognized that the basic need of the world after the close of the war will be the development of a civilization in which men and women can be assured of continuous work at fair rates of pay, and in which they will have a reasonable assurance against the three great tragedies of life: unemployment, sickness, and destitution in old age. Such a civilization could be developed only in an atmosphere of world peace and world co-operation. To this end the International Labour Organization had most important functions to perform: (*a*) in the establishment of cordial relations between management and labour; (*b*) in advancing the equalization of labour standards throughout the world; and (*c*) in furthering the development of social security.

17. In his reply (May 10) to the observations offered by the various speakers, the Acting Director of the Office stressed a few fundamental propositions. He pointed out that the Office should not be allowed to be-

[1] For the full text of Mr. Martin's statement see Annex 3.

[2] For the full text of Mrs. Casselman's speech see Annex 4.

come an academic research institution. Its task was to formulate for discussion at the Conference what it had discovered to be the general opinion of the constituent elements of the Organization.

The Acting Director noted that one of the outstanding features of the Conference had been the emphasis which had been laid upon the importance of vigorous action by the Organization in many parts of the world. The time, he believed, was rapidly approaching when the Organization should resume its American regional conferences. The first was held in Santiago-de-Chile in 1936, the second in Havana in 1939, and it was the intention to continue them at frequent intervals.

One other characteristic of this Conference, the Acting Director observed, was not that it differed from other Conferences, but that in the present circumstances of a world conflict raging on all the continents and in the two great oceans it should in its composition so closely resemble an ordinary meeting.

Turning to the question of the place of the I.L.O. in the new world organization which is progressively taking shape, the Acting Director said that there must be some general international framework within which the different agencies already created or being brought into being must find their place and some authority which will be responsible for the maintenance of peace and security and for the co-ordination of the activities of functional agencies. The various suggestions made to the Conference by the Office concerning relations with other international organizations were intended to implement this policy. The I.L.O. had, however, the special characteristic of its tripartite composition. It was important that in whatever new arrangements might be made its special character and functions should be respected and that it would at all events be given no less important a place than it had been given in its relations with the League of Nations in which it had the right of access to the highest authorities, namely the Council and the Assembly, whenever questions touching its interests were discussed.

The Acting Director said that, in this connection he was grateful to the Canadian Delegation for their resolution, which would result in transmitting to the Governing Body for further study certain detailed proposals concerning the facilities which the International Labour Office must have for carrying out its task.

Declaration on the Aims and Purposes of the International Labour Organization

18. The Special Drafting Committee appointed by the Conference to examine the proposed Declaration concerning the Aims and Purposes of the International Labour Organization held three sittings, in the course of which it took into account the observations made on the Declaration during the general discussion in plenary session, and the further observations drawn to its attention by delegates.

19. The Committee, after examining closely a number of proposals for rearranging the provisions of the proposed Declaration and simplifying the text, unanimously decided to propose to the Conference that the Declaration should be adopted substantially in the form in which it had been submitted by the Office. There was possible logical justification for almost any order of arrangement of its provisions, and in these circumstances the Committee thought it preferable to adhere to the order with which the Conference and the Governments had already become familiar.

The Committee also considered that it would be difficult to shorten or simplify the text substantially without omitting provisions which were regarded as important by one or another element in the Conference, and in these circumstances, it limited its efforts to simplify the text to breaking up various paragraphs into separately printed clauses.

In considering the various proposals made to it, the Committee was guided by the consideration that the Declaration was designed to be a statement of certain aims and purposes which were agreed upon by all elements in the Organization. In these circumstances, the Committee did not feel justified in accepting proposals, no matter how meritorious, the inclusion of which would clearly give rise to controversy, and it was guided in the revision of the wording of certain clauses by the desire to make the text acceptable to all groups in the Conference.

The Committee, in its report, having in mind the observations submitted by the Canadian Government Delegate, pointed out that the pledge contained in part IV of the Declaration that the I.L.O. would co-operate fully with other international bodies indicated clearly that the Organization realizes the part which other international agencies would be called upon to play, and that its own part, great as it might be in the treatment of social questions and in defining the social objective, was only a share of the task to be accomplished.

20. The Report of the Special Drafting Committee was approved by the Conference, without discussion, on May 10.

21. The full text of the Declaration, as finally adopted, will be found in Annex 5 to

the present report. As regards its contents, it should suffice to mention here that the Declaration reaffirms, among other principles, that "labour is not a commodity", that "poverty anywhere constitutes a danger to prosperity everywhere", and that "it is a responsibility of the International Labour Organization to examine and consider all international economic and financial policies and measures" in the light of these fundamental axioms.

Committee on Items I and II of the Agenda

22. The Committee on Items I and II had before it two main subjects: the first dealing with the future policy, program and status of the International Labour Organization (Report I submitted by the International Labour Office, with the exception of the Declaration on the Aims and Purposes of the International Labour Organization); the second dealing with recommendations to the United Nations on present and future social policy (Report II submitted by the International Labour Office).

23. After considering each of these questions in general discussion, the Committee appointed four sub-committees as follows:

Sub-Committee on Constitutional Questions,
Sub-Committee on Industrial Committees,
Sub-Committee on Economic Questions,
Sub-Committee on Axis Territories.

The first two Sub-Committees were concerned with Item I of the Agenda, and the second two with Item II.

24. At its meeting of 9th May, 1944, the Committee on Items I and II adopted the Reports of the Sub-Committees concerned with Item I on the agenda. These Reports were transmitted by the Committee to the Conference with the recommendation that the Conference adopt the Resolutions contained in the Reports.

Constitutional Questions

25. The Report of the Sub-Committee on Constitutional Questions contained the following three resolutions:—

Resolution concerning the constitution and constitutional practice of the International Labour Organization and its relationship with other international bodies;
Resolution concerning the international character of the responsibilities of the Director and the staff of the International Labour Office;
Resolution concerning the holding of a regional conference of the countries of the Near and Middle East.

The first resolution was submitted to the Committee in the name of the Canadian and United States Government Delegates. It was explained by Mr. Claxton to the Committee on May 5 that this resolution provides, in the first place, for interim machinery supplementary to normal procedures for the transmission of communications where the ordinary channels present serious difficulties which block the work of the Organization; second, it requests the Governing Body to begin work on regional and other special problems and to report to the next general session of the Conference what it has been able to plan and to set up for such special work; third, it provides that, during the period when a more permanent plan is being worked out, the Governing Body may and should deal with interim relations with new international organization; fourth, it requests the Governing Body to appoint a committee to consider the future constitutional development of the Organization, with a view to its long-term program; fifth, it provides for a committee of the Governing Body with power to act, should that become necessary in the interim, on constitutional matters that relate to the relationships of the International Labour Organization to other international bodies; and, finally, it authorizes the Governing Body to set the time and place of the next general Conference.

The three resolutions reported by the Sub-Committee on Constitutional Questions were adopted by the Conference at its eighteenth plenary sitting on May 12. The text of these resolutions will be found in Annexes 6, 7 and 8 to this Report.

Industrial Committees

26. The Sub-Committee on Industrial Committees met on May 8. An exchange of views took place, which revealed the unanimous desire of members of the Sub-Committee that action should be taken as rapidly as possible with a view to defining a policy for the constitution of committees for the main world industries and for translating that policy into action.

The Sub-Committee deliberately refrained from attempting to reach any definite conclusion as to whether the constitution of such committees, should be bi-partite (workers and employers only) or tri-partite. It was felt that this question would need further discussion by the Governing Body, and one member expressed the view that no single formula would cover the requirements of all committees or of all circumstances. Workers' members expressed a definite preference for a tri-partite constitution, and it was also pointed out in the discussion that such a constitution would offer the only means of insuring repre-

sentation to areas where occupational organization is still undeveloped.

With regard to the composition of the industrial committees, stress was laid upon a number of difficulties that would have to be faced by the Governing Body, for instance, the problem of determining the countries to be represented and the number of representatives to which they would be respectively entitled on the various committees. It was urged that the Governing Body should give the clearest possible guidance to those upon whom would fall responsibility for selecting employers' and workers' representatives.

The Sub-Committee did not attempt to reach conclusions as regards the possible scope of the activities of such committees. It took note, however, of a statement by the Indian Government member that it would be desirable for the committees, in so far as economic issues came up for their consideration, to confine their attention to the social aspects of those issues and of a statement by the French Workers' member that each committee should confine its attention to problems peculiar to its own particular industry, and should not attempt to deal with social problems of a general nature.

The Sub-Committee concluded its discussion by unanimously adopting the following resolution which, on May 12, was approved by the Conference in plenary sittings (Annex 9):—

That this meeting is of the opinion that the International Labour Office should proceed forthwith with the setting up of industrial sections and invites the Governing Body to elaborate regulations governing the activities of industrial committees.

Axis Territories

27. The Sub-Committee on Social Policy in Occupied Axis Territories held three sittings on 6th and 9th May. A general discussion took place on the resolution concerning government and administration by the United Nations of Germany and other totalitarian countries in Europe submitted by the Office as a basis for discussion. It was decided to recommend that the proposals submitted by the Office should be referred back to the Governing Body together with the minutes of the discussion.

A general discussion took place also in the Sub-Committee on the resolution concerning measures for the protection of transferred foreign workers and of foreign workers' organizations submitted by the Office to the Conference. The British Government member suggested that the present Conference was not the proper place at which a resolution concerning action to be taken by the United Nations in respect of a problem that would arise when the Allied forces occupied German territory should be formally adopted, and also pointed out that one of the most important United Nations (U.S.S.R.) was not represented at the Conference. He proposed that the text, as amended, should be referred to the Governing Body, along with the minutes of the discussion that had taken place, in the same manner as the proposed resolution concerning government and administration by the United Nations of Germany and other totalitarian countries in Europe.

On a vote being taken, it was decided by five votes to one to submit the text of the proposed resolution as amended to the full Committee with a view to its adoption by the Conference.

The resolution was adopted by the Conference as a whole at its eighteenth sitting held on May 12. The text of the resolution will be found in Annex 10 to the present report.

Economic Policy

28. The Sub-Committee on economic policies for the attainment of social objectives held three sittings on May 5, 8 and 9. It decided to recommend unanimously to the Committee on Items I and II to transmit to the Conference for adoption the draft Resolutions constituting Annexes 11 and 12 to this report, namely:

Resolution concerning economic policies for the attainment of social objectives, and

Resolution requesting the Governing Body of the Office to examine problems involved in labour provisions for internationally-financed development works.

By the Resolution concerning economic policies the Conference welcomed the creation of the United Nations Relief and Rehabilitation Administration; endorsed the declaration of the United Nations Conference on Food and Agriculture held in May, 1943; noted with satisfaction that the United Nations were giving careful attention to the establishment of effective international machinery for settling balances arising out of international trade and other transactions and for maintaining stability in rates of exchange; expressed the hope that they will examine wartime changes in industrial capacity, arrange for exchange of information on post-war industrial programs, and promote the expansion of international trade by appropriate commercial policies; recommended that arrangements be made by those nations whose productive capacities have been maintained during the war, by all other nations which are in a position to make materials available and by the appropriate international organizations, to give the highest priority consistent with the exigencies of war to immediately supplying the territories liberated from Axis occupation with materials and equipment required for

industrial installations, agriculture, transport, public works and utilities of an essential character; and urged that all practicable measures be taken to maintain a high and steady level of employment.

The Report of the Sub-Committee on economic policies was adopted by the Committee on May 10, and by the Conference on May 12.

Social Provisions in the Peace Settlement

29. The Committee on Items I and II, at its plenary sitting on May 10, considered the text of the Resolution of the Office concerning social provisions in the peace settlement, and the series of amendments and resolutions on this subject presented by members of the Committeee.

Amendments offered by the Australian and United States Government members affecting paragraphs 1 and 2 of the Office text were discussed together. The Australian Government member had proposed the calling of an international conference to consider "an international agreement on domestic policies of employment and unemployment." The United States Government member had initially proposed a substitute text for the Office suggestions. The Australian Government member proposed a substitute amendment to the amendment submitted by the United States Government to replace the substance of the United States text by an alternative text. In view of the divergence between these two texts, the Committee, at an earlier sitting, had postponed consideration of either amendment with the suggestion that the two Governments try to reach an agreement on a single draft. Negotiations took place in the interim, but it was found that there was no basis for agreement. The Australian Government indicated that it wished to arrive at a text providing at this time for formal undertakings and international obligations with regard to maintaining high levels of employment in advance of other international agreements in related economic fields. The United States Government was not prepared at this Conference and in advance of other conferences being prepared under other auspices to enter into international undertakings concerning domestic policies of employment. The United States Government agreed that the nations must acknowledge themselves as willing and having the duty to maintain high levels of employment by domestic policies in co-ordination with international economic policies. Consequently, the Committee had before it separate texts from the Australian and United States Government members. In the course of the discussion, it was pointed out by representatives of governments that they did not consider it to be appropriate, at this moment, to undertake any binding obligations concerning employment policies because other aspects of international collaboration must be settled before countries undertake such obligations. This point of view was protested against by the Australian Government member, who indicated that as Australia was greatly dependent on world conditions, the Australian Government considered that if the United States Government was unwilling to undertake obligations in the field of employment the Australian Government must hesitate before entering into discussions on other aspects of international co-operation.

The original text of the Australian amendment provided for consultation by Governments "with appropriate international authorities"; for governments to submit statistics "through an appropriate international organization"; for governments to report to an annual conference on their employment conditions and their policies to combat unemployment, and for representatives of governments and international authorities at a special conference called by "the appropriate organization." At the request of the workers' delegates of the Committee, the Australian Government member accepted an amendment to his proposal to provide that in each case the appropriate international authority should be the International Labour Organization.

The amendment submitted by the Australian Government, as revised during the discussion, was put to the vote. It was rejected by 22 votes to 17.

Following the vote on the Australian amendment, the amendment submitted by the United States Government member as a substitute for the Office proposals was taken for final discussion and for vote. The amendment was adopted by 46 votes to 3.

The resolution of the Committee on social provisions in the peace settlement was adopted unanimously by the Conference as a whole on May 12, with a slight amendment. The text as adopted will be found in Annex 13 to this report.

Part I of the resolution proposes a series of articles which are declared to be "appropriate for inclusion in a general or special treaty or agreement between nations desirous of giving early effect to the principles of the Atlantic Charter and of Article VII of the United States Mutual Aid Agreement." These articles include reaffirmation of the Declaration of Philadelphia. In them, each government recognizes its duty to maintain a high level of employment. They indicate that this and other standards of labour which are recited in

the text are of international concern and should be among the social objectives of international as well as national policy.

Part II of the resolution proposes that in case of danger of a substantial fall in general employment levels—and full employment is noted as one of the principal social objectives —the Governing Body shall call a special emergency conference of the I.L.O. to attempt to deal with the problem practically.

Part III of the resolution contains a series of specific suggestions for social provisions.

Part IV provides for continuing machinery by which the Governing Body may give further advice and counsel on these subjects as need and opportunity arise.

Part V is what has come out of the discussions on the Australian proposal. It recommends that Governments, in association with the Governing Body of the International Labour Office, consider the calling of a conference to consider an international agreement on domestic policies of employment and unemployment.

Committee on Employment

30. The Committee on Employment appointed as its Chairman Mr. Paul Martin, K.C., M.P., Canadian Government delegate. The Chairman explained at the outset that the Committee's duty was to place before the Conference general guiding principles on the organization of employment in the transition from war to peace.

31. The procedure for carrying out this task was the subject of a general discussion in the course of which it was suggested that the Committee should not interpret its terms of reference too strictly and that, in order to be of full use to the Governments, its conclusions should include proposals concerning possible methods of application. It was also indicated that these methods should not necessarily be suggested as applicable to all countries and that the proposals of the Office might conveniently be adjusted and expanded so as to deal more adequately with the conditions of particular countries such as the devastated countries of Europe or the less industrialized countries of America or Asia. It was decided therefore that the Committee should take the Office texts as the basis of discussion, should attempt to extract from them general guiding principles and should also present suggested methods and machinery for the application of these principles, bearing in mind the need for flexibility and alternative solutions.

32. As a result of its eleven sittings, the Committee submitted three Recommendations for adoption to the Conference, namely:

Recommendation concerning Employment Organization in transition from war to peace (Annex 15).

Recommendation concerning the Employment Service (Annex 16), and

Recommendation concerning the National Planning of Public Works (Annex 17).

In presenting these Recommendations to the Conference, Mr. Martin referred to the demand "in each country on the part of all people, of all shades of political opinion," that full employment be achieved in time of peace as it has been in war. He pointed out that the attainment of this objective is dependent upon the fullest economic and political collaboration of all the nations of the world (Annex 14).

33. The first Recommendation contains eleven general principles. In order to hasten the reabsorption and redistribution of all persons who desire to work, it is proposed that each Government should collect information in advance in order to indicate the workers who will be available upon demobilization and the employment opportunities that will be open to them.

It is further proposed that the assistance extended to persons returned to civil life should include reinstatement in their former jobs, the affording of all possible opportunity for other suitable employment and for advancement on the basis of their qualifications, and financial aid where it is economically feasible for them to settle on the land or to undertake professional or other independent work.

As regards industrial reconversion programs, it is urged that these should aim at minimizing unemployment in the transition period, and at facilitating the most rapid attainment of full employment for the production of needed goods and services. Contract cancellation should take the employment factor into account, and advance information should be given of dismissals and layoffs. The Committee rejected as unsound the idea that war industries should be kept in operation until some other forms of employment became available.

Three sections of the Recommendation are concerned with applications for work and for

workers, vocational guidance and training and retraining programs. It is suggested that the widest possible use of employment service facilities by employers seeking workers and by workers seeking employment should be encouraged by public authorities and by employers' and workers' organizations. Governments should endeavour to make vocational guidance facilities available to persons seeking work. Training and retraining programs should be developed in order to meet the needs of those who will have to be reinstated in employment or provided with new jobs.

The principle that Governments in co-operation with employers' and workers' organizations should formulate a positive policy in regard to the location of industry and the diversity of economic activity, and should facilitate the necessary mobility of labour, was widely approved.

The need of better standards of education and health supervision for young persons and for provision of the widest possible opportunities for acquiring skills for juveniles and young workers who were unable because of the war to undertake or to complete their training is recognized.

There is endorsement of the principle of complete equality of opportunity in post-war employment for men and women on the basis of their individual merit, skills and experience.

It is recommended that disabled workers, whatever the origin of their disability, should be provided with full opportunities for rehabilitation, specialized vocational guidance, training and retraining and employment in useful work.

The first Recommendation closes with a proposal that measures should be taken to regularize employment within particular industries and occupations most subject to fluctuations.

34. The second Recommendation deals with the functions of the employment service, which would acquire additional responsibilities in the demobilization period under the terms of the previous Recommendation and which, in the opinion of the Committee, should be materially strengthened to meet the needs of a long-term policy of full employment.

The Recommendation provides that the employment service, in co-operation with other public and private bodies concerned, should ensure the best possible organization of all types of employment as an integral part of the national program for the full use of productive resources. To this end, the employment service and related agencies should be responsible for collecting and making available information concerning labour supply, employment opportunities, the skills required to do particular jobs, changes in skill requirements within the different industries, employment and unemployment trends, the regularization of employment, the causes of unemployment, and other information of value in promoting full employment.

In addition, it is proposed that the employment service should in a number of particulars, assist and co-operate with other public authorities operating in related fields. It should for example, maintain close co-operation with authorities charged with responsibility for accelerating or slowing down public works in accordance with the current state of employment and unemployment.

35. The third Recommendation submitted by the Committee on Employment is concerned with the national planning of public works, and in the light of prospective post-war needs undertakes to lay down general principles amplifying the Public Works Recommendation of 1937. It is now proposed that each Member Nation should prepare a long-term development program which can be accelerated or slowed down in accordance with the employment situation in different parts of the country. It is further proposed that its execution be so timed as to have a stabilizing effect on the national and local employment situation, that consideration be given in applying this policy to the particular skills available, and that the central authority should, at the earliest possible moment, in the interest of soldiers to be demobilized, indicate what financial support for public works they will provide to local jurisdictions.

36. Two Resolutions were also included in the Report of the Employment Committee to the Conference (See Annexes 17 and 18 below). The first draws attention to the I.L.O. Conventions and Recommendations bearing upon the organization of employment in the transition period. It urges members who have not already done so to give consideration to their ratification or to making effective the provisions of such Conventions or Recommendations. The other deals with international public works and invites the Governing Body to call a meeting of the International Public Works Committee at the earliest opportunity.

37. The Report of the Committee, together with the Recommendations and Resolutions contained therein, was adopted unanimously by the Conference at its seventeenth plenary meeting on May 11.

Committee on Social Security

38. The Committee on Social Security devoted three sittings to a general discussion, in the course of which interesting descriptions were given of social security developments in different countries.

39. The general discussion having been completed, the Committee set up two sub-committees, one to examine the Recommendation proposed by the Office concerning medical care, and the other, a proposed Draft Convention concerning the maintenance of the pension rights of displaced persons. The remaining questions contained in Report IV of the Office were left to be examined by the full Committee.

40. At the conclusion of its discussions, the Committee decided to transmit to the Conference the following recommendations and resolutions:—

Recommendation concerning income security (Annex 20).
Recommendation concerning income security and medical care for persons discharged from the armed forces and assimilated services and from war employment (Annex 21),
Recommendation concerning medical care (Annex 22),
Resolution concerning social security in Asiatic countries (Annex 23),
Resolution concerning the definition of terms used in international conventions and recommendations concerning social security (Annex 24),
Resolution concerning social insurance rights and related questions in the peace settlement (Annex 25),
Resolution concerning international administration to promote social security (Annex 26).

42. By the first Recommendation Members of the Organization are urged to apply, as rapidly as national conditions allow, certain guiding principles set forth in the Recommendation, in developing their income security schemes with a view to the implementation of the fifth principle of the Atlantic Charter, and to report to the International Labour Office concerning the measures taken to give effect to these principles.

43. The second Recommendation provides for the social security of members of the armed forces and assimilated services under three heads: mustering-out grant, unemployment insurance and assistance, and pension and sickness insurance.

44. The third Recommendation contains general principles, and suggestions for their application, for the extension and generalization of measures to protect the health of the people.

45. The Resolution concerning the social insurance rights of displaced persons replaces a proposed Draft Convention. It suggests that the peace settlement should include arrangements to protect the social insurance rights of workers recruited for employment by Axis and Associated countries.

46. The Resolution on International Administration to Promote Social Security provides for technical assistance, both by the Office and by States which have schemes in operation, to countries which are in the course of initiating or modifying their institutions. It deals with three primary aspects of collaboration: first, the interchange of experts; second, regular interchange of information especially on: (1) statistics of social security services and consideration of the possibility of standardizing them; (2) large-scale investment; (3) measures to simplify administration; (4) relations between social assistance and social insurance; (5) prevention of the risks covered by insurance; and (6) organization of courses of higher study for the training of administrative staff for social insurance institutions. Finally, the Resolution suggests that the Office should consider the opportunity of concluding international agreements for common tasks within the financial or administrative field.

47. All the texts submitted by the Committee on Social Security were approved by the Conference as a whole. A motion by Mr. Tomlinson, Government delegate of the United Kingdom, that the first Recommendation should be sent to Governments for their observations, and that the whole subject covered by the Recommendation should be placed on the agenda of the next Conference with a view to the adoption of a Draft Convention was defeated by 68 votes to 14.

Committee on Social Policy in Dependent Territories

48. In the Committee on social policy in dependent territories a general discussion was first held, in which opinions were expressed on the nature of policies of social development in dependent territories, and on the means of giving effect to the Conference's instructions. While some members stressed the urgency of reaching concrete results at the 26th Session of the International Labour Conference, other members held that the questions were so complex and that the preparatory work of the Conference had been so rapid that the Conference should take final decisions only after

there had been an opportunity for consultation of the interests concerned.

The British Government member, for instance, pointed out that the Report had not been prepared in accordance with the usual method of consultation with the Governments. The British Government, as is shown by its policy, was favourably disposed towards all efforts to improve social standards in dependent territories. It considered, however, that this should be done in accordance with normal procedure and in the most practical manner. In view of the decision of the Conference the real task of the Committee was to summarize the views of the members on the Office's proposals. If that plan was adopted, voting on any question of principle should be unnecessary, and, if such questions were put to the vote, the British Government would abstain.

The Employers' members supported these arguments.

The Government delegates of Belgium, United Statets, France, Australia, New Zealand and the Netherlands urged that the decisions reached should be presented in a reasonably strong form. The colonial peoples, who had shown their loyalty during the war, would be greatly disappointed if only a resolution emerged from this Conference. The British Workers' member said that the sacrifice of dependent peoples during the war would seem incomprehensible to them if no benefits were offered to them as a result of victory. A second discussion method would postpone to an uncertain date the final decisions of the International Labour Conference.

Finally, the motion that the Committee should suggest that the Articles on which it had agreed should be adopted by the Conference in the form of a recommendation was approved by the Committee by twenty-five votes, with thirteen abstentions.

49. When the final text of the proposed Recommendation was put to the vote in the Committee, the British Government member said that he could vote in favour of the Recommendation, subject to the reservation, expressed by his abstention on the motion to propose a Recommendation, that he considered that the choice of the form in which the guiding principles should be adopted should be left entirely to the plenary Conference. The British Employers' member associated himself with this statement on behalf of the Employer members who had abstained on the motion.

With these reservations the proposed Recommendation was adopted unanimously (33 votes to 0).

50. The draft Recommendation lists a few general and basic principles. The first is that the primary object of the policy applied to dependent territories must be the well-being and the development of the peoples of these territories.

In addition to stating this principle the draft Recommendation suggests the means of carrying it out in asking that the physical means be placed at the disposal of the authorities whose aim has been the emancipation of the people in dependent territories.

The draft Recommendation also makes a point of associating those who live in these dependent territories with the achievement of this aim, associating them with it continually and in so far as the evolution of the autochthonous institutions permits.

The draft Recommendation does not ignore such questions as slavery and opium. It also recalls four international labour Conventions passed some time ago and applying specifically to these same territories: one on forced labour, one on the recruiting of workers, one on labour contracts, and one on punitive sanctions.

The draft also contains provisions for the protection of child, youth and women labour. One of the sections of the draft Recommendation is devoted to the remuneration of workers; another to public welfare, dwellings, and social security; and still another to professional organizations and co-operative organizations.

One provision in the Recommendation prohibits any discrimination between workers on grounds of race, colour, religion or tribe.

51. Two resolutions were also adopted without opposition to secure the continuation of the examination of minimum standards of social policy in dependent territories by the Conference and appropriate means of study to this end.

52. Subject to an amendment submitted by Mr. Hallsworth, Workers' delegate of the United Kingdom, and providing for the insertion in the Recommendation of clauses 1, 2 and 3 of section 14, "Inspection and Safety", on page 65 of Report V of the Office, the Recommendation, together with the two Resolutions, were adopted by the Conference in plenary sitting.

Before the Recommendation was put to the vote, the Government delegate of the United Kingdom announced that his vote would be given in favour of the adoption of the text that was before the Conference.

53. The text of the Recommendation and of the two Resolutions as adopted by the Conference will be found in Annexes 27, 28 and 29 of this report.

Credentials Committee

54. The Committee on Credentials submitted to the Conference four reports in which it noted, among other things, that the following delegations were incomplete:

Government delegates only (11):
Ethiopia, Haiti, Iran, Iraq, Ireland, Liberia, Luxembourg, Switzerland, Turkey, Uruguay, Venezuela.

Government and Workers' delegates only (2):
Colombia, Costa Rica.

55. Objections to the nomination of the following members were submitted to the Committee:

The Indian Workers' Delegates and Advisers (lodged by the All India Trade Union Congress),

The Yugoslav Workers' Delegate and Adviser (lodged by the Yugoslav Seamen's Union),

The Delegates appointed by the Government of Yugoslavia (lodged by the United South Slav Committee),

The Workers' Delegate and Advisers of the Argentine Republic (lodged by the Secretary of the Workers' Group of the Conference),

The Workers' Delegate and Adviser of Greece (lodged by the Representative of the Panhellenic Federation of the Maritime Trade Unions).

56. The objection concerning the nomination of the Workers' Delegate and Advisers of the Argentine Republic was subsequently withdrawn by its author. As regards the other nominations to which objection was made, the Committee asked the Conference to consider them as duly valid for the 26th Session of the Conference.

57. The four reports of the Credentials Committee were adopted by the Conference without discussion.

Committee on the Application of Conventions

58. This Committee's report to the Conference dealt with the obligation on Governments to make annual reports to the Office on the measures which have been taken to give effect to the provisions of the Conventions which their respective countries have ratified and to which they are parties. In spite of the obstacles which made the full operation of the normal procedure impossible, this obligation had been substantially fulfilled, the Committee reported.

59. The Committee, however, considered it important that the normal procedure should be re-established as early as possible and therefore recommended: (*a*) that the Committee of Experts for the examination of reports on the application of Conventions be re-established at the earliest possible date, and (*b*) that the personnel of the Office should be increased to enable it to undertake the statutory duty imposed upon the Director by Article 22 of the Constitution to compile a summary of the annual reports for submission to the Conference.

60. The Committee found that it had not been possible to do much to implement the recommendations made by the Committee on the application of Conventions in their report to the Conference in 1939 and therefore wished to reiterate the recommendations made in the following respects:

(*a*) The importance "of Governments supplying their annual reports in time for examination by the Committee of Experts";

(*b*) The importance of a realization that "there is no legal basis for delay on the part of a State in giving effect to a Convention which it has ratified";

(*c*) "That in securing the proper enforcement of the national legislative and other measures implementing the ratified conventions, labour inspection, operated by a staff adequate in number, training and organization, plays a fundamental role."

61. Certain suggestions for improving the position as regards the ratificaton and application of Conventions were made in the course of a general discussion in the Committee. No mention of these suggestions was made in the Committee's Report, as they were considered by the Committee to be outside its terms of reference.

The suggestions were:

(1) Establishment of a procedure that would enable a Government, after application to the International Labour Organization, to ratify a Convention, even if its legislation did not conform to that embodied in the Convention, on condition that this legislation has been found to be of an equally high level from a social point of view by an appropriate organ of the International Labour Organization;

(2) the practicability of framing regional Conventions;

(3) The possibility of allowing of ratification of a Convention by stages;

(4) That before a country is permitted to ratify a Convention, its national law should be brought into conformity with it;

(5) That these and other similar suggestions might suitably be considered by a special tripartite committee, or that they might be specifically considered by the Committee of Experts.

62. The Report of the Committee on the Application of Conventions was adopted by the Conference at its fourteenth plenary sitting on May 10.

Resolutions Committee

63. This Committee examined the resolutions submitted other than those relating to items on the agenda with a view to ascertain their receivability both as regards the time-limits for their submission and as regards the competence of the Conference, and considered their expediency.

64. Six resolutions were thus examined by the Committee, namely:

Resolution concerning the action of Federal States on Conventions and Recommendations, submitted by Mr. Bengough, Workers' delegate, Canada (Annex 30);

Resolution concerning the membership of Austria in the International Labour Organization, submitted by the Government delegate of Czechoslovakia (Annex 31);

Resolution concerning complete delegations to the Conference submitted by Mr. Jamnadas Mehta, Indian Workers' delegate (Annex 32);

Resolution concerning the use of Spanish and Portuguese as official languages, submitted by the Government delegates of Brazil, Chile and Uruguay (Annex 33);

Resolution concerning the membership of certain American States in the International Labour Organization, submitted by the Government delegates of Chile, Colombia and Mexico and by the Workers' delegates of Canada and the Netherlands (Annex 34);

Resolution concerning Nazi crimes, submitted by the Polish delegates (Annex 35).

65. These resolutions were transmitted to the full conference, which adopted them all, with the exception of the Resolution concerning Federal States, submitted by Mr. Bengough of Canada, which was transmitted to the Governing Body of the International Labour Office to be considered along with the other constitutional matters listed in the Canadian Resolution referred to in the section of this report devoted to the work of the Committee on Items I and II.

Elections to the Governing Body

66. On May 5 the electoral colleges of the three groups represented at the Conference met separately to elect new members of the Governing Body.

As a result of the elections, the elective seats on the Governing Body are occupied as follows:—

Governments (1):

Brazil, Chile, Mexico, Norway, Poland, Yugoslavia, Peru and Greece.

Employers—Regular Members:

Col. Antoine (France), Col. Chapa (Mexico), Mr. Erulkar (India), Sir John Forbes Watson (United Kingdom), Mr. Gemmill (Union of South Africa), Mr. Harriman (United States of America), Mr. Joassart (Belgium), Mr. Morawetz (Czechoslovakia).

Deputy Members:

Mr. Li Ming (China), Mr. Dahl (Norway), Mr. Macdonnell (Canada), Mr. Cowley Hernandez (Cuba), Mr. Falter (Poland), Mr. Kulukundis (Greece), Mr. Warning (Netherlands), Mr. Banats (Yugoslavia).

Workers—Regular Members:

Mr. Hallsworth (United Kingdom), Mr. Watt (United States of America), Mr. Anderson (Sweden), Mr. Laurent (France), Mr. Rens (Belgium), Mr. Chu Hsueh-fan (China), Mr. Lombardo Toledano (Mexico), Mr. Bengough (Canada).

Deputy Members: Mr. Crofts (Australia); Mr. Oldenbroek (Netherlands); Mr. Kosina (Czechoslovakia); Mr. Ibanez (Chile); Mr. Downes (Union of South Africa); Mr. Adamczyk (Poland); Mr. Nordahl (Norway); Mr. Mehta (India).

69. It was decided that the mandate of Governments and persons occupying elective seats would not be extended beyond the next ordinary session of the International Labour Conference.

Declaration by the Delegations of Occupied Countries

70. The Conference members representing the occupied countries of Europe, (Belgium, Czechoslovakia, France, Greece, Luxembourg, the Netherlands, Norway, Poland, and Yugoslavia) held meetings during which they agreed on the text of a declaration regarding the special reconstruction problems of those countries (Annex 36).

The text of this Declaration was read to the Conference by Mr. Tixier, Government Delegate of France.

71. Miss Perkins, Government Delegate of the United States, then moved a resolution taking note of the Declaration and expressing the hope that the United Nations and the

(1) The permanent seats of the Governing Body are occupied by the United States of America, Belgium, British Empire, Canada, China, France, India, Netherlands.

other members of the Conference will unite their efforts to promote in every way the economic and social recovery of all the countries sorely tried by enemy occupation and by the devastation due to the war (Annex 37).

This resolution was seconded by Sir Frederick Leggett on behalf of the British Government delegation and adopted unanimously by the Conference at its eighteenth sitting on May 12.

Closing of the Conference

72. The Twenty-Sixth Session of the International Labour Conference was declared closed at 8 p.m., May 12, after a series of speeches by the President, Vice-Presidents and the Secretary-General of the Conference.

73. In his closing speech the President stated that he had never attended a meeting where representatives of three groups, employers, employees and Governments, had been so united in the objectives towards which they desired to travel. The Declaration of Aims which the Conference had adopted would go down in history as one of the most significant documents of our time. It was the greatest social charter that had yet been published. The Declaration and the Recommendations that had been adopted lay the foundation for the kind of post-war world we had undertaken to bring into being. But the constructive task of building upon this foundation was one to which we must still dedicate our efforts and our resolve.

We have the honour to be,
Sir,
Your obedient servants,

(Signed) Paul Martin,
Brooke Claxton.

ANNEX 1—Address by the Canadian Minister of Labour, Honourable Humphrey Mitchell

I bring to this Congress the good wishes of the Government of Canada and its people, and in so doing express the earnest hope that these deliberations will maintain the high standards of social endeavour that have been recently set in motion by our Government to eradicate from the lives of the men and women those three great basic fears: The fear of destitution through unemployment; the fear of destitution through old age; and the fear of destitution through sickness.

The Government of Canada has been active in the International Labour Organization since its inception. The size of the Canadian delegation here this morning is an indication of the importance that our Government attaches to this Organization as an agency for the crystallization of progressive measures throughout the civilized world.

We maintained a permanent representative in Geneva prior to the outbreak of war, so that we could be in the closest contact with the International Labour Organization. After the outbreak of war, we took you into our home. I hope it is only temporarily, that you will go back some day to that magnificent structure that was used prior to the outbreak of war. While it is sometimes very cold in our country in the winter, you can rest assured that the warmth of our reception to the Office is on a par with the vigour and the generosity of the Canadian people.

I think it is fair to say that this Organization has made the greatest contribution to world good of any international organization that has ever been set up. What pleases me a great deal, too, is that we are meeting on American soil; since the genesis of this Organization was conceived in the mind of that great labour leader, the late Samuel Gompers. I have always felt that it is the simplest things that govern the destinies of a nation or a civilization. Whenever I am a little low on my fundamentals, I still go back to Sam Gompers.

It is also fitting that this meeting should be held in the United States. It is here in the North American Continent that free men have fashioned the most powerful instrument of production since men invented the wheel and learned the art of controlling fire in the service of mankind.

Notwithstanding what we might do here, let it be clearly understood that our primary duty is in the destruction of the greatest menace that ever confronted mankind since the dawn of history, and no other consideration must stand in the way. All the plans that we may make at this magnificent gathering will be of no avail unless Hitler and his friends in the Pacific are completely wiped off the face of the earth.

Always remember this, that freedom is like the air you breathe—you do not miss it until it gets scarce. The progress of our civilization is in proportion to the freedom of our institutions. The history of the arts and sciences in all the democratic countries has clearly indicated this.

May I say a few words about my own country. We, in Canada, have built the greatest industrial machine in our history. We have the largest production of foodstuffs on the farms of our country in our history. When I tell you that six out of eight people of fourteen years of age and over—that includes men and women—are either in the armed services or engaged in avocations necessary for the successful prosecution of the war, that will give you some indication of the degree of organization that has taken place in the Dominion of Canada. Speaking of our farmers, last year the production on their farms was 43 per cent greater than it was in 1939. When I tell you that since the war broke out we have taken half a million people out of agriculture and put them into industry and the armed forces, it will give you some indication of the driving force of our people in assisting in defeating our enemies across the seas.

Then we have endeavoured with the co-operation of labour and management to stabilize our currency and our price structure. I think we have been reasonably successful in so doing. We have clearly in mind that you cannot plan for the future on an unstable price structure. You have to have a stable currency and a stable price level.

There are a good many books written about money. If some people can make a thing so complicated that they cannot understand it themselves, they think it should work. But I have got a simple definition of money: If it isn't hard to get, it isn't money. So when we go into the post-war period with these plans of reconstruction, of

social advancement, we feel, in the Dominion of Canada, that it is absolutely necessary that we should keep our price structure stable.

In the mobilization of our country, let me say this—that we have had the greatest co-operation in Selective Service, in labour relations, on the economic side and also in the labour relations side, from both employers and employees. We feel that we still have some trials and tribulations on our industrial front, but that is the price you pay for freedom. Don't forget that—it is the price you pay for freedom.

I think that I should say this: that the world admires the great contribution being made by the American people. I feel that your genius for mass production will tip the scales of victory.

May we all leave this Conference inspired with the spirit of freedom that has contributed so much to the advancement of mankind. After all is said and done, your life and my life are only a heartbeat in the life of the nation or a civilization. May it be said of us here that we will have set in motion policies that have for their purpose the protection of the men, women and children of our time and those who are to follow.

History has never been written around people who sit on the fence. This City of Philadelphia is a monument of that fact. History is written around the people who are prepared to live dangerously.

In conclusion I should like to close with these words: That I hope the post-war period will be planned and fashioned by the courageous men and women with the organizing genius that will make victory possible. The United Nations have been magnificent in destruction. If we use the same energy and talents in the problems of reconstruction, the future of our respective nations is assured.

ANNEX 2—Statement by Mr. Percy Bengough

The future policy, program and status of the International Labour Organization is, in our opinion, the most important question for consideration and decision that is before this 26th Session. One section of the Constitution of the I.L.O. states that universal peace can be established only if based upon social justice, and that conditions of labour exist, involving such injustice, hardship and privation to large numbers of people, as to produce unrest so great that the peace and harmony of the world are imperilled, and an improvement of these conditions is urgently needed. This statement made in 1919 is even more significant in 1944, and the ideas expressed must be fully recognized now, if permanent peace is to be attained.

Subject only to the vital need of winning the war in the shortest possible time in order to save our democratic way of life—the question of what we are going to do in the post-war period is the most important problem that humanity has ever had to solve, because if solutions are not found to these problems the stupendous sacrifices made in the effort to save our democracies will have been in vain. Frankly, the majority of Canadian workers are fearful of the prospects of the post-war period. Hundreds of thousands of them retain bitter memories of unemployment and misery during the Great Depression. They remember when they were anxious and willing to work, and no jobs were available. To-day, they look for assurance—yes, very definite assurance—that they will not once again find themselves, through no fault of their own, on the verge of starvation while living in a land of plenty.

When we consider what Canada has accomplished during the war, with a population all told of approximately twelve and a quarter million, we inevitably must go on to ask how are we going to arrange our way of living in order to rid ourselves of unemployment, want and misery in the post-war period? Canada has to-day some 750,000 able-bodied citizens in the armed services. It must be recognized that in such service, and particularly in modern mechanized warfare, they become far greater consumers than they would be in civilian life. We have around a million and a quarter men and women engaged directly in war work. Over $55,000,000 worth of munitions and supplies are being produced in Canada every week.

Over and above all this, in the fiscal year 1942-43, Canada provided a direct gift of 1,000,000,000 dollars in munitions, raw materials and foodstuffs for the United Kingdom, some of which was transferred to other countries. In the three previous years, Canada provided financial assistance to the United Kingdom totalling $1,518,000,000. In the fiscal year 1943-44, Canada provided for the distribution of Canadian war equipment, raw materials and foodstuffs to the United Nations to the value of 1,000,000,000 dollars, on the basis of strategic need. From August, 1942, up to date, Canada has donated 260,000 tons of wheat to Greece. And while all this has been

accomplished, we have, in addition, grown, manufactured and distributed all civilian requirements.

On the declaration of peace, we shall be confronted with a new era in Canadian history. Canadians feel justly proud of their war effort. The productive capacity of Canada has been more than trebled. It has been officially stated that, in the four war years since 1939, Canada has undergone an industrial transformation which, under normal conditions, could not have taken place in less than twenty-five years. This indicates what we can do when we are compelled to meet extraordinary demands.

If we can do all these things for the purposes of destruction, is it not natural that people should ask why Canadian workers could not be gainfully employed for constructive purposes during the years of peace? Why were hundreds of thousands of our citizens suffering unemployment and want prior to the outbreak of war? One thing we have conclusively demonstrated, and that is that we can produce an abundance to meet every human need and requirement and, knowing this, the workers of Canada will not go back to the pre-war days of fear and want.

We have no illusions as to the magnitude of the problems and difficulties which will confront us in the post-war period, and for which preparations must now be made. Civilian positions and jobs in gainful employment will have to be provided for all of those who have been fighting on our behalf overseas, as well as for those who are working on our behalf in the production of munitions and supplies at home. Two million new jobs have to be found in Canada in the post-war period, and we shall have to find them expeditiously, in order to be sure that chaos, confusion and possibly disaster will not occur.

War compelled us to intensify our industrial efforts, and a gigantic system of planning was adopted which was wholly unprecedented. Apart from such planning, it would have been impossible for Canadians to meet their war responsibilities. The consciousness of the workers and the people generally has been awakened. They realize to-day the enormous capacity that we have to produce and the value of our scientific and modern methods of production; they know what Canada has accomplished while at the same time she has maintained and fed a great army of men and women removed from the productive activities of industry. It is obvious that we must not return to a system of life that reduces farm output, that restricts production, and that develops only on a basis of profitable operation for the owners of industry, and a scarcity of commodities for the masses of the people. We have advanced proposals to meet these problems in our own country. However, time does not permit me to present our views on these particular matters at present.

The workers of Canada have no desire, nor do they believe it possible, even though this North American continent has an abundance of natural resources, to solve these problems by a policy of isolation. We recognize the fact that if shoes can be produced in Japan for 25 cents a pair in the post-war period, as a result of low living standards, that sooner or later, workers producing such products in other countries, will either have to reduce their standards or become unemployed. No country to-day, however favourably situated, can solve these great problems alone. They are international, and must be solved through international co-operation.

The International Labour Organization has the confidence of the people of the world, to a greater extent than any other international agency that has been, or can be, devised. The I.L.O. has demonstrated its possibilities—there is no time, nor is it necessary, to experiment now in the endeavour to form another international organization to do the great work that has to be done. But, if we are sincere and determined to rid this world of fear and want, we can give to the International Labour Organization the finances and authority it needs for its successful operation and for the achievement of the greatest and finest objective of mankind—the establishment of universal peace, based on social justice and economic security.

The workers of Canada, wholeheartedly endorse the proposed declaration concerning the aims and purposes of the International Organization, as these are set out in the Report now under discussion.

ANNEX 3—Statement by Mr. Paul Martin

The Office is to be congratulated on the preparatory work which has produced the series of reports for this Conference. It has done so under difficulty, without the opportunity of consulting governments in advance.

I propose chiefly to concentrate my remarks on Reports I and II, which to a very great extent must be regarded as political in the sense that they impinge on national policies which have not yet been defined.

The fact that these policies have not yet been defined by the governments makes the Office Reports even more valuable, as they are, therefore, the beginning and foundation of our discussion. The first step in the consideration of any problem is the gathering of material, the second the definition of the problem. The Office has provided the material and has gone a great distance towards defining the problem.

The definition of the problem will be well begun when the Conference has agreed on the text of the proposed declaration concerning the aims and purposes of the Organization. I think that we agree that such a declaration should be made by this Conference.

The text of the declaration provided by the Office offers a good draft from which to work. I am not able to agree with all it contains. I am sure that the Office did not expect that the Canadian Delegation or any other Delegation would agree entirely. If they did, there would be no need for this Conference.

This Conference must keep in mind that simultaneously with the formulation of the future policy and program of the Organization other international economic and social institutions are being set up, or have been set up, and are now making plans for their own future activity. The pattern which is beginning to take shape suggests that there will be a number of separate organizations each of which will cover a particular phase of international economic or social relations.

These separate international organizations are projected in the sphere of monetary and exchange policy, commercial policy, international collaboration to permit full employment, commodity policy, international investment, food and agriculture. It seems probable there will be others.

In the view of the Canadian Government these international organizations must eventually be brought together in an international framework. It is important that the functions of each should be clear-cut and definite. Any tendency for one organization to take on vague general purposes which would encompass an excessive range of activities must be avoided if we are to avoid overlapping and confusion.

I cannot, therefore, until it has been more specifically defined, subscribe to the statement confined in the proposed Declaration of Aims and Purposes that it is the responsibility of the Organization to "scrutinize all international economic and financial policies and measures . . . and consider all relevant economic and financial factors and include in its decisions and recommendations any provisions which it considers appropriate"; neither can I subscribe to the statement that the Organization claims "a primary interest in the achievement of harmonious working relationships between all the constituent functional parts of the body of social and economic institutions which the world's needs require."

In saying this, I mean that the Declaration as phrased is not sufficiently precise as a definition of the scope and function of the I.L.O. Such a definition is required. There should be no doubt—no room for doubt—on such a vital Declaration, particularly as it is recommended to the United Nations that it be repeated in affirmative terms in the Peace Settlement. I should want answers to the following questions, which the wording of the draft Resolution raises in my mind:

1. Is the International Labour Organization to discharge this responsibility of scrutiny over governments and over specialized international bodies by way of seeking knowledge of their plans and tendering advice to them as to the social implications of their proceedings or measures?

2. Is it to seek membership in international bodies?

3. Is it to use its duty of scrutiny to acquire a primacy over other international bodies with equal functional importance in related spheres?

4. Is it to share in responsibility for the decisions of such bodies?

The form and phrasing of the Declaration can well give rise to these and similar questions, and accordingly I suggest that the Conference make very sure as to their import so as to be sure of the path which it proposes the Organization shall tread.

The I.L.O. should be in a position to give advice where international financial policy may

affect wages or working conditions, similarly the Food and Agriculture Organization should be in a position to give advice where measures proposed by the I.L.O. may affect agricultural production. Eventually, this may be achieved at the top through a new co-ordinating agency; in the meantime, the mechanism of mutual exchange between the international organizations must be improvised on a basis of equality.

Much stress is laid in Report 1 upon the tripartite character of the Organization, and on the consequent "representation of highly important elements of organized public opinion," to co-ordinate the work of other international agencies.

I agree with the view that the tripartite character of the International Labour Organization must be considered in planning its future. The representation of employers and workers gives the Organization exceptional authority in the field of employer-employee relations, working conditions, hours, wages, industrial safety, and so on; but I think that it must be recognized that the tripartite representation is also a limiting factor as limiting the peculiar competence of the Organization to those matters which are of special importance and direct relation to the sections of the national communities—employers and workers —represented in it.

We must not weaken the position of the Organization in its rightful field by overreaching in an attempt to extend its authority into fields where other groups of the community are more directly concerned. As an example of this danger, I draw your attention to the passage of the Office's report dealing with the Permanent Agricultural Committee. The Organization has, of course, a legitimate interest in agricultural questions; but we cannot pretend that the employer-workers representation in the I.L.O. is a representation of the agricultural community or of the community of consumers.

Further, the United Nations have established a new permanent organization on food and agriculture. I think that we should, therefore, recognize that the claim of the International Labour Organization to authority in this field extends only to those questions which are specifically questions of wages, hours, working conditions and so on; and to support the Organization's claims here, we should endeavour to secure within the I.L.O. representation of agricultural employers and workers.

I have found Chapter VI of the First Report an interesting and stimulating document. No proposals for submission to the Conference are included, but it is indicated that the suggestions contained would be submitted to the Governing Body. Unfortunately it has not been possible for the Governing Body to give consideration, before this debate, to the financial questions raised in this Chapter.

It is unquestionable that the financial relations between the I.L.O. and the League are complicated and difficult and should at some time be simplified. With the growth of the number of states belonging to the I.L.O. which are not members of the League, these difficulties have increased. The questions are whether now is the time to make changes, and whether the changes proposed are desirable.

I do not believe that this is the time to change. The present machinery, with some improvisation, has worked satisfactorily through four years of war. Temporary and ad hoc measures can be taken to meet new difficulties as they arise; but here again before tearing down and rebuilding, we must have a clearer view of the new world organization which is taking shape.

In so far as we can consider the future, I believe that the emphasis in this discussion should be on the possibility and means of reaching as soon as possible a single international budget. As the Office Report rightly points out, such an international budget cannot be established at this stage. The principle, however, should be recognized, and we should avoid taking a step in the direction of separate budgets, which I believe all would agree would be in the opposite direction to that in which we wish to go.

Moreover, I have noted that the proposal to divorce the I.L.O. budget from that of the League is taken in some quarters to mean that the Organization is prepared to cut itself adrift from the League. Many of you will have noted an item which appeared recently in the press referring to the International Labour Organization, in which it is stated "the Governing Body is slated to consider decisions capable of driving another nail in the coffin of the League", and a little further on, "some delegates look for a decision which would sever the last practical tie between the I.L.O. and the League".

I should like to see this idea effectively scotched. I could not, in this Conference, give support to any proposal which, rightly or wrongly, may be interpreted as "driving another nail in the coffin of the League".

While considering the external relations of the Organization we should not neglect to examine the internal constitution of the Organization itself with a view to possible improvement. The relations between the Conference, Governing Body and Office might bear examination, especially to bring the Conference

into closer contact with the Office and to provide for more continuity in the Conference itself and in its committees. Again the whole subject of regional organization is deserving of study. Would it be wise or otherwise, for example, to authorize the establishment of permanent regional committees to work with regional branches of the Office in Asia, South America, the Far East, or elsewhere?

A small change in the Conference rules which might be valuable to federal states would be a provision for the attendance at the Conference, as part of National Delegations, of two classes of Observers, namely (1) representatives of the constituent states or provinces of the federal state, and (2) representatives of important national bodies which have a direct and legitimate interest in the work of the I.L.O. but cannot properly be fitted into the existing composition of delegations as governmental advisers.

Such a provision might well be subject to a proviso limiting such observers to a stated number or to a number bearing a stated relation to the total number of government advisers in attendance.

In summary and conclusion, I should like to make the following proposals to the Conference:

(1) We should look through the first two items on the agenda with a view to dividing them according to the action which this Conference should take. I find that we have in Item I a Declaration of the aims and purposes of the Organization which is reproduced in the proposed Resolution concerning Social Provisions in the Peace Settlement contained in Report II. I believe that such a Declaration should be made by this Conference, but I should like to see this Declaration contain a specific statement of the sphere of authority of the Organization in terms of its tripartite constitution, as I have indicated. I believe that such a definition of our field of activity would save troublesome rivalries in the future between the I.L.O. and other international organizations.

(2) I do not think that we can hope to settle at this Conference questions as to the relationship of the Organization to other international bodies and to its future program generally. The necessary result of the expressions of opinion given to the Conference should be the appointment by the Conference, or by the Governing Body, of a Committee empowered to deal with Resolutions or Declarations affecting the future of the Organization. Such a Committee should meet as frequently as necessary, preferably in Montreal—should, in active collaboration with the Office, discuss and revise the Office Reports in the light of the discussion in this Conference. The Committee should have as its great task the fitting of the Organization into its proper and rightful place in the new international framework now beginning to emerge. Arrangements for collaboration betwen the International Labour Organization and other existing or projected international organizations should be regarded as of a tentative and interim character, pending the establishment of a World Council or the restoration of the League, or the creation of other central control agency.

(3) The work of the Committee would crystallize in a Report for submission to governments with a view to action thereon at the next Conference, by which time the pattern of the new world organization may be expected to have taken such shape that with the aid of considered opinions from governments the Conference may well be able to take further steps towards completing the structure. Canada would expect to be represented on this Committee and would cooperate fully with it.

(4) The same, or another committee, should consider the internal constitution of the Organization; whether or not the relation between the Conference and the Office should be strengthened; whether more continuity might be given the Conference and its committees; whether permanent regional organization should be developed with regional committees and branches of the Office. The working of the Standing Orders might be examined and consideration given to the admission of Observers on Government Delegations to meet one of the problems of Federal States.

(5) When the proposals of the first committee have begun to take shape the Governing Body should refer to governments the financial questions. We should be moving towards an international budget, not away from it.

(6) Lastly, there are questions of an urgent character raised in Report II which we should discuss in so far as they affect the I.L.O., and submit to a committee of the Conference for further consideration. All the recommendations in Report II are, of course, not within the competence of the I.L.O. to achieve; but I see no reason why the Conference should not make general recommendations as to the social objectives of the group of international organizations in existence and coming into being. Too much of our time, however, should

not be spent in dealing with principles and generalities. I believe that the time will soon be here for action and I think that the committee dealing with this item of the agenda should devote most of its time to problems such as the re-introduction into liberated territories of the codes, practices and policies of the I.L.O. which were in effect until they were destroyed by the aggressor. While not neglecting the more distant future, let us be sure that we deal fully with the problems which may confront the United Nations in the immediate future.

ANNEX 4—Statement by Mrs. Cora Casselman

Students of public affairs have long been accustomed to look to the annual report of the Director of the International Labour Office for a faithful survey of world economic and labour developments and an authoritative appraisal of the trends in social policy. The reappearance, after two years, of this report is therefore a welcome event.

This year, as usual, the report devotes attention to Canada's place in the world's economy. Even before the war Canada ranked among the eight most important trading and industrial countries. Since 1939 she has become an arsenal of supply in the battle for world freedom. Her agricultural and industrial development have been tantamount, in the words of the Director, to an economic revolution. As a producer of munitions, for instance, Canada now ranks fourth among the United Nations. By the end of 1943 she had produced more than ten thousand planes, six hundred thousand motor vehicles, seven hundred and fifty escort cargo and patrol ships, vast quantities of chemicals and explosives, and millions of dollars' worth of instruments and communications.

On the other hand, with very little increase in acreage and an actual reduction in man-power, Canada's agriculture is to-day producing unprecedented quantities of many important foodstuffs and raw materials. In less than four years we have increased our output by 50 per cent, in spite of a reduction of 23 per cent in man-power.

At the restoration of peace, therefore, Canada will be equipped to produce more than in any previous period in her history. This increase in efficiency of production will have a profound effect upon the distribution of goods in Canada and upon the international trade of the nation. A larger proportion of the Canadian people will be employed in factories, and in the trades dependent on them, than at any time in the past, while these factories will be in a position to produce within Canada many of the things that were previously imported from other countries. It should be emphasized, moreover, that much of this industrial expansion has occurred in primary industries. The development of a Canadian tool-making industry is a case in point, while the growth of the chemical industry and the rapid expansion of aluminum production also constitute admirable examples.

In many cases, moreover, the war has made important changes in technology which will remove differences that existed before the war. The Director is therefore right in estimating that the structure of Canadian international trade will thus be permanently affected.

It is likely that munition and armament factories, because of the peculiar nature of the existing production, will not be useful to Canada in times of peace. There will arise, therefore, the problem of reconverting to civilian use a certain volume of resources no longer needed for the making of war material. The great complexity of this task is widely recognized, and a beginning has been made with the advance planning and preparation which will be essential to its successful performance.

The increase in production capacity has been possible only through the full employment of man-power. Five millions or nearly 60 per cent of the total population, aged fourteen and over were in the armed forces or at work at the end of 1943. The strength of the armed forces was around 770,000. The number of workers of both sexes in war industry alone was over 1,140,000.

We are glad to record here the magnificent part played by the women of Canada in all phases of our war effort. They have come forward as volunteers to accept all kinds of work at a rate and with a spirit that is nothing short of spectacular. At the end of 1943 over one million women were gainfully employed in Canada, as compared with around 600,000 in August, 1939. In addition there are over 750,000 women—wives and daughters of farmers—supplementing the work of men to maintain the high record of farm production. Each year these women have taken on more and more of the farm work in addition to their work for the home and family, at a great sacrifice of time and energy.

It is, of course, in war industry that we have seen the greatest expansion in the employment of women. In June, 1941, there were 40,000 women so employed. By September, 1943, that number had increased to 235,000. This large employment of women in a thousand different industrial plants has created problems of its own in connection with work conditions. For instance, the entry within two years of nearly 200,000 women into war industry alone has had the effect of creating a shortage of help in other industries and services in which women workers have always predominated. One of them is hospital service.

Every effort has been made to bring into full productive activity the skill and services of all the Canadian people. Since 1940 Canada has brought its employment service under federal administration and strengthened it in a variety of ways. Now there are over 240 offices in five regions across Canada with a staff of over 5,000. The Director's comments on employment services in general apply to Canada. The gradual evolution of the machinery needed for solving employment problems is one of the most hopeful factors in the present situation.

War experience in attaining the most effective use and distribution of the available skills will be of direct value in meeting the vast programs of employment organization in the transition

from war to peace. We agree with the Director that the broader conception of the employment service brought about by war needs must continue to prevail once the war has come to an end. As the Director points out, there should be no delay in equipping the employment services to play an effective part in the carrying out of national plans for the after-war period.

In 1939 the total wages and salaries paid in Canada amounted to two and a half billion dollars. In the following years the total rose steadily until in 1943 the figure of over four and a half billion dollars was reached. This is due not only to the increase in the numbers of earning population. Wage rates in Canada to-day are an alltime high level. They are considerably higher, in fact, than in 1920, when the cost of living was at a peak as a result of the first world war. While the wage index for 1943 has not yet been definitely determined, the Canadian Minister of Labour predicts that it will show a still greater advance this year.

In addition to an increase in the level of salaries, it should be noted that, since the outbreak of war, vacations with pay have been introduced, covering an aggregate of 600,000 employees.

The improved position of wage earners is best realized when the cost of living index is taken into account. Canada's record in this respect is outstanding among allied countries. In January, 1944, the cost of living index in Canada had risen by almost eight points less than it had risen in Great Britain.

As one of the measures necessary to prevent inflation, Canada has enforced a strict wage policy. It is with satisfaction that the Canadian delegates note this statement in the Director's Report, that the Canadian policy of stabilization "has achieved considerable success". Wartime wage controls have involved the temporary assumption by the federal Government of powers formerly vested in the provincial authorities. The Director is right in his view that this development may have widespread effects in the post-war period.

A statement of measures adopted by Canada to stabilize wages and salaries at levels prevailing in November, 1941, will be found at page 44 in the Director's Report.

Wage control and price control have not been separated. It is noteworthy that the Director reports that in control of prices in Canada the administration has "achieved a degree of success which affords a welcome contrast to the experience of the last war" (page 19). "After a period of selective price controls", he explains, "Canadian authorities put into effect an all-inclusive price stop towards the end of 1941. The policy has been effective: during the first four years of war the Canadian cost of living index rose 18 per cent as compared with 28 per cent in the United Kingdom, 23 per cent in the United States, and 51 per cent in Canada in the same period of the last war. In the first two years of price ceiling control to the end of 1943, the rise in the Canadian index was only 3 per cent".

A chapter of the Director's Report deals with wartime international collaboration in the economic field. It describes the part played by Canada in this collaboration, her participation in the co-ordinating boards of the United Nations, the international wheat agreement of June, 1942, and the mutual aid agreements between Canada, on the one hand, and Great Britain, the Soviet Union, Australia, China, and the French Committee of National Liberation on the other. As the Director points out, a basic principle of these agreements, and one of outstanding importance for the post-war period, is that "these give rise neither to war debts nor to indefinite and uncertain post-war obligations". When explaining the scheme, the Canadian Minister of Finance stated: "It shall be good and sufficient consideration for transferring war supplies to other United Nations that such supplies are to be used in the joint and effective prosecution of the war."

In a subsequent chapter, the Director discusses social developments such as employment and social insurance. There again he is able to announce to the Conference an important measure taken by Canada, in the midst of the war itself: the putting into operation of a national scheme of unemployment insurance for workers in industry and commerce. To bring about this measure, which had been delayed for constitutional reasons, it was necessary to amend the British North America Act, which is the basis of our country's constitution. This was done with the unanimous consent of the nine provinces. A parliamentary committee is now considering detailed measures covering all persons in Canada for health insurance. Already on the statute books are comprehensive rehabilitation acts for veterans of the war.

It is fortunate that, in his chapter on the work of the Organization, the Director records the technical assistance afforded by the Office to Canada and to other countries during the period under review. This gives me an opportunity of publicly thanking the Director and the members of his staff, on behalf of the Canadian Government, for their ready response to my country's request for assistance when the programme for social security and labour relations was under review.

In making this call, Canada expressed confidence in the Office to which she gave sanctuary when it was forced by events to move from its seat in Switzerland. She was glad of having this opportunity, when the future of the Organization was at stake. She is likewise proud that *The International Labour Code of 1939* was published in a Canadian city. This corpus of social legislation is, perhaps, the most valuable legacy which the inter-wars period has made to civilization. On that solid basis the present generation should be able to rise to constantly higher levels on the road to progress.

The war is not over. We face now the most critical period. We must still expend our energies and resources to defeat the enemy. But while we do not relax our efforts, our minds are already struggling with the problems of peace. We have learned in war to unite our strength to win our common objective within our nations and among our nations. Differences between clashing interests that divide us at home have been set aside in order to reach the goal of full wartime production. Differences that impede us in reaching the goal of full peacetime production must give way to a similar united effort to bring prosperity to all our people.

Canada shows by her co-operation in international conferences in war and in peace that she realizes her responsibilities and that she stands ready with her allies to build structures of firm and lasting co-operation. The I.L.O. stresses the importance of interchange of views and free discussion among the three member groups, Government, employers and workers. It stresses the importance of these same methods among member countries—the interchange of views and free discussion. It has made and is making a tremendous contribution to world progress. Canada joins in congratulating the Director and his staff on their splendid achieve-

ments. Their objective, our objective, can be reached by no easy path. But by determined purpose, by patient perseverance, by common action, we shall conquer fear and want within our borders, and among the peoples of the world. By broad vision, by courage and decision, we shall conquer the greatest enemy of all mankind—war itself.

ANNEX 5—Declaration Concerning the Aims and Purposes of the International Labour Organization

The General Conference of the International Labour Organization, meeting in its Twenty-Sixth Session in Philadelphia, hereby adopts, this tenth day of May in the year nineteen hundred and forty-four, the present Declaration of the aims and purposes of the International Labour Organization and of the principles which should inspire the policy of its members.

I

The Conference reaffirms the fundamental principles on which the Organization is based and, in particular, that:

(*a*) labour is not a commodity;

(*b*) freedom of expression and of association are essential to sustained progress;

(*c*) poverty anywhere constitutes a danger to prosperity everywhere;

(*d*) the war against want requires to be carried on with unrelenting vigour within each nation, and by continuous and concerted international effort in which the representatives of workers and employers, enjoying equal status with those of Governments, join with them in free discussion and democratic decision with a view to the promotion of the common welfare.

II

Believing that experience has fully demonstrated the truth of the statement in the Constitution of the International Labour Organization that lasting peace can be established only if it is based on social justice, the Conference affirms that:

(*a*) all human beings, irrespective of race, creed or sex, have the right to pursue both their material well-being and their spiritual development in conditions of freedom and dignity, of economic security and equal opportunity;

(*b*) the attainment of the conditions in which this shall be possible must constitute the central aim of national and international policy;

(*c*) all national and international policies and measures, in particular those of an economic and financial character, should be judged in this light and accepted only in so far as they may be held to promote and not to hinder the achievement of this fundamental objective;

(*d*) it is a responsibility of the International Labour Organization to examine and consider all international economic and financial policies and measures in the light of this fundamental objective;

(*e*) in discharging the tasks entrusted to it the International Labour Organization, having considered all relevant economic and financial factors, may include in its decisions and recommendations any provisions which it considers appropriate.

III

The Conference recognizes the solemn obligation of the International Labour Organization to further among the nations of the world programs which will achieve:

(*a*) full employment and the raising of standards of living;

(*b*) the employment of workers in the occupations in which they can have the satisfaction of giving the fullest measure of their skill and attainments and make their greatest contribution to the common well-being.

(*c*) the provision, as a means to the attainment of this end and under adequate guarantees for all concerned, of facilities for training and the transfer of labour, including migration for employment and settlement;

(*d*) policies in regard to wages and earnings, hours and other conditions of work calculated to ensure a just share of the fruits of progress to all, and a minimum living wage to all employed and in need of such protection;

(*e*) the effective recognition of the right of collective bargaining, the co-operation of management and labour in the continuous improvement of productive efficiency, and the collaboration of workers and employers in the preparation and application of social and economic measures;

(*f*) the extension of social security measures to provide a basic income to all in need of such protection and comprehensive medical care;

(*g*) adequate protection for the life and health of workers in all occupations;

(*h*) provision for child welfare and maternity protection;

(*i*) the provision of adequate nutrition, housing and facilities for recreation and culture;

(*j*) the assurance of equality of educational and vocational opportunity.

IV

Confident that the fuller and broader utilization of the world's productive resources necessary for the achievement of the objectives set forth in this Declaration can be secured by effective international and national action, including measures to expand production and consumption, to avoid severe economic fluctuations, to promote the economic and social advance-

ment of the less developed regions of the world, to assure greater stability in world prices of primary products, and to promote a high and steady volume of international trade, the Conference pledges the full co-operation of the International Labour Organization with such international bodies as may be entrusted with a share of the responsibility for this great task and for the promotion of the health, education and well-being of all peoples.

V

The Conference affirms that the principles set forth in this Declaration are fully applicable to all peoples everywhere and that, while the manner of their application must be determined with due regard to the stage of social and economic development reached by each people, their progressive application to peoples who are still dependent, as well as to those who have already achieved self-government, is a matter of concern to the whole civilized world.

ANNEX 6—Resolution Concerning the Constitution and Constitutional Practice of the International Labour Organization and Its Relationship With Other International Bodies

The General Conference resolves that:

1. During periods of emergency when, in the judgment of the Governing Body, the efficient operation of the Organization or of the Office will be advanced thereby, and the Governing Body so notifies the Members of the Organization, it shall provide that, supplementary to the normal procedure, the following communications should be transmitted through the Director:

(*a*) the communication to Members of certified copies of Recommendations and Conventions in accordance with paragraph 4 of Article 19 of the Constitution of the Organization;

(*b*) the communication by Members of the information concerning the action taken in regard to Recommendations required by Paragraph 6 of Article 19 of the Constitution;

(*c*) the communication by Members of the formal ratifications of International Labour Conventions in accordance with paragraph 7 of Article 19 of the Constitution and the relevant provisions of the individual Conventions;

(*d*) the communication to Members of all notifications required by the terms of International Labour Conventions.

2. The Conference requests the Governing Body:

(*a*) to take effective steps as promptly as possible to deal with problems common to a region or to a particular industry, with due regard to the Constitution and principles of the Organization, and its competence, and

(*b*) to report to the next general session of the Conference the steps taken and plans for the further regionalization of the Office and of the Organization and for special consideration of the problems of particular industries.

3. The Conference requests the Governing Body during the period of deliberation of the Committee to be established under the terms of this Resolution and of the development of an overall pattern of international institutions, to take appropriate steps to assure close collaboration with a full exchange of information between the I.L.O. and any other public international organizations which now exist or may be established for the promotion of economic and social well-being, and in the furtherance of this objective it may instruct the Director to arrange with such organizations, on conditions mutually agreeable, for

(*a*) the exchange of information, views, reports, studies and other documents regarding policies and measures of mutual interest and concern at appropriate stages in their formulation and execution, and:

(*b*) the exchange of representatives without vote, at meetings convened by this organization and such other organizations, and:

(*c*) the creation and maintenance of such joint committees as may facilitate their effective co-operation.

4. The Conference requests the Governing Body:

(*a*) to appoint a Committee as soon as possible to consider the future Constitutional development of the Organization. The Committee shall particularly consider the following matters in active collaboration with the Office, and in the light of the Report on Item I submitted by the Office the resolutions and amendments submitted to the Conference, the views expressed in the Conference and any suggestions which may be communicated to the Office by Governments:

(1) the relationship of the Organization to other international bodies;

(2) the constitutional practice of the Organization and its clarification and codification;

(3) the status, immunities and other facilities to be accorded to the Organization by Governments as necessary to the efficient discharge of the responsibilities of the Organization;

(4) the methods of financing the Organization;

(*b*) after receiving and considering the Report of the Committee to bring to the attention of the Conference at its next general session such matters as in its judgment require action by the Conference.

5. The Conference requests the Governing Body to appoint representatives with power to negotiate, if necessary prior to the next general session of the Conference, with international authorities on behalf of the Organization concerning any constitutional questions which at any time require immediate action, including the matters referred to in paragraph 4.

6. The Conference authorizes the Governing Body to decide the place at which the Twenty-seventh Session of the Conference shall be held. In the event of a maritime session being convened in the near future, this authorization shall apply to the Twenty-seventh and Twenty-eighth Sessions.

ANNEX 7—Resolution Concerning the International Character of the Responsibilities of the Director and Staff of the International Labour Office

The Conference, desirous of reaffirming the international character of the responsibilities of the Director and staff of the International Labour Office adopts the following resolution:

(1) The Director of the International Labour Office shall, on appointment, make a solemn declaration before the Governing Body that he will discharge the duties committed to him with the interests of the International Labour Organization alone in view, will not seek or receive instructions in regard to the discharge thereof from any authority external to the Organization, and will at all times uphold the provisions of the Constitution of the International Labour Organization.

(2) The responsibilities of the staff of the International Labour Office shall be exclusively international in character. Members of the staff shall on appointment make a solemn declaration in the form and manner approved by the Governing Body that they will not seek or receive instructions in regard to the discharge of their responsibilities from any authority external to the Organization.

(3) The Conference affirms it to be the duty of the Members of the Organization to respect fully the international character of the responsibilities of the Director and Staff of the International Labour Office and not to seek to influence any of their nationals in the discharge of such responsibilities.

ANNEX 8—Resolution Concerning the Holding of a Regional Conference of the Countries of the Near and Middle East

Whereas the International Labour Organization, during the coming years, will have to pay closer attention to the various regions of the world where similar social and economic conditions exist, and

Whereas the raising of the social standards of the workers in town and country will largely depend upon appropriate solutions being sought to the specific problems of the regions concerned, and

Whereas the Near and the Middle East constitute a vast region of particular importance, where similar conditions prevail as regards the working and living conditions of great masses of agricultural workers, whether independent, semi-independent, or wage-paid, and

Whereas these conditions as well as the problems with which the countries concerned are confronted in their effort towards systematic development of resources and industrialization, require special study, exchange of experience and joint action, and

Whereas particular attention should be directed to the working and living conditions in the oil producing areas of this region.

The twenty-sixth Session of the International Labour Conference resolves to invite the Governing Body of the International Labour Office to examine the possibility of convening at an early date a regional conference of the countries of the Near and Middle East, with a view to giving effect to the consideration of the specific problems of that region.

ANNEX 9—Resolution Concerning Industrial Committees

The Conference is of the opinion that the International Labour Office should proceed forthwith with the setting up of industrial sections and invites the Governing Body to elaborate regulations governing the activities of industrial committees.

ANNEX 10—Resolution Concerning Measures for the Protection of Transferred Foreign Workers and of Foreign Workers' and Employers' Organizations

Whereas the International Labour Conference is called upon by Item II on the Agenda of the present Session to make recommendations to the United Nations for present and post-war social policy;

Whereas some of the gravest problems of social policy that will confront the United Nations when they come to occupy certain portions of Axis territory will be those which will arise in connection with the millions of foreign workers who have been transferred to work in Axis countries; and

Whereas the Council of the United Nations Relief and Rehabilitation Administration has assumed responsibility for the measures to be taken to repatriate such workers; and

Whereas it is desirable that provision should be made for the protection of such workers in regard to their health, welfare and general interests pending their repatriation;

The Conference recommends as follows:

1. Precautions should be taken, subject to the removal of all officials identified with the former totalitarian régime, to ensure that the administrative machinery set up by the former régime for handling questions connected with the utilization of foreign labour power, together with all its records and documents, is for the time being preserved intact. In particular, the United Nations and the occupying authorities should make it clear that the personnel concerned will be held individually responsible for the preservation of such documents and records and that persons convicted of destroying or concealing them will be severely punished.

2. Pending the repatriation of foreign workers, which should be carried out with the greatest possible speed, the competent occupation authority should take appropriate action for the purpose of protecting such workers in regard to their feeding, accommodation, health, safety, welfare and general interests.

3. All discriminatory treatment in respect of remuneration, the right to employment, conditions of employment, the wearing of distinctive badges, etc., on account of race, national or local origin, or religion, should be immediately abolished.

4. The competent occupation authority should in the matters concerning foreign workers in Axis nations collaborate with the Governments and Trade Unions of Allied countries.

5. Arrangements should be made, within the framework of general restitution arrangements, for the restitution of funds or property that may have been confiscated in Germany or elsewhere from international and foreign trade union organizations, co-operatives, and employers' organizations by Axis agents.

ANNEX 11—Proposed Resolution Concerning Economic Policies for the Attainment of Social Objectives

Whereas the prospect of a complete victory of the United Nations makes it possible to prepare a better world order directed towards the achievement of the social objectives which these nations proclaimed in the Atlantic Charter in expressing their desire to bring about the fullest collaboration between all nations in the economic field with the object of securing for all improved labour standards, economic advancement and social security; and

Whereas these objectives of the United Nations coincide with the basic principles of the International Labour Organization, and the International Labour Conference, meeting in New York in 1941, pledged the full collaboration of the International Labour Organization in their implementation; and

Whereas the International Labour Conference is called upon by Item II on the Agenda of the present Session to make recommendations to the United Nations for present and post-war social policy concerning more especially the measures required to be taken internationally and nationally to ensure full employment, social security and rising standards of living; and

Whereas the initiative with regard to international policy lies with the United Nations at the present time, and it is desirable in order to attain the objectives referred to that all nations should pursue an appropriate national policy; and

Whereas the attainment of full employment and high productivity by the various nations after the war is essential to the achievement of freedom from want, the attainment of increasing living standards, the realization of genuine economic security and the continuation of peaceful economic progress; and

Whereas full employment can be achieved and maintained only through the adoption, by governments, industry and labour, of policies and measures which effectively encourage the continuing expansion of production and improvement of distribution; and

Whereas the speedy achievement of full employment requires the prompt and orderly reconversion, reconstruction and expansion of industry, trade, commerce and agriculture after the war, and the subsequent maintenance of employment and production at high levels requires the creation of an economic and social environment conducive to a progressive and expanding economy;

The Conference adopts the following resolution;

I. International Policy

1. Believing that the relief of war-stricken peoples, repatriation of prisoners and exiles and resumption of agricultural and industrial production are matters which will be of the utmost urgency immediately on the liberation of occupied countries and that on the successful handling of these problems the possibility of achieving the long-range objectives of social and economic well-being will largely depend,

The Conference welcomes the creation of the Unitel Nations Relief and Rehabilitation Administration, urges all States concerned to co-operate actively in the achievement of the tasks entrusted to it and assures the Administration of the readiness of the International Labour Organization to assist it in every appropriate way.

2. In view of the fact that for varying periods after the end of hostilities many essential commodities and transport facilities will be in short supply, and that international arrangements will be needed to ensure a fair allocation of available supplies and prevent excessive price movements,

The Conference considers that the Governments of the United Nations concerned should arrange to continue in operation, for such periods as any serious shortages may persist, the existing machinery of international co-ordination and control subject to such modification, and in particular to such enlargement of the membership of the authorities concerned, as may contribute to the equitable and efficient operation of such machinery in the transition from war to peace.

3. The Conference endorses the declaration of the United Nations Conference on Food and Agriculture held in May, 1943, that while the primary responsibility lies with each nation for seeing that its own people have the food needed for life and health, each nation can fully achieve this goal only if all co-operate in appropriate international action, and urges the setting up of a permanent international organization, as recommended by the Conference on Food and Agriculture, to raise the level of nutrition and improve the efficiency of agricultural production and distribution.

4. Recognizing that a satisfactory international monetary system is essential to the full development of mutually advantageous economic relations between nations, and consequently to the raising of standards of living,

The Conference attaches great importance to the establishment at the earliest possible moment of effective international machinery for settling balances arising out of international trade and other transactions and for maintaining stability in rates of exchange, notes with satisfaction that the Governments of the United Nations are giving careful attention to this matter and urges that they include in any agreement establishing such machinery a provision requiring the authorities responsible for its application to have regard in framing and applying their policies to the effect of their decisions on employment and living standards.

5. Noting that imports of capital will be needed for reconstruction, development and the raising of living standards in many countries and believing that the provision of such capital will contribute to the maintenance of full employment in the lending countries,

The Conference:

(*a*) considers that the existing machinery of the international capital market should be supplemented by the establishment of appropriate international machinery for the purpose of promoting the international movement of capital;

(*b*) considers that the promotion of full employment and higher living standards should be regarded as a primary objective of any such international machinery;

(*c*) considers that the authorities responsible for the operation of such international machinery should consult the International Labour Organization as to the appropriateness of including in the terms under which development works financed in whole or in part through such machinery are to be carried out, provisions regarding the welfare and working conditions of the labour employed; and that such provisions should be framed in consultation with the International Labour Organization;

(*d*) affirms the readiness of the International Labour Organization to render every assistance in its power in determining the appropriations of the inclusion of such provisions and in their framing and application and in the promotion through the operations of such international machinery of the general objectives of full employment and higher living standards.

6. Recognizing the great contribution which the international exchange of goods and services can make to higher living standards and to high levels of employment,

The Conference:

(*a*) believes that the measures proposed in the foregoing paragraphs for the promotion of exchange stabilization and international lending will contribute to the expansion of international trade, but considers that the United Nations should also examine wartime changes in industrial capacity, and arrange for exchange of information on postwar industrial programs and should take vigorous action to promote the expansion of international trade by appropriate commercial policies; and considers that all countries, creditor as well as debtor, should adapt their commercial policy in such a way as to enable them to settle all obligations arising out of international transactions;

(*b*) considers that the United Nations should initiate measures to facilitate the co-ordination through appropriate international machinery of the commercial policies of all countries for the purpose of promoting a steady expansion in world trade on a multilateral basis;

(*c*) considers that in such co-ordination special consideration should be given to the need of countries which are highly dependent on returns from exports to take measures to

ensure a high degree of stability in the level of their economic activity and observes that the need for these measures will decrease to the extent that international collaboration proves successful; and

(*d*) considers that in such co-ordination special account should be taken of the dislocation and the accumulated needs resulting from the devastation caused by war operations and from the prolonged diversion from peacetime production in countries which have been engaged for a long period in a sustained and total war effort.

7. In order to lay the foundation for rising levels of consumption throughout the world and at the same time to ensure more stable and adequate incomes to those primary producers whose services are needed for the production of essential raw materials and foodstuffs,

The Conference considers that the United Nations should initiate concerted action designed to ensure the constant availability to all purchasers of adequate supplies of such commodities at prices which give a reasonable return to the efficient producer and are held sufficiently stable to afford protection against major short-term fluctuations in supply or demand; and that such international arrangements (*a*) should provide for adequate representation of consumers as well as producers, representing both importing and exporting countries, in all authorities responsible for the determination and application of policy, and (*b*) should aim to assure to all workers, including the self-employed, engaged in the production of the commodities concerned, fair remuneration, satisfactory working conditions and adequate social security protection, having regard to the general standards in the countries concerned.

8. Believing that migratory movements may play an important part in the development of a dynamic economy, and that disorderly international migration may create economic and social dislocation in the countries concerned and involve serious individual hardship for the migrats themselves, while desirable migratory movements are often hampered by technical and financial difficulties which can be overcome only through international co-operation,

The Conference considers that:

(*a*) The United Nations should encourage by appropriate measures, with adequate safeguards for all concerned, the orderly migration of labour and settled in accordance with the economic needs and social conditions prevailing in the various countries, and in this connection should note the Conclusions adopted by the Conference of Experts on Technical and Financial Co-operation with regard to Migration for Settlement held at the International Labour Office in 1938;

(*b*) Arrangements should be made for close co-operation between the International Labour Organization and any public international agency established to deal with migration;

(*c*) The Governing Body should take steps to bring before an early session of the Conference a report of a representative commission, with such technical assistance as it may require, on the means necessary to protect the interests of labour, on the one hand, against barriers which prevent migration from areas of limited resources, and on the other hand, against the lowering of the labour standards that might result from immigration at a rate exceeding the capacity of the receiving countries to absorb immigrants.

9. In order that re-employment may be expedited and healthy living standards established within a period of minimum duration in areas liberated from Axis occupation,

The Conference recommends that arrangements be made by those nations whose productive capacities have been maintained during the war, by all other nations which are in a position to make materials available and by the appropriate international organizations, to give the highest priority consistent with the exigencies of war to immediately supplying the territories liberated from Axis occupation with materials and equipment required for industrial installations, agriculture, transport, public works and utilities of an essential character.

10. Believing that the best possible conditions for a rise in the standard of living and the maintenance of full employment in the world can only be obtained by mutually consistent national economic, financial and social policies and by co-ordination of the activities of the different international institutions in this field,

The Conference considers that appropriate international measures should be taken which guarantee sufficient contact and consultation with regard to such policies between governments as well as between the different international institutions.

II. National Policy

11. In order that full employment at productive peacetime pursuits, freedom from want, rising standards of living and genuine economic security may be achieved with a minimum of delay after the war,

The Conference urges that governments and employers' and workers' organizations formulate comprehensive and co-ordinated programs, suited to the particular needs of their countries, for prompt and orderly reconversion, reconstruction and economic expansion, and that such programs be prepared and applied simultaneously with the consideration of the international measures referred to in the preceding paragraphs.

12. Recognizing that the economic situation will differ markedly among the various countries at the war's end, varying particularly with the degree and type of industrial development, the extent to which the peacetime economy has been disrupted by the war, and whether the country's territory has been occupied by the enemy; and recognizing that national post-war economic programs must vary accordingly, in order to meet most effectively the needs of the country in which they are to be applied.

The Conference urges that, with due allowance for difference in national economic situations, programs for economic reconversion, reconstruction and expansion include the development of sound policies and procedures to provide:

(*a*) Effective arrangements for the orderly and expeditious demobilization and repatriation, and for the early absorption in productive peacetime employment of members of the armed forces, civilian workers, prisoners, per-

sons who have resisted deportation, deported persons and refugees, for the prompt termination of contracts and settlement of claims, the prompt determination of policy on the peacetime use of Government-owned war production capacity and equipment and the disposition of surplus materials, with a view to the use of these items to satisfy human needs, and liberal provision for the maintenance, educational training and retraining of persons unavoidably out of employment as recommended by the 26th Session of the International Labour Conference in its Recommendation concerning employment organization in the transition from war to peace:

(*b*) Retention, as long as shortages exist, of such war-created economic controls—for example, price and exchange controls and rationing—as are necessary to prevent inflation, and the relaxation of such controls as rapidly thereafter as is consistent with the public welfare;

(*c*) Adjustment of tax systems to encourage rapid reconversion, reconstruction and economic expansion, while maintaining an equitable distribution of tax burdens and avoiding financial measures which tend to increase the dangers of inflation or deflation;

(*d*) Development of effective mechanisms for adequate financing of the reconversion, reconstruction and expansion of industry, trade, commerce and agriculture, and particularly to assist the establishment of new and efficient enterprises.

13. The Conference urges that all practicable measures be taken to maintain a high and steady level of employment, to minimize fluctuations in business activity, and to assure a steadily expanding volume of production, more particularly by means of:

(*a*) Fiscal, monetary and other measures, including useful public works, to sustain the volume of demand for goods and services at a high level while avoiding the dangers of an inflationary spiral of prices and wages—in this connection attention should be paid, among other measures, to such methods as an adequate income security system, and to properly timed public works financed by borrowing in periods of depression, in accordance with the Public Works (National Planning) Recommendation, 1937;

(*b*) Measures to discourage monopolistic practices and to encourage technological progress, to maintain a reasonably flexible system of prices and wages, to encourage the transfer of workers and productive resources from declining to expanding industries, and to attain a high degree of mobility of resources and freedom of access to alternative employments.

(*c*) Measures to provide adequate incentives to engage in and expand constructive enonomic activity, to encourage private investment and to maintain the rate of investment—among the measures which warrant careful consideration in this connection are the adjustment of tax systems, removal of artificial barriers limiting access to resources and markets, the relaxation of unreasonable restrictions imposed by governmental agencies or by business or by labour organizations, and the maintenance of a high and stable demand for goods;

(*d*) Measures to provide adequate opportunity for workers to engage in productive activity and to obtain advancement—among the measures which warrant careful consideration in this connection are the provision of improved and more generally accessible educational and training facilities, provision of higher nutritional and health standards, improvement of public employment services, increased provision against economic insecurity, the maintenance of wages at a high level, and the protection, extension and improvement of collective bargaining procedures.

ANNEX 12—Resolution Requesting the Governing Body to Examine Problems Involved in Labour Provisions for Internationally-Financed Development Works

Considering that the International Labour Organization should be in a position to offer effective assistance in determining the appropriateness of including provisions concerning welfare and working conditions in the terms under which any international development works are to be carried out, and in framing and applying any such provisions;

The Conference requests the Governing Body to examine the methods which might be adopted for determining the appropriateness in any particular case of the inclusion of such provisions, for framing such provisions, and for ensuring their effective application.

ANNEX 13—Resolution Concerning Social Provisions in the Peace Settlement

Whereas the Conference is called upon to make recommendations to the United Nations for present and post-war social policy, and more particularly concerning the social provisions to be inscribed in the various general or special treaties or agreements to which the United Nations will jointly or severally become parties;

Whereas the prospect of a complete victory of the United Nations makes it possible to prepare a better world order directed towards the achievement of the social objectives which these nations proclaimed in the Atlantic Charter in expressing their desire to bring about the fullest collaboration between all nations in the economic field with the object of securing for all improved labour standards, economic advancement and social security;

I

The Conference considers that the principles stated in the following draft are appropriate for inclusion in a general or special treaty or agreement between nations desirous of giving early effect to the principles of the Atlantic Charter and Article VII of the Mutual Aid agreement:

The signatory governments

Having pledged themselves to provide conditions which will ensure an increasing measure of freedom from want to their own peoples and to all peoples;

Recognizing, therefore, their common obligation to foster expanding production and

employment on a sound basis, free from disruptive fluctuations, and to ensure that workers and productive resources shall not be allowed to be idle while the needs of large parts of the world remain unsatisfied;
Realizing that the economic life and conditions in each nation are increasingly dependent upon the economic life and conditions of other nations, and that hence the attainment of the above-stated objectives requires increasing collaboration among nations;
Have agreed that:

Article I

The Declaration of the Aims and Purposes of the International Labour Organization adopted by the International Labour Conference at Philadelphia, 1944, the text of which is annexed, is hereby reaffirmed.

Article II

Each government recognizes its duty to maintain a high level of employment. Accordingly, all arrangements by and among the signatory and other like-minded governments for international economic co-operation should be framed and administered to serve the objectives set forth in Article I. They should be directed to the expansion of production, employment and the exchange and consumption of goods and to the liberation of economic activity from unreasonable restrictions. Particular consideration should be given to measures for promoting the reconstruction of economic life in countries whose economic and social life has been disrupted as the result of Axis aggression.

Article III

The following matters are of international concern and should be among the social objectives of international as well as national policy:

(1) Opportunity for useful and regular employment to all persons who want work, at fair wages or returns and under reasonable conditions, with provision for protection of health and against injury in all occupations;
(2) Raising standards of living to provide adequate nutrition, housing, medical care and education;
(3) Establishment of minimum standards of employment to prevent exploitation of workers, whether employed or self-employed, whose opportunities for high wage employment are limited;
(4) Provision for child welfare;
(5) Provision for a regular flow of income to all those whose employment is interrupted by sickness or injury, by old age or by lack of employment opportunity;
(6) The effective recognition of the right of freedom of association and of collective bargaining;
(7) Provision of facilities for training and transfer of labour.

Article IV

The International Labour Office may, under standards constitutionally determined by the International Labour Conference, as occasion requires, collect from, and interchange with, the signatory governments, uniform statistical and other economic information on the following matters which are among those of direct interest to the International Labour Organization and are of international concern:

(1) Employment, wages and conditions of work;
(2) Standards of living and the distribution of income, with particular reference to wage and salaried workers;
(3) Technical education and training for employment;
(4) Industrial health, safety and welfare;
(5) Industrial relations;
(6) Social security; and
(7) Administration of labour and social security legislation.

Article V

With respect to the matters set forth in Article III:

(1) The governments, through appropriate international agencies, shall develop standards and statistical measures, and shall maintain uniform statistics and other information.
(2) The governments shall interchange among themselves and make available to the International Labour Organization such information and reports as may be required to assist them and the Organisation to develop recommendations with respect to such matters.
(3) The governments shall take appropriate steps to assure close collaboration and full exchange of information between the International Labour Organisation and any other international bodies which now exist or may be established for the promotion of economic advancement and social well-being.
(4) The governments shall take appropriate steps to have placed on the agenda of the International Labour Conference annually the subject of the extent to which the social objectives set forth in Article I have been attained and on the measures taken during the year toward the attainment of the objectives.

Article VI

With respect to draft international conventions and recommendations adopted by the Conference in accordance with Article 19 of the constitution of the International Labour Organisation, the signatory governments undertake to report to the International Labour Office as requested by the Governing Body on the status of legislation and administration and, in so far as practicable, of practices under collective agreements between employers and workers.

[Here follows the *Declaration concerning the Aims and Purposes of the International Labour Organisation,* for the text of which see Annex 5 above.]

II

The Conference recommends that the Governing Body of the International Labour Organization:

(1) call a special conference of the Organization when in its opinion there is a danger of a substantial fall in general employment levels for the purpose of recommending appropriate national or international measures to prevent the development or spread of unemployment and to establish conditions under which high levels of employment may be maintained or restored;
(2) correlate the activities of the I.L.O. toward the end of maintaining full employment with those of any other inter-

national agency or agencies which may be designated by the United Nations to have primary responsibility in related economic fields.

III

The Conference Recommends that:

(1) The United Nations should undertake—

(*a*) to apply to any dependent territories in respect of which they have accepted or may accept a measure of international accountability through any international or regional commission or other body the principle that all policies designed to apply to dependent territories shall be primarily directed to the well-being and development of the peoples of such territories, and to the promotion of the desire on their part for social progress;

(*b*) to apply to such territories the provisions of the Forced Labour Convention, 1930; the Recruiting of Indigenous Workers Convention, 1936; the Contracts of Employment (Indigenous Workers) Convention, 1939, and the Penal Sanctions (Indigenous Workers) Convention, 1939;

(*c*) to make a periodical report to the International Labour Office in respect of each such territory indicating the extent to which effect has been given to the provisions of the Social Policy (Dependent Territories) Recommendation, 1944;

(*d*) to ask the International Labour Office to appoint, in continuation of the collaboration established in the case of the Permanent Mandates Commission, a representative on any Committee which may be entrusted with the task of watching over the application of the principle of international accountability, and further to ensure that any facilities which may be afforded, in the form of inspection or otherwise, for the better implementation of this principle, shall include appropriate measures for examining the application of the above-mentioned Conventions and Recommendation.

(2) When determining the future status of dependent territories which on 1 September 1939 were controlled by Axis Powers, the United Nations should specifically require the application thereto of the arrangements provided for in the preceding paragraph.

(3) In making international arrangements concerning transport by air, land, and inland waterway, the United Nations should have due regard to the repercussions of such arrangements on the working and living conditions of persons employed in transport, and should consult the International Labour Organization in regard to such repercussions and more particularly in regard to the working and living conditions of persons who, in operating such transport systems, work in or under the jurisdiction of more than one country.

(4) The International Labour Organization should make available to the United Nations any information or assistance calculated to facilitate the implementation of the proposals contained in the resolution concerning economic policies for the attainment of social objectives and the present resolution and should be prepared to participate in any international conference which may be considering such proposals.

IV

Believing that the exceptional opportunity of the negotiations of the peace settlement should be taken to secure a concerted advance in the acceptance of binding obligations concerning conditions of labour;

The Conference reaffirming the principle of the association of management and labour in the framing of such standards,

Recommends

(*a*) That throughout the peace settlement the United Nations should wherever appropriate include provisions for labour standards. In a number of cases such provisions might properly be taken from conventions or recommendations that have been or may be adopted by the International Labour Conference.

(*b*) That the Governing Body should appoint a consultative committee on labour provisions in the peace settlement. This committee should hold itself in readiness, together with the Director of the International Labour Office, to give advice with reference to such provisions on the request of the United Nations or of particular groups of the United Nations. This committee should have the right to co-opt additional members of special competence with respect to the particular sets of provisions under consideration.

(*c*) That the United Nations should make full use of this committee in any way in which they consider it appropriate to include labour provisions in the peace settlement.

V

The Conference recommends to Governments that a Conference of representatives of the Governments of the United, associated, and other Nations, willing to attend, be called at an early date, in association with the Governing Body of the International Labour Office, to consider an international agreement on domestic policies of employment and unemployment; and this Conference pledges the full co-operation and the assistance of the I.L.O. in calling such a conference on employment, and in helping to carry into effect appropriate decisions it might make.

ANNEX 14—Statement by Mr. Paul Martin, K.C., M.P., in Presenting Report of Committee on Employment

There is no point in my making any extended remarks at this juncture, except to say by way of résumé that the Committee is grateful to those of the Office, its officers, and translators who assisted so materially in rendering so efficient the working of this Committee.

As Mr. Tomlinson said, having in mind the terms of reference of the Committee, there was no Committee of the Conference to whom had been assigned a more important responsibility. For, after all, the Committee's deliberations were predicated upon two fundamental assumptions: The first, that policies to effect full employment are a *sine qua non* for the successful handling of the main terms of reference engaging this whole Conference; and, secondly, the recognition that the problem of full employment in terms of application will affect different countries in different ways.

All the nations assembled at this Conference can agree upon the principles and suggestions embodied in this Report. The application of these principles, however, will require variation in various parts of the world.

In so far as the liberated areas are concerned, we recognize that the principles enunciated in the Report cannot be given immediate application. But I think I may state on behalf of the Committee that there was engendered throughout our deliberations a deep understanding of the special problem that faces the countries now occupied by the enemy; and that while the application of full employment principles may not be as readily applied in those areas as in the more fortunate countries, there will be a disposition on the part of the more fortunate countries to assist in the reconstruction of those liberated areas, in terms of full employment for them as for the more fortunate countries.

But we must not lose sight of the one clear and indisputable fact in the discussion of this tremendous problem. There is, as Mr. Tomlinson has so well said, a demand in each country on the part of all people, of all shades of political opinion, regardless of what their labels may be, that if we could during the war, with victory and justice as the spearhead and the encouragement, provide full employment for our people, then with equally powerful incentives in the days of peace, that must be possible when the days of war have passed.

But all of us at this international Conference, Mr. President, must not lose sight of the fact that full employment in my country—and I dare say that each delegate would say the same thing of full employment in his country—is dependent upon the fullest economic and political collaboration of all the nations of the world. If that cannot be done, if that cannot be assumed, then I dare say that full employment at home will be conceived at least in terms of limited capacities.

But I do suspect that the deliberations of this Conference, and certainly this Committee, were predicated upon the great assumption upon which not only human dignity but the peace of the world depends: that in determining the political side of the peace, there shall not be forgotten those important economic considerations which were, perhaps, forgotten twenty years ago, and which this time, we trust, will not be forgotten.

And so that we can have full employment, high levels of employment for our people in all the lands, our Governments represented here and represented at other Conferences must bring about, *vis-a-vis* one another, the fullest amount of collaboration, not only in political but also in economic terms. In that spirit, and in that spirit alone, we must go along in the building of a better world.

ANNEX 15—Employment (Transition from War to Peace) Recommendation, 1944

The General Conference of the International Labour Organization,

Having been convened at Philadelphia by the Governing Body of the International Labour Office, and having met in its Twenty-sixth Session on 20 April 1944, and

Having decided upon the adoption of certain proposals with regard to the organization of employment in the transition from war to peace which is the third Item on the Agenda of the Session, and

Having determined that these proposals shall take the form of a Recommendation,

adopts, this twelfth day of May, of the year one thousand nine hundred and forty-four, the following Recommendation which may be cited as the Employment (Transition from War to Peace) Recommendation, 1944:

Whereas the promotion of full employment with a view to satisfying the vital needs of the population and raising the standard of living throughout the world is a primary objective of the International Labour Organization;

Whereas in order to achieve full employment economic measures providing employment opportunities must be supplemented by effective organization to help employers to secure the most suitable workers, to help workers to find the most suitable employment, and generally to ensure that, at any given moment, the necessary skills are available and are distributed satisfactorily among the various branches of production and the various areas; and

Whereas the character and magnitude of the employment adjustments required during the transition from war to peace will necessitate special action, more particularly for the purpose of facilitating the re-employment of demobilised members of the armed forces, discharged war workers, and all persons whose usual employment has been interrupted as a result of the war, enemy action, or resistance to the enemy or enemy-dominated authorities, by assisting the persons concerned to find without delay the most suitable employment;

The Conference recommends the Members of the Organization to apply the following general principles, and in so doing to take into account, according to national conditions, the suggested methods of application, and to communicate information to the International Labour Office, as requested by the Governing Body, concerning the measures taken to give effect to these principles.

General Principles

I. Each Government should collect whatever information is necessary regarding workers seeking or likely to be seeking employment and regarding prospective employment opportunities, with a view to ensuring the most rapid reabsorption or redistribution in suitable employment of all persons who desire to work.

II. The demobilisation of the armed forces and of assimilated services and the repatriation of prisoners of war, persons who have been deported, and others, should be planned with the objective of maximum fairness to individuals and maximum opportunities for satisfactory re-establishment in civil life.

III. National programmes for industrial demobilisation and reconversion should be planned in co-operation with employers' and workers' organizations, and other adequate measures taken, in such manner as to facilitate the most rapid attainment of full employment for the production of needed goods and services.

IV. In the organization of full employment in the transition period and thereafter, the widest possible use of employment service facilities by employers seeking workers and by workers seeking employment should be encouraged

by the competent authorities and by employers' and workers' organizations.

V. Each Government should, to the maximum extent possible, provide public vocational guidance facilities, available to persons seeking work, with a view to assisting them to find the most suitable employment.

VI. Training and retraining programmes should be developed to the fullest possible extent in order to meet the needs of the workers who will have to be re-established in employment or provided with new employment.

VII. With a view to avoiding the need for excessive movements of workers from one area to another and preventing localised unemployment in particular areas, each Government should, in co-operation with employers' and workers' organizations, formulate a positive policy in regard to the location of industry and the diversification of economic activity. Governments should also take steps to facilitate any necessary mobility of labour, both occupational and geographical.

VIII. Efforts should be made during the transition period to provide the widest possible opportunities for acquiring skill for juveniles and young workers who were unable, because of the war, to undertake or to complete their training and efforts should also be made to improve the education and health supervision of young persons.

IX. The redistribution of women workers in each national economy should be carried out on the principle of complete equality of opportunity for men and women in respect of admission to employment on the basis of their individual merit, skill and experience, and steps should be taken to encourage the establishment of wage rates on the basis of job content, without regard to sex.

X. Disabled workers, whatever the origin of their disability, should be provided with full opportunities for rehabilitation, specialised vocational guidance, training and retraining, and employment on useful work.

XI. Measures should be taken to regularise employment within the industries and occupations in which work is irregular, in order to achieve full use of the capacities of the workers.

Methods of Application

I. Advance collection of information

1. Each Government should arrange for the co-ordinated collection and utilisation of as complete and up-to-date information as possible on:

(*a*) the number, educational and occupational backgrounds, past and present skills, and occupational wishes of members of the armed forces and of assimilated services, and as far as possible of all persons whose usual employment has been interrupted as the result of enemy action or resistance to the enemy or enemy-dominated authorities;

(*b*) the number, location, industrial distribution, sex distribution, skills and occupational wishes of workers who will have to change their employment during the transition from war to peace; and

(*c*) the number and distribution of older workers, women and juveniles who are likely to withdraw from gainful employment after the war emergency and the number of juveniles who are likely to be seeking employment on leaving school.

2. (1) Comprehensive material on prospective labour requirements, showing the probable extent and timing of the demand for workers from each major industry, both in total and by major skills, should be collected and analysed before the end of the war.

(2) Where such information is in the possession of any administrative authority, it should be made available to the authorities primarily responsible for the collection or utilisation of advance information on labour supply and requirements.

(3) The material on labour requirements should cover more particularly:

(*a*) the probable contraction of labour requirements resulting from the closing of certain munitions undertakings;

(*b*) the probable rate of contraction of the armed forces and of assimilated services upon the termination of hostilities;

(*c*) probable fluctuations and changes by areas in the labour force of industries or undertakings which will, with or without a period of conversion, continue in operation to meet peacetime needs;

(*d*) probable labour requirements in industries which will be expanding to meet peacetime needs, in particular in industries the output of which is most urgently needed to improve the standard of living of the workers, and in public works, including works of a normal character and works held in reserve for the provision of supplementary employment in periods of declining economic activity; and

(*e*) the probable demand for workers in the main industries and occupations under conditions of full employment.

3. Prospective labour supply and demand in the various areas should be kept under constant review by the appropriate authorities, in order to show the effect of the war and the probable effect of the termination of hostilities on the employment situation in each of these areas.

4. Members should co-operate in collecting the information referred to in subparagraphs (*a*), (*b*) and (*c*) of paragraph 1 in respect of persons transferred out of their own countries as a result of Axis aggression. Each Government should supply such information in respect of nationals of other Members living in its territory, in Axis territories, or in territory occupied by the Axis, who are awaiting repatriation, even where the information available is merely of a general character.

II. Demobilization of the Armed Forces

5. Close contact should be organized and maintained between the employment service and the authorities responsible for the demobilization of the armed forces and assimilated services and for the repatriation of prisoners of war and persons who have been deported, in order to ensure the speediest re-employment of the men and women concerned.

6. (1) The rate and order of demobilization should be controlled according to clearly expressed principles which should be given wide publicity in order that they may be clearly understood.

(2) In the process of demobilization, which should in general be as rapid as military necessity and transportation facilities permit, consideration should be given to:

(*a*) the desirability of regulating the rate and distributing the flow of demobilization so as to avoid local concentrations of ex-service men and women disproportionate to the capacity of their community to provide opportunity for employment or training;

(*b*) the desirability of arranging, where necessary, for an early release of workers whose qualifications make them indispensable for urgent reconstruction work.

7. (1) Schemes for reinstating in their former employment persons whose usual employment has been interrupted by military mobilization, enemy action, or resistance to the enemy or enemy-dominated authorities, should be adopted and carried out so far as changed post-war circumstances allow.

(2) The fullest possible employment and advancement opportunities for these men and women, on the basis of their qualifications, should be assured through Government action and collective agreements.

(3) Immediate alternative employment should be secured for the workers displaced by the operation of these schemes.

8. In addition to schemes for re-employment, immediate consideration should be given to the provision, wherever justified by prospective opportunities to make a living, of adequate financial and other assistance to enable qualified demobilized persons to settle or resettle on the land, to enter or re-enter a profession, or to take up other independent work.

III. Industrial Demobilization and Conversion

9. (1) Each Government should, in cooperation with employers' and workers' organizations, formulate a national industrial demobilization and reconversion program to facilitate the rapid and orderly conversion of the economy from wartime to peacetime requirements during the period of reconstruction, account being taken of the urgent need of countries devastated by the war, with a view to attaining full employment with the least possible delay. All information in regard to the demobilization and reconversion program should be made available to the authorities responsible for collecting advance information on labour supply and requirements.

(2) The cooperation of employers' and workers' organizations should be invited with a view to working out comprehensive industry and area demobilization and reconversion programs to facilitate the change-over from war to peace production in a manner that will minimize transitional unemployment.

10. (1) Each Government should, so far as possible before the end of the war, determine its policy in regard to the peace-time use of Government-owned war production capacity and equipment and in regard to the disposition of surplus materials.

(2) Special consideration should be given to the early release of factories and equipment urgently needed for peacetime production or training.

(3) In general, factories, equipment or materials should not be destroyed or kept out of use where human needs are unsatisfied or where no excess production would exist at reasonable prices under conditions of demand associated with full employment.

11. Each Government should, in formulating its policy and procedure for the termination or adjustment of war contracts, give special consideration to the possibilities of continued employment or rapid re-employment of the workers affected or of favourable opportunities for employment in other areas. Governments should also arrange for the prompt settlement of claims under terminated contracts, so that employment will not be held back by needless financial difficulties of contractors. Contractors in countries at present occupied who have worked voluntarily in the interest of the enemy should not be granted the benefit of such arrangements.

12. (1) Arrangements should be made to ensure that administrative authorities give information at the earliest possible moment to the employment service and contractors regarding any circumstances likely to cause dismissals or lay-offs.

(2) Procurement agencies should give contractors both at home and abroad and the employment service as long advance notice as possible of cut-backs in war orders. In no case should the notice given be less than two weeks.

(3) Employers should give the employment service at least two weeks' advance notice of proposed dismissals affecting more than a specified number of workers, in order to enable the employment service to make plans for alternative employment for the workers concerned.

(4) Employers should give the employment service at least two weeks' advance notice of proposed temporary lay-offs affecting more than a specified number of workers, together with information to show the probable duration of such lay-offs, in order to enable the employment service to find temporary public or private employment or training for the laid-off workers. Employers should so far as possible inform the laid-off workers of the expected duration of such lay-offs.

IV. Applications for Work and for Workers

13. (1) Vacancies on public works and in undertakings working on public orders to the extent of 75 per cent or more of their operations should be filled through the employment service.

(2) Consideration should be given to the advisability of requiring employers in specified industries or areas to engage their workers through the employment service in order to facilitate the readjustment of employment.

(3) Employers should be encouraged to give advance notice of their labour requirements to the employment service.

14. Persons applying for employment on Government-sponsored projects, as well as persons applying for publicly supported training programs or transfer assistance, or claiming unemployment benefit or allowance, should be required to register with the employment service.

15. Special efforts should be made to assist demobilized members of the forces and war workers to find the most suitable work of which they are capable, making use wherever possible of the skills acquired by them during the war.

16. Every effort should be made, by the authorities, and in particular by the employment service, in co-operation with employers' and workers' organizations, to encourage as wide a use as possible of the employment service by employers and workers.

V. Vocational Guidance

17. Special and immediate attention should be given to the development of suitable methods and techniques of vocational guidance for adult workers.

18. In cases of prolonged unemployment, the use of vocational guidance facilities should be made a condition for the continued receipt of unemployment benefit or allowance.

19. The competent authorities should, in co-operation with the private bodies concerned, develop and maintain adequate training facilities for vocational guidance officers.

VI. Training and Retraining Programs

20. On the basis of information concerning labour supply and demand in the post-war period, each government should, in close co-operation with employers' and workers' organiztions, formulate a national training and retraining program, geared to the post-war needs of the economy and taking into account changes in the different skill requirements of each industry.

21. Every possible step should be taken to facilitate the occupational mobility necessary to adjust the supply of workers to present and prospective labour requirements.

22. Training and retraining programs should be extended and adapted to meet the needs of demobilized persons, discharged war workers, and all persons whose usual employment has been interrupted as the result of enemy action or resistance to the enemy or enemy-dominated authorities. Special emphasis should be placed on courses of training designed to fit the persons concerned for employment which offers a permanent career.

23. In addition to apprenticeship schemes, systematic methods of training, retraining and upgrading workers should be developed to meet post-war needs for the reconstitution and expansion of the skilled labour force.

24. Persons undertaking training should be paid, where necessary, remuneration or allowances which provide an inducement to undergo and continue training and are sufficient to maintain a reasonable standard of life.

25. Men and women whose higher training and education has been prevented or interrupted by war service, whether in a military or civilian capacity, or by enemy action, or by resistance to the enemy or enemy dominated authorities, should be enabled to enter upon or resume and complete their training and education, subject to continued proof of merit and promise, and should be paid allowances during their training and education.

26. (1) Qualified vocational teachers and instructors who have been engaged in other work during the war should be encouraged to resume their previous occupation at the earliest possible moment.

(2) Refresher courses should be organized in case of need:

(*a*) for vocational instructors returning to their work after a lengthy absence; and

(*b*) for teaching new methods and techniques.

(3) Additional vocational teachers and instructors should be trained in the numbers required to meet the needs of the training and retraining program.

(4) Members should co-operate, where necessary, in reconstituting and expanding vocational training and retraining, by such methods as:

(*a*) the provision in one country of training as instructors for persons from another country to enable them to acquire broader skill or training not available in their own country;

(*b*) the loan of experienced vocational instructors and teachers from one country to help meet shortages of vocational training staff or new industrial needs in another country;

(*c*) facilitating the return to the territories of member countries of subjects thereof living in the territory of another member country who are qualified for teaching and instructing in their home country; and

(*d*) the provision of training handbooks and other equipment to assist instructors and persons in training.

27. Training and retraining services should be co-ordinated on a national, regional and local basis, and should be closely associated at all levels of operation with guidance work, with the placement work of the employment service, and with the training activities of employers' and workers' organizations.

VII. Geographical Mobility

28. With a view to facilitating the necessary mobility of labour, the employment service should take action to overcome the obstacles to transfers from one area to another and to assist the movement of workers to areas needing labour, thereby helping to bring together available skills and available employment opportunities and thus preventing unemployment.

29. (1) Where a worker is transferred from one area to another on the initiative or with the consent of the employment service, arrangements should be made to grant travelling expenses and to assist the worker to meet initial expenses in the new place of work by granting or advancing him a specified amount, fixed according to the circumstances.

(2) where a temporary transfer made through the employment service involves the separation of the head of the household from his family, arrangements should be made to grant an appropriate separation allowance to cover the added costs of maintaining double living quarters.

VIII. Employment of Young Workers

30. (1) The policy of revising upward the school-leaving age and the age for admission to employment should be considered by all countries as a primary factor in planning employment policy for the transition period.

(2) Maintenance allowances should be granted to parents by the competent authorities during the additional period of compulsory education referred to above.

31. Student-aid programs should be developed to enable young persons above the school-leaving age to continue their education in secondary schools or high schools, and for those beyond the secondary school level, subject to continued proof of merit, in technical or higher education schools or courses on a full-time basis.

32. (1) Vocational guidance services adapted to their needs should be available for all young persons, both prior to and at the time of leaving school, through the school or the employment service.

(2) Free pre-employment medical examination should be provided for all young persons. The results of this examination should be incorporated in a certificate to serve as a basis for periodical re-examinations during a period to be precribed by national laws or regulations.

(3) In countries in which war conditions and enemy occupation have undermined the health of young persons, particular attention should be given to the health supervision of such persons from the time of their admission to employment through the period of adjustment to working life, and, where necessary, measures of physical rehabilitation should be adopted.

(4) Members should co-operate, when requested, in providing for the training of medical and nursing staff, and the loan of experienced doctors, surgeons, nursing personnel and appropriate equipment, in order to facilitate the physical rehabilitation of the young persons referred to in sub-paragraph (3) above.

33. (1) Young persons whose contracts of apprenticeship have been interrupted owing to the war should be entitled to resume apprenticeship on the termination of their war service.

(2) State aid should be made available to enable a person whose apprenticeship has been resumed in accordance with sub-paragraph (1) above to be assured of an income which is reasonable, having regard to his age and to the remuneration he would have been receiving had his apprenticeship not been interrupted.

(3) In all cases in which military service, raw material shortages, enemy action, or other war circumstances, have prevented young persons from entering or continuing apprenticeship, arrangements should be made to encourage them, as soon as circumstances permit, to resume their apprenticeship or to learn a skilled trade.

(4) With a view to encouraging the resumption of interrupted apprenticeships, arrangements should be made to review the provisions of apprenticeship contracts and to vary them where this seems equitable to take account of training, skill or experience acquired during war service.

(5) Existing apprenticeship programs should be re-examined, in co-operation with employers' and workers' organizations, with a view to giving wider opportunities to learn a skilled trade to the younger workers who have not been able, owing to the war, to enter apprenticeship. More particularly, consideration should be given to making arrangements for varying existing restrictions on admission to apprenticeship and for taking into account any training, skill or experience acquired during the war.

34. Employers should be encouraged to introduce programs of systematic in-plant training to enable all the young workers employed in the undertaking to acquire training or to improve their skill and broaden their knowledge of the operations of the undertaking as a whole. Such programs should be developed in co-operation with workers' organizations and should be adequately supervised.

35. In countries which have been invaded during the war, and in which there are young persons who have been compelled to abstain from work, or, without regard to their aptitudes or desires, to work for the enemy, special attention should be devoted to the readjustment of such young persons to work habits and to supplementing their vocational training.

IX. Employment of Women

36. The redistribution of women workers in the economy should be organized on the principle of complete equality of opportunity for men and women on the basis of their individual merit, skill and experience, without prejudice to the provisions of the International Labour Conventions and Recommendations concerning the employment of women.

37. (1) In order to place women on a basis of equality with men in the employment market, and thus to prevent competition among the available workers prejudicial to the interests of both men and women workers, steps should be taken to encourage the establishment of wage rates based on job content, without regard to sex.

(2) Investigations should be conducted, in co-operation with employers' and workers' organizations, for the purpose of establishing precise and objective standards for determining job content, irrespective of the sex of the worker, as a basis for determining wage rates.

38. The employment of women in industries and occupations in which large numbers of women have traditionally been employed should be facilitated by action to raise the relative status of these industries and occupations and to improve conditions of work and methods of placement therein.

X. Employment of Disabled Workers

39. The criterion for the training and employment of disabled workers should be the employability of the worker, whatever the origin of the disability.

40. There should be the closest collaboration between medical services for the disabled and vocational rehabilitation and placement services.

41. Specialized vocational guidance for the disabled should be developed in order to make it possible to assess each disabled worker's capacity and to select the most appropriate form of employment for him.

42. (1) Wherever possible, disabled workers should receive training in company with able-bodied workers, under the same conditions and with the same pay.

(2) Training should be continued to the point where the disabled person is able to enter employment as an efficient worker in the trade or occupation for which he has been trained.

(3) Wherever practicable, efforts should be made to retrain disabled workers in their former occupations or in related occupations where their previous qualifications would be useful.

(4) Employers with suitable training facilities should be induced to train a reasonable proportion of disabled workers.

(5) Specialized training centres, with appropriate medical supervision, should be provided for those disabled persons who require such special training.

43. (1) Special measures should be taken to ensure equality of employment opportunity for disabled workers on the basis of their working capacity. Employers should be induced by wide publicity and other means, and where necessary compelled, to employ a reasonable quota of disabled workers.

(2) In certain occupations particularly suitable for the employment of seriously-disabled workers, such workers should be given preference over all other workers.

(3) Efforts should be made, in close co-operation with employers' and workers' organizations, to overcome employment discriminations against disabled workers which are not related to their

ability and job performance, and to overcome the obstacles to their employment including the possibility of increased liability in respect of workmen's compensation.

(4) Employment on useful work in special centres under non-competitive conditions should be made available for all disabled workers who cannot be made fit for normal employment.

44. Information should be assembled by the employment service in regard to the occupations particularly suited to different disabilities and the size, location and employability of the disabled population.

XI. Regularization of Employment in Particular Industries

45. In industries in which operations are irregular, such as construction and port transport, the schemes for the regularization of employment adopted or extended during the war by Member States should be maintained and adapted to peacetime conditions in consultation with the employers' and workers' organizations concerned.

ANNEX 16—Employment Service Recommendation, 1944

The General Conference of the International Labour Organization,

Having been convened at Philadelphia by the Governing Body of the International Labour Office, and having met in its Twenty-sixth Session on 20th April, 1944, and

Having decided upon the adoption of certain proposals with regard to the employment service, which is included in the third Item on the Agenda of the Session, and

Having determined that these proposals shall take the form of a Recommendation,

adopts, this twelfth day of May, of the year one thousand nine hundred and forty-four, the following Recommendation which may be cited as the Employment Service Recommendation, 1944:

Whereas the application of the Employment (Transition from War to Peace) Recommendation, 1944, requires the existence and development of an efficient employment service; and

Whereas the Unemployment Convention, 1919, provides for the establishment of a "system of free public employment agencies under the control of a central authority"; and

Whereas the fulfilment of the tasks enumerated in the Employment (Transition from War to Peace) Recommendation, 1944, involves a new and broader definition of the responsibilities, functions and methods of operation of the employment service; and

Whereas this broader conception is of importance in the formulation and application of a long-term full employment policy;

The Conference recommends the Members of the Organization to apply the following general principles, and to report to the International Labour Office from time to time, as requested by the Governing Body, concerning the measures taken to give effect to these principles:

1. The essential duty of the employment service should be to ensure, in co-operation with other public and private bodies concerned, the best possible organization of industrial, agricultural and other employment as an integral part of the national program for the full use of productive resources.

2. (1) To fulfil this duty, steps should be taken to strengthen the employment service and related authorities.

(2) These services should be responsible for:

(a) collecting and making available information concerning labour supply, employment opportunities, the skills required to do particular jobs, changes in skill requirements within the different industries, employment and unemployment trends, the regularization of employment, and the causes of unemployment, and other information of value in promoting full employment;

(b) assisting workers to find suitable employment and employers to find suitable workers;

(c) assisting in developing and in determining the content of training and retraining courses;

(d) developing methods of facilitating the transference, where necessary, of workers from one occupation or area to another;

(e) helping to achieve the best possible distribution of manpower within each industry and area;

(f) co-operating as may be required in the administration of unemployment insurance and assistance;

(g) assisting other public and private bodies in planning the location of industry, public works, housing projects, social amenities, and other social and economic measures.

3. The closest co-operation between the employment service and other authorities whose activities affect the employment situation, including authorities charged with responsibility for accelerating or slowing down public works in accordance with the current state of employment and unemployment, should be established at the national, regional and local levels.

4. (1) In addition to the joint advisory bodies provided for in Article 2 of the Unemployment Convention, 1919, the employment service should co-operate closely with employers' and workers' organizations. Appropriate machinery should be devised to enable these organizations to assist in the formulation and carrying out of employment policy.

(2) The employment service should co-operate with any joint industry committees which may be set up to facilitate the solution of the special problems of the industries concerned.

ANNEX 17—Public Works (National Planning) Recommendation, 1944

The General Conference of the International Labour Organization,

Having been convened at Philadelphia by the Governing Body of the International Labour Office, and having met in its Twenty-sixth Session on 20th April, 1944, and

Having decided upon the adoption of certain proposals with regard to the national planning of public works, which is included in the third Item on the Agenda of the Session, and

Having determined that these proposals shall take the form of a Recommendation,

adopts, this twelfth day of May, of the year one thousand nine hundred and forty-four, the following Recommendation which may be cited as the Public Works (National Planning) Recommendation, 1944:

Whereas the Public Works (National Planning) Recommendation, 1937, recommends that all works undertaken or financed by public authorities should be timed in such a way as to reduce industrial fluctuations as far as possible, and that special consideration should be given to the financing by loan in periods of depression of works likely to stimulate economic recovery and to the application of a monetary policy which will make possible the expansion of credit required for the speeding up of such works and ensure the lowest possible rate of interest on the loans;

Whereas at the end of the war public authorities will be faced with the great need to repair the damage caused by the war, to restore and replace existing public works, and to provide new public works and services; and

Whereas public works constitute a large element in the economic life of all nations, and public works programs are an important method by which levels of productivity can be increased, and by which levels of living of all peoples can be raised; and

Whereas it is important in the transition from war to peace that public and private enterprise should be co-ordinated to assure the prompt and orderly use of human and material resources, avoiding on the one hand rush demands for materials which would leave contractors temporarily in short supply and on the other hand inadequate development of demand;

The Conference recommends the Members of the Organization to apply the following general principles, and to communicate information to the International Labour Office, as requested by the Governing Body, concerning the measures taken to give effect to these principles:

1. Each Member should prepare a long-term development program which can be accelerated or slowed down in accordance with the employment situation in different parts of the country.

2. Special attention should be paid to the importance of timing the execution of the works and the ordering of supplies, so as to limit the demand for labour at a time when there is already full employment and to increase it at a time when there is unemployment.

3. In applying this policy, consideration should be given not only to the employment situation in the country as a whole but also to the situation in each area and to the particular types of skill available in the area concerned.

4. Local authorities and others responsible for framing schemes for employment should be informed by their central authorities at the earliest possible moment what financial support will be forthcoming, so that the local authorities and technical services may proceed without further delay to prepare plans and to make such practical preparation as would enable large numbers of demobilized soldiers to be absorbed as soon as they are available.

ANNEX 18—Resolution Concerning the Conventions and Recommendations Adopted at Earlier Sessions of the Conference Bearing Upon the Problem of the Organization of Employment in the Transition From War to Peace

The General Conference of the International Labour Organization,

Having adopted the Employment (Transition from War to Peace *Recommendations*, 1944, the Employment Service *Recommendation*, 1944, the Public Works (National Planning) *Recommendation*, 1944,

Draws the attention of the Members of the Organization to the bearing upon the problem of the organization of employment in the transition from war to peace of the following Conventions and Recommendations:—

the Unemployment Conventions, 1919,
the Fee-Charging Employment Agencies Convention, 1933,
the Employment Agencies Recommendation, 1933,
the Unemployment Provision Convention, 1934,
the Unemployment Provision Recommendation, 1934,
the Unemployment (Young Persons) Recommendations, 1935,
the Vocational Training Recommendation, 1939,
the Apprenticeship Recommendation, 1939,
the Vocational Education (Building) Recommendation, 1937,
the Minimum Age (Industry) Convention (Revised), 1937,
the Minimum Age (Family Undertakings) Recommendation, 1937,
the Minimum Age (Non-Industrial Employment) Convention (Revised), 1937,
the Minimum Age (Agriculture) Convention, 1921,
the Public Works (National Planning) Recommendation, 1937,
the Public Works (International Co-operation Recommendation, 1937; and

Urges that Members which have not already done so should give consideration to ratifying the said Conventions, and to giving effect, wherever possible, to their provisions pending ratification, and that all members should give consideration to making effective the provisions of the said Recommendations.

ANNEX 19—Resolution Concerning Co-operation in Regard to the Preparation for Plans for Public Works in Countries at Present in Enemy Occupation

Whereas the Governments of the United Nations, whose territory is still under the occupation of the enemy, are unable to prepare detailed plans for public works in their countries, because they do not possess the data necessary for such a preparation and because they are handicapped by either the lack of trained technical personnel, or by the lack of adequate financial means or by both;

Whereas the universities and technical colleges in some of the occupied countries have been forcibly closed for years, and laboratories, research institutes and libraries destroyed;

Whereas in most of these countries the number of previously trained technical experts has been because of persecution considerably reduced and the remaining experts have been for years without any communication with the western world and consequently have been unable to keep up with the results and methods of technical progress achieved in non-occupied territories; and

Whereas a considerable volume of public works will have to be undertaken upon the liberation of those countries in order to provide the basis for a speedy reconstruction, to organize the transportation network, to provide housing for the great masses of the population, and finally to provide employment;

It is resolved:

(*a*) that the Members of the International Labour Organization be invited to exchange the results of their research in the various branches of development works including public utilities and their experiences with the technical problems involved in the preparation and carrying out of development works programs.

(*b*) that they exchange experiences gained in the planning and organization of development works and in the maintenance of such works and public utilities; and exchange information on the education of technical experts and on making these matters known to the public.

(*c*) that the Conference invites the Governing Body to call a meeting of the International Public Works Committee at the earliest practicable moment and to include in the agenda of that meeting the study of the exchange of such information as is referred to in clauses (*a*) and (*b*).

ANNEX 20—Income Security Recommendation, 1944

The General Conference of the International Labour Organization,

Having been convened at Philadelphia by the Governing Body of the International Labour Office, and having met in its Twenty-sixth Session on 20th April, 1944, and

Having decided upon the adoption of certain proposals with regard to income security, which is included in the fourth item on the Agenda of the Session, and

Having determined that these proposals shall take the form of a Recommendation.

adopts, this twelfth day of May, of the year, one thousand nine hundred and forty-four, the following Recommendation which may be cited as the Income Security Recommendation, 1944:

Whereas the Atlantic Charter contemplates "the fullest collaboration between all nations in the economic field with the object of securing for all improved labour standards, economic advancement and social security"; and

Whereas the Conference of the International Labour Organization, by a resolution adopted on 5th November, 1941, endorsed this principle of the Atlantic Charter and pledged the full co-operation of the International Labour Organization in its implementation; and

Whereas income security is an essential element in social security; and

Whereas the International Labour Organization has promoted the development of income security—

by the adoption by the International Labour Conference of Conventions and Recommendations relating to workmen's compensation for accidents and occupational diseases, sickness insurance, provision for maternity, old age, invalidity, and widows' and orphans' pensions, and provision for unemployment,

by the adoption by the First and Second Labour Conferences of American States of the resolutions constituting the Inter-American Social Insurance Code, by the participation of a delegation of the Governing Body in the First Inter-American Conference on Social Security which adopted the Declaration of Santiago de Chile, and by the approval by the Governing Body of the Statute of the Inter-American Conference on Social Security established as a permanent agency of co-operation between social security administrations and institutions acting in concert with the International Labour Office, and

by the participation of the International Labour Office in an advisory capacity in the framing of social insurance schemes in a number of countries and by other measures; and

Whereas some members have not taken such steps as are within their competence to promote the well-being and development of their people although their need for improved labour standards, economic advancement and social security is greatest; and

Whereas it is now highly desirable that such members take all necessary steps as soon as possible to reach the accepted international minimum standards and develop those standards; and

Whereas it is now desirable to take further steps towards the attainment of income security by the unification or co-ordination of social insurance schemes, the extension of such schemes to all workers and their families, including rural populations and the self-employed, and the elimination of inequitable anomalies; and

Whereas the formulation of certain general principles which should be followed by members of the Organization in developing their income security schemes along these lines on the foundation of the existing Conventions and Recommendations, pending the unification and amplification of the provisions of the said Conventions and Recommendations, will contribute to this end;

The Conference:

(*a*) recommends the Members of the Organization to apply progressively the following general guiding principles, as rapidly as national conditions allow, in developing their income security schemes with a view to the implementation of the fifth principle of the Atlantic Charter, and to report to the International Labour Office from time to time as requested by the Governing Body, concerning the measures taken to give effect to the said general guiding principles;

(*b*) calls the attention of the Members of the Organization to the suggestions for the application of these general guiding principles submitted to the Conference and contained in the Annex to this Recommendation.

Guiding Principles

GENERAL

1. Income security schemes should relieve want and prevent destitution by restoring, up to a reasonable level, income which is lost by reason of inability to work (including old age) or to obtain remunerative work or by reason of the death of a breadwinner.

2. Income security should be organized as far as possible on the basis of compulsory social insurance, whereby insured persons fulfilling prescribed qualifying conditions are entitled, in consideration of the contributions they have paid to an insurance institution, to benefits payable at rates, and in contingencies, defined by law.

3. Provision for needs not covered by compulsory social insurance should be made by social assistance; certain categories of persons, particularly dependent children and needy invalids, aged persons and widows, should be entitled to allowances at reasonable rates according to a prescribed scale.

4. Social assistance appropriate to the needs of the case should be provided for other persons in want.

SOCIAL INSURANCE

5. The range of contingencies to be covered by compulsory social insurance should embrace all contingencies in which an insured person is prevented from earning his living, whether by inability to work or inability to obtain remunerative work, or in which he dies leaving a dependent family, and should include certain associated emergencies, generally experienced, which involved extraordinary strain on limited incomes, in so far as they are not otherwise covered.

6. Compensation should be provided in cases of incapacity for work and of death resulting from employment.

7. In order that the benefits provided by social insurance may be closely adapted to the variety of needs, the contingencies covered should be classified as follows:—

(*a*) sickness;
(*b*) maternity;
(*c*) invalidity;
(*d*) old age;
(*e*) death of breadwinner;
(*f*) unemployment;
(*g*) emergency expenses; and
(*h*) employment injuries.

Provided that benefits should not be payable at the same time for more than one of the following contingencies: invalidity, old age and unemployment.

8. Supplements for each of the first two children should be added to all benefits payable for loss of earnings, provision for further children being left to be made by means of children's allowances payable out of public funds or under contributory schemes.

9. The contingency for which sickness benefit should be paid is loss of earnings due to abstention from work necessitated on medical grounds by an acute condition, due to disease or injury, requiring medical treatment or supervision.

10. The contingency for which maternity benefit should be paid is loss of earnings due to abstention from work during prescribed periods before and after child-birth.

11. The contingency for which invalidity benefit should be paid is inability to engage in any substantially gainful work by reason of a chronic condition, due to disease or injury, or by reason of the loss of a member or function.

12. The contingency for which old-age benefit should be paid is the attainment of a prescribed age, which should be that at which persons commonly become incapable of efficient work, the incidence of sickness and invalidity becomes heavy, and unemployment, if present, is likely to be permanent.

13. The contingency for which survivors' benefits should be paid is the loss of support presumably suffered by the dependants as the result of the death of the head of the family.

14. The contingency for which unemployment benefit should be paid is loss of earnings due to the unemployment of an insured person who is ordinarily employed, capable of regular employment in some occupation, and seeking suitable employment, or due to part-time unemployment.

15. Benefits should be provided in respect of extraordinary expenses, not otherwise covered, incurred in cases of sickness, maternity, invalidity and death.

16. The contingency for which compensation for an employment injury should be paid is traumatic injury or disease resulting from employment and not brought about deliberately or by the serious and wilful misconduct of the victim, which results in temporary or permanent incapacity or death.

17. Social insurance should afford protection, in the contingencies to which they are exposed, to all employed and self-employed persons, together with their dependants, in respect of whom it is practicable:

(*a*) to collect contributions without incurring disproportionate administrative expenditure; and
(*b*) to pay benefits with the necessary cooperation of medical and employment services and with due precaution against abuse.

18. The employer should be made responsible for collecting contributions in respect of all persons employed by him, and should be entitled to deduct the sums due by them from their remuneration at the time when it is paid.

19. In order to facilitate the efficient administration of benefits, arrangements should be made for the keeping of records of contributions, for ready means of verifying the presence of the contingencies which give rise to benefits, and for a parallel organization of medical and employment services with preventive and remedial functions.

20. Persons employed for remuneration should be insured against the whole range of contingencies covered by social insurance as soon as the collection of contributions in respect of them can be organized and the necessary arrangements can be made for the administration of benefit.

21. Self-employed persons should be insured against the contingencies of invalidity, old age and death, under the same conditions as employed persons as soon as the collection of their contributions can be organized. Consideration should be given to the possibility of insuring them also against sickness and maternity necessitating hospitalization, sickness which has lasted for several months, and extraordinary

expenses incurred in cases of sickness, maternity, invalidity and death.

22. Benefits should replace lost earnings, with due regard to family responsibilities, up to as high a level as is practicable without impairing the will to resume work where resumption is a possibility, and without levying charges on the productive groups so heavy that output and employment are checked.

23. Benefits should be related to the previous earnings of the insured person on the basis of which he has contributed: Provided that any excess of earnings over those prevalent among skilled workers may be ignored for the purpose of determining the rate of benefits, or portions thereof, financed from sources other than the contributions of the insured person.

24. Benefits at flat rates may be appropriate for countries where adequate and economical facilities exist for the population to procure additional protection by voluntary insurance. Such benefits should be commensurate with the earnings of unskilled workers.

25. The right to benefits other than compensation for employment injuries should be subject to contribution conditions designed to prove that the normal status of the claimant is that of an employed or self-employed person and to maintain reasonable regularity in the payment of contributions: Provided that a person should not be disqualified for benefits by reason of the failure of his employer duly to collect the contributions payable in respect of him.

26. The cost of benefits, including the cost of administration, should be distributed among insured persons, employers and taxpayers in such a way as to be equitable to insured persons and to avoid hardship to insured persons of small means or any disturbance to production.

27. The administration of social insurance should be unified or co-ordinated within a general system of social security services, and contributors should, through their organizations, be represented on the bodies which determine or advise upon administrative policy and propose legislation or frame regulations.

SOCIAL ASSISTANCE

28. Society should normally co-operate with parents through general measures of assistance designed to secure the well-being of dependent children.

29. Invalids, aged persons and widows who are not receiving social insurance benefits because they or their husbands, as the case may be, were not compulsorily insured, and whose incomes do not exceed a prescribed level, should be entitled to special maintenance allowances at prescribed rates.

30. Appropriate allowances in cash or partly in cash and partly in kind should be provided for all persons who are in want and do not require internment for corrective care.

Annex

GUIDING PRINCIPLES ACCOMPANIED BY SUGGESTIONS FOR APPLICATION

(The paragraphs in bold type are the general guiding principles and the subparagraphs are the suggestions for application.)

GENERAL

1. Income security schemes should relieve want and prevent destitution by restoring, up to a reasonable level, income which is lost by reason of inability to work (including old age) or to obtain remunerative work or by reason of the death of a breadwinner.

2. Income security should be organized as far as possible on the basis of compulsory social insurance, whereby insured persons fulfilling prescribed qualifying conditions are entitled, in consideration of the contributions they have paid to an insurance institution, to benefits payable at rates, and in contingencies, defined by law.

3. Provision for needs not covered by compulsory social insurance should be made by social assistance; certain categories of persons, particularly dependent children and needy invalids, aged persons and widows, should be entitled to allowances at reasonable rates according to a prescribed scale.

4. Social assistance appropriate to the needs of the case should be provided for other persons in want.

I. SOCIAL INSURANCE

A. Contingencies Covered

Range of Contingencies to be Covered

5. The range of contingencies to be covered by compulsory social insurance should embrace all contingencies in which an insured person is prevented from earning his living, whether by inability to work or inability to obtain remunerative work, or in which he dies leaving a dependent family, and should include certain associated emergencies, generally experienced, which involve extraordinary strain on limited incomes, in so far as they are not otherwise covered.

6. Compensation should be provided in cases of incapacity for work and of death resulting from employment.

7. In order that the benefits provided by social insurance may be closely adapted to the variety of needs, the contingencies covered should be classified, as follows:

(a) sickness;
(b) maternity;
(c) invalidity;
(d) old age;
(e) death of breadwinner;
(f) unemployment;
(g) emergency expenses; and
(h) employment injuries.

Provided that benefits should not be payable at the same time for more than one of the following contingencies; invalidity, old age and unemployment.

8. Supplements for each of the first two children should be added to all benefits payable for loss of earnings, provision for further children being left to be made by means of children's allowances payable out of public funds or under contributory schemes.

Sickness

9. The contingency for which sickness benefit should be paid is loss of earnings due to abstention from work necessitated on medical grounds by an acute condition, due to disease or injury, requiring medical treatment or supervision.

(1) The necessity for abstention from work should be judged, as a rule, with reference to the previous occupation of the insured person, which he may be expected to resume.

(2) Benefit need not be paid for the first few days of a period of sickness, but if sickness recurs within a few months, a fresh waiting period should not be imposed.

(3) Benefit should preferably be continued until the beneficiary is fit to return to work, dies or becomes an invalid. If, however, it is considered necessary to limit the duration of benefit, the maximum period should not be less than 26 weeks for a single case, and provision should be made for extending the duration of benefit in the case of specified diseases, such as tuberculosis, which often involve lengthy, though curable, sickness; Provided that at the outset of the operation of an insurance scheme it may be necessary to provide for a shorter period than 26 weeks.

Maternity

10. The contingency for which maternity benefit should be paid is loss of earnings due to abstention from work during prescribed periods before and after childbirth.

(1) A woman should have the right to leave her work if she produces a medical certificate stating that her confinement will probably take place within six weeks, and no woman should be permitted to work during the six weeks following her confinement.

(2) During these periods maternity benefit should be payable.

(3) Absence from work for longer periods or on other occasions may be desirable on medical grounds, having regard to the physical condition of the beneficiary and the exigencies of her work; during any such periods sickness benefits should be payable.

(4) The payment of maternity benefit may be made conditional on the utilization by the beneficiary of health services provided for her and her child.

Invalidity

11. The contingency for which invalidity benefit should be paid is inability to engage in any substantially gainful work by reason of a chronic condition, due to disease or injury, or by reason of the loss of a member or function.

(1) A handicapped person should be expected to engage in any occupation which may reasonably be indicated for him, having regard for his remaining strength and ability, his previous experience, and any facilities for training available to him.

(2) A person for whom such an occupation can be indicated but is not yet available, and a person following a training course, should receive provisional invalidity benefit, training benefit or unemployment benefit, if he is otherwise qualified for it.

(3) A person for whom no such occupation can be indicated should receive invalidity benefit.

(4) Beneficiaries whose permanent inability to engage regularly in any gainful occupation has been confirmed should be allowed to supplement their invalidity benefit by casual earnings of small amount.

(5) Where the rate of invalidity benefit is related to the rate of the previous earnings of the insured person, the right to benefit should be admitted if the handicapped person is not able to earn by ordinary effort as much as one-third of the normal earnings in his previous occupation of able-bodied persons having the same training.

(6) Invalidity benefit should be paid, from the date when sickness benefit ceases, for the whole duration of invalidity, provided that when the beneficiary reaches the age at which old-age benefit may be claimed the latter may be substituted for invalidity benefit.

Old Age

12. The contingency for which old-age benefit should be paid is the attainment of a prescribed age, which should be that at which persons commonly become incapable of efficient work, the incidence of sickness and invalidity becomes heavy, and unemployment, if present, is likely to be permanent.

(1) The minimum age at which old-age benefit may be claimed should be fixed at not more than 65 in the case of men and 60 in the case of women: Provided that a lower age may be fixed for persons who have worked for many years in arduous or unhealthy occupations.

(2) Payment of old-age benefit may, if the basic benefit can be considered sufficient for subsistence, be made conditional on retirement from regular work in any gainful occupation; where such retirement is required, the receipt of casual earnings of relatively small amount should not disqualify for old-age benefit.

Death of Breadwinner

13. The contingency for which survivors' benefits should be paid is the loss of support presumably suffered by the dependents as the result of the death of the head of the family.

(1) Survivors' benefits should be paid: (*a*) to the widow of an insured man; (*b*) for the children, stepchildren, adopted children and, subject to their previous registration as dependents, illegitimate children of an insured man or of an insured woman who supported the children; and, (*c*) under conditions to be defined by national laws, to an unmarried woman with whom the deceased cohabited.

(2) Widow's benefit should be paid to a widow who has in her care a child for whom child's benefit is payable or who, at her husband's death or later, is an invalid or has attained the minimum age at which old-age benefit may be claimed; a widow who does not fulfill one of these conditions should be paid widow's benefit for a minimum period of several months, and thereafter if she is unemployed until suitable employment can be offered to her, after training if necessary.

(3) Child's benefit should be paid for a child who is under the school-leaving age, or who is under the age of 18 and is continuing his general or vocational education.

Unemployment

14. The contingency for which unemployment benefit should be paid is loss of earnings due to the unemployment of an insured person who is ordinarily employed, capable of regular employment in some occupation, and seeking suitable employment, or due to part-time unemployment.

(1) Benefit need not be paid for the first few days of a period of unemployment reckoned from the date on which the claim is registered, but if unemployment recurs

within a few months, a fresh waiting period should not be imposed.

(2) Benefit should continue to be paid until suitable employment is offered to the insured person.

(3) During an initial period reasonable in the circumstances of the case, only the following should be deemed to be suitable employment:

(*a*) employment in the usual occupation of the insured person in a place not involving a change of residence and at the current rate of wages, as fixed by collective agreements where applicable; or

(*b*) another employment acceptable to the insured person.

(4) After the expiration of the initial period,

(*a*) employment involving a change of occupation may be deemed to be suitable if the employment offered is one which may reasonably be offered to the insured person, having regard to his strength, ability, previous experience and any facilities for training available to him;

(*b*) employment involving a change of residence may be deemed to be suitable if suitable accommodation is available in the new place of residence;

(*c*) employment under conditions less favourable than the insured person habitually obtained in his usual occupation and district may be deemed to be suitable if the conditions offered conform to the standard generally observed in the occupation and district in which the employment is offered.

Emergency Expenses

15. Benefits should be provided in respect of extraordinary expenses, not otherwise covered, incurred in cases of sickness, maternity, invalidity and death.

(1) Necessary domestic help should be provided, or benefit paid for hiring it, during the hospitalization of the mother of dependent children, if she is an insured woman or the wife of an insured man and is not receiving any benefit in lieu of earnings.

(2) A lump sum should be paid at childbirth to insured women and the wives of insured men towards the cost of a layette and similar expenses.

(3) A special supplement should be paid to recipients of invalidity or old-age benefit who need constant attendance.

(4) A lump sum should be paid on the death of an insured person, or of the wife, husband or dependent child of an insured person, towards the cost of burial.

Employment Injuries

16. The contingency for which compensation for an employment injury should be paid is traumatic injury or disease resulting from employment and not brought about deliberately or by the serious and wilful misconduct of the victim which results in temporary or permanent incapacity or death.

(1) Injuries resulting from employment should be deemed to include accidents occurring on the way to or from the place of employment.

(2) Where compensation for an employment injury is payable, the foregoing provisions should be subject to appropriate modifications as indicated in the following paragraphs.

(3) Any disease which occurs frequently only to persons employed in certain occupations or is a poisoning caused by a substance used in certain occupations, should, if the person suffering from such a disease was engaged in such an occupation, be presumed to be of occupational origin and give rise to compensation.

(4) A list of diseases presumed to be of occupational origin should be established and should be revised from time to time by a simple procedure.

(5) In fixing any minimum period of employment in the occupation required to establish the presumption of occupational origin and any maximum period during which the presumption of occupational origin will remain valid after leaving the employment, regard should be had to the length of time required for the contraction and manifestation of the disease.

(6) Temporary incapacity compensation should be payable under conditions similar to those applicable to the payment of sickness benefit.

(7) Consideration should be given to the possibility of paying compensation from the first day of temporary incapacity if the incapacity lasts longer than the waiting period.

(8) Permanent incapacity compensation should be payable in respect of the loss or reduction of earning capacity by reason of the loss of a member or function or by reason of a chronic condition due to injury or disease.

(9) A person who becomes permanently incapacitated should be expected to resume employment in any occupation which may reasonably be indicated for him, having regard to his remaining strength and ability, his previous experience, and any facilities for training available to him.

(10) If no such employment can be offered, the person should receive compensation for total incapacity on a definitive or provisional basis.

(11) If such employment can be offered, but the sum which the person is able to earn by ordinary effort in the employment is significantly less than that which he would probably have earned had he not suffered the injury or disease, he should receive compensation for partial incapacity proportionate to the difference in earning capacity.

(12) Consideration should be given to the possibility of paying suitable compensation in every case of loss of a member or function or disfigurement, even where no reduction of capacity can be proved.

(13) Persons exposed to the risk of an occupational disease of gradual development should be examined periodically, and those for whom a change of occupation is indicated, should be eligible for compensation.

(14) Compensation for permanent incapacity, total or partial, should be paid from the time when temporary incapacity compensation ceases for the whole duration of permanent incapacity.

(15) Persons receiving compensation for permanent partial incapacity should be able to qualify for other benefits under the same conditions as able-bodied persons, where the rates of such benefits are related to the previous earnings of the insured person.

(16) Where the rates of such benefits are not related to the previous earnings of the

insured person, a maximum may be fixed for the combined rate of compensation and other benefit.

(17) Survivors' compensation should, subject to the provisions of the following sub-paragraphs, be paid to the same dependants as could otherwise qualify for survivors' benefits.

(18) A widow should receive compensation for the whole duration of her widowhood.

(19) A child should receive compensation until the age of 18, or 21 if he is continuing his general or vocational education.

(20) Provision should be made for compensating other members of the family of the deceased who were dependent upon him, without prejudice to the claims of the widow and children.

(21) The survivors of a person permanently incapacitated in the degree of two-thirds or more who dies otherwise than from the effects of an employment injury should be entitled to basic survivors' benefits, whether or not the deceased fulfilled the contribution conditions for such benefit at the time of his death.

B. Persons Covered

Range of Persons to Be Covered

17. Social insurance should afford protection, in the contingencies to which they are exposed, to all employed and self-employed persons, together with their dependants, in respect of whom it is practicable:

(a) to collect contributions without incurring disproportionate administrative expenditure; and

(b) to pay benefits with the necessary co-operation of medical and employment services and with due precautions against abuse.

(1) Dependent wives (that is to say, wives who are not employed or self-employed) and dependent children (that is to say, persons who are under the school-leaving age, or who are under the age of 18 and are continuing their general or vocational education) should be protected in virtue of the insurance of their bread-winners.

Collection of Contributions

18. The employer should be made responsible for collecting contributions in respect of all persons employed by him, and should be entitled to deduct the sums due by them from their remuneration at the time when it is paid.

(1) Where membership of an occupational association or the possession of a licence is compulsory for any class of self-employed persons, the association or the licensing authority may be made responsible for collecting contributions from the persons concerned.

(2) The national or local authority may be made responsible for collecting contributions from self-employed persons registered for the purpose of taxation.

(3) Pending the development of agencies to enforce payment of contributions, provision should be made for enabling self-employed persons to contribute voluntarily, either as individuals or as members of associations.

Administration of Benefits

19. In order to facilitate the efficient administration of benefits, arrangements should be made for the keeping of records of contributions, for ready means of verifying the presence of the contingencies which give rise to benefits, and for a parallel organization of medical and employment services with preventive and remedial functions.

Employed Persons

20. Persons employed for remuneration should be insured against the whole range of contingencies covered by social insurance as soon as the collection of contributions in respect for them can be organized and the necessary arrangements can be made for the administration of benefit.

(1) Persons whose employment is so irregular or likely to be so short in its total duration, that they are unlikely to qualify for benefit confined to employed persons, may be excluded from insurance for such benefits. Special provision should be made on behalf of persons who ordinarily work for a very short period for the same employer.

(2) Apprentices who receive no remuneration should be insured against employment injuries, and, as from the date at which they would have completed their apprenticeship for their trade, compensation based on the wages current for workers in that trade should become payable.

Self-Employed Persons

21. Self-employed persons should be insured against the contingencies of invalidity, old age and death under the same conditions as employed persons as soon as the collection of their contributions can be organized. Consideration should be given to the possibility of insuring them also against sickness and maternity necessitating hospitalization, sickness which has lasted for several months, and extraordinary expenses incurred in cases of sickness, maternity, invalidity and death.

(1) Members of the employer's family living in his house, other than his dependent wife or dependent children, should be insured against the said contingencies on the basis of either their actual wages or if these cannot be ascertained the market value of their services; the employer should be responsible for the payment of contributions in respect of such persons.

(2) Self-employed persons whose earnings are ordinarily so low that they can be presumed to be a merely subsidiary or casual source of income or that payment of the minimum contribution would be a hardship for them should be excluded provisionally from insurance and referred for counsel to the employment service or to any special service that may exist for promoting the welfare of the occupational group to which they may belong.

(3) Persons who after completing the contribution period prescribed as a qualification for invalidity and survivors' benefits cease to be compulsorily insured either as employed or as self-employed persons should be given the option to be exercised within a limited period of continuing their insurance under the same conditions as self-employed persons subject to such modifications as may be prescribed.

C. Benefit Rates and Contribution Conditions

Benefit Rates

22. Benefits should replace lost earnings, with due regard to family responsibilities, up

to as high a level as is practicable without impairing the will to resume work where resumption is a possibility, and without levying charges on the productive groups so heavy that output and unemployment are checked.

23. Benefits should be related to the previous earnings of the insured person on the basis of which he has contributed: Provided that any excess of earnings over those prevalent among skilled workers may be ignored for the purpose of determining the rate of benefits, or portions thereof, financed from sources other than the contributions of the insured person.

24. Benefits at flat rates may be appropriate for countries where adequate and economical facilities exist for the population to procure additional protection by voluntary insurance. Such benefits should be commensurate with the earnings of unskilled workers.

(1) Sickness and unemployment benefits should, in the case of unskilled workers, be not less than 40 per cent of the previous net earnings of the insured person if he has no dependants, or 60 per cent thereof if he has a dependent wife or housekeeper for his children; for each of not more than two dependent children, an additional 10 per cent of such earnings, less the amount of any children's allowances for these children, should be payable.

(2) In the case of workers with high earnings, the foregoing proportions of benefit to previous earnings may be somewhat reduced.

(3) Maternity benefit should in all cases be sufficient for the full and healthy maintenance of the mother and her child; it should be not less than 100 per cent of the current net wage for female unskilled workers or 75 per cent of the previous net earnings of the beneficiary, whichever is the greater, but may be reduced by the amount of any child's allowance payable in respect of the child.

(4) Basic invalidity and old-age benefits should be not less than 30 per cent of the current wage commonly recognized for male unskilled workers in the district in which the beneficiary resides, if the beneficiary has no dependants, or 45 per cent thereof if he has a dependent wife who would be qualified for widow's benefit or a housekeeper for his children; for each of not more than two dependent children, an additional 10 per cent of such wage, less the amount of any children's allowances for these children, should be payable.

(5) Basic widow's benefit should be not less than 30 per cent of the current minimum wage commonly recognized for male unskilled workers in the district in which the beneficiary resides; for each of not more than three dependent children, child's benefit at the rate of 10 per cent of such wage, less the amount of any children's allowances for these children, should be payable.

(6) In the case of an orphan, basic child's benefit should be not less than 20 per cent of the current minimum wage commonly recognized for male unskilled workers, less the amount of any child's allowance payable in respect of the orphan.

(7) A portion of every contribution additional to those paid as a qualification for basic invalidity, old-age and survivors' benefits may be credited to the insured person for the purpose of increasing the benefits provided for in sub-paragraphs (4), (5) and (6).

(8) In every case in which retirement is deferred beyond the minimum age at which old-age benefit could have been claimed, basic old-age benefit should be equitably increased.

(9) Compensation for employment injuries should not be less than two-thirds of the wages lost, or estimated to have been lost, as the result of the injury.

(10) Such compensation should take the form of periodical payments, except in cases in which the competent authority is satisfied that the payment of a lump sum will be more advantageous to the beneficiary.

(11) Periodical payments in respect of permanent incapacity and death should be adjusted currently to significant changes in the wage level in the insured person's previous occupation.

Contribution Conditions

25. The right to benefits other than compensation for employment injuries should be subject to contribution conditions designed to prove that the normal status of the claimant is that of an employed or self-employed person and to maintain reasonable regularity in the payment of contributions: Provided that a person shall not be disqualified for benefits by reason of the failure of his employer duly to collect the contributions payable in respect of him.

(1) The contribution conditions for sickness, maternity and unemployment benefits may include the requirement that contributions shall have been paid in respect of at least a quarter of a prescribed period, such as two years, completed before the contingency occurs.

(2) The contribution conditions for maternity benefit may include the requirement that the first contribution shall have been paid at least ten months before the expected date of confinement, but even though the contribution conditions are not fulfilled, maternity benefit at the minimum rate should be paid during the period of compulsory abstention from work after confinement, if the claimant's normal status appears, after consideration of the case, to be that of an employed person.

(3) The contribution conditions for basic invalidity, old-age and survivors' benefits may include the requirement that contributions shall have been paid in respect of at least two-fifths of a prescribed period, such as five years, completed before the contingency occurs; payment of contributions in respect of not less than three-quarters of a prescribed period, such as ten years, or of any longer period which has elapsed since entry into insurance, should be recognized as an alternative qualification for benefit.

(4) The contribution conditions for old-age benefit may include the requirement that the first contribution shall have been paid at least five years before the claim for benefit is made.

(5) The right to benefit may be suspended where an insured person wilfully fails to pay any contribution due by him in respect of any period of self-employment or to pay any penalty imposed for late payment of contributions.

(6) The insurance status of an insured person at the date when he becomes entitled to invalidity or old-age benefit should be maintained during the currency of such benefit for the purposes of ensuring him, in the event of recovery from invalidity, as full protection under the scheme as he was entitled to on the occurrence of the invalidity, and of entitling his survivors to survivors' benefits.

D. Distribution of Cost

26. The cost of benefits, including the cost of administration, should be distributed among insured persons, employers and taxpayers, in such a way as to be equitable to insured persons and to avoid hardship to insured persons of small means or any disturbance to production.

(1) The contribution of an insured person should not exceed such proportion of his earnings taken into account for reckoning benefits as, applied to the estimated average earnings of all persons insured against the same contingencies, would yield a contribution income the probable present value of which would equal the probable present value of the benefits to which they may become entitled (excluding compensation for employment in injuries).

(2) In accordance with this principle the contributions of employed persons and self-employed persons for the same benefits may, as a rule, represent the same proportion of their respective earnings.

(3) A minimum absolute rate, based on the minimum rate of earnings which may be deemed to be indicative of substantial gainful work, may be prescribed for the insured person's contribution with respect to benefits the whole or part of which does not vary with the rate of previous earnings.

(4) Employers should be required to contribute, particularly by subsidizing the insurance of low-wage earners, not less than half the total cost of benefits confined to employed persons, excluding compensation for employment injuries.

(5) The entire cost of compensation for employment injuries should be contributed by employers.

(6) Consideration should be given to the possibility of applying some method of merit rating in the calculation of contributions in respect of compensation for employment injuries.

(7) The rates of contribution of insured persons and employers should be kept as stable as possible, and for this purpose a stabilization fund should be constituted.

(8) The cost of benefits which cannot properly be met by contributions should be covered by the community.

(9) Among the elements of cost which may be charged to the community may be mentioned:

(*a*) the contribution deficit resulting from bringing persons into insurance when already elderly;

(*b*) the contingent liability involved in guaranteeing the payment of basic invalidity, old-age and survivors' benefits and the payment of adequate maternity benefit;

(*c*) the liability resulting from the continued payment of unemployment benefit when unemployment persists at an excessive level; and

(*d*) subsidies to the insurance of self-employed persons of small means.

E. Administration

27. The administration of social insurance should be unified or co-ordinated within a general system of social security services, and contributors should, through their organizations, be represented on the bodies which determine or advise upon administrative policy and propose legislation or frame regulations.

(1) Social insurance should be administered under the direction of a single authority, subject, in federal countries, to the distribution of legislative competence; this authority should be associated with the authorities administering social assistance, medical care services and employment services in a co-ordinating body for matters of common interest, such as the certification of inability to work or to obtain work.

(2) The unified administration of social insurance should be compatible with the operation of separate insurance schemes, compulsory or voluntary in character, providing supplementary, but not alternative, benefits for certain occupational groups, such as miners and seamen, public officials, the staffs of individual undertakings and members of mutual benefit societies.

(3) The law and regulations relating to social insurance should be drafted in such a way that beneficiaries and contributors can easily understand their rights and duties.

(4) In devising procedures to be followed by beneficiaries and contributors, simplicity should be a primary consideration.

(5) Central and regional advisory councils, representing such bodies as trade unions, employers' associations, chambers of commerce, farmers' associations, women's associations and child protection societies, should be established for the purpose of making recommendations for the amendment of the law and administrative methods, and generally of maintaining contact between the administration of social insurance and groups of contributors and beneficiaries.

(6) Employers and workers should be closely associated with the administration of compensation for employment injuries, particularly in connection with the prevention of accidents and occupational diseases and with merit rating.

(7) Claimants should have a right of appeal in case of dispute with the administrative authority concerning such questions as the right to benefit and the rate thereof.

(8) Appeals should preferably be referred to special tribunals, which should include referees who are experts in social insurance law, assisted by assessors, representative of the group to which the claimant belongs, and, where employed persons are concerned, by representatives of employers also.

(9) In any dispute concerning liability to insurance or the rate of contribution, for an employed or self-employed person, and where an employer's contribution is in question, an employer should have a right of appeal.

(10) Provision for uniformity of interpretation should be assured by a superior appeal tribunal.

II. SOCIAL ASSISTANCE

A. Maintenance of Children

28. Society should normally co-operate with parents through general measures of assistance designed to secure the well-being of dependent children.

(1) Public subsidies in kind or in cash or in both should be established in order to assure the healthy nurture of children, help to maintain large families, and complete the provision made for children through social insurance.

(2) Where the purpose in view is to assure the healthy nurture of children, subsidies should take the form of such advantages as free or below-cost infants' food and school meals and below-cost dwellings for families with several children.

(3) Where the purpose in view is to help to maintain large families or to complete the provision made for children by subsidies in kind and through social insurance, subsidies should take the form of children's allowances.

(4) Such allowances should be payable, irrespective of the parents' income, according to a prescribed scale, which should represent a substantial contribution to the cost of maintaining a child, should allow for the higher cost of maintaining older children, and should, as a minimum, be granted to all children for whom no provision is made through social insurance.

(5) Society as a whole should accept responsibility for the maintenance of dependent children in so far as parental responsibility for maintaining them cannot be enforced.

B. Maintenance of Needy Invalids, Aged Persons and Widows

29. Invalids, aged persons and widows who are not receiving social insurance benefits because they or their husbands, as the case may be, were not compulsorily insured, and whose incomes do not exceed a prescribed level, should be entitled to special maintenance allowances at prescribed rates.

(1) The persons who should be entitled to maintenance allowances should include:

(*a*) persons belonging to occupational groups or residing in districts to which social insurance does not yet apply, or has not yet applied for as long as the qualifying period for basic invalidity, old age or survivors' benefits, as the case may be, and the widows and dependent children of such person; and

(*b*) persons who are already invalids at the time when they would normally enter insurance.

(2) Maintenance allowances should be sufficient for full, long-term maintenance; they should vary with the current cost of living, and may vary as between urban and rural areas.

(3) Maintenance allowances should be paid at the full rate to persons whose other income does not exceed a prescribed level and at reduced rates in other cases.

(4) The provisions of the present Recommendation defining the contingencies in which invalidity, old-age and survivors' benefits should be paid should be applied, in so far as they are relevant, to maintenance allowances.

C. General Assistance

30. Appropriate allowances in cash or partly in cash and partly in kind should be provided for all persons who are in want and do not require internment for corrective care.

(1) The range of cases in which the amount of the allowance is entirely discretionary should be gradually narrowed as the result of the improved classification of cases of want, and the establishment of budgets corresponding to the cost of maintenance in short-term and long-term indigency.

(2) The grant of allowance may be subject to compliance by the recipient with directions given by the authorities administering medical or employment services in order that the assistance may yield its greatest constructive effect.

ANNEX 21—Social Security (Armed Forces) Recommendation, 1944

The General Conference of the International Labour Organization,

Having been convened at Philadelphia by the Governing Body of the International Labour Office, and having met in its Twenty-sixth Session on 20th April, 1944, and

Having decided upon the adoption of certain proposals with regard to income security and medical care for persons discharged from the armed forces and assimilated services and from war employment, which is included in the third item on the Agenda of the Session, and

Having determined that these proposals shall take the form of a Recommendation,

adopts, this twelfth day of May, of the year one thousand nine hundred and forty-four, the following Recommendation which may be cited as the Social Security (Armed Forces) Recommendation, 1944:

Whereas persons discharged from the armed forces and assimilated services have been obliged to interrupt their careers and will be faced with initial expenditure in re-establishing themselves in civil life; and

Whereas persons discharged from the armed forces or assimilated services or from war employment may in certain cases remain unemployed for a time before obtaining suitable employment; and

Whereas it is undesirable that persons discharged from the armed forces and assimilated services should find themselves at a disadvantage in respect of pension insurance as compared with persons who have remained in civil employment, and the Invalidity, Old-Age and Survivors' Insurance Recommendation, 1933, while providing for the maintenance of the rights under pension insurance schemes of persons engaged in military service who were insured before beginning such service, does not provide for the attribution of any rights under such schemes to persons not insured before entering military service; and

Whereas it is desirable that persons discharged from the armed forces and assimilated services should be protected by insurance in respect of sickness occurring between their discharge and their re-establishment in civil life by entry into insurable employment or otherwise; and

Whereas it is necessary to make equitable provision in regard to these matters, without prejudice to the satisfaction of other essential needs, such as those of military and civilian war victims, which must also be a charge on the national income:

The Conference recommends the Members of the Organization to apply the following principles and to communicate information to the International Labour Office, as requested by the Governing Body, concerning the measures taken to give effect to these principles:

I. Mustering-out Grant

1. Persons discharged from the armed forces and assimilated services should, except in cases in which they have, in virtue of national laws or regulations, continued to receive a substantial part of their remuneration, receive on their discharge a special grant, which may be related

to their length of service and should be paid in the form of a lump sum, in the form of periodical payments, or partly in the form of a lump sum and partly in the form of periodical payments.

II. Unemployment Insurance and Assistance

2. Persons discharged from the armed forces and assimilated services should, so far as is administratively practicable, be treated under unemployment insurance schemes as insured contributors in respect of whom contributions have been paid for a period equal to their period of service. The resulting financial liability should be borne by the State.

3. Where persons discharged from the armed forces and assimilated services or from war employment, as defined by national laws or regulations, exhaust their right to benefit before suitable employment is offered to them, or are not covered by an unemployment insurance scheme, an allowance financed wholly from State funds should be paid until suitable employment is available; the allowance should, if possible, be paid irrespective of need.

III. Pension and Sickness Insurance

4. (1) Where a compulsory insurance scheme providing pensions in case of invalidity, old age or death and covering a substantial part of the working population is in force, periods of service in the armed forces and assimilated services should be reckoned as contribution periods for the purpose of determining whether any requirement in regard to a minimum qualifying period has been fulfilled.

(2) Where the rate of pension varies with the number of contributions credited to the insured person, the period of service should be taken into account for the purpose of increasing the rate of pension.

(3) Where contributions are graduated according to remuneration, contributions should be credited in respect of periods of service on the basis of a uniform hypothetical remuneration of reasonable amount: Provided that contributions credited to persons insured immediately before beginning their service may be based on the remuneration which they were receiving at the time if such remuneration was higher than the hypothetical remuneration.

(4) Persons discharged from the armed forces and assimilated services should retain, during the period between their discharge and the time at which they can be considered to be re-established in civil life, their rights in respect of the contributions credited to their account; these rights should be maintained for a period of not less than twelve months.

5. (1) Where a compulsory insurance scheme providing sickness, maternity and medical benefits and covering a substantial part of the working population is in force, persons discharged from the armed forces and assimilated services should be entitled to such benefits in respect of sickness or childbirth occurring during the period betwen their discharge and the time at which they can be considered to be re-established in civil life; these rights should be maintained for a period of not less than twelve months.

(2) Where the compulsory insurance scheme provides maternity and medical benefits for the dependents of insured persons, discharged persons protected by the scheme should be entitled to such benefits for their dependents.

(3) Where the rate of sickness benefits is proportional to the remuneration of the insured person, the rate of benefit payable to discharged persons should be based on a uniform hypothetical remuneration of reasonable amount.

6. (1) The State should bear the liability created by crediting persons serving in the armed forces or assimilated services with pension insurance contributions and insuring them against sickness pending their re-establishment in civil life: Provided that, where the pay of any class of such persons may, having regard to the value of their subsistence and of dependents' allowances, be considered at least equivalent on the whole to the wages prevailing in industry, a portion of the pension insurance contribution may be deducted from their service pay.

(2) The provisions of sub-paragraph (1) shall not apply in cases where, in virtue of national laws or regulations, such persons continue to receive, during their service, a substantial part of their remuneration, and the normal contributions required by law continue to be payable in respect of them.

ANNEX 22—Medical Care Recommendation, 1944

The General Conference of the International Labour Organization,

Having been convened at Philadelphia by the Governing Body of the International Labour Office, and having met in its Twenty-sixth Session on 20 April, 1944, and

Having decided upon the adoption of certain proposals with regard to the question of medical care services which is included in the fourth Item on the Agenda of the Session, and

Having determined that these proposals shall take the form of a Recommendation,

adopts, this twelfth day of May of the year one thousand nine hundred and forty-four, the following Recommendation which may be cited as the Medical Care Recommendation, 1944:

Whereas the Atlantic Charter contemplates "the fullest collaboration between all nations in the economic field with the object of securing for all improved labour standards, economic advancement and social security"; and

Whereas the Conference of the International Labour Organization, by a resolution adopted on 5 November, 1941, endorsed this principle of the Atlantic Charter and pledged the full co-operation of the International Labour Organization in its implementation; and

Whereas the availability of adequate medical care is an essential element in social security; and

Whereas the International Labour Organization has promoted the development of medical care services—

by the inclusion of requirements relating to medical care in the Workmen's Compensation (Accidents) Convention, 1925, and the Sickness Insurance (Industry, etc.) and (Agriculture) Conventions, 1927,

by the communication to the Members of the Organization by the Governing Body of the conclusions of meetings of experts relating to public health and health insurance in periods of economic depression, the economical

administration of medical and pharmaceutical benefits under sickness insurance schemes, and guiding principles for curative and preventive action by invalidity, old-age and widows' and orphans' insurance,

by the adoption by the First and Second Labour Conferences of American States of the resolutions constituting the Inter-American Social Insurance Code, by the participation of a delegation of the Governing Body in the First Inter-American Conference on Social Security which adopted the Declaration of Santiago de Chile, and by the approval by the Governing Body of the Statute of the Inter-American Conference on Social Security, established as a permanent agency of co-operation between social security administrations and institutions acting in concert with the International Labour Office, and

by the participation of the International Labour Office in an advisory capacity in the framing of social insurance schemes in a number of countries and by other measures; and

Whereas some Members have not taken such steps as are within their competence to improve the health of the people by the extension of medical facilities, the development of public health programs, the spread of health education, and the improvement of nutrition and housing, although their need in that respect is greatest, and it is highly desirable that such Members take all steps as soon as possible to reach the international minimum standards and to develop these standards; and

Whereas it is now desirable to take further steps for the improvement and unification of medical care services, the extension of such services to all workers and their families, including rural populations and the self-employed, and the elimination of inequitable anomalies, without prejudice to the right of any beneficiary of the medical care service who so desires to arrange privately at his own expense for medical care; and

Whereas the formulation of certain general principles which should be followed by Members of the Organization in developing their medical care services along these lines will contribute to this end:

The Conference recommends the Members of the Organization to apply the following principles, as rapidly as national conditions allow, in developing their medical care services with a view to the implementation of the fifth principle of the Atlantic Charter, and to report to the International Labour Office, as requested by the Governing Body, concerning the measures taken to give effect to these principles.

I. General

Essential Features of a Medical Care Service

1. A medical care service should meet the need of the individual for care by members of the medical and allied professions and for such other facilities as are provided at medical institutions:

(*a*) with a view to restoring the individual's health, preventing the further development of disease and alleviating suffering, when he is afflicted by ill health (curative care); and

(*b*) with a view to protecting and improving his health (preventive care).

2. The nature and extent of the care provided by the service should be defined by law.

3. The authorities or bodies responsible for the administration of the service should provide medical care for its beneficiaries by securing the services of members of the medical and allied professions and by arranging for hospital and other institutional services.

4. The cost of the service should be met collectively by regular periodical payments which may take the form of social insurance contributions or of taxes, or of both.

Forms of Medical Care Service

5. Medical care should be provided either through a social insurance medical care service with supplementary provision by way of social assistance to meet the requirements of needy persons not yet covered by social insurance, or through a public medical care service.

6. Where medical care is provided through a social insurance medical care service:

(*a*) every insured contributor, the dependent wife or husband and dependent children of every such contributor, such other dependents as may be prescribed by national laws or regulations, and every other person insured by virtue of contributions paid on his behalf, should be entitled to all care provided by the service;

(*b*) care for persons not yet insured should be provided by way of social assistance if they are unable to obtain it at their own expense; and

(*c*) the service should be financed by contributions from insured persons, from their employers, and by subsidies from public funds.

7. Where medical care is provided through a public medical care service:

(*a*) every member of the community should be entitled to all care provided by the service;

(*b*) the service should be financed out of funds raised either by a progressive tax specifically imposed for the purpose of financing the medical care service or of financing all health services, or from general revenue.

II. Persons Covered

Complete Coverage

8. The medical care service should cover all members of the community, whether or not they are gainfully occupied.

9. Where the service is limited to a section of the population or to a specified area, or where the contributory mechanism already exists for other branches of social insurance and it is possible ultimately to bring under the insurance scheme the whole or the majority of the population, social insurance may be appropriate.

10. Where the whole of the population is to be covered by the service and it is desired to integrate medical care with general health services, a public service may be appropriate.

Coverage Through a Social Insurance Medical Care Service

11. Where medical care is provided through a social insurance medical care service, all members of the community should have the right to care as insured persons or, pending their inclusion in the scope of insurance, should

have the right to receive care at the expense of the competent authority when unable to provide it for themselves.

12. All adult members of the community (that is to say, all persons other than children as defined in paragraph 15) should be required to pay insurance contributions if their income is not below the subsistence level. The dependent wife or husband of a contributor should be insured in virtue of the contribution of her or his breadwinner, without any addition on that account.

13. Other adults who prove that their income is below the subsistence level, including indigents, should be entitled to care as insured persons, the contribution being paid on their behalf by the competent authority. Rules defining the subsistence level in each country should be laid down by the competent authority.

14. If and so long as adults unable to pay a contribution are not insured as provided for in paragraph 13, they should receive care at the expense of the competent authority.

15. All children (that is to say, all persons who are under the age of 16 years, or such higher age as may be prescribed, or who are dependent on others for regular support while continuing their general or vocational education) should be insured in virtue of the contributions paid by or on behalf of adult insured persons in general, and no additional contribution should be payable on their behalf by their parents or guardians.

16. If and so long as children are not insured as provided for in paragraph 15, because the service does not yet extend to the whole population, they should be insured in virtue of the contribution paid by or on behalf of their father or mother without any additional contribution being payable on their behalf. Children for whom medical care is not so provided should, in case of need, receive it at the expense of the competent authority.

17. Where any person is insured under a scheme of social insurance for cash benefits or is receiving benefit under such a scheme, he and his qualified dependents as defined in paragraph 6, should also be insured under the medical care service.

Coverage Through a Public Medical Care Service

18. Where medical care is provided through a public medical care service, the provision of care should not depend on any qualifying conditions, such as payment of taxes or compliance with a means test and all beneficiaries should have an equal right to the care provided.

III. The Provision of Medical Care and Its Co-ordination With General Health Services

Range of Service

19. Complete preventive and curative care should be constantly available, rationally organized and, so far as possible, co-ordinated with general health services.

Constant Availability of Complete Care

20. Complete preventive and curative care should be available at any time and place to all members of the community covered by the service, on the same conditions, without any hindrance or barrier of an administrative, financial or political nature, or otherwise unrelated to their health.

21. The care afforded should comprise both general-practitioner and specialist out- and in-patient care, including domiciliary visiting; dental care; nursing care at home or in hospital or other medical institutions; the care given by qualified midwives and other maternity services at home or in hospital; maintenance in hospitals, convalescent homes, sanatoria or other medical institutions; so far as possible, the requisite dental, pharmaceutical and other medical or surgical supplies, including artificial limbs; and the care furnished by such other professions as may at any time be legally recognized as belonging to the allied professions.

22. All care and supplies should be available at any time and without time limit, when and as long as they are needed, subject only to the doctor's judgment and to such reasonable limitations as may be imposed by the technical organization of the service.

23. Beneficiaries should be able to obtain care at the centres or offices provided, wherever they happen to be when the need arises, whether at their place of residence or elsewhere within the total area in which the service is available, irrespective of their membership in any particular insurance institution, arrears in contributions or of other factors unrelated to health.

24. The administration of the medical care service should be unified for appropriate health areas sufficiently large for a self-contained and well-balanced service, and should be centrally supervised.

25. Where the medical care service covers only a section of the population or is at present administered by different types of insurance institutions and authorities, the institutions and authorities concerned should provide care for their beneficiaries by securing collectively the services of members of the medical and allied professions, and by the joint establishment or maintenance of health centres and other medical institutions, pending the regional and national unification of the services.

26. Arrangements should be made by the administration of the service for securing adequate hospital and other residential accommodation and care, either by contracts with existing public and approved private institutions, or by the establishment and maintenance of appropriate institutions.

Rational Organization of Medical Care Service

27. The optimum of medical care should be made readily available through an organization that ensures the greatest possible economy and efficiency by the pooling of knowledge, staff, equipment and other resources and by close contact and collaboration among all participating members of the medical and allied professions and agencies.

28. The wholehearted participation of the greatest possible number of members of the medical and allied professions is essential for the success of any national medical care service. The numbers of general practitioners, specialists, dentists, nurses and members of other professions within the service should be adapted to the distribution and the needs of the beneficiaries.

29. Complete diagnostic and treatment facilities, including laboratory and X-ray services, should be available to the general practitioner, and all specialist advice and care, as well as nursing, maternity, pharmaceutical and other auxiliary services and residential accommoda-

tion, should be at the disposal of the general practitioner for the use of his patients.

30. Complete and up-to-date technical equipment for all branches of specialist treatment, including dental care, should be available, and specialists should have at their disposal all necessary hospital and research facilities, and auxiliary out-patient services such as nursing, through the agency of the general practitioner.

31. To achieve these aims, care should preferably be furnished by group practice at centres of various kinds working in effective relation with hospitals.

32. Pending the establishment of, and experiments with, group practice at medical or health centres, it would be appropriate to obtain care for beneficiaries from members of the medical and allied professions practising at their own offices.

33. Where the medical care service covers the majority of the population, medical or health centres may appropriately be built, equipped and operated by the authority administering the service in the health area, in one of the forms indicated in paragraphs 34, 35 and 36.

34. Where no adequate facilities exist or where a system of hospitals with out-patient departments for general-practitioner and specialist treatment already obtains in the health area at the time when the medical care service is introduced, hospitals may appropriately be established as, or developed into, centres providing all kinds of in- and out-patient care and complemented by local outposts for general-practitioner care and for auxiliary services.

35. Where general practice is well developed outside the hospital system while specialists are mainly consultants and working at hospitals, it may be appropriate to establish medical or health centres for non-residential general-practitioner care and auxiliary services, and to centralize specialist in-patient and out-patient care at hospitals.

36. Where general and specialist practice are well developed outside the hospital system, it may be appropriate to establish medical or health centres for all non-residential treatment, general-practitioner and specialist, and all auxiliary services, while cases needing residential care are directed from the centres to the hospitals.

37. Where the medical care service does not cover the majority of the population but has a substantial number of beneficiaries, and existing hospital and other medical facilities are inadequate, the insurance institution, or insurance institutions jointly, should establish a system of medical or health centres which affords all care, including hospital accommodation at the main centres, and, so far as possible, transport arrangements; such centres may be required more particularly in sparsely settled areas with a scattered insured population.

38. Where the medical care service covers too small a section for complete health centres to be an economical means of serving its beneficiaries, and existing facilities for specialist treatment in the area are inadequate, it may be appropriate for the insurance institution, or the institutions jointly, to maintain posts at which specialists attend beneficiaries as required.

39. Where the medical care service covers a relatively small section of the population concentrated in an area with extensive private practice, it may be appropriate for the members of the medical and allied professions participating in the service to collaborate at centres rented, equipped and administered by the members, at which both beneficiaries of the service and private patients receive care.

40. Where the medical care service covers only a small number of beneficiaries who are scattered over a populated area with adequate existing facilities, and voluntary group practice as provided for in paragraph 39 is not feasible, beneficiaries may appropriately receive care from members of the medical and allied professions practising at their own offices, and at public and approved private hospitals and other medical institutions.

41. Travelling clinics in motor vans or aircraft, equipped for first-aid, dental treatment, general examination and possibly other health services such as maternal and infant health services, should be provided for serving areas with a scattered population and remote from towns or cities, and arrangements should be made for the free conveyance of patients to centres and hospitals.

Collaboration with General Health Services

42. There should be available to the beneficiaries of the medical care service all general health services, being services providing means for the whole community and/or groups of individuals to promote and protect their health while it is not yet threatened or known to be threatened, whether such services be given by members of the medical and allied professions or otherwise.

43. The medical care service should be provided in close co-ordination with general health services, either by means of close collaboration of the social insurance institutions providing medical care and the authorities administering the general health services, or by combining medical care and general health services in one public service.

44. Local co-ordination of medical care and general health services should be aimed at either by establishing medical care centres in proximity to the headquarters for general health services, or by establishing common centres as headquarters for all or most health services.

45. The members of the medical and allied professions participating in the medical care service and working at health centres may appropriately undertake such general health care as can with advantage be given by the same staff, including immunization, examination of school children and other groups, advice to expectant mothers and mothers with infants, and other care of a like nature.

IV. The Quality of Service

Optimum Standard

46. The medical care service should aim at providing the highest possible standard of care, due regard being paid to the importance of the doctor-patient relationship and the professional and personal responsibility of the doctor, while safeguarding both the interests of the beneficiaries and those of the professions participating.

Choice of Doctor and Continuity of Care

47. The beneficiary should have the right to make an initial choice, among the general practitioners at the disposal of the service within a reasonable distance from his home, of the doctor by whom he wishes to be attended in a

permanent capacity (family doctor); he should have the same right of choice for his children. These principles should also apply to the choice of a dentist as family dentist.

48. Where care is provided at or from health centres, the beneficiary should have the right to choose his centre within a reasonable distance from his home and to select for himself or his children a doctor and a dentist among the general practitioners and dentists working at this centre.

49. Where there is no centre, the beneficiary should have the right to select his family doctor and dentist among the participating general practitioners and dentists whose office is within a reasonable distance from his home.

50. The beneficiary should have the right subsequently to change his family doctor or dentist, subject to giving notice within a prescribed time, for good reasons, such as lack of personal contact and confidence.

51. The general practitioner or the dentist participating in the service should have the right to accept or refuse a client, but may not accept a number in excess of a prescribed maximum nor refuse such clients as have not made their own choice and are assigned to him by the service through impartial methods.

52. The care given by specialists and members of allied professions, such as nurses, midwives, masseurs and others, should be available on the recommendation, and through the agency, of the beneficiary's family doctor who should take reasonable account of the patient's wishes if several members of the specialty or other profession are available at the centre or within a reasonable distance of the patient's home. Special provision should be made for the availability of the specialist when requested by the patient though not recommended by the family doctor.

53. Residential care should be made available on the recommendation of the beneficiary's family doctor, or on the advice of the specialist, if any, who has been consulted.

54. If residential care is provided at the centre to which the family doctor or specialist is attached, the patient should preferably be attended in the hospital by his own family doctor or the specialist to whom he was referred.

55. Arrangements for the general practitioners or dentists at a centre to be consulted by appointment should be made whenever practicable.

Working Conditions and Status of Doctors and Members of Allied Professions

56. The working conditions of doctors and members of allied professions participating in the service should be designed to relieve the doctor or member from financial anxiety by providing adequate income during work, leave and illness and in retirement, and pensions to his survivors, without restricting his professional discretion otherwise than by professional supervision, and should not be such as to distract his attention from the maintenance and improvement of the health of the beneficiaries.

57. General practitioners, specialists and dentists, working for a medical care service covering the whole or a large majority of the population, may appropriately be employed whole time for a salary, with adequate provision for leave, sickness, old age and death, if the medical profession is adequately represented on the body employing them.

58. Where general practitioners or dentists, engaged in private practice, undertake part-time work for a medical care service with a sufficient number of beneficiaries, it may be appropriate to pay them a fixed basic amount per year, including provision for leave, sickness, old age and death, and increased if desired by a capitation fee for each person or family in the doctor's or dentist's charge.

59. Specialists engaged in private practice who work part time for a medical care service with a considerable number of beneficiaries may appropriately be paid an amount proportionate to the time devoted to such service (part-time salary).

60. Doctors and dentists engaged in private practice who work part time for a medical care service with few beneficiaries only may appropriately be paid fees for services rendered.

61. Among the members of allied professions participating in the service, those rendering personal care may appropriately be employed whole time for salary, with adequate provision for leave, sickness, old age and death, while members furnishing supplies should be paid in accordance with adequate tariffs.

62. Working conditions for members of the medical and allied professions participating in the service should be uniform throughout the country or for all sections covered by the service, and agreed on with the representative bodies of the profession, subject only to such variations as may be necessitated by differences in the exigencies of the service.

63. Provision should be made for the submission of complaints by beneficiaries concerning the care received and by members of the medical or allied professions concerning their relations with the administration of the service, to appropriate arbitration bodies under conditions affording adequate guarantees to all parties concerned.

64. The professional supervision of the members of the medical and allied professions working for the service should be entrusted to bodies predominantly composed of representatives of the professions participating with adequate provision for disciplinary measures.

65. Where, in the proceedings referred to in paragraph 63, a member of the medical or allied professions working for the service is deemed to have neglected his professional duties, the arbitration body should refer the matter to the supervisory body referred to in paragraph 64.

Standard of Professional Skill and Knowledge

66. The highest possible standard of skill and knowledge should be achieved and maintained for the professions participating both by requiring high standards of education, training and licensing and by keeping up to date and developing the skill and knowledge of those engaged in the service.

67. Doctors participating in the service should be required to have an adequate training in social medicine.

68. Students of the medical and dental professions should, before being admitted as fully qualified doctors or dentists to the service, be required to work as assistants at health centres or offices, especially in rural areas, under the

supervision and direction of more experienced practitioners.

69. A minimum period as hospital assistant should be prescribed among the qualifications for every doctor entering the service.

70. Doctors wishing to furnish specialist service should be required to have certificates of competence for their specialty.

71. Doctors and dentists participating should be required periodically to attend post-graduate courses organized or approved for this purpose.

72. Adequate periods of apprenticeship at hospitals or health centres should be prescribed for members of allied professions, and post-graduate courses should be organized and attendance periodically required for those participating in the service.

73. Adequate facilities for teaching and research should be made available at the hospitals administered by or working with the medical care service.

74. Professional education and research should be promoted with the financial and legal support of the State.

V. Financing of Medical Care Service

Raising of Funds Under Social Insurance Service

75. The maximum contribution that may be charged to an insured person should not exceed such proportion of his income as, applied to the income of all insured persons, would yield an income equal to the probable total cost of the medical care service, including the cost of care given to qualified dependents as defined in paragraph 6.

76. The contribution paid by an insured person should be such part of the maximum contribution as can be borne without hardship.

77. Employers should be required to pay part of the maximum contribution on behalf of persons employed by them.

78. Persons whose income does not exceed the subsistence level should not be required to pay an insurance contribution. Equitable contributions should be paid by the public authority on their behalf: Provided that in the case of employed persons, such contributions may be paid wholly or partly by their employers.

79. The cost of the medical care service not covered by contributions should be borne by taxpayers.

80. Contributions in respect of employed persons may appropriately be collected by their employers.

81. Where membership of an occupational association or the possession of a licence is compulsory for any class of self-employed persons, the association or the licensing authority may be made responsible for collecting contributions from the persons concerned.

82. The national or local authority may be made responsible for collecting contributions from self-employed persons registered for the purpose of taxation.

83. Where a scheme of social insurance for cash benefits is in operation, contributions both under such scheme and under the medical care service may appropriately be collected together.

Raising of Funds under Public Medical Care Service

84. The cost of the medical care service should be met out of public funds.

85. Where the whole population is covered by the medical care service and all health services are under unified central and area administration, the medical care service may appropriately be financed out of general revenue.

86. Where the administration of the medical care service is separate from that of general health services, it may be appropriate to finance the medical care service by a special tax.

87. The special tax should be paid into a separate fund reserved for the purpose of financing the medical care service.

88. The special tax should be progressively graded and should be designed to yield a return sufficient for financing the medical care service.

89. Persons whose income does not exceed the subsistence level should not be required to pay the tax.

90. The special tax may appropriately be collected by the national income tax authorities or, where there is no national income tax, by authorities responsible for collecting local taxes.

Raising of Capital Funds

91. In addition to providing the normal resources for financing the medical care service, measures should be taken to utilize the assets of social insurance institutions, or funds raised by other means, for financing the extraordinary expenditure necessitated by the extension and improvement of the service, more particularly by the building or equipment of hospitals and medical centres.

VI. Supervision and Administration of Medical Care Service

Unity of Health Services and Democratic Control

92. All medical care and general health services should be centrally supervised and should be administered by health areas as defined in paragraph 24, and the beneficiaries of the medical care service, as well as the medical and allied professions concerned, should have a voice in the administration of the service.

Unification of Central Administration

93. A central authority, representative of the community, should be responsible for formulating the health policy or policies and for supervising all medical care and general health services, subject to consultation of, and collaboration with, the medical and allied professions on all professional matters, and to consultation of the beneficiaries on matters of policy and administration affecting the medical care service.

94. Where the medical care service covers the whole or the majority of the population and a central government agency supervises or administers all medical care and general health services, beneficiaries may appropriately be deemed to be represented by the head of the agency.

95. The central government agency should keep in touch with the beneficiaries through advisory bodies comprising representatives of organizations of the different sections of the population, such as trade unions, employers' associations, chambers of commerce, farmers' associations, women's associations and child protection societies.

96. Where the medical care service covers only a section of the population, and a central government agency supervises all medical care and general health services, representatives of

ANNEX 23—Resolution Concerning Social Security in Asiatic Countries

Whereas the proposals for the promotion of social security before the Committee are for the most part inapplicable to Asiatic countries such as India in their present stage of industrial development, and

Whereas the Asiatic Member States constitute a large part of the world with vast populations which should not be excluded from the benefits of the proposed measures for the promotion of social security, having regard to the aims and purposes of the International Labour Organization,

The Conference recommends that an Asiatic regional conference be held at as early a date as possible and that the question of the organization of social security be included in the agenda of that conference.

ANNEX 24—Resolution Concerning the Definition of Terms Used in International Conventions and Recommendations Concerning Social Security

Whereas it would greatly contribute to the clarification of the terms used in Conventions and Recommendations concerning social security to establish an international nomenclature of social security terms in orders to avoid misinterpretation due to differences in the terminology employed in various countries,

The Conference requests the International Labour Office to prepare in consultation with experts on social security, on sociology, and on economic and legal questions, a list containing definitions of terms occurring in international conventions or recommendations on social security with a view to arriving at international agreement.

ANNEX 25—Resolution Concerning Social Insurance and Related Questions in the Peace Settlement

1. Whereas the peace settlement must necessarily comprise various clauses intended to solve a number of international problems of a social nature, of capital importance, which will arise as between the Axis and associated countries on the one hand and the United Nations on the other;

2. Whereas, among these problems the following deserve special attention:

(*a*) The protection of the social insurance rights of displaced persons;

(*b*) Indemnities for losses and damage suffered in consequence of the war and occupation by the social security institutions of Members of the United Nations and by their nationals;

(*c*) The settlement of the social problems resulting from the transfer of territories and the exchange of populations;

(*d*) The revival of bilateral social treaties and the juridical status under social legislation of nationals of Members of the United Nations in the Axis and associated countries;

The Conference approves as a basis for the solution of the problems mentioned above, the principles which are submitted in Annexes I-IV of the present Resolution and,

Invites the Governing Body to appoint within six months a Special Committee constituted in the manner indicated in Annex V, which should be entrusted with the preparation, on the basis of the said principles of—

(1) precise provisions concerning these questions for submission to the United Nations with a view to their insertion in the peace settlement; and

(2) such executive measures as may appear practical.

Annex I

Principles Concerning the Protection of the Social Insurance Rights of Displaced Persons

1. The peace settlement should include the following arrangements to protect the social insurance rights of workers recruited for employment by Axis and associated countries.

2. The arrangements shall apply to any person who, while residing in the territory of a Member of the United Nations (hereinafter called "country of residence") has, at any time since 31 August 1939 (since 28 September 1938 in the case of Czechoslovakia) and before the cessation of hostilities, been recruited by or on behalf of an agency of an Axis or associated country (hereinafter called "recruiting country") for employment in its own or in another territory occupied by it, and who in virtue of such employment has been liable to compulsory social insurance as a manual worker, salaried employee or miner, as the case may be, under the laws or regulations of the recruiting country or would have been so liable if a national of such country. Similar arrangements should also apply to workers subjected to forced labour in their country of residence.

Pension Insurance

3. A recruited worker shall be deemed to have been affiliated to the pension insurance institution of the recruiting country appropriate to the nature of his employment as from the date of his departure from his country of residence—

(1) until the date of his return thereto, or

(2) until the date of his death or his becoming and invalid, according as (1) or (2) is the earlier.

4. During the whole period for which he is deemed to have been affiliated to an insurance institution of the recruiting country, contributions shall be deemed to have been paid in respect of the recruited worker. Such contributions shall be based on the normal wage of a worker of the recruiting country performing similar work and shall comprise such part of the total of the joint contribution of employed persons and employers, payable in virtue of the social insurance laws or regulations of the recruiting country, as is applied to the financing of the pension insurance scheme administered by the insurance institution to

which the recruited worker concerned is deemed to have been affiliated.

5. Where the last employment of a recruited worker in his country of residence was in work of a higher grade than that in which he was employed in the recruiting country, the contributions deemed to have been paid in respect of him shall be based on the earnings corresponding to the work of higher grade and shall be deemed to have been paid to the pension insurance institution of the recruiting country appropriate to the nature of this employment.

6. The total of the contributions deemed to have been paid in respect of a recruited worker, together with a proportionate share of any State subsidy to the revenue or expenditure of the pension insurance scheme, shall constitute a debt due to the country of residence. The recruiting country accepts full responsibility for the discharge of this debt: provided that such acceptance of responsability shall not be interpreted as altering the nature of the debt which remains primarily a joint liability of all the social insurance institutions of the recruiting country. The discharge of the above-mentioned responsibility by the recruiting country shall be effected independently of all other financial obligations which may be incurred as the result of the war by the recruiting country to the country of residence.

Provided that the total of any instalments of a pension or any lump sum in commutation of a pension which have been paid by an insurance institution of the recruiting country to a recruited worker or his survivors up to the date when the arrangements came into force shall be deducted from the total of the contribution debts due by the recruiting country, and, in such proportion as the country of residence may determine from the proceeds of each debt individually.

7. The debt shall fall due on the date to which its amount is notified to the recruiting country and shall be increased by compound interest at the rate of x per cent. annually from the date at which the recruited worker is deemed to have ceased to be affiliated to an insurance institution of the recruiting country, until the debt is discharged.

8. Any rules adopted for the conversion, with a view to payment, of the amount of any debts expressed in the currency of the recruiting country into the currency of the country of residence, shall provide equitably for protecting the creditor from the effects of the depreciation of the currency of the recruiting country.

9. On the payment of the debt, the liabilities of the recruiting country in respect of the rights in course of acquisition and rights acquired by a recruited worker while he was deemed to be affiliated to an insurance institution of the recruiting country shall be considered as discharged.

Provided that, where, in the course of five years from the date when these arrangements came into force, the frequency of invalidity and death among recruited workers while in the recruiting country and while insured in their country of residence after their return, is found to be significantly greater than that assumed in the actuarial estimates of the scheme under which they are insured, the resultant increase in the pension expenditure shall constitute a debt due by the recruiting country, to be discharged in accordance with the provisions of paragraphs 6 to 8.

10. The country of residence shall use the proceeds of the debt paid in respect of each recruited worker in order to credit him with rights under its pension insurance laws and regulations, and for this purpose shall affiliate him to an insurance institute appropriate for him in view of the nature of his occupation. If there is no such institution the country of residence shall apply the proceeds for the benefit of the worker concerned in such way as it may deem fit.

11. Where the recruited worker died or became disabled before the date when these arrangements came into force, a pension shall be awarded if the qualifying conditions can be deemed to have been fulfilled, having regard to the period during which he is deemed to have been affiliated to an insurance institution of the recruiting country.

Accident Insurance

12. Where a recruited worker became permanently incapacitated or died in consequence of an occupational accident or disease occurring in the recruiting country in respect of which compensation was payable under the laws or regulations of the recruiting country concerning accident insurance or would have been so payable if he had been a national of the recruiting country, such compensation shall be commuted for a lump sum representing its capital value, calculated in accordance with actuarial tables applied under the accident insurance laws or regulations of the country of residence. Where necessary the rate of the pension shall be recalculated on the basis of the normal wage of a worker of the recruiting country performing similar work, and the provisions of paragraph 5 shall apply correspondingly.

13. Such lump sum shall constitute a debt due by the recruiting country to the country of residence, and paragraph 6 shall apply correspondingly.

14. The debt shall fall due at the date at which its amount is notified to the recruiting country and shall be increased by compound interest at the rate of x per cent. annually from the date when the first instalment, due but not yet paid, became payable until the debt is discharged; paragraph 8 shall apply correspondingly.

15. The country of residence shall use the proceeds of the debt paid in respect of the recruiting worker in order to provide him or his survivors with a pension under its accident insurance laws or regulations.

Unemployment Insurance

16. The provisions of these arrangements shall apply correspondingly to the unemployment insurance contributions paid in respect of workers recruited by the recruiting country.

17. Provided that the country of residence shall apply the proceeds of the debts in respect of such contributions on behalf of recruited workers who are unemployed after their return.

General Provisions

18. For the purpose of assisting the countries of residence concerned in applying these arrangements, there shall be established in connection with the International Labour Office a Commission consisting of one delegate from each such country, together with three persons appointed respectively by the Government, workers and employers' representatives upon the Governing Body of the International Labour Office.

19. The Commission shall be empowered to make regulations for the purpose of giving effect to these arrangements and resolving any difficulties which may arise in connection with the application thereof; it shall establish its own procedure.

20. Without prejudice to the generality of the powers conferred by paragraph 19, the Commission is entitled to make regulations designed to—

(*a*) substitute more summary methods than those specified in paragraphs 4 to 6 for the calculation of debts;

(*b*) substitute for the present arrangements the general provision of the Maintenance of Migrants' Pension Rights Convention, 1935, as between certain countries or certain categories of recruited workers.

(*c*) resolve any doubt whether workers are to be regarded as having been recruited;

(*d*) determine the rate of the contribution to be deemed to have been paid in respect of a recruited worker;

(*e*) determine one wage on which the contribution is to be deemed to have been based, taking into consideration typical wages of broad occupational groups and the necessity of ignoring all discrimination based on race, nationality and religion;

(*f*) determine the propriety of classifying as recruited workers nationals of Members of the United Nations recruited while residing in the territory of an Axis or associated country and certain other groups such as deported persons, and, for the purposes of workmen's compensation, prisoners of war.

21. The Commission shall accord just consideration to representations and complaints from recruiting countries arising out of the application of these arrangements.

22. Any expenses properly incurred by the Commission shall be borne by recruiting countries.

Annex II

Principles Concerning Indemnities for Social Claims

1. In the peace settlements which will impose financial obligations on the Axis and associated countries, provision should be made for full indemnities in respect of legitimate claims of a social character which result from the events of the present war and from the occupation of the territories of certain Members of the United Nations.

2. The above provision relates:

(1) On the one hand, to the satisfaction of claims for indemnity made by social security institutions (social insurance or autonomous welfare funds) of Members of the United Nations in respect of all loss and damage which they have suffered as the result of the events mentioned in paragraph 1; the indemnity should include the reconstitution of the reserves of social insurance institutions which are necessary to cover their liabilities as affected by the said events, including the increase of those liabilities resulting from the aggravation of the risks in consequence of the said events;

(2) On the other hand, to the satisfaction of the claims of individual nationals of Members of the United Nations in respect of treatment contrary to international law or other inequitable treatment imposed on them by Axis or associated countries in the matter of conditions of employment (including remuneration), loss of social insurance rights not covered by the provisions of Annex I to the present Resolution, and of any other claims connected with working conditions and social protection and the like which are the direct or indirect consequence of the events mentioned in paragraph 1 and involve the liability either of Governments and public institutions of the Axis and associated countries or of physical or legal persons belonging to such countries;

(3) In the peace settlement which will impose financial obligations on the Axis and associated countries, provision should be made for priority in favour of the payment of indemnities in respect of the claims mentioned under paragraphs 1 and 2 over all other claims.

Annex III

The Principles Concerning the Settlement of the Social Problems Resulting from the Transfer of Territories and the Exchange of Populations

1. Any provisions in the peace settlement on the subject of the transfer of territories should provide for:

(*a*) The transfer of a clearly defined part of the social insurance liabilities pertaining to the ceded territories from the countries previously competent to the countries subsequently competent, corresponding to the ceded territories;

(*b*) The immediate transfer by the previously competent countries to the subsequently competent countries of the reserves necessary according to actuarial calculations, to cover the liabilities which will be assumed and discharged by the latter; this transfer should be effected independently of any payments from the Axis or associated countries to the United Nations on account of war reparations or any other account;

(*c*) The resumption by the successor countries of the payment of the social insurance benefit for which they became liable, so as to secure the uninterrupted continuation of the payment of current benefits and the award of benefits in respect of rights in course of acquisition which have been assumed;

(*d*) The application of the principles set out under sub-paragraphs (*a*) to (*c*), not only to social insurance but to all similar social security institutions, such as pension funds, unemployment funds, autonomous provident or welfare funds, etc.

2. All arrangements entered into among Members of the United Nations for the exchange of populations between different countries should include suitable provisions for the protection of the social rights of workers, including regulations similar to those provided for under paragraph 1.

Annex IV

Principles Relating to the Revival of Bilateral Social Treaties and to the Juridical Status of Nationals of Members of the United Nations Under Social Legislation in Axis and Associated Countries

1. The peace settlement should, at the request of Members of the United Nations concerned,

provide for the revival of treaties and bilateral agreements on the subjects of social insurance, labour, unemployment, public assistance and other related subjects in force on 31 August, 1939 (or at any earlier date at which the territory of a Member was occupied) between Axis and associated countries on the one hand and these Members of the United Nations on the other; it should provide that such treaties and agreements may not thereafter be denounced unilaterally by Axis or associated countries within five years from the date of the peace settlement.

2. The peace settlement should guarantee the nationals of the United Nations the same treatment as Axis and associated countries grant to their own nationals in the application of all branches of social legislation.

Annex V

Composition of the Proposed Commission

A. Three representatives of the Governing Body, appointed from members of the three groups, being nationals of countries other than those directly represented on the Committee, in accordance with paragraph B below;

B. Ten experts on social insurance and the international regulation of social questions, appointed in particular by countries directly concerned in this matter;

C. Duly qualified representatives of the international bodies which are competent for related questions.

ANNEX 26—Resolution Concerning International Administration to Promote Social Security

Whereas mutual assistance in social security administration is one of the forms of collaboration between nations calculated to promote the progressive development in all countries of comprehensive social security schemes providing for income security and medical care; and

Whereas the International Labour Office has co-operated with Members of the Organization in an advisory capacity in the planning and development of social security schemes by means of expert missions, and it is now desirable to take further measures to make the experience of social security administration gained by Members individually available through the International Labour Office to other Members about to introduce social security schemes or to amend their existing schemes; and

Whereas the Inter-American Conference on Social Security adopted at its first session, held at Santiago de Chile in 1942, resolutions favouring co-operation among social security administrations and institutions with a view to the unification of statistics of medical care and the encouragement of research and technical studies:

The Conference requests the International Labour Office:

(*a*) to take the necessary measures to facilitate the interchange of qualified technicians and experts by means of agreements between Members of the Organization;

(*b*) to continue efforts to promote, on an international or regional basis, systematic and direct collaboration among social security administrations or institutions with a view to the regular interchange of information which will facilitate their work and the study of common problems in the application of social security. Among these problems the following are enumerated without implying any order of preference:

(i) the comparability of statistics on the working of social security services, and their possible standardisation;

(ii) long-term investment of the reserves of social security institutions;

(iii) simplification of social security administration;

(iv) relations between social security institutions based on assistance and those based on insurance;

(v) the prevention of the risks covered;

(vi) the training and technical improvement of the personnel of social security administration through the organization of courses of higher study in the actuarial and accounting fields and others related to the application of social security systems.

(*c*) to study the possibility and appropriateness of international or multilateral agreements which would establish bodies responsible for performing common functions, either in the field of finances or of administration.

ANNEX 27—Social Policy in Dependent Territories Recommendation, 1944

The General Conference of the International Labour Organization,

Having been convened at Philadelphia by the Governing Body of the International Labour Office, and having met in its Twenty-sixth Session on 20th April, 1944, and

Having decided upon the adoption of certain proposals with regard to minimum standards of social policy in dependent territories, which is the fifth item on the Agenda of the Session, and

Having determined that these proposals shall take the form of a Recommendation,

adopts, this twelfth day of May of the year one thousand nine hundred and forty-four, the following Recommendation which may be cited as the Social Policy in Dependent Territories Recommendation, 1944:

Whereas the economic advancement and social progress of the peoples of dependent territories have become increasingly a matter of close and urgent concern to the States responsible for their administration; and

Whereas the International Labour Organization has from its inception endeavoured to assist the efforts towards this end of governments, employers and workers; and

Whereas the Atlantic Charter has expressed the desire of the signatories "to bring about the fullest collaboration between all nations in the economic field with the object of securing,

for all, improved labour standards, economic advancement and social security"; and

Whereas the Conference of the International Labour Organization, by a Resolution adopted on 5th November, 1941, endorsed the principles of the Atlantic Charter and pledged the full co-operation of the International Labour Organization in their implementation; and

Whereas the International Labour Organization has from time to time adopted Conventions and Recommendations dealing with special aspects of the conditions of life and labour in dependent territories and has promoted the application to such territories, in accordance with Article 35 of the Constitution of the Organization, of Conventions and Recommendations of general application; and

Whereas the progress of the well-being and development of dependent peoples is influenced by the economic relations between the dependent territories and the rest of the world, as well as by measures taken within the dependent territories; and

Whereas it is desirable to state the fundamental principles of social policy in dependent territories, and to provide for the extension of the application to such territories of accepted international minimum standards and for the improvement of these standards, in order to promote the attainment of the aforesaid objects;

The Conference makes the following recommendations:—

1. Each Member of the International Labour Organization should take or continue to take such steps as are within its competence to promote the wellbeing and development of the peoples of dependent territories through the effective application of the general principles set forth in Part I of the Annex to this Recommendation.

2. Each Member of the Organization which is responsible for any dependent territory should take all steps within its competence to secure the effective application in each such territory of the minimum standards set forth in Part II of the Annex to this Recommendation, and in particular should bring this Recommendation before the authority or authorities competent to make effective in each such territory the minimum standards set forth in Part II of the Annex.

3. Each Member of the Organization should, if it approves this Recommendation, notify the Director of the International Labour Office of its acceptance of the general principles set forth in Part I of the Annex; should communicate to the Director at the earliest possible date particulars of the action taken to make effective the minimum standards set forth in Part II of the Annex in respect of each dependent territory for which the Member in question is responsible; and thereafter should report to the International Labour Office from time to time, as requested by the Governing Body, concerning the action taken to give effect to the Recommendation.

4. The standards set forth in Part II of the Annex to this Recommendation should be regarded as minimum standards, which do not qualify or impair any obligation to apply higher standards incumbent upon any Member of the Organization under the Constitution of the Organization or under any International Labour Convention which the Member may have ratified, and should in no case be so interpreted or applied as to lessen the protection afforded by existing legislation to the workers concerned.

Annex

PART I. GENERAL PRINCIPLES

Article 1

1. All policies designed to apply to dependent territories shall be primarily directed to the well-being and development of the peoples of such territories and to the promotion of the desire on their part for social progress.

2. Policies of more general application shall be formulated with due regard to their effect upon the well-being of dependent peoples.

Article 2

1. In order to promote economic advancement and thus to lay the foundations of social progress, every effort shall be made to secure, on an international, regional, national or territorial basis, financial and technical assistance in the economic development of dependent territories under the control of the local administrations, in such a way as to safeguard the interests of the peoples of dependent territories.

2. It shall be an aim of policy for all Government authorities to ensure that adequate funds are made available to provide capital for development purposes on terms which secure to the peoples of the dependent territories the full benefits of such development.

3. In appropriate cases international, regional or national action shall be taken with a view to establishing conditions of trade sufficient for the maintenance of reasonable standards of living for producers efficiently producing the essential export products of dependent territories.

Article 3

All possible steps shall be taken by appropriate international, regional, national and territorial measures to promote improvement in such fields as public health, housing, nutrition, education, the welfare of children, the status of women, conditions of employment, the remuneration of wage earners and independent producers, migratory labour, social security, standards of public services and general production. These steps shall include the adoption of appropriate commercial and trading policies by countries on which dependent territories depend.

Article 4

All possible steps shall be taken effectively to associate the peoples of the dependent territories in the framing and execution of measures of social progress, preferably through their own elected representatives where appropriate and possible.

PART II. MINIMUM STANDARDS

Section 1. Slavery

Article 5

In pursuance of the objectives of free labour in a free world, the principle is affirmed that the slave trade and slavery in all its forms shall be prohibited and effectively suppressed in all dependent territories.

Section 2. Opium

Article 6

1. In recognition of the menace which the use of opium may represent to the health, productivity and general welfare of the peoples

of dependent territories, the principle is affirmed that the traffic in opium and other dangerous drugs shall be strictly regulated in such manner as to protect fully the interests of the workers.

2. Consideration shall be given to the prohibition of opium smoking and the abolition of government opium monopolies in all dependent territories where opium smoking is still authorized.

SECTION 3. FORCED OR COMPULSORY LABOUR

Article 7

1. The use of forced or compulsory labour in dependent territories, which may have been inaugurated during the present war emergency, shall be eliminated entirely within the shortest possible period. In the meantime measures shall be adopted in dependent territories to increase the spontaneous offer of labour.

2. The use of forced or compulsory labour in all its forms shall be suppressed within the shortest possible period.

3. Where forced or compulsory labour is used in dependent territories as a temporary and exceptional measure the conditions and guarantees provided for in the Forced Labour Convention, 1930, shall be respected. In no case shall the use of forced or compulsory labour by private employers be permitted, irrespective of whether or not the State contracts with the employers.

4. Consideration shall be given to the possibility of eliminating or withdrawing any exceptions to the application in dependent territories of all the provisions of the Forced Labour Convention, 1930.

5. Consideration shall be given to the application of the Forced Labour Convention, 1930, to those dependent territories where forced or compulsory labour may occur in respect of which the Convention is not already in force.

6. Consideration shall be given to the desirability of ratifying the Forced Labour Convention, 1930, by such States responsible for dependent territories where forced or compulsory labour may occur as have not already done so.

Article 8

With a view to avoiding the development of indirect compulsion to labour, consideration shall be given to the application of the principles set forth in the Forced Labour (Indirect Compulsion) Recommendation, 1930.

SECTION 4. RECRUITING OF WORKERS

Article 9

1. It shall be an aim of policy to eliminate the recruiting of workers and to replace such recruiting by arrangements which, though based upon the spontaneous offer of labour through free agencies controlled by government, provide for medical inspection, transport, food and shelter and all other benefits accruing to workers under existing systems.

2. Pending the formulation of any new proposals concerning the methods of obtaining labour and with a view to the more rapid promotion of a change over to the new methods contemplated, consideration shall be given to the application of the principles contained in the Elimination of Recruiting Recommendation, 1936.

Article 10

1. Consideration shall be given to the application of the Recruiting of Indigenous Workers Convention, 1936, to those dependent territories where recruiting may occur in respect of which the Convention is not already in force.

2. Consideration shall be given to the desirability of ratifying the Recruiting of Indigenous Workers Convention, 1936, by such states responsible for dependent territories where recruiting may occur as have not already done so.

SECTION 5. SPECIAL TYPES OF CONTRACT OF EMPLOYMENT

Article 11

1. It shall be an aim of policy to regulate long-term employment by a system of written contracts in the cases required by and in accordance with the provisions of the Contracts of Employment (Indigenous Workers) Convention, 1939.

2. Consideration shall be given to the application of the Contracts of Employment (Indigenous Workers) Convention, 1939, to those dependent territories where employment under long-term contract may occur in respect of which the Convention is not already in force.

3. Consideration shall be given to the desirability of ratifying the Contracts of Employment (Indigenous Workers) Convention, 1939 by such States responsible for dependent territories where employment under long-term contract may occur as have not already done so.

Article 12

With a view to the definite limitation of periods of service under contract, consideration shall be given to the application of the principles set forth in the Contracts of Employment (Indigenous Workers) Recommendation, 1939.

Article 13

1. All practicable steps shall be taken to equate supply and demand in areas where some casual employment is inevitable and to guard against undesirable attraction of casual labour to centres of potential employment.

2. Measures, such as short-term labour agreements, shall be considered in order to secure the maximum employment for labour normally available at such centres.

Article 14

1. The practise of entering statements of a subjective nature on the worker's conduct or ability in work-cards or work-books required by law to be carried on the person of the worker shall be eliminated.

2. The use of work-cards or work-books shall be regulated to prevent their use as a device of intimidation or compulsion in employment.

Article 15

Where a married man is employed on contract within his own country but at a considerable distance from his home, the competent authority shall take all practical steps in appropriate cases to afford him full opportunity to be accompanied if he so desires by his wife and family.

SECTION 6. PENAL SANCTIONS

Article 16

1. It shall be an aim of policy to abolish penal sanctions for breach of contract of employment as defined in Article 1 of the Penal Sanctions (Indigenous Workers) Convention, 1939.

2. Consideration shall be given to the application of the Penal Sanctions (Indigenous Workers) Convention, 1939, to those dependent territories where the imposition of penal sanctions may occur in respect of which the Convention is not already in force.

3. Consideration shall be given to the desirability of ratifying the Penal Sanctions (Indigenous Workers) Convention, 1939, by such States responsible for dependent territories where the imposition of penal sanctions may occur as have not already done so.

SECTION 7. EMPLOYMENT OF CHILDREN AND YOUNG PERSONS

Article 17

1. Adequate provision shall be made in dependent territories, to the maximum extent possible under local conditions, for the progressive development of broad systems of education, vocational training and apprenticeship, with a view to the elimination of illiteracy among children and young persons and to their effective preparation for a useful occupation.

2. In order that the child population may be able to profit by existing facilities for education and in order that the extension of these facilities may not be hindered by a demand for child labour, the employment of persons below the school-leaving age shall be prohibited in any area where educational facilities are provided on a scale adequate for the majority of the children of school age.

Article 18

1. Children under the age of twelve years shall not be employed in any employment, except on light work of an agricultural or domestic character in which only members of the employer's family are employed or except on agricultural light work carried on collectively by the local community. This age shall be progressively raised along with the school-leaving age.

2. Where the transfer of children to the family of an employer is permitted by custom, the conditions of transfer and of employment shall be closely regulated and supervised, whether the children are above or below twelve years of age. The progressive abolition of all such transfers shall be an aim of policy for all dependent territories.

Article 19

Children under the age of fifteen years shall not be employed or work in any industrial undertaking, or in any branch thereof.

Article 20

Children under the age of fifteen years shall not be employed or work on vessels.

Article 21

1. Young persons under the age of sixteen years shall not be employed underground in mines.

2. The employment underground in mines of young persons who have attained the age of sixteen years but not that of eighteen years shall be conditional on the production of a medical certificate attesting fitness for such work, signed by a doctor who shall be approved by the competent authority.

Article 22

1. Young persons under the age of eighteen years shall not be employed or work on vessels as trimmers or stokers.

2. When a trimmer or stoker is required in a port where young persons of less than eighteen years of age only are available, such young persons may be employed and in that case it shall be necessary to engage two young persons in place of the trimmer or stoker required. Such young persons shall be at least sixteen years of age.

3. Provided that the provisions of this Article do not apply:

(*a*) to the employment of young persons on vessels mainly propelled by other means than steam;

(*b*) to young persons of not less than sixteen years of age who, if found physically fit after medical examination, may be employed as trimmers or stokers on vessels exclusively engaged in coastal trade.

Article 23

The provisions of Articles 18 (1), 19 and 20 do not apply to work, approved and supervised by the competent authority, done by children or young persons in *bonafide* State or private technical schools or school ships or training ships having prescribed courses of study and reasonable limits on the length of time in which students may remain in training or apprenticeship.

Article 24

1. In the case of unhealthy, dangerous or onerous work, minimum ages higher than those required in virtue of Articles 18 (1) and 19 shall be fixed, or the hours of work of children between the minimum age of employment and an appropriate higher age shall be subject to special limitations, or other special protection shall be afforded.

2. Special protection shall be provided for children who are permitted to undertake employment away from their homes.

Article 25

1. Young persons under eighteen years of age shall not be employed during the night in any industrial undertaking, or in any branch thereof.

2. Provided that young persons over the age of sixteen years may be employed during the night in exceptional circumstances defined by the competent authority.

Article 26

1. The employment of any young person under eighteen years of age on any vessel shall be conditional on the production of a medical certificate attesting fitness for such work, signed by a doctor who shall be approved by the competent authority.

2. In urgent cases the competent authority may allow a young person below the age of eighteen years to embark without having un-

dergone medical examination, always provided that such an examination shall be undergone, at the expense of the employer, at the first port at which the vessel calls, and that failing satisfactory medical attestation the young person shall be returned as a passenger to the port or place where he was engaged or to his home, whichever is the nearer, at the expense of the employer.

Article 27

In developing systems of education suited to the economic and social interests of the communities, consideration shall be given to the application of the principles set forth in the Vocational Training Recommendation, 1939, so far as this is practicable and appropriate to local circumstances.

Article 28

To assist in the application of the provisions of this Section, administrative bodies or officers shall be appointed. The appointment and establishment of these administrative bodies or officers shall be made in accordance with practices successfully adopted in metropolitan or independent countries.

SECTION 8. EMPLOYMENT OF WOMEN

Article 29

It shall be an aim of policy for all competent authorities to take such measures as, having due regard to local conditions, are appropriate and practicable to secure for women: adequate opportunities of general education, vocational training and employment; safeguards against physically harmful conditions of employment and economic exploitation, including safeguards for motherhood; protection against any special forms of exploitation; and fair and equal treatment between men and women as regards remuneration and other conditions of employment.

Article 30

All practicable steps shall be taken to improve the social and economic status of women in any dependent territory where, whether by law or custom, arrangements survive which in effect maintain women in, or reduce women to, a condition of servitude.

Article 31

1. Provision shall be made as rapidly as possible for maternity protection for women employed in industrial and commercial undertakings.

2. In so doing the aim shall be to give effect, subject to such modifications as may be necessary in the light of local conditions, to the provisions of the Childbirth Convention, 1919, and in particular to the following principles:

(*a*) the right to be absent from employment before and after childbirth;
(*b*) the right to medical assistance and benefits during such absence.

Article 32

1. Women shall not be employed during the night in any industrial undertaking, or in any branch thereof.

2. Provided that women may be employed during the night:

(*a*) in cases where the work has to do with raw materials or materials in course of treatment which are subject to rapid deterioration; and
(*b*) when in any undertaking an emergency occurs which it was impossible to foresee and which is not of a recurring character.

3. Provided also that the prohibition of night work may be suspended, when in case of serious emergency the public interest demands it.

4. The provisions of this Article do not apply to women holding responsible positions of management who are not ordinarily engaged in manual work.

Article 33

1. Women shall not be employed on underground work in any mine.

2. Provided that the competent authority may grant exemptions from the above prohibition in respect of:

(*a*) women holding positions of management who do not perform manual work;
(*b*) women employed in health and welfare services;
(*c*) women who, in the course of their studies, spend a period of training in the underground parts of a mine; and
(*d*) any other woman who may occasionally have to enter the underground parts of a mine for the purpose of a non-manual occupation.

Article 34

In order to promote the application of measures relating to the employment and economic status of women and their welfare, use shall be made of women advisers where questions especially affecting women are to be considered. The women advisers shall, whenever possible, be drawn from the local population.

SECTION IX. REMUNERATION

Article 35

1. The improvement of standards of living shall be regarded as the principal objective in the planning of economic development.

2. All practicable measures appropriate to local conditions shall be taken to secure for independent producers and wage earners conditions which will ensure the maintenance of minimum standards of living as ascertained by means of official enquiries into living conditions and will give scope to independent producers and wage earners to improve those standards by their own efforts.

3. Forms of economic enterprise which require the labour of workers living away from their homes shall take account of the normal family needs of the workers.

4. Where the labour resources of other areas are used on a temporary basis for the benefit of one area, measures shall be taken to encourage the transfer of part of the workers' wages and savings from the area of labour utilization to the areas of labour supply.

5. Where workers and their families move from low-cost to higher-cost areas, account shall be taken of the increased cost of living resulting from the change.

6. The substitution of alcohol or other spirituous beverages for all or any part of wages for services performed by the workers shall be prohibited.

Article 36

All public works, whether undertaken directly by a public authority or through a contract entered into between a public authority and an employer, shall be subject to the requirement that the rates of wages and the general conditions of employment shall not be less than the prevailing rates and conditions, and shall where practicable be fixed after consultation with any employers' and workers' organizations concerned.

SECTION X. HEALTH, HOUSING AND SOCIAL SECURITY

Article 37

1. All practicable measures shall be taken to improve the health of the people by the extension of medical facilities, by the development of public health programs, by surveys of epidemic and endemic diseases prevalent in tropical dependent territories and by the introduction of appropriate measures of combating them, by the spread of health education and the improvement of nutrition and housing.

2. All practicable measures shall be taken to ascertain by nutritional surveys the food requirements of the people and the ways of improving nutrition and to give effect to the food policies which such surveys indicate. National nutritional organizations shall be set up and shall be provided with adequate funds, facilities and authority.

3. The competent authority shall be responsible for ensuring the establishment of satisfactory housing conditions. The general aim of policy shall be to provide workers normally dependent on wage earning with the opportunity of securing satisfactory housing accommodation on premises not the property of the employer.

4. Where an undertaking employing labour is situated in an area where satisfactory housing accommodation is not available, the provision of housing may be made an obligation on the undertaking on an equitable basis. In such cases the competent authority shall define the minimum standards of accommodation and shall exercise strict control over the enforcement of these standards. The competent authority shall also define the rights of the worker who may be required to vacate his house on leaving employment and shall take all necessary steps to secure the enforcement of these rights.

Article 38

Such arrangements as are practicable, having due regard to local conditions, shall be made for the maintenance and treatment of the sick and for the care of the aged, of the incapacitated and of the dependent survivors of deceased persons.

Article 39

1. Provision shall be made by law for the payment of compensation to employed persons in case of incapacity for work caused by accidents arising out of and in the course of their employment, and to their dependent survivors in case of death caused by such accidents, and for the medical care of persons injured by such accidents.

2. The laws and regulations concerning workmen's compensation shall apply to all workers, employees and apprentices employed on vessels and by industrial, commercial, and agricultural undertakings.

3. Provided that exceptions may be made in respect of:

(*a*) persons whose employment is of a casual nature and who are employed otherwise than for the purpose of the employer's trade or business;
(*b*) out-workers;
(*c*) members of the employer's family who work exclusively on his behalf and who live with him;
(*d*) non-manual workers whose remuneration exceeds a limit to be determined by laws or regulations.

Article 40

1. Compensation shall be payable to workers incapacitated by occupational diseases, or, in case of death from any such disease to their dependents, in accordance with the general principles of workmen's compensation.

2. Provided that such compensation may be limited to the occupational diseases of chief importance in the territory concerned.

SECTION 11. PROHIBITION OF COLOUR AND RELIGIOUS BARS AND OTHER DISCRIMINATORY PRACTICES

Article 41

1. The standards set by law in each territory with respect to conditions of labour shall have due regard to the equitable economic treatment of all workers lawfully resident or working therein.

2. Discrimination directed against workers for reason of race, colour, confession or tribal association, as regards their admission to public or private employment shall be prohibited.

3. All measures practicable under local conditions shall be taken to promote effective equality of treatment in employment by the provision of facilities for training, by the discouragement of discrimination in the negotiation of collective agreements or on grounds of trade union membership, and by other appropriate means.

SECTION 12. INSPECTION

Article 42

1. Labour inspection services shall be established in territories where such services do not already exist. Inspectors shall be required to inspect conditions of employment at frequent intervals.

2. The inspectors shall have no direct or indirect interest in undertakings subject to their supervision.

3. Workers and their representatives shall be afforded every facility for communicating freely with the inspectors.

SECTION 13. INDUSTRIAL ORGANIZATION

Article 43

1. The rights of employers and employed alike to associate for all lawful purposes shall be guaranteed by appropriate measures.

2. All practicable measures shall be taken to consult and associate the representatives of organizations of employers and workers in the establishment and working of machinery for conciliation, arbitration, minimum wage fixing and labour inspection. Where representative organizations of workers have not developed, the competent authority shall appoint persons specially qualified to act on behalf of the workers and by advice and guidance to assist in the early development of workers' organizations.

3. All practicable measures shall be taken to assure to trade unions which are representative of the workers concerned the right to conclude collective agreements with employers or employers' organizations.

Article 44

1. As rapidly as possible, machinery shall be created for the settlement of collective disputes between employers and workers.

2. Representatives of the employers and workers concerned, including representatives of their respective organizations, where such exist, shall where practicable, be associated in the operation of the machinery, in such manner and to such extent, but in any case in equal numbers and on equal terms, as may be determined by the competent authority.

SECTION 14. CO-OPERATIVE ORGANIZATIONS

Article 45

1. The assistance and development of co-operative societies, including co-operative organizations of workers for the promotion of health, housing and education, shall be accepted as part of the economic program of competent authorities in dependent territories, and the measures to be taken shall include financial assistance wherever this is appropriate.

2. To this end consideration shall be given to:

(*a*) the adoption of adequate legislation, simple and inexpensive in application, covering all forms of co-operative organizations;

(*b*) the creation of special services to promote and supervise the development of co-operative organizations and to encourage education in co-operation.

3. In appropriate cases co-operative organizations shall be effectively represented on public boards and agencies affecting their interests.

SECTION 15. DEFINITIONS AND SCOPE

Article 46

For the purposes of this Part of the present Annex:

(*a*) the term "agricultural undertaking" may be defined so as to include processes conducted on the undertaking for the preservation and despatch of the agricultural products of the undertaking, unless it is desired to classify these processes as parts of an industrial undertaking;

(*b*) the term "commercial undertaking" includes:

(i) commercial establishments and offices, including establishments engaging wholly or mainly in the sale, purchase, distribution, insurance, negotiation, loan, or administration of goods or services of any kind;

(ii) establishments for the treatment or care particularly of the aged, infirm, sick, destitute, or mentally unfit;

(iii) hotels, restaurants, boarding houses, clubs, cafés and other refreshment houses;

(iv) theatres and places of public amusement; and

(v) any establishment similar in character to those enumerated in sub-paragraphs (i), (ii), (iii), and (iv) above;

(*c*) the term "industrial undertaking" includes:

(i) undertakings in which articles are manufactured, altered, cleaned, repaired, ornamented, finished, adapted for sale, broken up or demolished, or in which materials are transformed, including undertakings engaged in shipbuilding, in the generation, transformation, or transmission of electricity, in the production or distribution of gas or motive power of any kind, in the purification or distribution of water, or in heating;

(ii) undertakings engaged in the construction, reconstruction, maintenance, repair, alteration, or demolition of any one or more of the following: buildings, railways, tramways, airports, harbours, docks, piers, works of protection against floods or coast erosion, canals, works for the purpose of inland, maritime or aerial navigation, roads, tunnels, bridges, viaducts, sewers, drains, wells, irrigation or drainage works, telecommunication installations, works for the production or distribution of electricity or gas, pipelines, waterworks, and undertakings engaged in other similar work or in the preparation for or laying the foundations of any such work or structure;

(iii) mines, quarries or other works for the extraction of minerals from the earth; and

(iv) undertakings engaged in the transport of passengers or goods, excluding transport by hand, unless such undertakings are regarded as parts of the operation of an agricultural or commercial undertaking;

(*d*) the terms "agricultural undertaking", "commercial undertaking" and "industrial undertaking" include both public and private undertakings;

(*e*) the term "vessel" includes all ships and boats, of any nature whatsoever, engaged in maritime navigation, whether publicly or privately owned, excluding ships of war; it may be interpreted as excluding vessels of less than a specified tonnage and carrying a crew of less than a specified number;

(*f*) the term "night" signifies a period of at least eleven consecutive hours: Provided that in those tropical countries in which work is suspended during the midde of the day, the night period may be shorter if compensatory rest is accorded during the day;

(*g*) provisions prescribing a minimum age may be interpreted as relating to an apparent minimum age where records of birth are inadequate.

Article 47

The competent authority may exclude from the application of the provisions of this Part of the present Annex undertakings or vessels in respect of which, from their nature and size, adequate supervision may be impracticable.

ANNEX 28—Resolution Including the Question of Minimum Standards of Social Policy in Dependent Territories (Supplementary Provisions) in the Agenda of the Next General Session of the Conference

In accordance with the provisions of paragraph 3 of Article 16 of the Constitution of the International Labour Organization, the XXVIth Session of the International Labour Conference decides to include in the Agenda of the next general session of the International Labour Conference the question of:

Minimum standards of social policy in dependent territories (supplementary provisions).

ANNEX 29—Resolution Requesting the Governing Body to set up a Committee to Advise the International Labour Office on Standards of Social Policy in Dependent Territories

The XXVIth Session of the International Labour Conference,

Recognizing the value of the work of the Committee of Experts on Native Labour and the necessity of providing the Office with all possible technical advice on social problems in dependent territories,

Requests the Governing Body of the International Labour Office to set up as soon as possible a Committee to advise the Office on standards of social policy in dependent territories.

The following are among the questions which the Governing Body may consider should appropriately be laid before the Committee, the creation of which is suggested:

(1) The status of women in dependent territories;

(2) Migratory labour and its protection;

(3) Housing standards in dependent territories, including methods to facilitate the interchange of information on progress realized.

ANNEX 30—Resolution Concerning the Action of Federal States on Conventions and Recommendations

(Submitted by Mr. Percy R. Bengough, Workers' Delegate of Canada)

Whereas the constitutions of a number of federal States, Members of the International Labour Organization, prevent their ratification of I.L.O. Conventions dealing with matters within the competence of their constituent State Governments, and in such circumstances the usual procedure for dealing with Conventions and Recommendations cannot be adopted;

And whereas it is desirable that a method be established whereby Conventions and Recommendations may be dealt with, pending any necessary change in the constitutions of the countries concerned or of the International Labour Organization;

Therefore, be it resolved, that the Acting Director be instructed to communicate with the Governments of such federal States, in the period between the Twenty-sixth and Twenty-seventh Sessions of the International Labour Conference, suggesting that arrangements be made whereby Draft Conventions or Recommendations which apply to matters within the competence of the constituent State Governments would be referred to such Governments by the federal authority, with the request that they bring the Recommendations or draft Conventions before the authority or authorities within whose competence the matters lie, for the enactment of legislation or other action.

And further, that the federal Governments be requested to obtain in due course a report regarding the action taken with respect to the Recommendations or Conventions, and convey such information to the Secretary-General.

ANNEX 31—Resolution Concerning the Membership of Austria in the International Labour Organization

The Conference takes note with satisfaction of the Moscow Declaration expressing the wish of the signatories to see re-established a free and independent Austria, recalls the active participation of Austria in the International Labour Organization from 1919 to 1928 and expresses the hope that a free, independent and democratic Austria will soon resume her participation in the International Labour Organization.

ANNEX 32—Resolution Concerning Complete Delegations to the Conference

In view of the growing volume and importance of the work of the International Labour Organization, and in order to enable the Conference of the Organization to have full and fruitful discussion of the questions on the agenda of the Conference and also to enable each delegation to participate effectively in the deliberations of the Conference and the several Committees, this Session of the International Labour Conference earnestly invites the Members of the International Labour Organization to send complete delegations, including an adequate number of advisers, to each session without regard to cost or distance.

ANNEX 33—Resolution Concerning the Use of Spanish and Portuguese as Official Languages

Considering that the nations of Latin America have made a substantial contribution to the development and universalization of the International Labour Organization;

Considering that the nations of Latin America have unanimously developed, spontaneously and with exceptional rapidity, a social policy based on the International Conventions and on the generous conceptions of the protection of labour and collective welfare;

Considering that the prominent position attained by the American Republics and the special social conditions of the Western Hemisphere have been demonstrated at the Labour Conferences of the American States which were held in 1936 and 1939, at Santiago-de-Chile and Havana respectively, and which had far-reaching results;

Considering that the ethical unity, historic traditions and ideals characteristic of the peoples of Latin America demonstrate the existence of an authentic culture, the value of which is all the greater inasmuch as it extends over the whole of the South American Continent and Central America;

Considering that the social development of Latin America springs from the Iberian civilization, which is both Spanish and Portuguese and is two-fold in its nature, and still maintains this diversity which so far from being a cause of division, rather serves to bind them more closely together for the preservation of the characteristics they derive from a common historic source;

Considering that the Spanish and Portuguese languages spoken by the nations of Latin America are also the languages of the countries of the Iberian Peninsula, of the peoples of a large part of the Continent of Africa, and of various regions of Asia;

Considering also that the Spanish and Portuguese languages are regional transformations and progressive adaptations of Latin and at the same time modern, living languages, with a classical etymology, which can be readily understood and acquired;

Considering that the original root and the manner of development of the Portuguese and Spanish idioms, which development has taken place in geo-political condition presenting substantial similarities, have rendered impossible wide divergences between the two tongues, so that to-day the peoples who speak them can readily understand one another;

Considering that the Havana Conference of 1939 in Resolution XXV, expressed itself unanimously in favour of the publication of legal decisions by the International Labour Organization in Spanish and Portuguese;

Considering finally that the use of the Spanish language has become an established practice of the International Labour Organization and that Portuguese has been used for several official publications of the Organization;

The Conference requests the Governing Body to consider the possibility of making Spanish and Portuguese official languages of the International Labour Organization and to submit to the next General Session of the Conference any necessary amendments of the Standing Orders of the Conference and of its Committees.

ANNEX 34—Resolution Concerning the Membership of Certain American States in the International Labour Organization

The International Labour Conference

expresses its great satisfaction that Nicaragua and Paraguay are represented at the Twenty-sixth Session of the Conference by Observers;

requests the Governing Body of the International Labour Office to consider, in consultation with those States, as well as other States of the American continent which are not at present Members of the Organization, how the resumption of active membership of the Organization by all of the States of the American continent could best be achieved; and

expresses the earnest hope that all the States of the American Continent will be represented at the next session of the International Labour Conference as Members of the Organization.

ANNEX 35—Resolution Concerning Atrocities in the Occupied Countries of Europe

Whereas the Declaration concerning the aims and purposes of the International Labour Organization, adopted by the Twenty-sixth Session of the International Labour Conference includes the reaffirmation of the following fundamental principle on which the Organization is based;

"that all human beings irrespective of race, creed or sex have the right to pursue both their material well-being and their spiritual development under conditions of freedom and dignity";

Whereas Nazi Germany and its satellites are continuing the criminal persecutions of all Axis-occupied countries, aiming particularly at annihilation of the Jews of Europe;

Whereas especially in occupied Poland mass murder of populations is being committed on a scale hitherto unknown in modern history;

The International Labour Conference adopts the following resolution:

The General Conference of the International Labour Organization, convened at its Twenty-sixth Session at Philadelphia, on 12 May, 1944,

1. protests against Nazi crimes which violate the fundamental principles of humanity and of international law;
2. welcomes
   the statement on atrocities signed by President Roosevelt, Prime Minister Churchill and Premier Stalin, announced on November 1, 1943, following the Three Power Conference in Moscow,
   and the Joint Declaration against extermination of the Jewish people announced on December 17, 1942, in London, Moscow and Washington by the Governments of Belgium, Czechoslovakia, Greece, Luxem-

burg, the Netherlands, Norway, Poland, the United States of America, the United Kingdom of Great Britain and Northern Ireland, the Union of Socialist Soviet Republics and Yugoslavia, and the French National Committee;

and expresses its firm conviction that all guilty of such crimes must be tried and punished;

3. requests that the United Nations take immediately all possible steps to stop mass slaughter of the population of the occupied countries of Europe;
4. expresses its deepest sympathy for all victims of Nazi terror including the defenders of the Ghettos of Warsaw and other cities and its great admiration for the underground fighters of all occupied countries who have been fighting and dying together for the common cause of the United Nations.

ANNEX 36—Declaration by the Delegations of the Occupied Countries of Europe

The delegates of the occupied countries of Europe represented at the Philadelphia Conference—that is, Belgium, Czechoslovakia, France, Greece, Luxemburg, the Netherlands, Norway, Poland, and Yugoslavia,

Having taken note of the declaration concerning the aims and purposes of the International Labour Organization, the resolution concerning social provisions in the peace settlement, and the resolution concerning economic policies for the attainment of social objectives,

Consider it to be their duty to state their views on the special problems of the economic, financial and social reconstruction of the countries of Europe, once they have been liberated.

I

They desire to stress their complete agreement with the principles and social objectives that should prevail in the reorganization of the world after the war, as set forth in the draft of the fundamental declaration and in the resolution before the Conference. In particular, they express their complete conviction that their respective countries will keep these principles and objectives closely in view in their economic policy, and will set as their essential aims the achievement of full employment, rising standards of living for the peoples, and social security. The social ideal that is their goal is thus the same as that which inspires all the members of the Conference, and they will devote all their efforts to its speedy realization.

II

Unfortunately, by reason of the loss and destruction caused by the war, and of the systematic persecution, devastation and pillage resulting directly from the actions of the invader, the situation of the occupied countries at the actual moment of liberation will be one bristling with difficulties.

The problem will not merely be how to transform a war economy into a peace economy, but, rather, how to provide for full-scale reconstruction in both the economic and the social fields, and the very conditions in which this work of almost total reconstruction must be undertaken will in themselves be particularly difficult.

We shall deliberately confine ourselves here to the economic and social fields. But we would briefly note that before all else, we must reconstruct the free political institutions that our countries formerly enjoyed, and amongst them all those based on the right of free association.

Without claiming to paint a complete picture here of the tragic situation in which the liberated countries will find themselves, we wish, however, to draw attention to certain aspects of the problems that they will have to face.

(*a*) Famine, privation of all kinds, isolation, imprisonments, deportations, executions—these are the marks that the long years of occupation will leave; the population as a whole will be greatly weakened. Many of the prisoners, the deported and the refugees will return home with their health undermined. The ground will be prepared for the spread of epidemics. The first task, and the most urgent, will be to improve nutrition, to provide medical aid and to distribute medicaments.

It seems to all of us highly desirable that, beginning now, and with a view to safeguarding the future of the race, medical supplies and vitamins intended for the children in occupied countries should be assembled for delivery to them, if possible immediately, and, in any case, as soon as delivery could be made without the enemy's obtaining any benefit therefrom.

(*b*) Stocks are completely exhausted. We shall find these countries emptied of their substance. For a long time the essential needs of their populations will far exceed the available quantities of consumption goods.

(*c*) The wear-and-tear on machines and materials, the exhaustion of reserves, the complete destruction of means of communication and transport, confiscations of all kinds, chaos in finance, currency and movable property, all the destruction of buildings, factories, mines and electric power stations due to the campaigns of invasion and to the deliberate policy of the invader faced with indomitable resistance—to all these will be added still further devastation in the course of the campaign of liberation. Under such conditions, the immediate possibilities of the production of goods will be considerably reduced.

(*d*) Until the emergence of order out of chaos and the restoration of equilibrium between needs and means, as regards both capital goods and consumption goods, the Governments of the liberated countries will doubtless find themselves compelled to maintain or to introduce economic controls similar to those that the United Nations have had to impose on themselves to meet war needs.

(*e*) The dislocation of the entire machinery of production and distribution—including the loss of foreign markets—will of course involve for some considerable time a marked shrinkage of the labour market. Here there is a serious risk of extensive unemployment.

And that is just the very time when the repatriated, the demobilized and the members of the resistance organizations will have to be reincorporated in economic life.

An immense effort will thus have to be made to avoid unemployment on a large scale. A whole series of special provisional measures will doubtless be required pending a gradual return to less abnormal conditions.

III

The sooner these efforts of economic reconstruction are successful, the sooner will it be possible to achieve the social objectives defined by the Conference.

The liberated countries are minded to undertake themselves, by their own efforts and under their own responsibility, the great work of national reconstruction which will require gigantic efforts in the fields of labour and finance, but they are aware of the parallel need for a concerted effort in the international domain. In this general effort, they will actively participate. They are justified in counting upon the full collaboration of countries less impoverished than they.

They are convinced that the international solidarity forged between the United Nations during the war will continue during the peace, and that the countries that have known neither occupation nor devastation will wish to give them priority in the supply of the essential consumption and capital goods required for their economic and social restoration.

The rapid restoration of the producing and consuming capacity of Europe is, moreover, indispensable to the return of the prosperity of the other countries of the world, and more especially to the prosperity of the great producers of raw materials, industrial products and agricultural produce.

In the general interest, international solidarity must be established both in the economic domain and in the financial domain with a view to the complete and speedy reconstruction of the occupied and devastated countries. To the United Nations falls the task of finding and applying the necessary measures for an equitable distribution of the costs of reconstruction after the war.

IV

Another danger threatens the occupied countries at the present time. The enemy, on the eve of his retreat or rout may resort to the last extreme excesses in destroying without discrimination both life and wealth. In certain regions this threat has already materialized. The more extensive the destruction, the more difficult will be the reconstruction and the longer will the achievement of social conditions worthy of the resolutions of this Conference be delayed. A last warning to the invaders informing them categorically that the authors of such excesses will answer for them personally with their heads and with their property might lessen the danger that threatens. In the circumstances, such warning should be given without delay and with the high moral authority of all the nations gathered together at this Conference.

V

The peoples of Europe, at this moment bent under the yoke of the invader, will find in the solicitude of the Conference for their own special problems a measure of comfort and a guarantee that the effective organizations of international solidarity will help them after the war to efface the marks of the tragedy that has weighed them down through these years of hardship.

ANNEX 37—Resolution Concerning the Declaration by the Delegations of the Occupied Countries of Europe

The Conference having taken note of the Declaration made on behalf of the occupied countries:

(1) expresses the conviction that the heroic resistance of the occupied countries is one of the essential factors in the struggle of the United Nations against the common enemy;

(2) shares the preoccupations, anxieties and wishes expressed by the representatives of the occupied countries concerning the special difficulties with which they are confronted in their economic and social reconstruction;

(3) welcomes the decisions already taken by the United Nations to heal the wounds caused by the war;

(4) expresses the hope that the United Nations and the other members of the Conference will unite their efforts to promote in every way the economic and social recovery of all the countries sorely tried by enemy occupation and by the devastation due to the war;

(5) asserts the determination of the International Labour Organization to associate its endeavours with the concerted will of the oppressed nations for the purpose of rebuilding their social life according to principles of international solidarity and respect for the fundamental spiritual and human values.

WAGES IN THE PRIMARY TEXTILES INDUSTRY IN CANADA, 1943

The statistics of wages and hours printed in this supplement to the LABOUR GAZETTE are the result of a co-operative arrangement by the National War Labour Board, the Department of Labour (Research and Statistics Branch), and the Primary Textiles Institute, under which the necessary information could be obtained without duplication of effort.

Previous statistics of wage rates in the textile industry have been published in a series of annual supplements to the LABOUR GAZETTE which contained statistics of wages and hours for the principal industries in Canada. The four divisions of the Primary Textiles Industry covered, were: Cotton Yarn and Cloth; Woollen Yarn and Cloth; Knitted Goods, including Hosiery; and Silk Yarn and Fabrics (now Rayon). Wage rates were shown for the main occupations as reported to the Department by each of a representative number of employers but the identity of the employers or firms was not revealed. Averages of the rates for each occupation were not calculated for Canada as a whole or by regions. The last of these supplements to be published was Report No. 25, applying to the year 1941 and certain previous years, issued in 1942.

The coverage of the industry represented in the following tables is much more complete than was the case in any previous survey for which statistics have been published. Formerly only a representative list of firms was requested to report but in the survey, the results of which are published here, practically all firms in the industry were circularized.

Most of the wage earners in the textile industry are paid on a piece rate basis but information on both time and piece workers is included in this report. Information is not included for foremen and supervisors, learners and beginners, aged and handicapped workers, nor for part-time workers. This is the same practice as was followed in previous reports of the Department on wages and hours.

The tables which follow are arranged in this order: the first four apply to Canada as a whole and give wage data for the four main divisions of the Primary Textiles Industry, namely, Cotton Yarn and Cloth, Woollen Yarn and Cloth, Knitting, and Rayon; the tables for Canada are followed by thirteen tables showing certain data for each of the four divisions of the industry by province or region.

In the four tables for Canada the average straight time wages or earnings per hour are shown for all qualified employees in each of the selected occupations on day work only. The figures include the cost-of-living bonus but do not include any overtime premium earnings. Data for male and female workers are shown separately. In addition, ranges of hourly wages are shown which include the middle 60 per cent of the workers in any of the occupations covered in which 30 or more workers were employed. That is, 20 per cent of the workers in each of these occupations received more than the higher figure in the range and 20 per cent received less than the lower figure.

Except for these ranges, the information in the regional tables is the same as in the tables for Canada with the addition of two columns—one giving the number of day workers in each of the occupations listed, the other showing the average hours actually worked per week by these employees during the pay period covered, that is, the period ending November 30, 1943. The tables for the Woollen Yarn and Cloth Industry and for the Knitting Industry give the above data for each of four regions, namely, the Maritime Provinces, Quebec, Ontario and the Western Provinces; the table for the Cotton Yarn and Cloth Industry gives similar data for the Maritime Provinces, Quebec and Ontario, and that for the Rayon Industry shows these figures for Quebec and Ontario only, the industry being concentrated in these two provinces.
